The CCNA Security Training Centers will provide CCNA Security training to academies through an in-person, remote, or blended learning environment. Local academies can choose any training center in their region with available classes. In addition, local academies can contact a CCNA Security Training Center in their region to enable the CCNA Security course for their academy.

For information about the scheduling of instructor training, please contact the training centers directly. Contact information for these academies can be obtained from the Academy Locator on Academy Connection.

For More Information

For more information about the CCNA Security course, including the Scope and Sequence, FAQs, and Overview Presentation, please visit the [CCNA Security Course Catalog](#) page on Academy Connection.

For general inquiries about the CCNA Security course, please contact the Cisco Networking Academy® Support Desk.
