

Joy Miller's Story

An unemployed single mother found a well-paying job after earning her networking certificate.

Joy Miller

My name is Joy Miller. I work for Lab Corporation of America. I received my Cisco CCNA, and from there I went into the job field and received an internship. I'm an example of what the Cisco networking program can do. I see how important the Cisco certifications are.

Going from low-income, actually no job, three children, on my own, living with a friend, to having my own house, being able to support my children. I would not be here today if it wasn't for Cisco Networking Academy. It's very important. It's what employers look for: the certification.

As long as you put your heart and devotion in your work, into something that you want, you're going to be able to succeed. And as long as you have the drive and the ambition, you can achieve anything that you want.
