7	Appendix A .....	14

# 1 Contents of Cisco Prime Network 3.8 Device Package 3.0

Cisco Prime Network 3.8 Device Package (DP) 3.0 provides new and enhanced device support and defect fixes for Cisco VNEs. The new support and defect fixes are described in this Readme.

## Note:

- DPs are cumulative. This means that all of the content supported in a previous DP version will continue to be supported in subsequent DP versions. In other words, a DP will contain new support *plus* all of the support from earlier DPs.
- Cisco Prime Network 3.8 DP 3.0 contains all of the support provided by the Device packages released post Cisco Prime Network 3.8
- Install the latest [Cisco Prime Network 3.8 point patches / service patches](#) on the server since some of the defect fixes in the VNE Drivers are dependent on these patches. ( refer to sec 4.1 of readme me for details )

For channelization support on XR devices , installation of Prime Network 3.8.0.0.2 or above is mandatory on the Prime Network 3.8 server.

**Note: Channelization feature support would not work if the Prime Network 3.8.0.0.2 or above is not installed on the server.**

- If a Customer is installing Thirdparty VNE Device package 1.0 along with Cisco VNE Device package , it is advised to install Thirdparty VNE 3.8 Device package first followed by Cisco PrimeNetwork 3.8 Device Package ( not applicable, for Thirdparty VNE Device package 2.0 or above )
- At any point in time, to get the most up-to-date device support, install the most recent DP that is available from Cisco.com. To verify whether you have latest VNE driver files, refer to Section 3.

## 1.1 New Software/Feature for Cisco Network Elements

- This DP provides the following new NE support. Note that jar files are cumulative; a jar that is revised for a newer DP contains all of the support that was contained in the previous version of the jar. (For example, CiscoPrimeNetwork-3.8-DP5.tar contains all of the support that was delivered from CiscoPrimeNetwork-3.8-DP1.tar)

The following table describes the new NE support provided in Cisco Prime Network 3.8 DP 3.0 (CiscoPrimeNetwork-3.8-DP3.tar) .

Device Series	Software	New NE / Power supply/Modules supported	Feature/ Technologies	Name and Version of Jar File Containing the s/w Support
CPT	CPT 9.5 (for CPT 200 and CPT 600)	ONS-SC-GE-BXD ONS-SC-2G-xx.x * ONS-SC+-10G-xx.x * ONS-SC-E3-T3-CES ONS-SC-E1-T1-CES ONS-SC-GE-BXU ONS-SC+-10G-ZR ONS-SI-GE-EX ONS-SC+-10G-LRM ONS-SE+-10G-LR		Cisco-CPT-v2.3.0.0.jar
MW 29xx	15.1(1)MR3			Cisco-MWR29xx-v2.2.0.0.jar
AS 901	15.1(2)SNH			Cisco-MWR29xx-v2.2.0.0.jar
2800	15.0(1)M7 15.1(3) T3			Cisco-Others-v2.3.0.0.jar
3800	15.0(1)M7			Cisco-Others-v2.3.0.0.jar
7600		ACE20-MOD-K9 WS-SVC-NAM-2-250S 7600-ES+ITU-2TG-LK 76-ES+XT-2TG3CXL		Cisco-76xx_65xxIOS-v2.3.0.0.jar
6500	12.2(33)SRE5			Cisco-76xx_65xxIOS-v2.3.0.0.jar
ASR 5000			* Support link/up down association * ASR5k Trap support for PGW, SGW, APN, GGSN, GPRS, MME	Cisco-ASR5000-v2.3.0.0.jar

\*Details of the connectors are available in [Cisco Prime Network Reference Guide - VNE Addendum, 3.8](#)

Consolidated list of devices , software , modules supported post Prime Network 3.8 release can be found here - [Cisco Prime Network Reference Guide - VNE Addendum, 3.8](#)

## 1.2 New Support for Device Package Mechanism

This DP provides support for the Device Package update mechanism for the following devices. (This means that these devices can support VNE updates from the [Cisco PRIME NETWORK Software Download site on Cisco.com.](#))

Device Series	DP Support Added in	Jar File Name and Version
Nexus 1000v	Prime Network 3.8 DP1	Cisco-Nexus10xx-v2.0.0.0.jar

## 1.3 New Reduced Polling (EVNE) Support

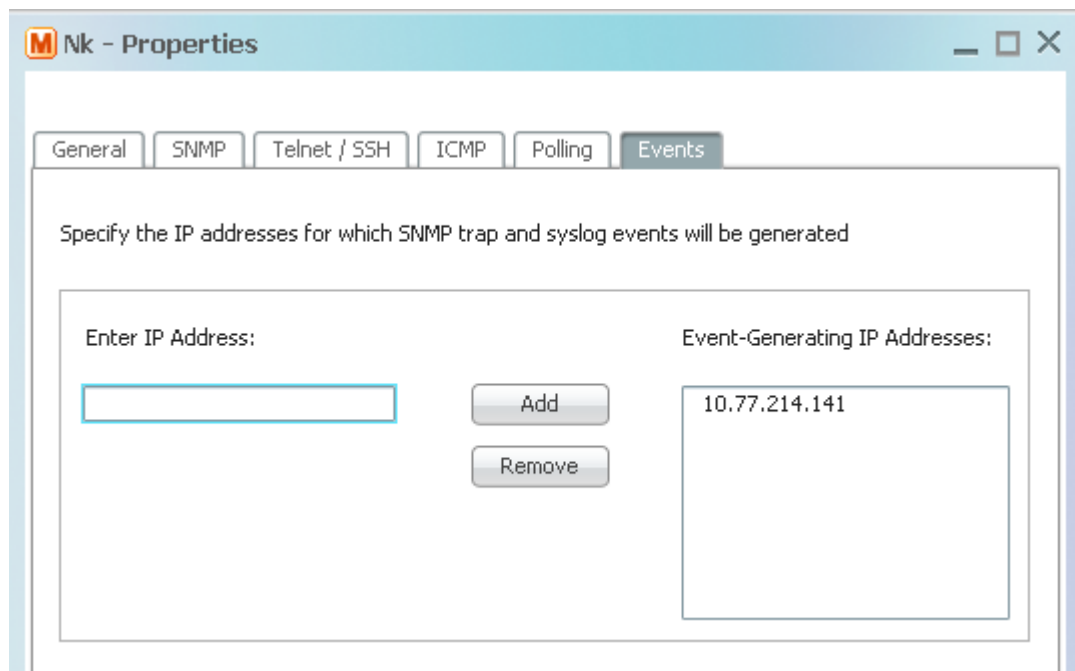

This DP provides reduced polling (event-based polling) support for the following devices. After installing the DP, when you create a VNE for these device families using the Cisco Prime Network GUI client, you will be able to choose reduced polling for these VNEs. (For information on reduced polling, see the [Cisco Prime Network Administrator Guide, 3.8.](#))

Device Series	EVNE Support Added in	Jar File Name and Version
Nexus 1000v	Prime Network 3.8 DP2	Cisco-Nexus10xx-v2.2.0.0.jar
ASR 901	Prime Network 3.8 DP1	Cisco-MWR29xx-v2.1.0.0.jar
Nexus 70xx	Prime Network 3.8 DP1	Cisco-Nexus70xx-v2.1.0.0.jar

### 1.3.1 Reduced VNE Polling support for Nexus 7000

#### Configuration Tasks for Nexus 7000 reduced polling VNE Creation

- Choose “Reduced Polling ( event-based)\* “ in “Polling Method” pane under “Polling Tab” of the VNE Creation window
- All VDC should be configured with Cisco Prime Network Management server IP address.
- The Cisco Prime Network Management IP address of each VDC should be added in the Event- Generating IP addresses box which appears in the “Events” Tab of the VNE Creation window

- Logging should be enabled on Nexus 7000 ( default vdc as well as non default vdc's ) and add the IP address of Cisco Prime Network Server as logging server host.

***Nexus7K(config)# logging server <Cisco Prime Network server IP address> 5 use-vrf <Cisco Prime Network Management VRF>***

## ***1.4 New Support for Cisco Prime Network Configuration and Image Management***

This DP provides the following new support for Cisco PRIME NETWORK Configuration and Image Management. For defect fixes, see Section 3.

Device Series	Software Release	Software Version	Functionality Supported	Device package jar file	Device Package release
Nexus 7000	NX OS	5.2(X)	All NCCM Feature	Cisco-Nexus70xx-v2.2.0.0.jar	Prime Network 3.8 DP2
Nexus 5000	NXOS	5.0(2)N2(1) 5.0(2)N1(1)	All NCCM Feature	Cisco-Nexus50xx-v2.2.0.0.jar	Prime Network 3.8 DP2

## **2 Installing Cisco Prime Network 3.8 Device Package 3.0**

For instructions on how to install (or uninstall) the DP, see the appropriate DP installation guide for your Cisco PRIME NETWORK release. The guides are available from two places:

- Go to [Cisco Prime Network 3.8 Software Download site on Cisco.com](#) (click on hyperlink) and navigate to **Cisco Prime Network 3.8 > Cisco Prime Network VNE Drivers**. Choose the latest Device Package release available on Cisco.com

**Note:**

- If a Customer is installing Thirdparty VNE Device package 1.0 along with Cisco VNE Device package , it is advised to install Thirdparty VNE 3.8 Device package first followed by Cisco PrimeNetwork 3.8 Device Package (( not applicable, for Thirdparty VNE Device package 2.0 or above )

For a complete list of Cisco Prime Network 3.8 documentation, see:

- [Cisco Prime Network 3.8 Documentation](#)

### 3 List of Latest Driver Files on Cisco Prime Network 3.8 server post installation of CiscoPrimeNetwork-3.8-DP3.tar

The following list reflects the latest versions of VNE driver files for Cisco devices. This includes the drivers that were provided with the base release of Cisco Prime Network 3.8 (without any DPs installed). To check if the system has the latest driver files installed, log into the gateway server and compare the contents of your \$ PRIME NETWORK HOME/Main/drivers directory with the list below.

**Note:** This table only lists the latest Cisco VNE driver files. Your directory may also contain third-party VNE drivers if you have installed any third-party VNE DPs.

	Device Series	Jar File name	DP version in which the jar file was changed
1.	12xxx	Cisco-12xxx-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
2.	70xx	cisco-70xx-v2.1.1.0.jar	Cisco-ANA3.8.x-DP3
3.	76xx_65xxIOS	Cisco-76xx_65xxIOS-v2.3.0.0.jar	Cisco-ANA3.8.x-DP3
4.	ASR5000	Cisco-ASR5000-v2.3.0.0.jar	Cisco-ANA3.8.x-DP3
5.	ASR903	Cisco-ASR903-v2.1.0.0.jar	Cisco-ANA3.8.x-DP3
6.	ASR90xx	Cisco-ASR90xx-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
7.	Cisco devices not supported device package mechanism*	Cisco-Others-v2.3.0.0.jar	Cisco-ANA3.8.x-DP3
8.	Cisco-Commons	Cisco-Commons-v2.3.0.0.jar	Cisco-ANA3.8.x-DP3
9.	CPT	Cisco-CPT-v2.3.0.0.jar	Cisco-ANA3.8.x-DP3
10.	CRS	Cisco-CRS-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
11.	All Cisco XR devices	Cisco-IOX-Commons-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
12.	Modules	Cisco-Modules-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
13.	MWR29xx	Cisco-MWR29xx-v2.2.0.0.jar	Cisco-ANA3.8.x-DP3

14.	Nexus50xx	Cisco-Nexus50xx-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
15.	Nexus70xx	Cisco-Nexus70xx-v2.2.1.0.jar	Cisco-ANA3.8.x-DP3
16.	Nexus10xx	Cisco-Nexus10xx-v2.2.0.0.jar	Cisco-ANA3.8.x-DP2
17.	NCCM feature for all devices	Cisco-NCCM_Core-v2.2.0.0.jar	Cisco-ANA3.8.x-DP2
18.	Mib2	Mib2-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
19.	UBR100xx	Cisco-UBR100xx-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
20.	NCCM feature for all XR devices	Cisco-NCCM_IOX-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
21.	ME36XX-ME38XX	Cisco-ME36XX-ME38XX-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
22.	ISR29xx	Cisco-ISR29xx-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
23.	ISR19xx	Cisco-ISR19xx-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
24.	ASR10xx	Cisco-ASR10xx-v2.2.0.0.jar	Cisco-ANA3.8.x-DP1
25.	49xx	Cisco-49xx-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
26.	45xx	Cisco-45xx-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
27.	3750ME	Cisco-3750ME-v2.1.0.0.jar	Cisco-ANA3.8.x-DP1
28.	3400ME	Cisco-3400ME-v2.0.1.0.jar	Cisco-ANA3.8.x-DP1
29.	100xx	Cisco-100xx-v2.0.1.0.jar	Cisco-ANA3.8.x-DP1
30.	Generic-ICMP	Generic-ICMP-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0
31.	UCS	Cisco-ucs-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0
32.	UBR72xx	Cisco-UBR72xx-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0
33.	ISR39xx	Cisco-ISR39xx-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0
34.	ASA5000	Cisco-asa55xx-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0
35.	ACE4710	Cisco-ACE4710-v2.0.0.0.jar	Cisco-ANA3.8.x-DP0

*\*See Appendix A.*

## 4 Resolved Defects

This section lists all defects that are resolved in this DP. Because defect fixes are cumulative and may be inherited from previous DPs, this section also lists which DP provided the resolution.

The following defects are resolved in CiscoPrimeNetwork-3.8-DP3.tar

S No	Defects	Platform	Headline
1.	CSCtl87991	ME 3400	No cefcFRUInserted event in Cisco ANA3.7.2

2.	CSCtx67427	ASR 9000	channelization configuration isn't remove on vne physical interface
3.	CSCtx02470	Activation scripts	Few Activation scripts are not working for Nexus 5010 device
4.	CSCty00295	7500	Empty Device Series field in vne's
5.	CSCtx97961	ASR 5000	ASR5500 device is not modeling in 3.8.1 on top of Feb DP3
6.	CSCtx19245	Activation scripts	Few Activation scripts are not working for Nexus 7000 device
7.	CSCtx51174	7600	Few scripts needs modification due to the down direction commands issue.
8.	CSCtx87344	7600	7600: ANA is not modeling channelization on CHOC12 card
9.	CSCty01162	XR 12000	GSR XR Running with 4.2 not modeling in ANA 3.8
10.	CSCtx64484	ASR 9000	ANA not modeling MPLS TP working and Protected LSP number
11.	CSCtx76206	ASR 903	Bridges are not modelled in ASR903
12.	CSCtx68202	ASR 9000	In ASR9000 the VLAN ID field under bridge must be removed.
13.	CSCtx17069	ACE 4710	ACE20-MOD-K9 module support for Cisco 7600 in ANA 373 DP 10
14.	CSCtx61643	ASR 5000	ASR5k: System description is displayed improperly.
15.	CSCtx17092	7600	WS-SVC-NAM-2-250S module support for Cisco 7600 in ANA 373 DP 10

The following defects are resolved in Prime Network 3.8 DP 2.0

S No	Defects	Platform	Headline
16.	CSCts98324	All Cisco Devices	incorrect path for end-to-end pw flow
17.	CSCtw68083	All XR devices	The T3 controller is not modelled in STS1->CT3->T1 channelization
18.	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1
19.	CSCtw78527	CRS	Serial interface status is not updated and alarm is not generated

The following defects are resolved in Prime Network 3.8 DP 1.0

S No	Defects	Platform	Headline
1.	CSCtr54450	7600	NullPointerException flood the AVM log
2.	CSCtr91490	7600	Label Switching table is not modelling explicit and implicit
3.	CSCts41347	ASR 1000	ASR1K: Missing VLAN sub interface down alarm in sub-interface down test
4.	CSCtu56055	ASR 1000	ASR1001 15.1(2)S1 support is broken in the latest PRIME NETWORK 3.7.X DP
5.	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1
6.	CSCts67203	NCCM feature for XR devices	ASR9K: Wrong telnet command for flash-device-info registration
7.	CSCtt44090	Nexus 7000	cpu utilization polled every system interval on 7600, evne scheme

**Note:** For information regarding the support provided in previous DPs, refer to the respective DP Readme files. Links are provided in Section 1.

#### ***4.1 Defect Resolutions That Require Cisco Prime Network Patches***

The following defect resolutions are contained in this DP. However, to get the complete defect fix you must also install the indicated version (or later revision) of the Cisco PRIME NETWORK patch. The following table lists these defects along with the required Cisco Prime Network patch, and the Cisco Prime Network defect identifier.

To obtain any Cisco Prime Network patches, contact your Cisco representative.

S no	Identifier	Platform	Headline	Cisco Prime Network Release in which it is the dependent Prime Network defect is fixed	Resolved in
1.	CSCtl87991	ME34xx	No cefcFRUInserted event in Cisco ANA3.7.2	Prime Network 3.8.0.0.3 (CSCtx63565)	Prime Network 3.8 DP3
2.	CSCtw68139	XR Devices	Channelization inventory is reporting wrong STS width	Prime Network 3.8.0.0.2 (CSCtu34176)	Prime Network 3.8 DP2
3.	CSCtw68083	XR Devices	The T3 controller is not modelled in STS1->CT3->T1 channelization	Prime Network 3.8.0.0.2 (CSCtw58067)	Prime Network 3.8 DP2
4.	CSCtw78527	CRS	Serial interface status is not	Prime Network 3.8.0.0.2	Prime

S no	Identifier	Platform	Headline	Cisco Prime Network Release in which it is the dependent Prime Network defect is fixed	Resolved in
			updated and alarm is not generated	(CSCtu95489)	Network 3.8 DP2
5.	CSCtr09508	All XR devices	Hyperlink not coming for some Ports under CDP in XR	Prime Network 3.8.1 (CSCtx14725)	Prime Network 3.8 DP2
6.	CSCtx02296	7600	FEC Mismatch Counter -1 on DWDM Window	Prime Network 3.8.1 (CSCtu31988 )	Prime Network 3.8 DP2
6	CSCtw58024	ASR 903	Metric value shows as "0" in the IS-IS metrics page of ASR903 device	CSCtx35283 (TBD)	Prime Network 3.8 DP2
7	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1	Prime Network 3.8.0.0.2 (CSCtw58067)	Prime Network 3.8 DP2

## 5 Open Defects

### 5.1 Device-Specific Open Defects

This sections lists the defects on the devices because of which some features relating to VNE might not work.

Sno	Defect ID	Platform	Description	Impact	Workaround
1.	CSCts31097	72xx	ATM IMA modeling issues for pa-ima-e1	On Cisco 72xx devices,ATM IMA will not model properly for pa-ima-e1 module,IfDesc is showing as ATM whereas ifType is showing as E1/T1.	None
2.	CSCtv22042	ASR 9000	Weapon-X: Need to invoke spa_oir_callback() for XCVR OIR		None
3.	CSCtr95939	CRS	CSC PathTrace fails, due to wrong Top Label in the path.	Pathtrace gets stuck on Backbone carrier PE as the trace is exiting the CSC backbone carrier network in the direction of the Customer carrier network. This is only a problem for IOS-XR PE devices.	None
4.	CSCtt43809	ME 38xx	OSPF neighbor down is not parsed from Cisco 3825	OSPF neighbor down is not parsed from Cisco 3825.As a result the service alarm of OSPF neighbor down will not correlate correctly	None

Sno	Defect ID	Platform	Description	Impact	Workaround
5.	CSCts48120	ME 38xx	MPLS LDP session up trap is not correlated to Link up ticket	The "MPLS LDP session up" trap is not correlated to the "Link up" ticket. Instead the MPLS LDP session down trap which is correlated in the ticket is auto cleared	None
6.	CSCtq61849	Nccm	Activating Image name should not be limited in command builder	Activating Image command builder fails	None
7.	CSCtr42741	NCCM Feature for XR devices	Admin config shows Running config	In Admin mode, NCCM may copy running config instead of admin config	None
8.	CSCts79008	Nexus 5000	Memory usage information is missing in Nexus5K	On Cisco Nexus-5K devices, Memory usage information is missing and unable to view the specific memory.	None
9.	CSCtq36525	Nexus 7000	Nexus 7000 - Wrong PID is shown in telnet result for all SFP's available	Wrong PID shown for transceiver / SFP modules for Nexus 7000	None

## 5.2 Cisco Prime Network-Specific Open Defects

S no	Defect ID	Description	Impact	Workaround
1.	CSCty28617	Remove cisco-others as dependency for ASA , 49xx,45xx,ME3400,3750ME	Error message thrown the Cisco-others is not compatible with the jars mentioned in the description and prompt the user ( y/n) to continue with the installation	Provide input as "yes", the installation will proceed further for completion
2.	CSCty17209	High CPU Utilization on CRS 8 running XR 411	High CPU utilization on CRS when managed from two ANA servers	None
3.	CSCty24948	FebDP:Inconsistent behaviour - Few Devices going to Unsynchronised state	Logical inventory is not modeled for the devices.	Clearing the persistency under \$ANAHOME /units and restarting the ANA Gateway would solve this issue

S no	Defect ID	Description	Impact	Workaround
4.	CSCtr26507	CPT modeling of NGXP card is not working in Failover scenarios	In a active/standby NGXP scenario, on resetting the active card the switchover happens seamlessly both in CPT Device as well Prime Network but Telnet connectivity is not switching	None
5.	CSCtx68490	TP impacts correlation of Cisco devices in a wrong way	When TP is installed on the ANA server with Cisco DP , correlation of cisco devices is impacted	Install the latest Thirdparty package available on Cisco.com
6.	CSCtx87344	7600: ANA is not modeling channelization on CHOC12 card	Network Vision does not display inventory of channelized interfaces on CHOC12 card	None
7.	CSCtx90642	MWR2900: VNE fails associate transceiver cefc FRU trap wt port connector	cefc FRU Removed/Inserted trap is not associated with port connector and not correlated to the root cause alarm	none
8.	CSCtx93011	ANA3.8 is not modeling properly the EFPs	ASR901 VNE does not model EFPs when corresponding VLAN domain is not defined explicitly	none
9.	CSCtx70115	Some ASR9K modules supported in XR 4.2 Modules ( mentioned in the bug ) will not model properly	Customer cannot see the module related properties in Network Vision	None
10.	CSCtx56584	Ports under SPA SPA-24CHT1-CE-ATM not modeling for CRS XR42	Ports under SPA SPA-24CHT1-CE-ATM not modeling for CRS XR42	None
11.	CSCtw78667	T1 port speed is showing zero	The T1 channelized port on CHOC12 card inventory shows port speed as '0.0'	None
12.	CSCtf00180	Cisco uBR10012:port is not modeled under SPA-24XDS-SFP card	Cisco ANA does not model ports under SPA-24XDS-SFP cards for Cisco uBR10012 devices running Cisco IOS 12.2(33)SCB2. As a result, these ports are not displayed in Cisco ANA Network Vision maps or in inventory.	None
13.	CSCtx42509	ASR5k ACL shows Out of Bound error in GUI ANA3.8	- ASR5k ACL shows Out of Bound error in GUI PRIME NETWORK3.8	Refer to Sec 5.2.1 of the document
14.	CSCtw53760	Issue in channelization modeling(AU3/AU4)_ASR9k_ ANA373/38	When we have both AU3/AU4 configured in the device ANA will populate only AU3 related details.If we have AU4 alone means it will populate AU4.	None
15.				

S no	Defect ID	Description	Impact	Workaround
16.	CSCtk00267	Migration: Legacy scripts from Cisco ANA 3.7.1 disappear after migration	In Cisco ANA 3.7.1 to 3.7.2 migration setup, Legacy scripts from Cisco ANA 3.7.1 disappear after migration.	None
17.	CSCtg56888	Missing VlanInterface notification when moving switchport to routed	On GigabitEthernet trunk port configured as 'switchport', after changing configuration as 'routed', the change is not getting reflected in Cisco Prime Network.	None
18.	CSCtg54230	ATM IMA cards do not populate Loopback, Framing, or Scrambling values	In Cisco 7200 device OC3 POS interface Loopback value is not populated properly. Pa-ima-e1 module is not populate E1 properties like loopback, Framing, Scrambling.	None
19.	CSCtj92252	VNE restarts due to software version change	When the Operator changes the current S/W version to upgraded software version, VNE restarts due to software version change.	None
20.	CSCtj44001	Cisco SFP-10GBase-CUxM does not return proper vendor OID	The Cisco SFP-10GBase-CUxM module does not provide the correct vendor OID in Cisco ANA NetworkVision.	None
21.	CSCth01054	Cisco ANA models Cisco 3750g fiber optic ports as RJ45 ports	While Modeling Cisco ANA 3750G the ports shown as RJ45 ports instead of fiber optic ports.	None
22.	CSCtj19233	Cisco RSP720 removal redundancy state ticket issued only after reinsert	Removing the active RSP from a 76xx with SRE0a will not issue "Cisco RF unit state changed" tickets until former active is reinserted and reaches at least "cold standby" state	None

### 5.2.1 Disabling Access list registration of ASR 5000 in Prime Network 3.8

ASR5000 ACL shows Out of Bound error in GUI ANA3.8. To prevent the exception being shown in the GUI, execute the following steps.

1. Login as Prime Network user to CISCO PRIME NETWORK Gateway
2. Go the \$ANAHOME/Main/drivers directory in the Cisco Prime Network Gateway
3. Execute the following command

```
runRegTool.sh localhost set "site/cisco-router-asr5k-productscheme/com.sheer.metrocentral.coretech.common.investigator.GenericForwardingInvestigator/accesslists container/enable" false
```

## 6 Related Documentation
