

## PushToTalk: The Walkie-Talkie Application for 7921 Phones

Berbee's PushToTalk-The Walkie Talkie application designed for Cisco 7921 phones. Simply press the PushToTalk side button to begin your PushToTalk session. (PushToTalk also works with most Cisco IP desk phones.)

### Business Considerations

- Increase communication efficiency.
- Manage a single infrastructure.
- Reduce dependence on cellular walkie-talkie plans.
- Expand walkie-talkie functionality to desktop phones by including them in PushToTalk phone groups.
- Administrator can centrally manage, monitor, and control phone groups and PTT sessions.

### Features and Benefits

- Groups may consist of any combination of supported phones.
- No limit to the number of phone groups and no limit to the number of phones in a given phone group.
- One-to-One allows for quick PTT session with a single user.
- Alert Tone-Users notified of initiation and conclusion of session by alert tones.
- Any user can exit the PushToTalk session at anytime.
- Users on PTT session can answer a phone call and re-join the session once phone call ends.
- Phone Display shows name and number of person talking.
- PTT skips any phones in use at time of initiation.
- Initiator can display list of users in session.
- PushToTalk sessions set-up as optional or automatic. Optional allows users to Accept or Reject the session. Automatic immediately joins the session.

### Typical Uses

- **Emergency Conferences.** Initiate a PushToTalk session during an emergency situation to give and receive instructions and information.
- **Selective communications.** Organize devices (phones) into logical phone groups. (e.g. Branch Manager Group, Security Group, or a Marketing Group).
- **Medical Facility Communications.** Immediate communication line for groups of nurses, physicians, or medical departments.
- **Retail Staff Communications.** Keep floor staff in contact with the office and with each other. Allows for quick response to customer requests.

### Requirements

- Windows 2000 or 2003 Pentium-class server.
- 2.5 GHz processor and 1 GB RAM.
- CallManager v4.0 (or newer).
- Multicast-enabled network.

### Cisco Phone Compatibility

- 7905/06                      • 7911/12
- 7920/21                     • 7940/41
- 7960/61                     • 7970/71

### Ordering

PushToTalk is sold based on the number of phones in blocks of 50, 250, and 1000.

**Part Numbers:** IPTA-PTT50, IPTA-PTT250, or IPTA-PTT1000 (includes first year of maintenance). (Available from Berbee, Ingram Micro and Comstor).
