

SOLUTION HIGHLIGHTS

- Simple, menu-based access to key functions lets employees get on with their work without needing access to a computer
- Effective policy enforcement — early and late punches can be restricted when configured accordingly

Convenient access

Employees can punch in and out, transfer, and view their schedules — right from a Cisco IP phone.

Easy to install

Requires no modification to your existing Workforce Central 6.1 system.

Simple to configure

Configure using Cisco Unified Communications Manager or Cisco Unified Communications Manager Express.

Kronos everywhere

Kronos Time Capture for Cisco is part of an ongoing Kronos initiative to provide our award-winning workforce management solutions on a wide array of devices, creating a more flexible data-collection network.

Extend the Value of Your Cisco Unified Communications Investment

Now you can do even more with your Cisco® Unified Communications system. Innovative technology gives you the power to integrate Kronos® capabilities into your Cisco IP phones, so you can take advantage of many advanced workforce management functions — without even using a computer.

Kronos Time Capture for Cisco

Kronos Time Capture for Cisco brings the power of Workforce Central® directly to your Cisco Unified Communications system. With a few quick pushes of the button, your employees can access the most commonly used Workforce Central functions — right from their phones.

Based on the Cisco Unified Communications Manager platform, this tool is simple to configure, requiring absolutely no changes to your existing Workforce Central 6.1 system. Using Cisco Unified Communications Manager or Cisco Unified Communications Manager Express, you control which phones will have access to the service. The Time Capture function is accessible from the services menu, or it can be configured as a speed-dial button.

Employees can punch, perform a labor account transfer, or view their schedules for the current or next period. Punches and transfers can enforce restrictions for any employee whose profile specifies timestamp restrictions.

System requirements

Workforce Central 6.1 with the Workforce Central server network available from the Cisco Unified Communication Manager.

- A Cisco IP phone system running either Cisco Unified Communications Manager 6.1.5 or 7.1.5 or Cisco Unified Communications Manager Express 7.1.
- Cisco IP phones of the following models: 7945, 7960, 7961, 7965, 7970, 7971, 7975. IP Communicator is also supported, but not required. Other models may be compatible; contact Kronos to determine if a specific phone will work with this product.
