

PCI Compliance Financing Solution from Cisco Capital

Cisco Capital – access to the right technology at the right time

Cisco Systems Inc., the world's largest supplier of networking solutions is the ultimate parent company of the Cisco CapitalSM group of companies. We, at Cisco Capital, have been providing our customers with flexible and innovative finance programs for over ten years to help them acquire the solutions they need, when they need them. And because we use our own resources to finance all customer transactions we avoid the extra costs involved with obtaining funds from external financial organisations.

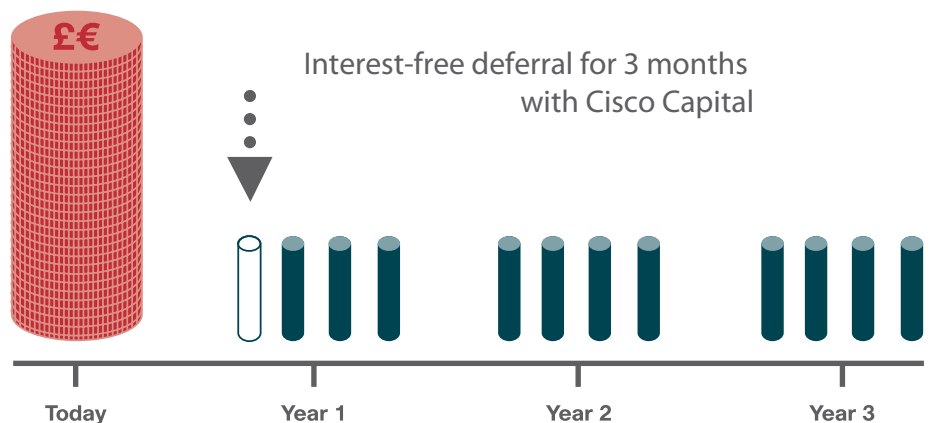

If your business stores, processes, or transmits credit card data, it needs to adhere to the PCI Data Security Standard. Designed to protect payment card and merchant data, this standard requires all companies that process credit card transactions to establish adequate controls to protect cardholder data, and to audit their networks, policies, and processes. The Payment Card Industry Data Security Standard affects all types of businesses that process credit card transactions.

Investment in the Cisco PCI validated architectures with a flexible financing proposal from Cisco Capital could help you meet the standard's requirements in time for the recommended deadline of 31 December 2008.

Defer payments for three months, interest free

Solve potential budget issues by deferring your initial finance payment on relevant Cisco technology for three months without paying interest. After that, you simply pay a fixed monthly amount for 36 months.

Cost to purchase technology BUT no budget remaining

“The result is immediate access to technology so that you benefit now.”

Don't let restrictions, such as cash flow worries and budget limitations, prevent your business meeting the deadline. Our innovative and flexible financing solutions can help you to spread the cost of equipment over time, smooth out budgetary issues and free up capital for other purposes so that you don't have to delay placing orders for the equipment you need.

The PCI Compliance finance solution from Cisco Capital allows you to defer your initial finance payment on relevant Cisco PCI validated technology solutions for three months without paying interest and solve potential budget issues. After that, you simply pay a fixed monthly amount for 36 months.

Get the Cisco Capital Advantage

In addition to this flexibility, Cisco Capital gives you more benefits:

1 Value for money

With our highly competitive interest rates and market-leading residual values, our financing initiatives enable us to provide you with the lowest possible cost of ownership.

2 Cash flow management

Our finance options remove the need for large initial capital investment and allow you to align costs more effectively. Our fixed payments for the term of the contract simplify your budget management and allow you to plan ahead.

3 Added flexibility

We will also finance Cisco hardware along with intangible assets such as software and services, offering you flexible payment periods for the complete solution that suit you.*

4 Technology refresh

The financing provides you upgrade flexibility with options to add to or refresh your network and meet your business requirements.

5 End of lease flexibility

At the end of term you have a number of options: return the equipment; purchase the equipment at Fair Market Value or extend the agreement.

6 Focus on your business - not on equipment ownership and disposal

As equipment returned to Cisco Capital will always be dealt with either through our Cisco Refurbishment program or with strict accordance to the WEEE Directive, our finance programs remove your compliance and process burdens associated with IT asset disposal so that you can focus on your key objectives - to manage, grow and develop your business.
