3. Important Notes

3.1 Installation

Cisco Unified Communications Locale Installer MUST be installed on every Cisco Unified Communications Manager server in a cluster, starting with the publisher. After installation has completed, it is essential to reboot the platform in order for all user and network locale changes to become fully activated.

3.2 Keyboard Alphanumeric Text Entry Support

There is currently no localized Keyboard AlphaNumeric Text Entry (KATE) support for the following Asian locales:

- Chinese (China)
- Chinese (Hong Kong)
- Chinese (Taiwan)
- Japanese (Japan)
- Korean (Korea Republic)

The default English (United States) KATE will be presented to the user instead.

3.3 Service Agreement Clause

Modification of a Cisco Unified Communications Locale Installer or files applied to Cisco Unified Communications Manager, unless instructed to do so by Cisco, may invalidate a service agreement.

3.4 Restoring Locales after Platform Upgrade or Disaster Recovery

After upgrading Cisco Unified Communications Manager to a later release, or after conducting a disaster recovery system restore onto a clean platform, it is necessary to either reapply this Cisco Unified Communications Locale Installer release, or install a later locale release where the major.minor version matches the platform's major.minor version.

4. Resolved And Known Issues

4.1 Resolved Issues

CSCux78605: CUCM &PO Locale installation on version update to db errors

4.2 Known Issues

None

4.3 Alert on IP Phone font size changes

CSCsu11816: A change request in CSCsu11816 required the font file within Cisco Unified IP Phone models 7945, 7965, 7942, and 7962 to be aligned with the font file within the default English (United States) locale. The new font file is present in all European-based locales built after November 2008.

Customers upgrading to locale installer version 7.1 or greater from version 6.1 will notice an increase in font size on IP Phone models 7945, 7965, 7942, and 7962. This is expected behaviour that will have been experienced in the default English (United States) locale as well.

CSCtn28594: DEU:Font size for 7915 change to small after CUCM upgrade to 8.03su1

Requested by a few customers, font size on 7915/16 extension model while it is connected to phone 7945/65/42/62 has been increased in Latin locales. Locales built after May 2011 will have this fix.

CSCtk31946: HEB: 7945/7965: Font for softkey buttons too small
