1 Contents of Prime Network 3.8.xTo3.9.x Device Package 1207

Prime Network 3.8.xTo3.9.x Device Package (DP) 1207 provides new and enhanced device support and defect fixes for Cisco VNEs. This document lists the cumulative support delivered post Cisco Prime Network 3.8.0.

This Device package can be installed on any Cisco Prime Network 3.8.0.0.5 or later, Cisco Prime Network 3.8.1.0.2 or Cisco Prime Network 3.9 only.

The new support and defect fixes are described in this Readme.

Note:

- At any point in time, to get the most up-to-date device support, install the most recent DP that is available from Cisco.com. To verify whether you have latest VNE driver files, refer to Section 3.
- Table below represents the feature support delivered in Device Package 3.8.xTo3.9.x DP1207

	On Prime Network 3.8.0.0.5	On Prime Network 3.9
Nexus 7000 and Nexus 2000	Modeled as Multi Shelf	Modeled as Multi Chassis
Nexus 5000 and Nexus 2000	Modeled as Multi Shelf	Modeled as Multi Chassis
ASR 9000 : Satellite and Cluster	Not Supported	Supported
ASR 5000 : GGSN APN GTPU	Not Supported	Supported
CRS : Multi chassis	Modeled as Multi Shelf	Modeled as Multi Chassis

1.1 Naming Convention of the Device package tar file

The Cisco VNE Device packages supported on Cisco Prime Network 3.8.0.0.5 would have the following naming convention going forward from June 2012.

PrimeNetwork-3.8.xTo3.9.x-DPymm.tar

For example - PrimeNetwork-3.8.xTo3.9.x-DP1206.tar

PrimeNetwork – indicates the product on which the Device package is supported

3.8.xTo3.9.x – Indicates the device package is supported on Prime Network releases , for example , Prime Network 3.8 , 3.8.1 and 3.9

DPymm – Indicate year and month in which the package is released.

PrimeNetwork-3.8.xTo3.9.x-DP1207.tar – indicates the device package is released in July 2012 and is supported on Prime Network 3.8, 3.8.1 and 3.9

1.2 New Software/Feature for Cisco Network Elements

Note that jar files are cumulative. A jar that is revised for a newer DP contains all of the support that was contained in the previous version of the jar. (For example, PrimeNetwork-3.8.xTo3.9.x-DP1207.tar contains all of the support that was delivered fromCiscoPrimeNetwork-3.8-DP1.tar)

The following table describes the new NE support provided in Cisco Prime Network 3.8.xTo3.9.x (PrimeNetwork-3.8.xTo3.9.x-DP1207.tar).

Device Series	Software	New NE / Power supply/ Modules supported	Feature/ Technologies	Name and Version of Jar File Containing the s/w Support
ASR 5000	14.0 *		Traps <ul style="list-style-type: none"> starECSTotalDNSLearntIPv4Threshold starECSTotalDNSLearntIPv4ThresholdClear starECSTotalDNSLearntIPv6Threshold starECSTotalDNSLearntIPv6ThresholdClear 	Cisco-ASR5000-v3.2.0.0.jar
ASR 9000		New Module A9K-MPA-2X40GE New Connector <ul style="list-style-type: none"> 40GBASE-SR4 40GBASE-LR4 	Y1731 Syslogs <ul style="list-style-type: none"> L2-CFM-6-AIS_LCK_CHANGE L2-CFM-6-CC_ERROR L2-CFM-6-MEP_CHANGE 	Cisco-ASR90xx-v3.2.0.0.jar, Cisco-IOX-Commons-v3.2.1.0.jar
Cisco 7600	15.0(1)S6		Syslogs <ul style="list-style-type: none"> ETHERNET_MLACP-SP-4-PEER_DOWN ETHERNET_MLACP-SP-4-CORE_ISOLATION 	Cisco-76xx_65xxIOS-v3.2.0.0.jar, Cisco-Commons-v3.2.1.0.jar
CRS			Multi Chassis	Cisco-CRS-v3.1.0.0.jar
Nexus 5000			Technology <ul style="list-style-type: none"> Port Channel VLAN 	Cisco-Nexus50xx-v3.2.0.0.jar
Nexus 7000		New NE Type N7K-C7009 New Module <ul style="list-style-type: none"> N7K-C7009-FAB-2 N7K-F248XP-25 N7K-M148GT-11L N7K-F132XP-15 N7K-M108X2-12 N7K-M108X2-12L Power Module N7K-AC-6.0kW Fan Module N7K-C7009-FAN	Syslogs <ul style="list-style-type: none"> VPC-3-INTF_CONSISTENCY_FAILED VPC-5-INTF_CONSISTENCY_SUCCESS VPC-6-PEER_VPC_UP VPC-6-PEER_VPC_DOWN VPC-5-VPC_UP VPC-5-VPC_DOWN VPC-5-VPCM_ENABLED VPC-5-VPCM_DISABLED 	Cisco-Nexus70xx-v3.2.1.0.jar

*Starting from StarOS 14.0, following mibs have been disabled by default in the device.

- ENTITY-MIB
- IF-MIB
- ENTITY-STATE-MIB

They need to be enabled for the ASR5k/5500 VNE to model using following configuration in the device.

- configure
- snmp mib ENTITY-MIB
- snmp mib IF-MIB
- snmp mib ENTITY-STATE-MIB

Consolidated list of devices, software, and modules supported post Prime Network 3.8 releases can be found here - [Cisco Prime Network Reference Guide - VNE Addendum, 3.8](#)

1.3 New Reduced Polling (EVNE) Support

This DP provides reduced polling (event-based polling) support for the following devices. After installing the DP, when you create a VNE for these device families using the Cisco Prime Network GUI client, you will be able to choose reduced polling for these VNEs. (For information on reduced polling, see the [Cisco Prime Network Administrator Guide, 3.8](#).)

Device Series	EVNE Support Added in	Jar File Name and Version
CRS 16 VE	Prime Network 3.8 DP 4	Cisco-Commons-v2.4.0.0.jar, Cisco-CRS-v2.2.2.0.jar
Nexus 1000v	Prime Network 3.8 DP2	Cisco-Nexus10xx-v2.2.0.0.jar
ASR 901	Prime Network 3.8 DP1	Cisco-MWR29xx-v2.1.0.0.jar
Nexus 70xx	Prime Network 3.8 DP1	Cisco-Nexus70xx-v2.1.0.0.jar

Note: Pl. refer to Appendix B for Reduced VNE Polling support for Nexus 7000

1.4 New Support for Cisco Prime Network Configuration and Image Management

This DP provides the following new support for Cisco Prime Network Configuration and Image Management. For defect fixes, see Section 3.

Device Series	Software Release	Software Version	Functionality Supported	Device package jar file	Device Package release
Nexus 7000	NX OS	5.2(X)	All NCCM Feature	Cisco-Nexus70xx-v2.2.0.0.jar	Prime Network 3.8 DP2
Nexus 5000	NXOS	5.0(2)N2(1) 5.0(2)N1(1)	All NCCM Feature	Cisco-Nexus50xx-v2.2.0.0.jar	Prime Network 3.8 DP2

2 Installing Prime Network 3.8.xTo3.9.x-Device Package 1207

For instructions on how to install (or uninstall) the DP, see the appropriate DP installation guide for your Cisco PRIME NETWORK release. The guides are available from two places:

- Go to [Cisco Prime Network 3.8 Software Download site on Cisco.com](#) (click on hyperlink) and navigate to **Cisco Prime Network VNE Drivers section**. Choose the latest Device Package release available on Cisco.com

Note: To obtain Cisco Prime Network 3.9 Software Download, contact your Cisco representative.

For a complete list of Cisco Prime Network 3.8 documentation, see:

- [Cisco Prime Network 3.8 Documentation](#)
- [Cisco Prime Network 3.9 Documentation](#)

3 List of Latest Driver Files on Cisco Prime Network 3.8/3.9 server post installation of PrimeNetwork-3.8.xTo3.9.x-DP1207.tar

The following list reflects the latest versions of VNE driver files for Cisco devices. This includes the drivers that were provided with the base release of Cisco Prime Network 3.8 (without any DPs installed).

To check if the system has the latest driver files installed, log into the gateway server and compare the contents of your \$ PRIME NETWORK HOME/Main/drivers directory with the list below.

Note: This table only lists the latest Cisco VNE driver files. Your directory may also contain third-party VNE drivers if you have installed any third-party VNE DPs.

S. No	Device Series	Jar File name	DP version in which the jar file was changed
1	Cisco-76xx_65xxIOS	Cisco-76xx_65xxIOS-v3.2.0.0.jar	PrimeNetwork-3.8.xTo3.9.x-DP1207

*See Appendix A.

4 Resolved Defects

This section lists all defects that are resolved in this DP. Because defect fixes are cumulative and may be inherited from previous DPs, this section also lists which DP provided the resolution.

The following defects are resolved in CiscoPrimeNetwork-3.8.xTo3.9.x-DP 1207

S No	Defect	Platform	Headline
1	CSCua19364	ASR 1000	ASR1K: POS channels and POS interfaces on CHOC12 card are not modeled
2	CSCua31306	UCS	Oper state is not getting updated when SFP-not-presentEvent got cleared
3	CSCua70896	Nexus 1000	Chassis serial number and description are not displayed in Nexus1000v
4	CSCua70977	Nexus 1000	Hardware version is not displayed for VEM module in Nexus 1000v
5	CSCua71014	Nexus 1000	Redundancy of the VSM not shown in Nexus 1000v
6	CSCua84524	ASR 9000	JUNDP Y1731 : On Demand Probe Script doesnt work for below operations
7	CSCua84644	Cisco 7600	CFM RemoteMaintenanceEndPoints are not modeled for 7600
8	CSCua85627	All Nexus Devices	port utilisation graph link disabled for Nexus device.
9	CSCua86136	ASR 901	PW information missing from the local interface (ASR901)
10	CSCua88111	ME 3400	STP is not modeling in ME 3400 device
11	CSCua89861	All Cisco IOS Devices	PN isn't modeling correct an IPv6 access-list
12	CSCua90574	All Cisco Devices	\ "snmp link down\ " trap should be with \ "is-correlation-allowed\ " false
13	CSCua91191	Nexus 7000	Mgmt vrf not modeling in Nexus 7000 device
14	CSCua96058	Nexus 1000	Routing Entity table is not modeling for Nexus 1000v
15	CSCub05120	ASR 1000	Association missing in POS interface and Layer2(PPP) information
16	CSCub05244	ASR 9000	To support L2-CFM-6-MEP_CHANGE msg as a part of RDI syslog
17	CSCub10665	Cisco 2800	Card NM-1T3E3 is modeled with RJ45 connectors, where it should be BNC
18	CSCub15799	All XR Devices	Unable to open Cisco events tab in VCB
19	CSCub20574	Cisco 7600	MplsTP LSP status showing as UNKNOWN when tunnel Is locked at

			both ends
20	CSCub20825	Cisco 7600	evil twin dc exception- POS port missing in 7600 device
21	CSCub20989	ASR 5000	StarECSTotalDNSLearntIPv4Threshold Trap is not displayed in ANA
22	CSCub21606	CPT	CPT VNE is not modelling
23	CSCub28591	CPT	MPLS-TP Global configuration scripts not working for CPT VNE
24	CSCub32991	All Cisco Devices	DP filename should be updated in manifest file for PN 38/39 DP
25	CSCub37044	All Cisco Devices	Rollback of DP to DP6 after installing 3.8 PP5

The following defects are resolved in CiscoPrimeNetwork-3.8.xTo3.9.x-DP 1206

S No	Defect	Platform	Headline
1	CSCts17077	Cisco 7600	Duplicate ports displayed on module
2	CSCtz95985	Cisco 3745	Generic module is displayed for new module added through VCB-3745 device
3	CSCtz96406	All Cisco Devices	Legacy Command Builder Scripts for running config from file not working
4	CSCtz96565	ASR 1000	IPV6 source and destination address are not populating in GRE tunnels
5	CSCua06621	ASR 5000	APN accounting mode none is displayed as unknown
6	CSCua30699	All Cisco Devices	MplsTP mid point LSP changes are not considered for EVNE update
7	CSCua32752	ASR 9000	Supported interfaces for configuring probe endpoint on ASR9K for Y1731
8	CSCua34010	Nexus 5000	FC ports Status and properties are not modelling Properly for Nexus 5K.
9	CSCua34098	Nexus 5000	IpInterfaces are not modeled when interface is operationally Down(Nex5K)
10	CSCua47017	CPT	CPT:\\"configure SLA\" script attribute validation is not properly done
11	CSCua51812	Nexus 5000	ARP Table is not modelling for Nexus5K
12	CSCua52383	ASR 1000	AVM exits with OutOfMemory error for ASR1k
13	CSCua55105	ASR 9000	Y1731:Unable to delete Probe from a Profile since its having dependency
14	CSCua57255	CPT	Y1731 : Script error is seen when target mac-address is selected.
15	CSCua57751	All Nexus Devices	Multi-Chassis display problem in Nexus7k and Nexus5k
16	CSCua57830	All Nexus Devices	Nexus 7k & Nexus 5K remains in \\"Unsynchronised state\"
17	CSCua62817	Cisco UCS	BackPlane 5 is not modelling in UCS
18	CSCua67495	ASR 9000	Satellite ICL container with no Satellite configured
19	CSCua68078	Nexus 5000	Powersupply and Fan modules are not modeling properly in Nexus5K
20	CSCua68651	MWR 2900	Typo in Access List parser causes missing entries in logical inventory
21	CSCua75020	ASR 9000	JUNDP Y1731: Packet every operation in Global SLA Script has error

The following defects are resolved in CiscoPrimeNetwork-3.8.x-DP 6.0

S No	Defect	Platform	Headline
1	CSCty64840	ASR-5000	Wrong alarm ids set for asr5k traps
2	CSCtz82733	XR-12000	Ipssec Technology need to be disable in GSR XR
3	CSCtz33866	ASR-9000	ANA3.7.3.1.3/DP12-BGP down trap\" not clearing when neighbor established
4	CSCtz34937	All Cisco Devices	BGP down traps correlate each one to the other result in loops
5	CSCtz39893	vne-asr-9k	MPLS TP: LSP Mid Point, Working LSP's details are missing.
6	CSCtz43981	CPT	Status of SFP pluggables not updated even after pluggable were removed
7	CSCtz89362	All XR Devices	Failed find key for DSX1 channel when parsing dsx1LineStatusChange trap
8	CSCtz49582	vne-cpt	Command builder scripts are not working .
9	CSCtz72314	All Cisco IOS Devices	Switching PW modeling needs to be handled in ANA
10	CSCtz75324	ASR-903	Two Management interface is shown after active rsp removal in Rudy
11	CSCtz68852	CPT	CPT:Product Id(PID) for E1T1 pluggable is not proper
12	CSCtz88335	All Cisco Devices	Ethernet status does not match BaseBand on GSR 1200 with IOX XR
13	CSCtz91222	MWR-29xx	Default registration in product evne file is wrongly pointing in MWR29xx
14	CSCtx86760	All Cisco IOX Devices	Wrong pluggable transceiver out tickets on GSR 12k IOX
15	CSCtz47910	All Cisco Devices	DSO bundle down service alarm is not cleared when line has loopback
16	CSCtz49881	ASR-1K	3.8.X DP5 FCS: Traffic Engineering tunnel not modelling properly- > ASR1K
17	CSCtz52243	Cat-356x	Default route shown twice in Routing table - Cisco 3560
18	CSCtz60710	All Cisco Devices	Missing MPLS interfaces on 7600
19	CSCtw66269	All Cisco IOS Devices	CDP Interface Hyperlink is mapping incorrectly _GSR XR_XR 412_ANA38 DP
20	CSCtz61695	UBR-10k	PN39 : Duplicate entries in ciscovdc-cisco-uBR100xx-product-scheme-evne

The following defects are resolved in CiscoPrimeNetwork-3.8.x-DP 5.0

S No	Defects	Platform	Headline
1	CSCto76406	ISR-3900	ISR3900:entPhysicalContained is shown wrong for GLC_LH_SM SFP
2	CSCtr42155	All Cisco Devices	ExpediteArchiveLog uses Timer object
3	CSCtr95939	All XR Devices	CSC PathTrace fails
4	CSCtw55497	All Cisco Devices	ANA: PW Type not correct which caused Crosslaunch to PPM not work
5	CSCtw79231	All Cisco Devices	EFP updates are not reflected immediatly on ASR903 using Poll Now
6	CSCtw82022	ASR-901	Aggregation link is not shown under Links
7	CSCtx07998	ASR-9000	ASR9K-BGP-Timers not being updated in Network Vision
8	CSCtx57489	All Cisco Devices	While adding new vne as Generic snmp getting exception in the log
9	CSCtx83764	XR-12000	bgp link GVPE isn't discover between CE and PE device
10	CSCty19092	All Cisco Devices	CiscoKeyFactory returns null key for EFP interface
11	CSCty33020	All XR Devices	VSI links do not go down in \"link down\" scenario on GSR-IOX
12	CSCty33189	All Cisco Devices	MPLS link doesn't go down when removing MPLS config from 7600 ES+ intf
13	CSCty35481	ASR-9000	incorrect outgoing interface for end-point lmps on IOX devices
14	CSCty47377	ASR-9000	MPLS TP configured with subinterfaces are not modeled the same.
15	CSCty63751	All Nexus Devices	Missing ports from EDS Ports property
16	CSCty69043	CPT	Card name displays junk values
17	CSCty82838	ASR-1000	ASR1k models with twin DC,Duplicate XID exception
18	CSCty83250	ASR-1000	ASR1k models with exceptions in SBE parser, CiscoRouterTunnel6rdParser
19	CSCty85217	ASR-1000	IPSec tunnel does not model when source is an interface
20	CSCty91357	CPT	Software version is showing as software description.

21	CSCTy93202	All Cisco Devices	Mpls LDP neighbor source not displayed if the source is a TP Tunnel
22	CSCTz02894	ASR-9000	ASR9k: power supply card status is set as \"status\" for evne
23	CSCTz04339	All Cisco Devices	dp name in manifest file has to be changed to prime network
24	CSCTz04949	ASR-5000	Wrong alarm ids for asr5k traps: overlapping with service events exists
25	CSCTz08928	All Cisco Devices	IRD comparison issue in the Routing table entity
26	CSCTz10498	CRS	PN3.8: DP4: Cannot model CRS4S IOS XR 4.1.1 with default scheme
27	CSCTz25044	ASR-9000	CFM Scripts: Wrong Range for \"traceroute cache hold-time\"
28	CSCTz25083	ASR-9000	CFM Scripts: Value not applicable percent in Contnuity Check Script
29	CSCTz31220	ISR-2900	C2951 Modells with NumberFormatException,IllegalArgumentExpection

The following defects are resolved in CiscoPrimeNetwork-3.8-DP 4.0

S No	Defects	Platform	Headline
1	CSCTu18135	All XR Devices	in some PW link peer isn't presented and local router ip is 0.0.0.0
2	CSCTu95760	CRS	Syslog \"L2-SONET_LOCAL-4-ALARM: SONET0/1/2/0: LAIS\" not supported
3	CSCTw28787	ASR-5K	cannot model an ASR 5K VNE through SSH
4	CSCTw51495	ASR-901	Exception upon executing preview for \"AddHostName Script\" on ASR901
5	CSCTx29511	All XR Devices	Configuration changes are not updated on XR VNE with reduced polling
6	CSCTx51174	All IOS devices	Few scripts needs modification due to the down direction commands issue.
7	CSCTx51695	7600	Few commands needs to be handled for DWDM counters, G709ODU/OTU script
8	CSCTx52035	All XR Devices	Time out exception while executing vlan related scripts in XR
9	CSCTx93011	ASR-901	EFPs are not modeled correctly for ASR 901
10	CSCTx94475	All IOS devices	Not all of the configured timeslots on ds0 are displayed
11	CSCTy00921	ASR-5500	ASR5500: Secondary IP address is not reflected in ANA
12	CSCTy00938	ASR-5500	ASR5500:Associated Entity field is not reflected in ANA
13	CSCTy06574	Nexus-7000	support separate registration for port status module status in Nexus 7k
14	CSCTy06831	ASR-5500	ASR5500: IP address is not seen in Export and Import route targets
15	CSCTy10686	All Cisco Devices	Container status is Unknown on Fan & PWR modules
16	CSCTy18359	ASR-5K	ASR 5K Image distribution fails when password has special characters
17	CSCTy19685	CRS	Shutting down a VRRP interface moves the CRS VNE to unreachable state
18	CSCTy29568	Cat-356X	\"Link down on unreachable\" appear after shutting down port
19	CSCTy41824	CRS	Support for reduced polling in CRS 16 VE chassis
20	CSCTy49971	All Cisco Devices	Correct/Insert description entry in ciscovds-*--entityspec.xml files
21	CSCTy53703	7600	LSE forwarding table is not modeled in MPLS TP setup
22	CSCTy57838	All Cisco Devices	Timestamp info in the CLI output breaks registrations parser logic
23	CSCTy63753	All Cisco Devices	Wrong DC relation getting created for channelized mpls serial interfaces
24	CSCTy75781	All XR Devices	Missing generic syslog pattern in parsing rules for IOX devices
25	CSCTy79115	7600	LSE forwarding table - OutInterface need to be handled for MPLS TP tunnel
26	CSCTy82080	All XR Devices	BGP AS number does not model under VRF in XR devices
27	CSCTy89153	ASR-9K	ICCP/mLACP not modeled on ASR 9K

The following defects are resolved in CiscoPrimeNetwork-3.8-DP 3.0

S No	Defects	Platform	Headline
1	CSCtI87991	ME 3400	No cefcFRUInserted event in Cisco ANA3.7.2
2	CSCtx67427	ASR 9000	channelization configuration isn't remove on vne physical interface
3	CSCtx02470	Activation scripts	Few Activation scripts are not working for Nexus 5010 device
4	CSCty00295	7500	Empty Device Series field in vne's
5	CSCtx97961	ASR 5000	ASR5500 device is not modeling in 3.8.1 on top of Feb DP3
6	CSCtx19245	Activation scripts	Few Activation scripts are not working for Nexus 7000 device
7	CSCtx51174	7600	Few scripts needs modification due to the down direction commands issue.
8	CSCtx87344	7600	7600: ANA is not modeling channelization on CHOC12 card
9	CSCty01162	XR 12000	GSR XR Running with 4.2 not modeling in ANA 3.8
10	CSCtx64484	ASR 9000	ANA not modeling MPLS TP working and Protected LSP number
11	CSCtx76206	ASR 903	Bridges are not modelled in ASR903
12	CSCtx68202	ASR 9000	In ASR9000 the VLAN ID field under bridge must be removed.
13	CSCtx17069	ACE 4710	ACE20-MOD-K9 module support for Cisco 7600 in ANA 373 DP 10
14	CSCtx61643	ASR 5000	ASR5k: System description is displayed improperly.
15	CSCtx17092	7600	WS-SVC-NAM-2-250S module support for Cisco 7600 in ANA 373 DP 10

The following defects are resolved in Prime Network 3.8 DP 2.0

S No	Defects	Platform	Headline
1	CSCts98324	All Cisco Devices	incorrect path for end-to-end pw flow
2	CSCtw68083	All XR devices	The T3 controller is not modelled in STS1->CT3->T1 channelization
3	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1
4	CSCtw78527	CRS	Serial interface status is not updated and alarm is not generated

The following defects are resolved in Prime Network 3.8 DP 1.0

S No	Defects	Platform	Headline
1	CSCtr54450	7600	NullPointerException flood the AVM log
2	CSCtr91490	7600	Label Switching table is not modelling explicit and implicit
3	CSCts41347	ASR 1000	ASR1K: Missing VLAN sub interface down alarm in sub-interface down test

4	CSCtu56055	ASR 1000	ASR1001 15.1(2)S1 support is broken in the latest PRIME NETWORK 3.7.X DP
5	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1
6	CSCts67203	NCCM feature for XR devices	ASR9K: Wrong telnet command for flash-device-info registration
7	CSCtt44090	Nexus 7000	cpu utilization polled every system interval on 7600, evne scheme

Note: For information regarding the support provided in previous DPs, refer to the respective DP Readme files. Links are provided in Section 6.

4.1 Defect Resolutions That Require Cisco Prime Network Patches

The following defect resolutions are contained in this DP. However, to get the complete defect fix you must also install the indicated version (or later revision) of the Cisco PRIME NETWORK patch. The following table lists these defects along with the required Cisco Prime Network patch, and the Cisco Prime Network defect identifier.

To obtain any Cisco Prime Network patches, contact your Cisco representative.

S no	Identifier	Platform	Headline	Cisco Prime Network Release in which it is the dependent Prime Network defect is fixed	Resolved in
1.	CSCti87991	ME34xx	No cefcFRUInserted event in Cisco ANA3.7.2	Prime Network 3.8.0.0.3 (CSCtx63565)	Prime Network 3.8 DP3
1	CSCtw68139	XR Devices	Channelization inventory is reporting wrong STS width	Prime Network 3.8.0.0.2 (CSCtu34176)	Prime Network 3.8 DP2
2	CSCtw68083	XR Devices	The T3 controller is not modelled in STS1->CT3->T1 channelization	Prime Network 3.8.0.0.2 (CSCtw58067)	Prime Network 3.8 DP2
3	CSCtw78527	CRS	Serial interface status is not updated and alarm is not generated	Prime Network 3.8.0.0.2 (CSCtu95489)	Prime Network 3.8 DP2
4	CSCtr09508	All XR devices	Hyperlink not coming for some Ports under CDP in XR	Prime Network 3.8.1 (CSCtx14725)	Prime Network 3.8 DP2
5	CSCtx02296	7600	FEC Mismatch Counter -1 on DWDM Window	Prime Network 3.8.1 (CSCtu31988)	Prime Network 3.8 DP2
6	CSCtw58024	ASR 903	Metric value shows as "0" in the IS-IS metrics page of ASR903 device	CSCtx35283 (Fix not available)	Prime Network 3.8 DP2
7	CSCtu34126	CRS	No Driver support for T3/E3 syslog on CHOC12 cards for CRS1	Prime Network 3.8.0.0.2 (CSCtw58067)	Prime Network 3.8 DP2

5 Open Defects

5.1 Device-Specific Open Defects

This sections lists the defects on the devices because of which some features relating to VNE might not work.

S no	Defect ID	Platform	Description
1	CSCtq36525	Nexus 7000	Nexus 7000 - Wrong PID is shown in telnet result for all SFP's available
2	CSCts31097	Cisco 7200	ATM IMA modeling issues for pa-ima-e1
3	CSCts79008	Nexus 5000	Memory usage information is missing in Nexus5K
4	CSCtw65605	Nexus 1000	ANA3.7.XDP9: VEM modules status missing in Nexus1000V
5	CSCtw77988	ASR 9000	ASR9k: missing bundle interface under Ethernet link agg in logical inven

5.2 Cisco Prime Network-Specific Open Defects

S no	Defect ID	Description
1	CSCua11460	Power down on 0/0/CPU0, Status is shown as UP
2	CSCua62184	Wrong Ethernet type Heading for 100GE port
3	CSCua35492	Chassis disconnected ticket is not cleared on Satellite OIR
4	CSCua31363	Server ports and uplink Ethernet ports are showing wrong' Mode' in UCS
5	CSCua33760	Back plane and Fabric ports state is not updated when IOcardinaccessable
6	CSCua02240	ATM traffic profiles are not modeled
7	CSCub10660	different maps for 4 similar cards
8	CSCub26195	RuntimeException: Duplicated XID error while modeling ASR903
9	CSCub18672	PN- delete sub-interface at cisco7201 will not take effect on E-VNE
10	CSCub23938	MPLS TE Tunnel down/up syslog isn't correlated to MPLS TE Tunnel down/up
11	CSCub23977	Problem in MplsTable modeling of Cisco 7200 & 7500

5.2.1 Disabling Access list registration of ASR 5000 in Prime Network 3.8

ASR5000 ACL shows Out of Bound error in GUI ANA3.8. To prevent the exception being shown in the GUI, execute the following steps.

1. Log in as Prime Network user to CISCO PRIME NETWORK Gateway

2. Go the \$ANAHOME/Main/drivers directory in the Cisco Prime Network Gateway
3. Execute the following command

```
runRegTool.sh localhost set "site/cisco-router-asr5k-
productscheme/com.sheer.metrocentral.coretech.common.investigator.GenericForwardingInves
tigatort/accesslists container/enable" false
```

7 Appendix A

Devices Supported in Cisco-Others-v3.1.0.0.jar Supported Device

The following device series are supported by Cisco-Others-v3.1.0.0.jar

Routers	Switches
Cisco 1000 Series Routers	Cisco Catalyst 2900 Series Switches
Cisco 10000 Series Routers	Cisco Catalyst 2960 Series Switches
Cisco 800 Series Routers	Cisco Catalyst 3500 XL Series Switches
Cisco 1600 Series Routers	Cisco Catalyst 3550 Series Switches
Cisco 1700 Series Modular Access Routers	Cisco Catalyst 3560 Series Switches
Cisco 1800 Series Integrated Services Routers	Cisco Catalyst 3750 Series Switches
Cisco 2500 Series Routers	Cisco Catalyst 4000 Series Switches
Cisco 2600 Series Multiservice Platform Routers	Cisco Catalyst 4500 Series Switches
Cisco 2800 Series Integrated Services Routers	Cisco Catalyst 5000 Series Switches
Cisco 3600 Series Multiservice Platform Routers	Cisco Catalyst 6500 Series (CatOS) Switches
Cisco 3700 Series Multiservice Access Routers	Cisco ME 6500 Series Ethernet Switches (6524)
Cisco 3800 Series Integrated Services Routers	Cisco Service Control Engines
Cisco 4700 Series Routers	
Access Servers Gateways, Security Appliances, and Generic Devices	
Cisco Access Server 5800 Series	
Cisco AS5300 Series Universal Gateways	

8 Appendix B

Specifying IP Addresses for which SNMP Trap and Syslog Events

On many occasions, SNMP syslog's are generated with source IP address other than the management IP address. In this case, the IP address has to be added in the "Events" tab while adding the VNE to the Server, so that Cisco Prime Network associates the events to the appropriate VNE

8.1.1.1 Reduced VNE Polling support for Nexus 7000

Configuration Tasks for Nexus 7000 reduced polling VNE Creation

- Choose "Reduced Polling (event-based)* " in "Polling Method" pane under "Polling Tab" of the VNE Creation window
- All VDC should be configured with Cisco Prime Network Management server IP address.
- The Cisco Prime Network Management IP address of each VDC should be added in the Event-Generating IP addresses box which appears in the "Events" Tab of the VNE Creation window

- Logging should be enabled on Nexus 7000 (default vdc as well as non-default vdc's) and add the IP address of Cisco Prime Network Server as logging server host.

Nexus7K(config)# logging server <Cisco Prime Network server IP address> 5 use-vrf <Cisco Prime Network Management VRF>

8.1.1.2 Support for ACE Card (Cisco 7600) Events

Add the source IP address of the event generated from ACE card residing on the 7600 chassis as mentioned in Sec 8.1.1.1
