

All Academy Day: Component Identification Event Rules

Object of the game

As a team, correctly identify and document each computer component within the allotted time.

Playing the game

- The members of the team can help each other. No one else is permitted to assist the teams.
- Each team selects a team captain and a team recorder for the event.
 - In case the team is split or undecided on a component, the captain will cast the deciding vote.
 - The recorder, a teammate with legible handwriting, enters the team's response in the student tracking sheet.
- Each team will receive a printout of the rules of the game and a clipboard with a tracking sheet on which to identify and record the computer components.
 - The last two columns of the tracking sheet are reserved for judges. Teams should leave these columns blank.
- Each team moves to component number one and waits for the judge's signal to begin.
- At the judge's signal, each team uncovers the component to be identified. The teams then have 90 seconds to identify the item and document their findings on the tracking sheet.
- The judge lets the teams know when there are 15 seconds remaining in the rotation.
- When time is up for the first component, the judge will direct the teams to cover the first component and then move on to the second component to be identified.
- This process continues, with the judge directing the teams, until all the components in the rotation have been examined.

Earning points

Five points are awarded to the team for each component correctly identified.

Bonus

A 10-point bonus will be awarded to teams that correctly identify all the components.
