

Kevin R. MacRitchie
Vice President
Global Government Systems Group
Cisco Systems, Inc.
CCIE 1079

Currently, Mr. MacRitchie is part of a “Giving Back” program in which Cisco Systems loans key Executives to not-for-profit organizations and State/Local Government agencies in order to provide business and technology expertise on key initiatives. Kevin started his initiative to help the Livingston County School System expand and develop a technological advantage which would provide superior education for their students. This project has now grown to embrace other school districts, county governments, first responders, and the State of Michigan as a whole. The current project has now expanded to a state wide initiative, which will include 16-20 counties, creating east-west and north-south interconnected corridors. Kevin is also presenting at State Educational conferences, as well as, speaking with Congress, in Washington D.C, on the topic of how technology can help the Michigan economy and its effects on education.

As the Vice President & Chief Global Strategist for the Global Government Systems Group at Cisco Systems, Inc., Mr. MacRitchie established a world-class team focused on expanding Cisco’s ability to address the exceedingly complex Defense and Public Safety challenges facing Governments world wide. Kevin’s team provided the coordination and subject matter expertise that enabled the Cisco in-theater teams to provide Core, Advanced, and Emerging Technologies to meet the needs of their Government Customers while driving growth of Cisco’s Global Public Sector.

Mr. MacRitchie joined Cisco in April of 1993 as a Systems Engineer and quickly moved through the ranks of the Systems Engineering Organization, as both a Systems Engineering Manager and a Systems Engineer Director. As a Director, he led the US Federal System Engineering Team to achieve its highest customer satisfaction results. Kevin later played an instrumental role in driving Cisco’s Global Y2K Readiness Program. Promoted to Vice President of WW Channels Technical Operations in August 2004, MacRitchie’s innovative strategies enabled the success of Cisco’s Partner Community through focus on Partner Development, Brand Protection, and Customer & Partner Satisfaction and Loyalty. Following his success in Channels, Kevin led the Global Defense, Space, and Homeland Security arm of Cisco’s Global Government Solutions Group. In that role, Kevin expanded GGSG’s reach far beyond the US and Canadian borders, creating opportunities in the fastest growing markets in the Global Public Sector.

MacRitchie holds one of the industry’s first Cisco Certified Internetworking Expert (CCIE) certifications.

Kevin, his wife, and two children live in Michigan on their horse, cattle, and buffalo ranch.
