

## Cybertrust PCI Compliance Services

### Company Overview

Cybertrust is the global information security specialist, delivering services that secure critical data, protect identities, and help customers demonstrate ongoing compliance. Cybertrust helps customers align information security with business objectives, using their existing resources. Headquartered in Herndon, Virginia, with offices around the world, Cybertrust is one of the world's largest information security providers and is a global market leader in managed security services.

### Partner Solution Description

Cybertrust is one of a select group of companies approved by the Payment Card Industry (PCI) Security Standards Council ([www.pcisecuritystandards.org](http://www.pcisecuritystandards.org)) as a Qualified Data Assessor (QSA). It is also an approved assessor for MasterCard, Visa, American Express, and other major credit card issuers. Cybertrust has applied its comprehensive security knowledge and expertise to provide a full PCI Data Security Standard audit of the Cisco® PCI Solution for Retail, which includes a set of recommended and configured architectures that incorporate Cisco and partner technology. These architectures support highly secure transport for point-of-sale (POS) traffic, such as credit card data, cardholder information, transaction logs, and database records.

### Core Components of the Partner Solution

In addition to providing a full range of managed services, professional services, and enabling technologies, the company helps customers achieve PCI compliance through its Online Compliance Program and Site Assessments. Cybertrust also provides investigative and forensic expertise, and can help a company prepare for, manage, and respond to any actual or suspected occurrence of a computer security incident. Specific PCI Compliance Services include:

- **PCI Acquiring Banks**—Online assessment service that helps PCI acquiring banks monitor PCI compliance for their thousands of vendors, merchants, processors, and payment service providers (PSPs).
- **PCI Merchants and Service Providers**—Online compliance program that enables merchants and PSPs to assess their PCI compliance status and address gaps.
- **PCI Onsite Assessments**—Onsite audit service that assesses the effectiveness of existing security controls, including those that safeguard the integrity of customer data as required by the PCI Data Security Standard.

### Related Cisco Products

- **Integrated Services Router:** Cisco routers integrate advanced communications and security capabilities
- **Network Management:** Cisco Security Monitoring, Analysis, and Response System and other products support network reporting, provisioning, policy and change management, and workflow tracking
- **Security:** Cisco ASA 5500 Series Adaptive Security Appliances offer firewall, Anti-X, intrusion prevention, and VPN capabilities
