

Jon Stine

Director, Retail/Consumer Packaged Goods Practice Internet Business Solutions Group

Jon Stine is a director of the Cisco Internet Business Solutions Group (IBSG), Retail and Consumer Packaged Goods (CPG) practice and is well-known within the industry as a catalyst for technology-enabled business transformation.

Prior to joining Cisco, Stine formed and developed the worldwide Retail-Consumer Products-Logistics industry solutions group for Intel Corporation, leading Intel to the forefront of industry technology providers. Within those six-plus years, Intel was a founding and ongoing Platinum Partner of the Metro Group Future Store Initiative, established global technology leadership in the POS and RFID reader markets, developed and implemented EPC-RFID solution and project development best methods, and initiated the multicompany Pan-Pearl River Delta Initiative, which has created operative RFID-enabled global supply chain solutions for leading retailers and their China-based suppliers.

Prior to Intel, Stine held senior executive positions in the U.S. consumer products industry, with responsibilities ranging from major account sales and field sales management to inventory control, production planning, marketing, and IT-driven vendor collaboration.

A popular speaker on industry trends, issues, and solutions, Stine also serves on several industry technology advisory boards. He has a degree from Indiana University and the University of Oregon.
