

AmbironTrustWave PCI Compliance Services

Company Overview

AmbironTrustWave (ATW) is a leading provider of information security and compliance management solutions that help customers mitigate risk by validating compliance with numerous regulatory requirements, including the Payment Card Industry Data Security Standard (PCI DSS). AmbironTrustWave clients include financial organizations, retailers, global electronic exchanges, educational institutions, business services firms, and government agencies. The company is headquartered in Chicago with offices throughout the United States, Europe and the Asia Pacific region.

Partner Solution Description

AmbironTrustWave is one of a select group of companies approved by the PCI Security Standards Council (www.pcisecuritystandards.org) as a Qualified Data Security Company (QDSC), holding the designation of both a Qualified Security Assessor (QSA) and an Approved Scanning Vendor (ASV). As such, the company is able to provide retailers with comprehensive, onsite compliance assessments as required by the PCI DSS. Assessment services include benchmarking, gap analysis, risk assessment, and remediation reporting, including in-depth assessments of critical infrastructure, networks, and application code. Since 2001, the company has performed more than 2000 Level 1, 2, and 3 assessments for merchants and service providers. AmbironTrustWave is also the only company authorized by all major card associations to validate compliance, scan merchants, and provide computer forensic services. To date, the majority of Visa's Payment Application Best Practices (PABP)-compliant application vendors were validated through AmbironTrustWave's TrustedAppSM service.

AmbironTrustWave's solution set works with the Cisco[®] PCI Solution for Retail, which includes a set of recommended and configured architectures that incorporate Cisco and partner technology. These architectures support highly secure transport for point-of-sale (POS) traffic, such as credit card data, cardholder information, transaction logs, and database records.

Core Components of the Partner Solution

AmbironTrustWave solutions include compliance, vulnerability detection and analysis, content discovery and review, and brand protection services:

Compliance Management

AmbironTrustWave's TrustKeeper[®] solution provides vulnerability assessment and compliance management, including proactive identification and addressing of security vulnerabilities.

Vulnerability and Threat Management

TrustedSentrySM provides vulnerability scanning of critical internal devices that sit behind a firewall, as well as state-of-the-art intrusion detection that alerts staff of any unauthorized activity within their IT environment.

Managed Security Services

TrustSentry[®] enables companies to upgrade their environments to best-of-breed solutions and experienced professional services without having to acquire in-house talent.

Executive Summary

Partner Designation

- Registered Channel Partner
- BAPP Pilot partner-PCI Solution Partner

Associated Cisco Solution

- Cisco PCI Solution for Retail
- Cisco Self-Defending Network

Customer Benefits

- Accelerate PCI Compliance auditing process
- Enhance company security posture
- Improve risk management capabilities
- Enable highly secure and new business initiatives
- Strengthen shopping security

Targeted Industries

Retail

Geographical Regions Served

Assessments

AmbironTrustWave's assessment services measure IT defense effectiveness against threats and in accord with current regulatory guidance. Assessments are performed by AmbironTrustWave's SpiderLabsSM, a specialized internal group that focuses on technical security assessments and cyber-crime investigations.

Incident Response

ATW's SpiderLabs incident response and forensics experts help organizations respond to data security breaches and support their litigation efforts.
