

Increasing Mobility with the Cisco Unified Wireless Network

Organizations can enable fast, reliable wireless networking solutions to give employees the freedom and mobility they need—without compromising network security. The Cisco Unified Wireless Network is the industry's only unified wired and wireless solution to deliver scalable, manageable, and secure WLANs with a low total cost of ownership. The Cisco Unified Wireless Network provides the same level of security, scalability, reliability, manageability, ease of deployment, and management for wireless LANs that organizations have come to expect from the wired network.

A Cisco wireless LAN solution can provide:

- Enhanced productivity and collaboration, since employees and guest users can securely access data and business critical applications from conference rooms, offices, and public spaces
- Reduced operational expenses through simplified network deployment and operations capabilities
- Streamlined real-time, dynamic network management, since staff can control hundreds or even thousands of wireless access points from a single management console
- Enhanced flexibility using wired and wireless solutions to shape the network around the organization's unique needs

Cisco Systems Capital® Wireless LAN Financing Program Supports Cisco® Wireless LAN Networks

Organizations around the globe are empowering employees to work effectively anywhere with wireless LAN solutions. Now, Cisco Systems Capital® Corporation has made it easier than ever before to give employees and business operations the freedom and mobility they need. Companies can extend the business network with a Cisco® wireless LAN solution for a low monthly lease payment that fits any budget. With a minimal initial investment, companies can increase employee productivity, responsiveness, and collaboration as well as deploy business-critical mobility applications right now, while protecting against technology obsolescence.

Delivering Value

The Cisco Wireless LAN financing program from Cisco Systems Capital can:

- Accelerate the adoption of Cisco wireless LAN technology with minimal initial investment
- Enable predictable and manageable payments, helping businesses to improve liquidity and preserve lines of credit
- Simplify budgeting processes by enabling companies to use operating expense (OpEx) budgets to acquire capital equipment now
- Protect against obsolescence and financial risk, since companies can use state-of-the-art technology over a long lease term, with competitively priced monthly payments
- Provide comprehensive support, since qualifying businesses can receive a low promotional rate on some support services for up to 60 months

Features of Cisco Wireless LAN Financing

The Cisco Wireless LAN financing program is a Fair Market Value (FMV) lease with available terms of 12 to 60 months, but a suggested term of 36 to 60 months. The program is provided by Cisco Systems Capital Corporation directly or through participating partners.

Cisco Systems Capital offers several options at the end of the lease term:

- Return the equipment to Cisco Systems Capital
- Purchase the equipment at the then FMV
- Extend the lease and continue to use the equipment

Other options may be available.

CISCO WIRELESS LAN PROGRAM

The program includes the following Cisco Unified Wireless Network products and their associated components:

- Cisco Aironet® 1500 Series, 1300 Series, 1240 AG Series, 1230 AG Series, 1200 Series, 1130 AG Series, 1100 Series, 1000 Series access points
