

Cisco Networking Academy: Nebraska Profile

Cisco® Networking Academy® is playing a critical role in the U.S. economic recovery by preparing students for the sustainable jobs that government, education and industry all agree will fuel America's ability to innovate and compete, not just today but in the future. As the focus turns to infrastructure, Networking Academy provides students with critical IT and networking skills to design, build, and maintain the infrastructure highway that both the public and private sector now depend on for sustainability.

The new Obama administration clearly recognizes the importance that technology plays in preparing students to compete in a 21st century global economy. In a speech on January 8, 2009, at Virginia's George Mason University, President Obama highlighted the current science and technology skills gap in the United States and the urgent need to address it:

“To give our children the chance to live out their dreams in a world that’s never been more competitive, we will equip tens of thousands of schools, community colleges, and public universities with 21st century classrooms, labs, and libraries. We’ll provide new computers, new technology, and new training for teachers, so that students in Chicago and Boston can compete with kids in Beijing for the high-tech, high-wage jobs of the future.”

Cisco Networking Academy is a proven model for delivering 21st century learning because it delivers:

- rigorous and interactive curricula licensed at no cost to nonprofit educational institutions
- an e-learning platform that supports different learning styles
- web-based content available to students 24/7
- online assessments
- student performance tracking
- hands-on labs
- instructor training and support

Networking Academy is a unique public-private partnership between educational institutions, national, state and local government, and community-based organizations, currently educating more than 128,000 students in over 2,200 U.S. educational institutions.

As an education solution, Networking Academy encourages seamless educational pathways between secondary and post-secondary institutions by using curricula aligned to national and state education standards for math, language arts, and technology and industry certifications. These courses also help students prepare to pursue degrees related to science, technology, engineering, and math (STEM). Networking Academy courses provide instructors with tools to help students make the connection between their educational experience and their careers. In the United States, academies are located in high schools, technical schools, colleges, universities, and community-based organizations.

Cisco Networking Academy provides:

- IT and networking skills mapped to high-skill, high-demand, high-wage 21st century jobs across virtually every industry
- sustainable partnerships at all levels of education, including community colleges at the forefront of workforce development and retraining

- strong alignment with high school career and technical education programs that build technical skills and create pathways for high school graduates going either directly into the workforce or on to post-secondary education
- the skilled pipeline of talent required to design, build and maintain the infrastructure needed for economic recovery

Included in each state profile are Networking Academy statistics, IT workforce projections, and student/graduate stories. These state-by-state profiles will provide you with important information about the value Cisco brings to government, education and business through delivery of IT/networking skills and knowledge. Cisco Networking Academy educates the architects of today's networked economy.

Profiles are updated annually with core content, and we will continue to add student/graduate profiles. For your convenience, the library of profiles for each state, plus the District of Columbia and the United States as a whole, are accessible at <http://www.cisco.com/go/netacadresourcecenter>.

We welcome your suggestions for future profiles. Please send any questions and feedback to our U.S. Marketing Team via Nancy Bischoff at nbischof@cisco.com.

Table 1 lists data about academies in Nebraska. Table 2 lists information about Networking Academy curricula in Nebraska, and Table 3 shows information by student education level.

For additional information about Cisco Networking Academy, visit <http://www.cisco.com/go/netacad>

Table 1. Cisco Networking Academy in Nebraska

Networking Academy students	1334
Female Networking Academy students	9% female
Distinct cumulative academy students (having successfully completed a course)	4768
Academies	29
Academy instructors	51
Total estimated cumulative contribution value to Nebraska academies*	\$3,201,301

Sources: AME/MRE FULL Package_10 31 08 Quarterly Metrics Date: Nov 13, 2008

Cumulative students are distinct; therefore, each student is only counted once.

*This estimate includes donations and discounts made to educational institutions implementing Cisco Networking Academy within Nebraska.

*Sources: AME/MRE report #3616student and instructor enrollment by year 2008.11.24_JBZ_v8.xls

Table 2. Networking Academy Curricula in Nebraska

Curriculum	All	ITE	CCNA 1, 2	CCNA 3, 4	Advanced Technologies and Other*
Number of academies by curriculum	29	55%	72%	48%	7%

The above curricula represent the core Networking Academy Academy curricula.

*Includes CCNP, Security, Wireless, Java, UNIX and Panduit Network Infrastructure Essentials (PNIE)

Academies often teach multiple curricula and may be counted more than once in this table.

Source: AME/MRE rpt #3651 as of 10.31.08 v2 Date: Dec 8, 2008

Table 3. Nebraska Academies and Students by Education Level

Education Level	Total Number	Secondary Schools	Community Colleges	Universities	Other
Nebraska Students*	1334	54%	40%	6%	0%
Nebraska Academies*	29	74%	18%	8%	0%

Sources: AME/MRE FULL Package_10 31 08 Quarterly Metrics Date: Nov 13, 2008

*For academies that self identify as more than one education level, the academies and students in this table are distributed proportionately across the education levels.

Academies represented in "Other" category include the following: community-based organizations, middle schools, the military, nontraditional educational settings, and post-graduate institutions

Active Cisco Networking Academies in Nebraska U.S. Congressional District Database

Data for this report was gathered using the U.S. Congressional District Database. This tool was developed to communicate with congressional representatives about Cisco Networking Academy implementation in their home districts. The database maps active academies by congressional district or by all districts within a state, providing academy name, city, state, and congressional district. The listing by state is updated annually.

Table 4 lists information about academies in Nebraska congressional districts.

Table 4. Networking Academies in Nebraska Congressional Districts

Cisco Networking Academy: Workforce Development in Nebraska

Cisco® Networking Academy® is ready to help U.S. workers learn critical IT and networking skills through academies located in high schools, community colleges, four-year colleges, and nontraditional settings. Developing in-demand technical skills in a timely, focused program enables students to quickly find and retain sustainable, high-paying jobs. Academy courses map to industry certifications and prepare students for technical jobs in a new, improved technical infrastructure across the nation. Even students who complete introductory courses will be prepared to work for companies that depend on a technical infrastructure for business sustainability.

“Obama’s pro-tech agenda could increase the number of technology jobs in the United States by 10 percent, adding about 300,000 high-paying IT positions.” –Katherine McGuire, VP of government relations, Business Software Alliance ¹

“Even with this economic downturn, the jobs outlook in IT for 2009 is better than that of many other industries, since IT is no longer at the peripheral of industries but at the core of their competitive edge, and IT will play a critical role in the infrastructure build out.” –David Foote, CEO of Foote Partners LLC, which analyzes IT wages and hiring data ¹

As the U.S. remains focused on economic recovery throughout 2009, there is a growing emphasis on upgrading the educational infrastructure to deliver the required knowledge and skills to build the needed technical workforce to support and maintain technology infrastructure assets and requirements. Just as the interstate highway investment created millions of construction jobs, which were then followed by maintenance and automotive jobs in the long term, so technology investments will initially create jobs necessary to design and deploy technology infrastructure, and these jobs will be followed by an array of new business opportunities.

“Investments in America’s digital infrastructure will spur significant job creation in the immediate term. An investment of \$40 billion in IT network infrastructure in 2009 will create more than 949,000 U.S. jobs, more than half of which will be in small businesses.” –Technology CEO Council press release ²

Cisco Networking Academy addresses the need for 21st century teaching and learning models that prepare students to move into the pipeline of talent needed to fill these high-skill, high-wage, high-demand careers.

“We will enable students of all ages to learn in 21st century classrooms, labs, and libraries, to help our students compete with any worker in the world.” –American Recovery and Reinvestment Plan press release ³

In a recent report, the Information Technology and Innovation Foundation “finds that investments in America’s digital infrastructure will spur significant job creation in the short run. Specifically, ITIF estimates that an additional investment of \$30 billion in America’s IT network infrastructure in 2009 will create approximately 949,000 U.S. jobs.” ⁴

Nebraska Student and Graduate Profile

When Mobius Communications Company, a high-speed Internet service provider for businesses and homes throughout western Nebraska, contacted Hemingford High School looking for a part-time employee, Cisco® Networking Academy® instructors knew Stephen Stewart would be an excellent fit for their company.

In 2002 Stephen, then a freshman at Hemingford High school, was given the opportunity to tour Mobius’ facilities and interview with the general manager. This ultimately led him to a position as an information systems technician.

Stephen became interested in technology at an early age when he installed a simple Ethernet network in his home with a hub and two computers. His curiosity led him to seek out a rigorous, technology-oriented class: Cisco Networking Academy.

In 2003, Stephen began the Cisco Certified Network Associate (CCNA®) courses at Hemingford High School. He says “the hands-on laboratory assignments meshed well with the textbook theory to make the materials and concepts understandable and fun.”

In addition to his studies at Hemingford, Stephen also worked part time at Mobius Communications. “Utilizing techniques, concepts, and protocols gained from four semesters of Networking Academy CCNA training, I’ve helped my company’s networks become more efficient, reliable, and cost-effective. I have found the fundamental knowledge of IP subnetting, TCP/IP, the OSI reference model, routing protocols, and VLANs very helpful in making our cross-platform technology reach its potential.”

“Utilizing techniques, concepts, and protocols gained from four semesters of Networking Academy CCNA training, I’ve helped my company’s networks become more efficient, reliable, and cost-effective.”

Stephen Stewart

Stephen graduated from Hemingford High School in 2006, obtained his CCNA and A+ certifications, and was accepted to the JD Edwards Honors Program at the University of Nebraska-Lincoln where he is currently studying computer engineering.

Stephen also works part-time at Mobius Communications implementing new technology, undertaking research and development, troubleshooting end user problems, and planning network expansions within their growing organization.

“The training I received in the Networking Academy’s CCNA class has been instrumental in enhancing my skills and the efficiency of Mobius’ information technology.”

After completing his undergraduate degree, Stephen plans to pursue his Cisco Certified Network Professional (CCNP®) certification.

His ultimate goal is to become a network engineer or system administrator for a Fortune 500 company.

For more information on the Cisco Networking Academy at Hemingford High School, visit: <http://hemingfordschools.org/>
