

Five Ways to Thrive: Business Imperatives for Manufacturing in a Dynamic World

Douglas Bellin

Industry Lead

July 17, 2009

Agenda

Challenges in this Dynamic Economy

Imperatives on Which to Focus

Offerings to Help You

How to Get Started

Questions and Open Discussion

What keeps Manufacturing Executives up at night?

**Optimizing Productivity
around the Globe**

**Developing More
Resilient Supply Chains**

**Fostering Product
Innovation**

**Achieving Greater, Longer-
Lasting Customer Relevancy**

... Events like The Global Financial Crisis:

Manufacturing Demand & Production Worldwide now at Recessionary Levels

Business Imperatives

Five Critical Steps to Thrive

Save to Invest...

... so that you can free human and capital resources to ...

Unlock Employee Potential...

... by investing in tools and processes that improve leadership and employee effectiveness, innovation, and motivation, allowing them to ...

Drive True Customer Intimacy...

...by getting closer to key customers, driving loyalty and increased wallet share, and truly understanding and meeting customer needs, which will enable you to ...

Outpace Your Competition...

... by increasing speed and scaling faster, focusing on strategic initiatives that harness the capabilities of new technology-enabled business models, so that you can ...

Transition to a Borderless Enterprise...

... where you can capitalize on the full potential of your global eco-system, to optimize profitability for you and them in a cost-effective, timely manner

Business Imperatives

Principles to Adopt

Save to Invest

- Intelligently reduce costs to fund investments for improvement
- Focus on profitability and capital efficiency

Unlock Employee Potential

- Augment process with collaborative solutions
- Harness the collaborative power of all employees for process efficiencies and effectiveness
- Nurture key employees; focus on motivation and morale

Drive True Customer Intimacy

- Get closer to your most important customers
- Embrace customers in your decision making
- Help your customers get closer to theirs

Outpace Your Competition

- Align the business on strategic initiatives, the vital few
- Invest to gain share and pull away from competition
- Create business velocity: speed and scale

Transition to a Borderless Enterprise

- Make full use of your global business ecosystem for greater effect, better results
- Include all stakeholders in ideation, improvement, and expansion

Addressing the Imperatives Requires Change at All Levels

Save to Invest

R&D

Increase distributed design team collaboration while reducing travel.

Supply Chain

Reduce supply chain waste with faster escalation of critical events.

Production

Improve efficiency of people and equipment through integration of unified communications with MES and ERP systems.

Sales and Service

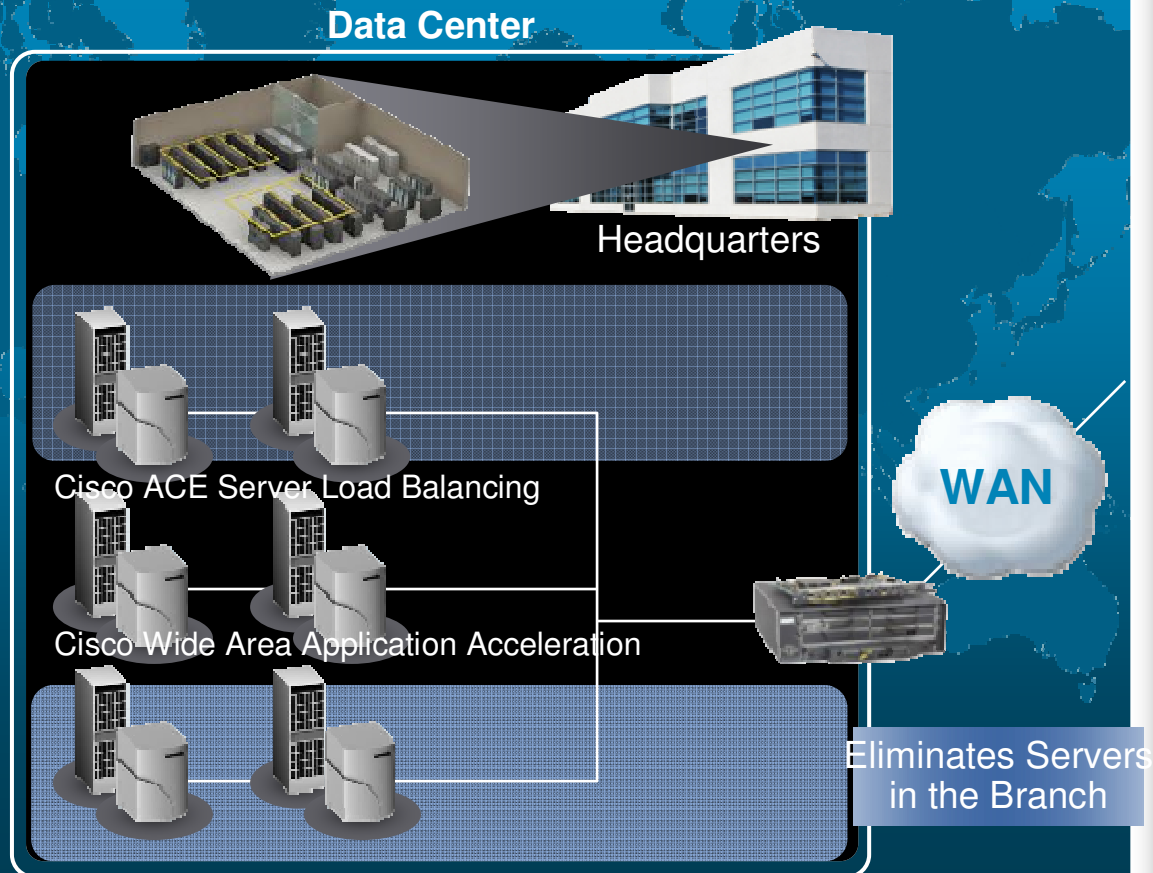

Reduce on-boarding and training costs for sales and service representatives.

Culture

Process

Technology

Centralizing Branch Office Servers to Reduce Operating Costs and Streamline Management

“We are saving over three terabytes of network traffic per month in application traffic alone through Cisco WAAS. We estimate that we will be over four terabytes in network traffic savings by the end of the year.”

Brent Wolfram

Lead Architect for Enterprise Infrastructure
LaFarge North America

Benefits

Centralized, scalable storage in the Data Center
WAN optimization to eliminate branch server footprint

Result

>\$700,000USD annual operating expense reduction
Streamlined IT management of storage now and into the future

Unlock Employee Potential

R&D

Integrate collaboration tools with Product Lifecycle Management (PLM) applications to accelerate design workflows.

Supply Chain

Speed supplier problem resolution, without travel downtime, using rich-media collaboration tools.

Production

Connect the plant floor to technical experts to reduce downtime.

Sales and Service

Improve customer experience with agents' access to pertinent customer information anywhere, anytime.

Culture

Process

Technology

Increase Engineering Productivity with Faster, More Collaborative Design Changes

Improved Productivity Optimizes Design Changes for Manufacturers Through Faster, More Collaborative Processes that Reduce Cycle Time, Minimize Data Errors, Connect Appropriate Skill Sets, and Provide a Recorded Audit Trail.

9 a.m. EST: Designer Writes Change Description

Designer

PLM Converts Text to Speech and Calls Engineer

Engineer

- Engineer receives call
- Accesses design data on PDA
- Reviews proposed design change

Approvers Are Contacted for Web Conference

Team reviews change to 3D design and suggests improvements
Team collaborates on changes until satisfied
Team reviews and approves final design
Design change approved at 1p.m. EST

Drive True Customer Intimacy

R&D

Include customers in your innovation process using virtual workspaces.

Supply Chain

Speed response to order fulfillment delays using collaboration-directed automated notifications.

Production

Faster collaboration between sales and production encourages greater customer responsiveness.

Sales and Service

Speed customer concern resolution by connecting with the right expertise the first time.

Culture

Process

Technology

Engaging Customers with Executives and Experts Using Cisco TelePresence

SAP

“We will take collaboration to the next level by overcoming geographical barriers and enabling employees, customers and partners to work together more effectively.”

Uwe Herold
CIO, SAP AG

Benefits

Faster Decision Making with Internal Experts
Operational Efficiency

Result

Speeding Product Development
Optimizing Customer Engagement

Outpace Your Competition

R&D

Speed innovation and time to market through transparent collaboration between distributed design and manufacturing teams.

Supply Chain

Create collaborative communities of suppliers and partners to achieve supply chain agility.

Production

Build advantaged cost structures by eliminating labor and process inefficiencies.

Sales and Service

Take full advantage of executives and subject matter experts to reach more customers.

Culture

Process

Technology

Accelerating Plant-Floor Problem Resolution with Video Collaboration

- Technical problem on plant floor needs R&D team to be brought in
- Plant supervisor calls relevant R&D and manufacturing team members using Wi-Fi IP phone

- Engineer initiates conversation with R&D team
- Better visibility into problem is achieved by escalating meeting to desktop video conference on factory floor

- Singapore, California, and China collaborate quickly to resolve complex problems
- Pending concerns are resolved in weekly problem status meetings held through a Cisco TelePresence™ conference

Business Value

- One–two week reduction in ~2.5 month prototype implementation process
- Potential savings of \$2 to 3M per major project
- \$35 to 50M in incremental margins from four–six-week reduction in overall time to market for new products through enhanced collaboration throughout design process

Transition to a Borderless Enterprise

A Globally Connected and Aligned Ecosystem...

That Innovates and Executes Faster and More Effectively...

To Differentiate Your Business Through Collaboration with Video ...

On Any Device, Anytime, Anywhere, and with Anyone...

Because the Network Is the Platform...

Connected Manufacturing

The Network is the Platform

Customer Intimacy

- Enhance collaboration and integrated service with a networked channel, sales, production, supply chain, and R&D

Continuous Innovation

- Speed time to market, increase product pipeline success rate, and improve new product vitality
- Reduce R&D costs with enhanced collaboration between customers, engineering, manufacturing, sales, and channel

Supply Chain Agility

- Provide one source of truth across the manufacturing enterprise chain of supply and production
- Secure, real-time, multitier visibility enables root-cause responsiveness with the right information to the right decision maker at the right time

Operations Excellence

- Secure real-time access through converged IT, control, and wireless networks enhances plant efficiency, throughput, safety, physical security, and return on assets

Customer Intimacy

Creating Ubiquitous Customer Connections

Remote Design Center

Identify the Right Products and Features to Satisfy Customers and Maximize ROI Through Better Application Performance.

Sales Office or Service Center

Increase Customer Satisfaction with Improved Responsiveness to Customers Through Faster Application Deployment to Sales and Service Centers.

Manufacturing or Warehouse

View Real-Time Parts and Inventory Availability to Respond Immediately to Customer Queries Through Improved Application Networking.

Data Center

Example Solution: Customer Service Resolution with WebEx

Improves Customer Satisfaction by Reducing Service Resolution Time by Hours, sometimes Days, Eliminates Most Customer Service Related Travel Costs using Secure Remote Access, and Dramatically Enhances Service Technician Productivity and Reduces Wear-and-Tear.

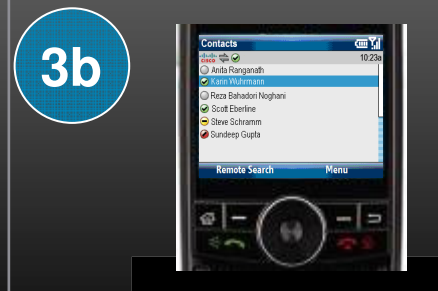

- Customer with service issue calls
- Skills based routing by UC CM to right, available technician

- WebEx to view and take control of customer PC used to operate equipment

- Issue resolved without travel time and costs

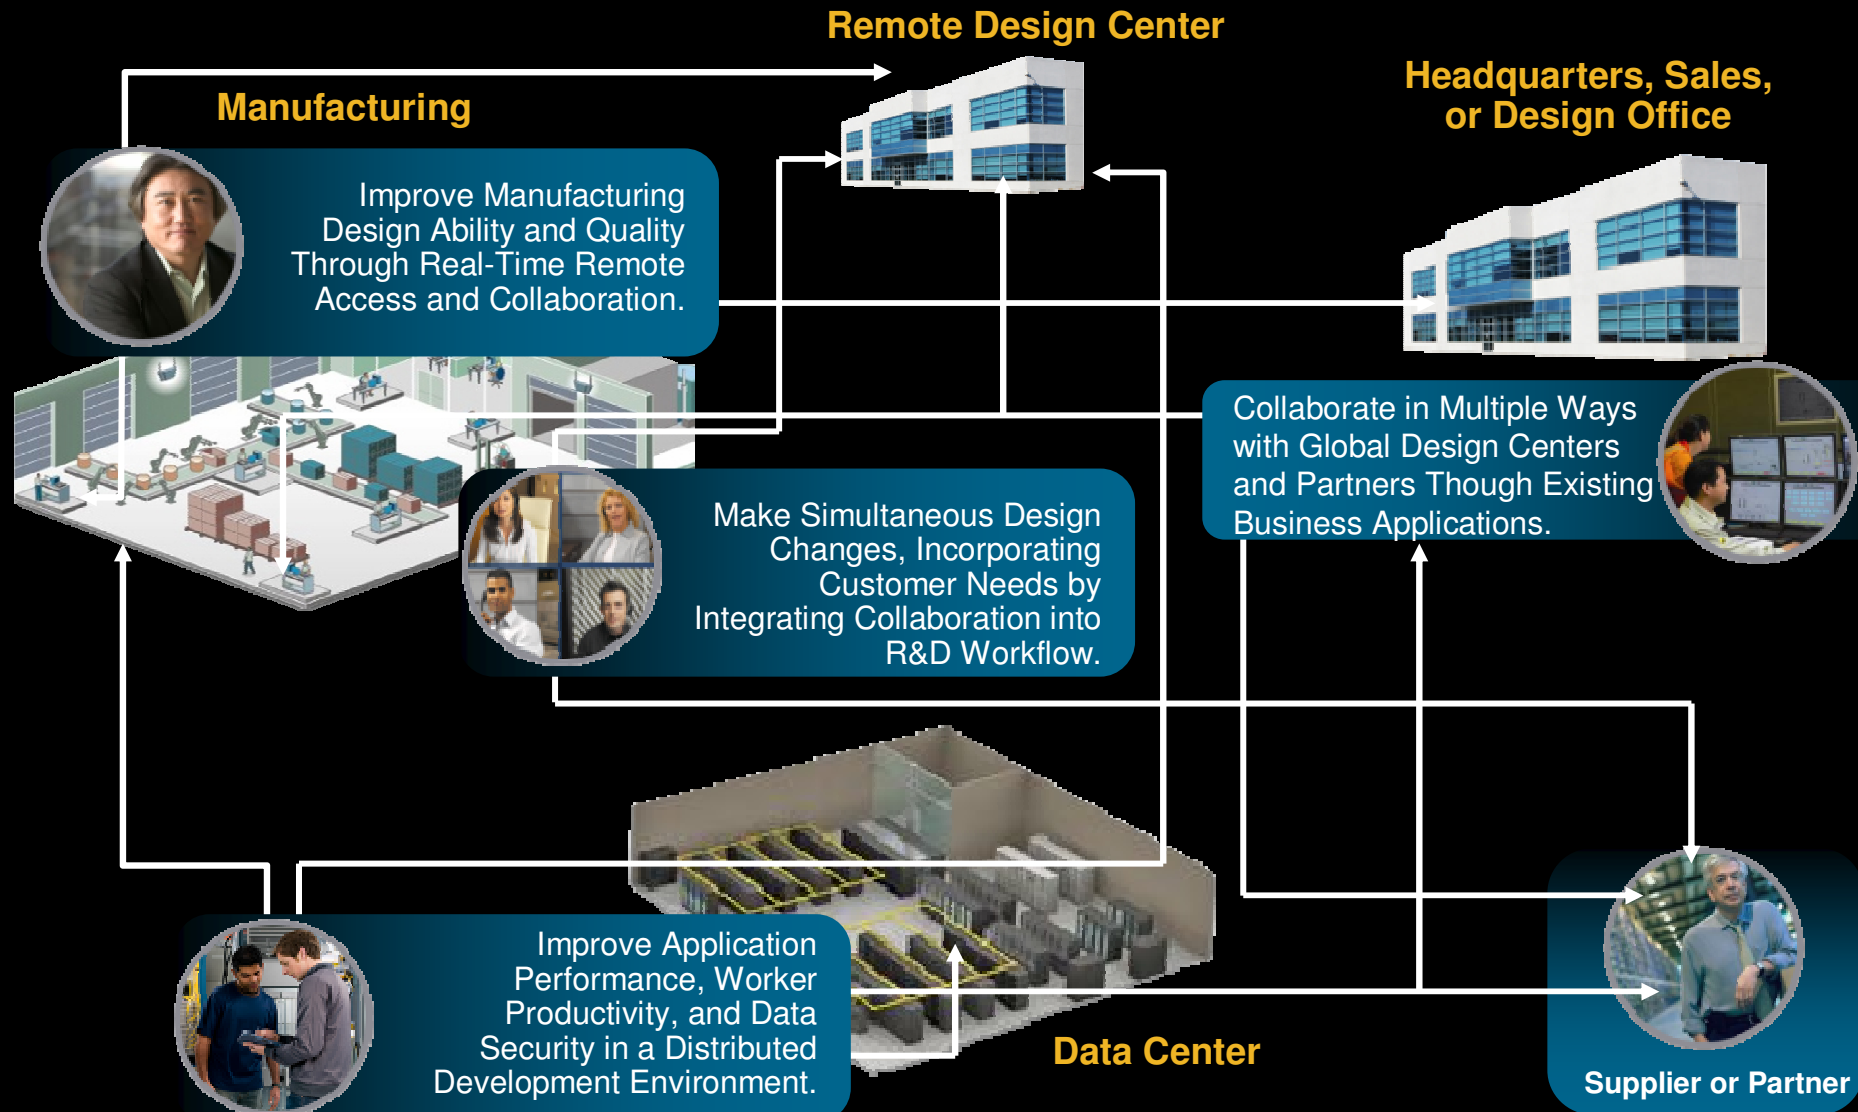

- For tougher issues requiring site visits; presence on mobile phone to connect to "available" remote experts globally

Continuous Innovation

Enhanced Collaboration Yielding Speed to Market and Engineering Productivity

Example Solution: Collaborative Research and Development

Provides Manufacturing Designers and Engineers with Real-Time Collaboration Which Accelerates Time to Market, Improves the Quality of Collaboration, Gains Efficiency Through Reduced Travel, all in a Secure Environment.

Main Design Center TelePresence

Engineer

Supply Partner TelePresence

Partner

DCV allows active CAD virtualization, collaboration on CAD model and live designer interaction, while full dataset remains secure

Remote Design Center

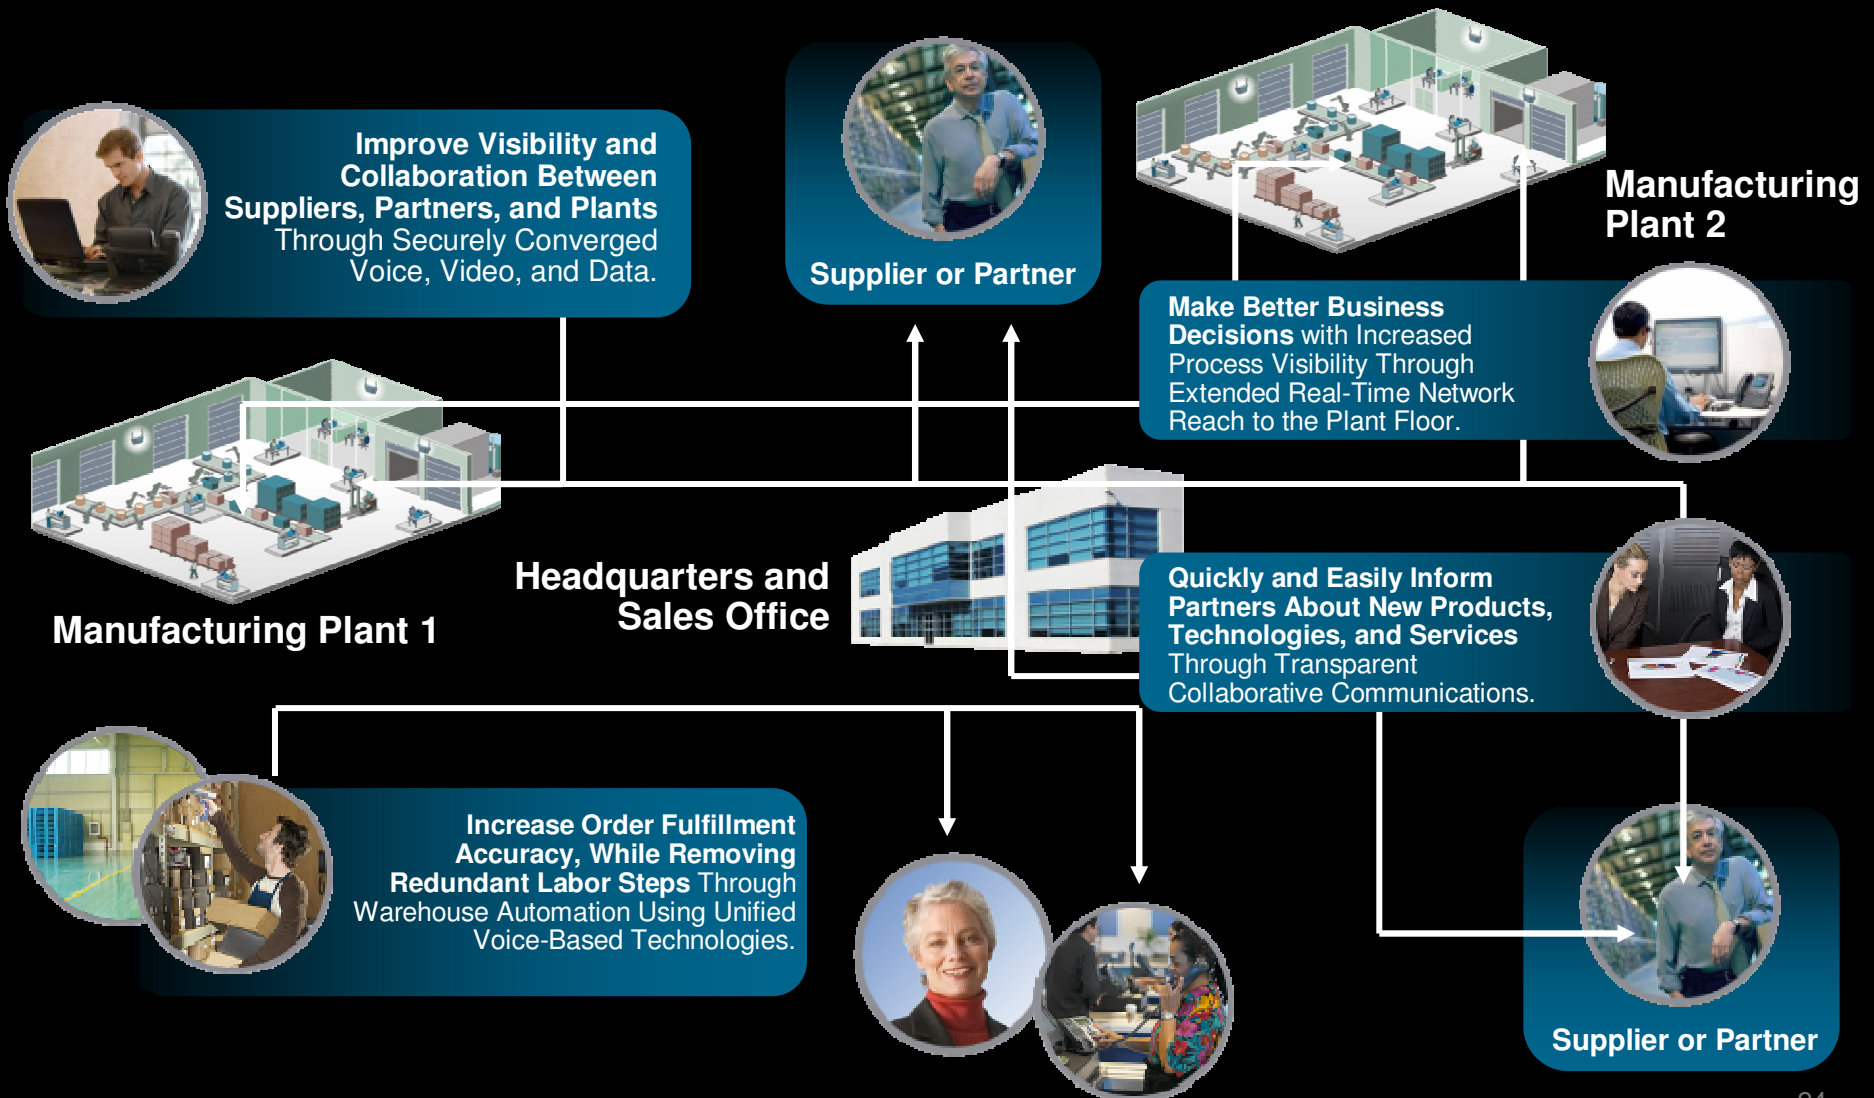

Data Center

Supply Chain Agility

Visibility and Collaboration Enabling New Levels of Agility Across the Supply Chain

Example Solution: Warehouse Workflow and Error Proofing

Provides an Open-standards, Affordable Warehouse Voice Solution to Increase Order Accuracy, Reduce Redundant Labor Steps, and Improve the Work Environment and Worker Productivity.

Manufacturer Warehouse

- Increased order accuracy to >99.8%
- Delivery time reduced 80% (60 to 10 minutes)
- Measurable ROI in six to nine months

Manufacturer Call Center

to speech

Distributor orders product

Operations Excellence

Enhance Plant Efficiency, Throughput, Safety, Security and Return on Assets

Improve Plant Safety and Worker Productivity by Adding Wireless Sensor Network and Plant Productivity Applications Through Secure Wireless Outdoor Mesh Networking.

Improve Employee Safety and Plant Security Through Wireless Video Monitoring.

Achieve Faster Resolution of Concerns and Minimize Downtime-Related Problems with Immediate Collaboration Technologies.

Improve Communications Between Plant Workers to Avoid Production Losses Through Voice over Wireless LAN.

Increase Manufacturing Visibility by Tracking Inventory, Equipment, and People Through Location-Based Services.

Gain Visibility for Real-Time Decision Making with Collaboration for Monitoring and Control Through Integrated Production and Enterprise Networks.

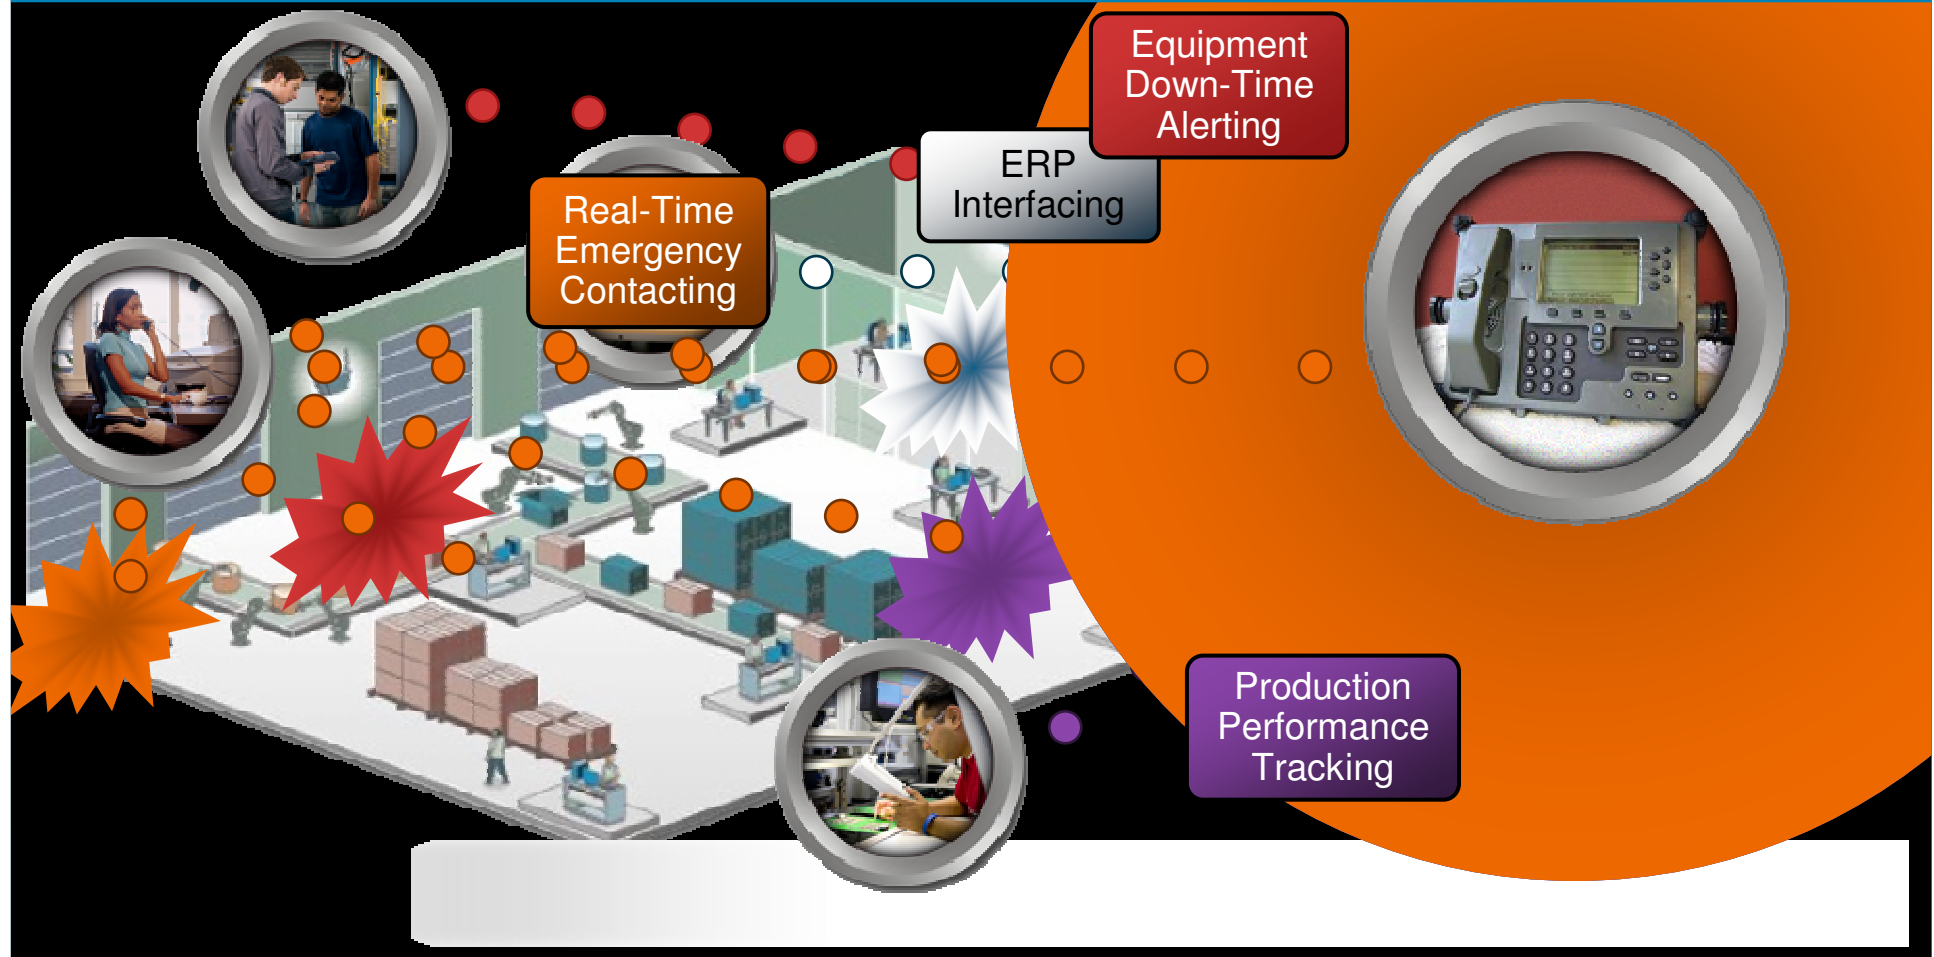

Headquarters and Sales Office

Supplier or Partner

Example Solution: Connected Factory Floor

Unleashes Hidden Productivity and Transforms Performance Improvement Initiatives Like Lean by Leveraging Advanced Communications and Enhances Worker Throughput by Converting Routine and Tedious Data and Communications Tasks to Productive Manufacturing Time.

Cisco's Commitment to Manufacturing

Proven Solutions

- Deep domain expertise inside Cisco
- Proven solutions for the shop floor to the top floor
- Industry-leading partnerships

Customer Benefits

- Deeper, wider in-context collaboration across the enterprise
- More competitive position with improved efficiency, quality, cost controls, and customer responsiveness
