

Nguyen Duy Phu

APC Technical Manager of Data Center Solutions

Nguyen Duy Phu joined American Power Conversion since 2007 as Data Center Infrastructure Designer where he brought with him, his technical expertise in facility management for data centers, call centers and server rooms, to the company.

In his capacity, he works closely with the local sales team and partners in designing and coordinating total end-to-end turnkey solutions for data centers according to customers' needs and requirements, training and certifying resellers and partners on data center design & requirements, conducting vulnerability audits on the network critical physical infrastructure of the data centers within companies.

Phu has been involved in several medium to large data center projects in Vietnam, including major turnkey projects such as PPF Finance.

Phu graduated with honor degree in Electrical Engineering from School of Information Technology & Engineering, University of Ottawa, Canada.
