"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a

file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.198 mysql-connector-j 8.0.33

### 1.198.1 Available under license :

Licensing Information User Manual

MySQL Connector/J 8.0

---

Introduction

This License Information User Manual contains Oracle's product license and other licensing information, including licensing information for third-party software which may be included in this distribution of MySQL Connector/J 8.0.

Last updated: February 2023

## Licensing Information

This is a release of MySQL Connector/J 8.0, brought to you by the MySQL team at Oracle. This software is released under version 2 of the GNU General Public License (GPLv2), as set forth below, with the following additional permissions:

This distribution of MySQL Connector/J 8.0 is distributed with certain software that is licensed under separate terms, as designated in a particular file or component or in the license documentation. Without limiting your rights under the GPLv2, the authors of MySQL hereby grant you an additional permission to link the program and your derivative works with the separately licensed software that they have included with the program.

Without limiting the foregoing grant of rights under the GPLv2 and additional permission as to separately licensed software, this Connector is also subject to the Universal FOSS Exception, version 1.0, a copy of which is reproduced below and can also be found along with its FAQ at <http://oss.oracle.com/licenses/universal-foss-exception>.

Copyright (c) 2017, 2023, Oracle and/or its affiliates.

## Election of GPLv2

For the avoidance of doubt, except that if any license choice other than GPL or LGPL is available it will apply instead, Oracle elects to use only the General Public License version 2 (GPLv2) at this time for any software where a choice of GPL license versions is made available with the language indicating that GPLv2 or any later version may be used, or where a choice of which version of the GPL is applied is otherwise unspecified.

## GNU General Public License Version 2.0, June 1991

The following applies to all products licensed under the GNU General Public License, Version 2.0: You may not use the identified files except in compliance with the GNU General Public License, Version 2.0 (the "License.") You may obtain a copy of the License at <http://www.gnu.org/licenses/gpl-2.0.txt>. A copy of the license is also reproduced below. Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

## GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim  
copies of this license document, but changing it is not  
allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the

Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding

those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the program's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author  
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details  
type 'show w'. This is free software, and you are welcome  
to redistribute it under certain conditions; type 'show c'  
for details.
```

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

=====  
=====

#### The Universal FOSS Exception, Version 1.0

In addition to the rights set forth in the other license(s) included in the distribution for this software, data, and/or documentation (collectively the "Software", and such licenses collectively with this additional permission the "Software License"), the copyright holders wish to facilitate interoperability with other software, data, and/or documentation distributed with complete corresponding source under a license that is OSI-approved and/or categorized by the FSF as free (collectively "Other FOSS"). We therefore hereby grant the following additional permission with respect to the use and distribution of the Software with Other FOSS, and the constants, function signatures, data structures and other invocation methods used to run or interact with each of them (as to each, such software's "Interfaces"):

- i. The Software's Interfaces may, to the extent permitted by the license of the Other FOSS, be copied into, used and distributed in the Other FOSS in order to enable interoperability, without requiring a change to the license of the Other FOSS other than as to any Interfaces of the Software embedded therein. The Software's Interfaces remain at all times under the Software License, including without limitation as used in the Other FOSS (which upon any such use also then contains a portion of the Software under the Software License).
- ii. The Other FOSS's Interfaces may, to the extent permitted by the license of the Other FOSS, be copied into, used and distributed in

the Software in order to enable interoperability, without requiring that such Interfaces be licensed under the terms of the Software License or otherwise altering their original terms, if this does not require any portion of the Software other than such Interfaces to be licensed under the terms other than the Software License.

iii. If only Interfaces and no other code is copied between the Software and the Other FOSS in either direction, the use and/or distribution of the Software with the Other FOSS shall not be deemed to require that the Other FOSS be licensed under the license of the Software, other than as to any Interfaces of the Software copied into the Other FOSS. This includes, by way of example and without limitation, statically or dynamically linking the Software together with Other FOSS after enabling interoperability using the Interfaces of one or both, and distributing the resulting combination under different licenses for the respective portions thereof.

For avoidance of doubt, a license which is OSI-approved or categorized by the FSF as free, includes, for the purpose of this permission, such licenses with additional permissions, and any license that has previously been so approved or categorized as free, even if now deprecated or otherwise no longer recognized as approved or free. Nothing in this additional permission grants any right to distribute any portion of the Software on terms other than those of the Software License or grants any additional permission of any kind for use or distribution of the Software in conjunction with software other than Other FOSS.

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

## 1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial code and documentation

distributed under this Agreement, and

b) in the case of each subsequent Contributor:

i) changes to the Program, and

ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to

the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

## 2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license

set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and
- b) its license agreement:
  - i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;
  - ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;
  - iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and
  - iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
- b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such

Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

## 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

#### Standard Licenses

GNU Lesser General Public License v2.1, February 1999

The following applies to all products licensed under the GNU Lesser General Public License, Version 2.1: You may not use the identified files except in compliance with the GNU Lesser General Public License, Version 2.1 (the "License"). You may obtain a copy of the License at <http://www.gnu.org/licenses/lgpl-2.1.html>. A copy of the license is also reproduced below. Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing

permissions and limitations under the License.

## GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA  
Everyone is permitted to copy and distribute verbatim copies  
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts  
as the successor of the GNU Library Public License, version 2, hence  
the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your  
freedom to share and change it. By contrast, the GNU General Public  
Licenses are intended to guarantee your freedom to share and change  
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some  
specially designated software packages--typically libraries--of the  
Free Software Foundation and other authors who decide to use it. You  
can use it too, but we suggest you first think carefully about whether  
this license or the ordinary General Public License is the better  
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,  
not price. Our General Public Licenses are designed to make sure that  
you have the freedom to distribute copies of free software (and charge  
for this service if you wish); that you receive source code or can get  
it if you want it; that you can change the software and use pieces of  
it in new free programs; and that you are informed that you can do  
these things.

To protect your rights, we need to make restrictions that forbid  
distributors to deny you these rights or to ask you to surrender these  
rights. These restrictions translate to certain responsibilities for  
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis  
or for a fee, you must give the recipients all the rights that we gave  
you. You must make sure that they, too, receive or can get the source  
code. If you link other code with the library, you must provide  
complete object files to the recipients, so that they can relink them  
with the library after making changes to the library and recompiling  
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library

to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

#### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not

covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If

identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding

machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library

facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by

all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free

Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

##### How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
<one line to give the library's name and a brief idea of what it does.>  
Copyright (C) <year> <name of author>
```

This library is free software; you can redistribute it and/or

modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990  
Ty Coon, President of Vice

That's all there is to it!

#### Written Offer for Source Code

For any software that you receive from Oracle in binary form which is licensed under an open source license that gives you the right to receive the source code for that binary, you can obtain a copy of the applicable source code by visiting <http://www.oracle.com/goto/opensourcecode>. If the source code for the binary was not provided to you with the binary, you can also receive a copy of the source code on physical media by submitting a written request to the address listed below or by sending an email to Oracle using the following link:  
<http://www.oracle.com/goto/opensourcecode/request>.

Oracle America, Inc.  
Attn: Senior Vice President  
Development and Engineering Legal

500 Oracle Parkway, 10th Floor  
Redwood Shores, CA 94065

Your request should include:

- \* The name of the binary for which you are requesting the source code
- \* The name and version number of the Oracle product containing the binary
- \* The date you received the Oracle product
- \* Your name
- \* Your company name (if applicable)
- \* Your return mailing address and email, and
- \* A telephone number in the event we need to reach you.

We may charge you a fee to cover the cost of physical media and processing.

Your request must be sent

- a. within three (3) years of the date you received the Oracle product that included the binary that is the subject of your request, or
- b. in the case of code licensed under the GPL v3 for as long as Oracle offers spare parts or customer support for that product model.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
2. You must cause any modified files to carry prominent notices stating that You changed the files; and
3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such

third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

given its low and high 32-bit\n * values as *signed* integers. See the from* functions below for more\n *
convenient ways of constructing Longs.\n * \n * The internal representation of a long is the two given signed, 32-bit
values.\n * \n * We use 32-bit pieces because these are the size of integers on which\n * Javascript performs bit-
operations. For operations like addition and\n * multiplication, we split each number into 16-bit pieces, which can
easily be\n * multiplied within Javascript's floating-point representation without overflow\n * or change in sign.\n
*\n * \n * In the algorithms below, we frequently reduce the negative case to the\n * positive case by negating the
input(s) and then post-processing the result.\n * \n * Note that we must ALWAYS check specially whether those values
are MIN_VALUE\n * (-2^63) because -MIN_VALUE == MIN_VALUE (since 2^63 cannot be represented as\n * a
positive number, it overflows back into a negative). Not handling this\n * case would often result in infinite
recursion.\n * \n * @param {number} low The low (signed) 32 bits of the long.\n * @param {number} high The
high (signed) 32 bits of the long.\n * @constructor\n * @final\n */\n\nKotlin.Long = function(low, high) {\n  /**\n

```

public fun ByteArray.sortedWith(comparator: Comparator<in Byte>): List<Byte> {
    return

```

`toArray().apply { sortBy(comparator) }.asList()` Returns a list of all elements sorted according to the specified [comparator].

`ShortArray.sortedWith(comparator: Comparator<in Short>): List<Short>` Returns a list of all elements sorted according to the specified [comparator].

`IntArray.sortedWith(comparator: Comparator<in Int>): List<Int>` Returns a list of all elements sorted according to the specified [comparator].

`LongArray.sortedWith(comparator: Comparator<in Long>): List<Long>` Returns a list of all elements sorted according to the specified [comparator].

`FloatArray.sortedWith(comparator: Comparator<in Float>): List<Float>` Returns a list of all elements sorted according to the specified [comparator].

`DoubleArray.sortedWith(comparator: Comparator<in Double>): List<Double>` Returns a list of all elements sorted according to the specified [comparator].

`BooleanArray.sortedWith(comparator: Comparator<in Boolean>): List<Boolean>` Returns a list of all elements sorted according to the specified [comparator].

`CharArray.sortedWith(comparator: Comparator<in Char>): List<Char>` Returns a [List] that wraps the original array.

`Array<out T>.asList(): List<T>` Returns a [List] that wraps the original array.

`ByteArray.asList(): List<Byte>` Returns a [List] that wraps the original array.

`ShortArray.asList(): List<Short>` Returns a [List] that wraps the original array.

`IntArray.asList(): List<Int>` Returns a [List] that wraps the original array.

`LongArray.asList(): List<Long>` Returns a [List] that wraps the original array.

`FloatArray.asList(): List<Float>` Returns a [List] that wraps the original array.

`DoubleArray.asList(): List<Double>` Returns a [List] that wraps the original array.

`BooleanArray.asList(): List<Boolean>` Returns a [List] that wraps the original array.

`CharArray.asList(): List<Char>` Returns `true` if the two specified arrays are *deeply* equal to one another, i.e. contain the same number of the same elements in the same order. If two corresponding elements are nested arrays, they are also compared deeply. If any of arrays contains itself on any nesting level the behavior is undefined. The elements of other types are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1") public expect infix fun <T> Array<out T>.contentDeepEquals(other: Array<out T>): Boolean` Returns a hash code based on the contents of this array as if it is [List]. Nested arrays are treated as lists too. If any of arrays contains itself on any nesting level the behavior is undefined.

`@SinceKotlin("1.1") public expect fun <T> Array<out T>.contentDeepHashCode(): Int` Returns a string representation of the contents of this array as if it is a [List]. Nested arrays are treated as lists too. If any of arrays contains itself on any nesting level that reference is rendered as `"[...]"` to prevent recursion.

`@sample samples.collections.Arrays.ContentOperations.contentDeepToString`

`@SinceKotlin("1.1") public expect fun <T> Array<out T>.contentDeepToString(): String` Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. The elements are compared for equality with the `[equals][Any.equals]` function. For floating point numbers it means that `NaN` is equal to itself and `-0.0` is not equal to `0.0`.

`@SinceKotlin("1.1") public expect infix fun <T> Array<out T>.contentEquals(other: Array<out T>): Boolean` Returns `true` if the two specified arrays are *structurally* equal to one another, i.e. contain the same number of the same elements in the same order. @param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R> DoubleArray.mapIndexed(transform: (index: Int, Double) -> R): List<R> {
    return mapIndexedTo(ArrayList<R>(size), transform)
}
```

Returns a list containing the results of applying the given [transform] function to each element and its index in the original array.

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R> BooleanArray.mapIndexed(transform: (index: Int, Boolean) -> R): List<R> {
    return mapIndexedTo(ArrayList<R>(size), transform)
}
```

Returns a list containing the results of applying the given [transform] function to each element and its index in the original array.

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R> CharArray.mapIndexed(transform: (index: Int, Char) -> R): List<R> {
    return mapIndexedTo(ArrayList<R>(size), transform)
}
```

Returns a list containing only the non-null results of applying the given [transform] function to each element and its index in the original array.

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <T, R : Any> Array<out T>.mapIndexedNotNull(transform: (index: Int, T) -> R?): List<R> {
    return mapIndexedNotNullTo(ArrayList<R>(), transform)
}
```

Applies the given [transform] function to each element and its index in the original array and appends only the non-null results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <T, R : Any, C : MutableCollection<in R>> Array<out T>.mapIndexedNotNullTo(destination: C, transform: (index: Int, T) -> R?): C {
    forEachIndexed { index, element -> transform(index, element)?.let { destination.add(it) } }
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <T, R, C : MutableCollection<in R>> Array<out T>.mapIndexedTo(destination: C, transform: (index: Int, T) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(index++, item))
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R, C : MutableCollection<in R>> ByteArray.mapIndexedTo(destination: C, transform: (index: Int, Byte) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(index++, item))
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R, C : MutableCollection<in R>> ShortArray.mapIndexedTo(destination: C, transform: (index: Int, Short) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(index++, item))
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R, C : MutableCollection<in R>> IntArray.mapIndexedTo(destination: C, transform: (index: Int, Int) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(index++, item))
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

@param [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

```
public inline fun <R, C : MutableCollection<in R>> LongArray.mapIndexedTo(destination: C, transform: (index: Int, Long) -> R): C {
    var index = 0
    for (item in this)
        destination.add(transform(index++, item))
    return destination
}
```

Applies the given [transform] function to each element and its index in the original array and appends the results to the given [destination].

containing all elements that are contained by both this array and the specified collection.

`intersect(other: Iterable<Char>): Set<Char>` {`val set = this.toMutableSet()` `set.retainAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<T>): Set<T>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Byte>): Set<Byte>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Short>): Set<Short>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Int>): Set<Int>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Long>): Set<Long>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Float>): Set<Float>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Double>): Set<Double>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Boolean>): Set<Boolean>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a set containing all elements that are contained by this array and not contained by the specified collection.

`subtract(other: Iterable<Char>): Set<Char>` {`val set = this.toMutableSet()` `set.removeAll(other)` `return set`}

Returns a mutable set containing all distinct elements from the given array.

`toMutableSet(): MutableSet<T>` {`val set = LinkedHashSet<T>(mapCapacity(size))` `for (item in this) set.add(item)` `return set`}

Returns a mutable set containing all distinct elements from the given array.

`toMutableSet(): MutableSet<Byte>` {`val set = LinkedHashSet<Byte>(mapCapacity(size))` `for (item in this) set.add(item)` `return set`}

Returns a mutable set containing all distinct elements from the given array.

`toMutableSet(): MutableSet<Short>` {`val set = LinkedHashSet<Short>(mapCapacity(size))` `for (item in this) set.add(item)` `return set`}

Returns a mutable set containing all distinct elements from the given array.

`toMutableSet(): MutableSet<Int>` {`val set = LinkedHashSet<Int>(mapCapacity(size))` `for (item in this) set.add(item)` `return set`}

Returns a mutable set containing all distinct elements from the given array.

`toMutableSet(): MutableSet<Long>` {`val set = LinkedHashSet<Long>(mapCapacity(size))` `for`

```

    return last as T
}

Returns last index of [element], or -1 if the sequence does not contain element.

The operation is _terminal_.

public fun <@kotlin.internal.OnlyInputTypes T> Sequence<T>.lastIndexOf(element: T): Int {
    var lastIndex = -1
    var index = 0
    for (item in this) {
        checkIndexOverflow(index)
        if (element == item)
            lastIndex = index
        index++
    }
    return lastIndex
}

Returns the last element, or `null` if the sequence is empty.

The operation is _terminal_.

public fun <T> Sequence<T>.lastOrNull(): T? {
    val iterator = iterator()
    if (!iterator.hasNext())
        return null
    var last = iterator.next()
    while (iterator.hasNext())
        last = iterator.next()
    return last
}

Returns the last element matching the given [predicate], or `null` if no such element was found.

The operation is _terminal_.

public inline fun <T> Sequence<T>.lastOrNull(predicate: (T) -> Boolean): T? {
    var last: T? = null
    for (element in this) {
        if (predicate(element))
            last = element
    }
    return last
}

Returns the single element, or throws an exception if the sequence is empty or has more than one element.

The operation is _terminal_.

public fun <T> Sequence<T>.single(): T {
    val iterator = iterator()
    if (!iterator.hasNext())
        throw NoSuchElementException("Sequence is empty.")
    val single = iterator.next()
    if (iterator.hasNext())
        throw IllegalArgumentException("Sequence has more than one element.")
    return single
}

Returns the single element matching the given [predicate], or throws exception if there is no or more than one matching element.

The operation is _terminal_.

public inline fun <T> Sequence<T>.single(predicate: (T) ->

```

```

Boolean): T {
    var single: T? = null
    var found = false
    for (element in this) {
        if (predicate(element))
            if (found) throw IllegalArgumentException("Sequence contains more than one matching element.")
            single = element
            found = true
    }
    if (!found) throw NoSuchElementException("Sequence contains no element matching the predicate.")
    @Suppress("UNCHECKED_CAST")
    return single as T
}

Returns single element, or `null` if the sequence is empty or has more than one element.

The operation is _terminal_.

public fun <T> Sequence<T>.singleOrNull(): T? {
    val iterator = iterator()
    if (!iterator.hasNext())
        return null
    val single = iterator.next()
    if (iterator.hasNext())
        return null
    return single
}

Returns the single element matching the given [predicate], or `null` if element was not found or more than one element was found.

The operation is _terminal_.

public inline fun <T> Sequence<T>.singleOrNull(predicate: (T) -> Boolean): T? {
    var single: T? = null
    var found = false
    for (element in this) {

        n == 0 -> this
        this is DropTakeSequence -> this.drop(n)
        else -> DropSequence(this, n)
    }
}

Returns a sequence containing all elements except first elements that satisfy the given [predicate].

The operation is _intermediate_ and _stateless_.

sample
samples.collections.Collections.Transformations.dropWhile

public fun <T> Sequence<T>.dropWhile(predicate: (T) -> Boolean): Sequence<T> {
    return DropWhileSequence(this, predicate)
}

Returns a sequence containing only elements matching the given [predicate].

The operation is _intermediate_ and _stateless_.

public fun <T> Sequence<T>.filter(predicate: (T) -> Boolean): Sequence<T> {
    return FilteringSequence(this, true, predicate)
}

Returns a sequence containing only elements matching the given [predicate].

@param [predicate] function that takes the index of an element and the element itself
and returns the result of predicate evaluation on the element.

The operation is _intermediate_ and _stateless_.

public fun <T> Sequence<T>.filterIndexed(predicate: (index: Int, T) -> Boolean): Sequence<T> {
    // TODO: Rewrite with generalized MapFilterIndexingSequence
    return TransformingSequence(FilteringSequence(IndexingSequence(this), true, { predicate(it.index, it.value) }), { it.value })
}

Appends all elements matching the given [predicate] to the given [destination].

@param [predicate] function that takes the index of an element and the element itself
and returns the result of predicate evaluation on the element.

The operation is _terminal_.

public inline fun <T, C : MutableCollection<in T>> Sequence<T>.filterIndexedTo(destination: C, predicate: (index: Int, T) -> Boolean): C {
    forEachIndexed { index, element ->
        if (predicate(index, element)) destination.add(element)
    }
    return destination
}

Returns a sequence containing all elements that are instances of specified type parameter R.

The operation is _intermediate_ and _stateless_.

public inline fun <reified R> Sequence<*>.filterIsInstance(): Sequence<@kotlin.internal.NoInfer R> {
    @Suppress("UNCHECKED_CAST")
    return filter { it is R } as Sequence<R>
}

Appends all elements that are instances of specified type parameter R to the given [destination].

The operation is _terminal_.

public inline fun <reified R, C : MutableCollection<in R>> Sequence<*>.filterIsInstanceTo(destination: C): C {
    for (element in this) if (element is R) destination.add(element)
    return destination
}

Returns a sequence containing all elements not matching the given [predicate].

The operation is _intermediate_ and _stateless_.

public fun <T> Sequence<T>.filterNot(predicate: (T) -> Boolean): Sequence<T> {
    return FilteringSequence(this, false, predicate)
}

Returns a sequence containing all elements that are not `null`.

The operation is _intermediate_ and _stateless_.

public fun <T : Any> Sequence<T?>.filterNotNull(): Sequence<T> {
    @Suppress("UNCHECKED_CAST")
    return filterNot { it == null } as Sequence<T>
}

Appends all elements that are not `null` to the given [destination].

The operation is _terminal_.

public fun <C :

```

```

Returns a sequence containing the results of applying the given [transform] function to each element in the original sequence.

The operation is `_intermediate_` and `_stateless_`.

`@sample`

```
samples.collections.Collections.Transformations.map
public fun <T, R> Sequence<T>.map(transform: (T) -> R): Sequence<R> {
    return TransformingSequence(this, transform)
}
```

Returns a sequence containing the results of applying the given [transform] function to each element and its index in the original sequence.

`@param` [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_intermediate_` and `_stateless_`.

`@public fun <T, R> Sequence<T>.mapIndexed(transform: (index: Int, T) -> R): Sequence<R> {
 return TransformingIndexedSequence(this, transform)
}`

Returns a sequence containing only the non-null results of applying the given [transform] function to each element and its index in the original sequence.

`@param` [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_intermediate_` and `_stateless_`.

`@public fun <T, R : Any> Sequence<T>.mapIndexedNotNull(transform: (index: Int, T) -> R?): Sequence<R> {
 return TransformingIndexedSequence(this, transform).filterNotNull()
}`

Applies the given [transform] function to each element and its index in the original sequence and appends only the non-null results to the given [destination].

`@param` [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_terminal_`.

`@public inline fun <T, R : Any, C : MutableCollection<in R>> Sequence<T>.mapIndexedNotNullTo(destination: C, transform: (index: Int, T) -> R?): C {
 forEachIndexed { index, element -> transform(index, element)?.let { destination.add(it) } }
 return destination
}`

Applies the given [transform] function to each element and its index in the original sequence and appends the results to the given [destination].

`@param` [transform] function that takes the index of an element and the element itself and returns the result of the transform applied to the element.

The operation is `_terminal_`.

`@public inline fun <T, R, C : MutableCollection<in R>> Sequence<T>.mapIndexedTo(destination: C, transform: (index: Int, T) -> R): C {
 var index = 0
 for (item in this)
 destination.add(transform(checkIndexOverflow(index++), item))
 return destination
}`

Returns a sequence containing only the non-null results of applying the given [transform] function to each element in the original sequence.

The operation is `_intermediate_` and `_stateless_`.

`@public fun <T, R : Any> Sequence<T>.mapNotNull(transform: (T) -> R?): Sequence<R> {
 return TransformingSequence(this, transform).filterNotNull()
}`

Applies the given [transform] function to each element in the original sequence and appends only the non-null results to the given [destination].

The operation is `_terminal_`.

`@public inline fun <T, R : Any, C : MutableCollection<in R>> Sequence<T>.mapNotNullTo(destination: C, transform: (T) -> R?): C {
 forEach { element -> transform(element)?.let { destination.add(it) } }
 return destination
}`

Applies the given [transform] function to each element of the original sequence and appends the results to the given [destination].

The operation is `_terminal_`.

`@public inline fun <T, R, C : MutableCollection<in R>> Sequence<T>.mapTo(destination: C, transform: (T) -> R): C {
 for (item in this)
 destination.add(transform(item))
 return destination
}`

Returns a sequence that wraps each element of the original sequence into an [IndexedValue] containing the index of that element and the element itself.

The operation is `_intermediate_` and `_stateless_`.

`@public fun <T> Sequence<T>.withIndex(): Sequence<IndexedValue<T>> {
 return IndexingSequence(this)
}`

Returns a sequence containing only distinct elements from the given sequence.

The elements in the resulting sequence are in the same order as they were in the source sequence.

The operation is `_intermediate_` and `_stateful_`.

`@sample`

```
samples.collections.Collections.Transformations.distinctAndDistinctBy
public fun <T> Sequence<T>.distinct(): Sequence<T> {
    return this.distinctBy { it }
}
```

Returns a sequence containing only elements from the given sequence having distinct keys returned by the given [selector] function.

The elements in the resulting sequence are in the same order as they were in the source sequence.

The operation is `_intermediate_` and `_stateful_`.

`@sample`

```
samples.collections.Collections.Transformations.distinctAndDistinctBy
public fun <T, K> Sequence<T>.distinctBy(selector: (T) -> K): Sequence<T> {
    return DistinctSequence(this, selector)
}
```

\* Returns a mutable set containing all distinct elements from the given sequence.

```

```

String.replaceAfterLast(delimiter: String, replacement: String, missingDelimiterValue: String = this): String {
    val index = lastIndexOf(delimiter)
    return if (index == -1) missingDelimiterValue else replaceRange(index +
    delimiter.length, length, replacement)
}

Replace part of string after the last occurrence of given
delimiter with the [replacement] string.
If the string does not contain the delimiter, returns
[missingDelimiterValue] which defaults to the original string.

public fun String.replaceAfterLast(delimiter:
Char, replacement: String, missingDelimiterValue: String = this): String {
    val index = lastIndexOf(delimiter)
    return if (index == -1) missingDelimiterValue else replaceRange(index + 1, length, replacement)
}

Replace part of string before the last occurrence of given delimiter with the [replacement] string.
If the string
does not contain the delimiter, returns [missingDelimiterValue] which defaults to the original string.

public fun String.replaceBeforeLast(delimiter: Char, replacement: String, missingDelimiterValue: String = this): String {
    val index = lastIndexOf(delimiter)
    return if (index == -1) missingDelimiterValue else replaceRange(0, index,
    replacement)
}

Replace part of string before the last occurrence of given delimiter with the
[replacement] string.
If the string does not contain the delimiter, returns [missingDelimiterValue] which defaults
to the original string.

public fun String.replaceBeforeLast(delimiter: String, replacement: String,
missingDelimiterValue: String = this): String {
    val index = lastIndexOf(delimiter)
    return if (index == -1)
    missingDelimiterValue else replaceRange(0, index, replacement)
}

public fun String.replace(oldChar: Char,
newChar: Char, ignoreCase: Boolean): String // JVM- and JS-specific
public fun String.replace(oldValue: String,
newValue: String, ignoreCase: Boolean): String // JVM- and JS-specific

Returns a new string obtained by
replacing each substring of this char sequence that matches the given regular expression
with the given
[replacement].
The [replacement] can consist of any combination of literal text and $-substitutions. To treat
the replacement string literally escape it with the [kotlin.text.Regex.Companion.escapeReplacement] method.

@kotlin.internal.InlineOnly
public inline fun CharSequence.replace(regex: Regex, replacement: String): String
= regex.replace(this, replacement)

Returns a new string obtained by replacing each substring of this char
sequence that matches the given regular expression
with the result of the given function [transform] that takes
[MatchResult] and returns a string to be used as a replacement for that match.

@kotlin.internal.InlineOnly
public inline fun CharSequence.replace(regex: Regex, noinline transform:
(MatchResult) -> CharSequence): String =
    regex.replace(this, transform)

Replaces the first
occurrence of the given regular expression [regex] in this char sequence with specified [replacement] expression.

@param replacement A replacement expression that can include substitutions. See [Regex.replaceFirst] for
details.

@kotlin.internal.InlineOnly
public inline fun CharSequence.replaceFirst(regex: Regex, replacement:
String): String = regex.replaceFirst(this, replacement)

Returns `true` if this char sequence matches the
given regular expression.

@kotlin.internal.InlineOnly
public inline infix fun CharSequence.matches(regex:
Regex): Boolean = regex.matches(this)

Implementation of [regionMatches] for CharSequences.
Invoked when it's already known that arguments are not Strings, so that no additional type checks are performed.

internal fun CharSequence.regionMatchesImpl(thisOffset: Int, other: CharSequence, otherOffset: Int, length: Int,
ignoreCase: Boolean): Boolean {
    if ((otherOffset < 0) || (thisOffset < 0) || (thisOffset > this.length - length) ||
    (otherOffset > other.length - length)) {
        return false
    }
    for (index in 0 until length) {
        if
        (!this[thisOffset + index].equals(other[otherOffset + index], ignoreCase)) {
            return false
        }
    }
    return
    true
}

Returns `true` if this char sequence starts with the specified character.

public fun
CharSequence.startsWith(char: Char, ignoreCase: Boolean = false): Boolean =
    this.length > 0 &&
    this[0].equals(char, ignoreCase)

Returns `true` if this char sequence ends with the specified character.

public fun
CharSequence.endsWith(char: Char, ignoreCase: Boolean = false): Boolean =
    this.length > 0 &&
    this[lastIndex].equals(char, ignoreCase)

Returns `true` if this char sequence starts with the specified
prefix.

public fun CharSequence.startsWith(prefix: CharSequence, ignoreCase: Boolean = false): Boolean {
    if (!ignoreCase && this is String && prefix is String)
        return this.startsWith(prefix)
    else
        return
        regionMatchesImpl(0, prefix, 0, prefix.length, ignoreCase)
}

Returns `true` if a substring of this char
sequence starting at the specified offset [startIndex] starts with the specified prefix.

public fun
CharSequence.startsWith(prefix: CharSequence, startIndex: Int, ignoreCase: Boolean = false): Boolean {
    if

```

OR CONDITIONS OF ANY KIND, either express or implied.  
 \* See the License for the specific language governing permissions and  
 \* limitations under the License.  
 \* Represents a parameter passed to a function or a property getter/setter,  
 \* including `this` and extension receiver parameters.  
 \* public interface KParameter : KAnnotatedElement {  
 \* 0-based index of this parameter in the parameter list of its containing callable.  
 \* public val index: Int  
 \* Name of this parameter as it was declared in the source code,  
 \* or `null` if the parameter has no name or its name is not available at runtime.  
 \* Examples of nameless parameters include `this` instance for member functions,  
 \* extension receiver for extension functions or properties, parameters of Java methods  
 \* compiled without the debug information, and others.  
 \* public val name: String?  
 \* Type of this parameter. For a `vararg` parameter, this is the type of the corresponding array,  
 \* not the individual element.  
 \* public val type: KType  
 \* Kind of this parameter.  
 \* public val kind: Kind  
 \* Kind represents a particular position of the parameter declaration in the source code,  
 \* such as an instance, an extension receiver parameter or a value parameter.  
 \* public enum class Kind {  
 \* Instance required to make a call to the member, or an outer class instance for an inner class constructor.  
 \* INSTANCE,  
 \* Extension receiver of an extension function or property.  
 \* EXTENSION\_RECEIVER,  
 \* Ordinary named value parameter.  
 \* VALUE,  
 \* }  
 \* `true` if this parameter is optional and can be omitted when making a call via [KCallable.callBy], or `false` otherwise.  
 \* A parameter is optional in any of the two cases:  
 \* 1. The default value is provided at the declaration of this parameter.  
 \* 2. The parameter is declared in a member function and one of the corresponding parameters in the super functions is optional.  
 \* public val isOptional: Boolean  
 \* `true` if this parameter is `vararg`.  
 \* See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/functions.html#variable-number-of-arguments) for more information.  
 \* @SinceKotlin("1.1")  
 \* public val isVararg: Boolean  
 \* Copyright 2010-2019 JetBrains s.r.o. and Kotlin Programming Language contributors.  
 \* Use of this source code is governed by the Apache 2.0 license that can be found in the license/LICENSE.txt file.  
 \* package kotlin.reflect  
 \* Represents a type. Type is usually either a class with optional type arguments,  
 \* or a type parameter of some declaration, plus nullability.  
 \* public interface KType : KAnnotatedElement {  
 \* The declaration of the classifier used in this type.  
 \* For example, in the type `List<String>` the classifier would be the [KClass] instance for [List].  
 \* Returns `null` if this type is not denotable in Kotlin, for example if it is an intersection type.  
 \* @SinceKotlin("1.1")  
 \* public val classifier: KClassifier?  
 \* Type arguments passed for the parameters of the classifier in this type.  
 \* For example, in the type `Array<out Number>` the only type argument is `out Number`.  
 \* In case this type is based on an inner class, the returned list contains the type arguments provided for the innermost class first,  
 \* then its outer class, and so on.  
 \* For example, in the type `Outer<A, B>.Inner<C, D>` the returned list is `[C, D, A, B]`.  
 \* @SinceKotlin("1.1")  
 \* public val arguments: List<KTypeProjection>  
 \* `true` if this type was marked nullable in the source code.  
 \* For Kotlin types, it means that `null` value is allowed to be represented by this type.  
 \* In practice it means that the type was declared with a question mark at the end.  
 \* For non-Kotlin types, it means the type or the symbol which was declared with this type  
 \* is annotated with a runtime-retained nullability annotation such as [javax.annotation.Nullable].  
 \* Note that even if [isMarkedNullable] is false, values of the type can still be `null`.  
 \* This may happen if it is a type of the type parameter with a nullable upper bound:  
 \* fun <T> foo(t: T) {  
 \* // isMarkedNullable == false for t's type, but t can be null here when T = "Any?"  
 \* }  
 \* public val isMarkedNullable: Boolean  
 \* Represents a type projection. Type projection is usually the argument to another type in a type usage.  
 \* For example, in the type `Array<out Number>`, `out Number` is the covariant projection of the type represented by the class `Number`.  
 \* Type projection is either the star projection, or an entity consisting of a specific type plus optional variance.  
 \* See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/generics.html#type-projections) for more information.  
 \* @SinceKotlin("1.1")  
 \* public data class KTypeProjection constructor(  
 \* The use-site variance specified in the projection, or `null` if this is a star projection.  
 \* public val variance: KVariance?,

\* Starts an unintercepted coroutine with receiver type [R] and result type [T] and executes it until its first suspension.

\* Returns the result of the coroutine or throws its exception if it does not suspend or [COROUTINE\_SUSPENDED] if it suspends.

\* In the latter case, the [completion] continuation is invoked when the coroutine completes with a result or an exception.

\* The coroutine is started directly in the invoker's thread without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established.

\* This function is designed to be used from inside of [suspendCoroutineUninterceptedOrReturn] to resume the execution of the suspended coroutine using a reference to the suspending function.

```

@SinceKotlin("1.3")
@InlineOnly
public actual inline fun <R, T> (suspend R.() -> T).startCoroutineUninterceptedOrReturn(
    receiver: R,
    completion: Continuation<T>): Any? =
    this.asDynamic()(receiver, completion, false)

```

\* Creates unintercepted coroutine without receiver and with result type [T].

\* This function creates a new, fresh instance of suspendable computation every time it is invoked.

\* To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance.

\* The [completion] continuation is invoked when coroutine completes with result or exception.

\* This function returns unintercepted continuation.

\* Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext].

\* It is the invoker's responsibility to ensure that a proper invocation context is established.

\* Note that [completion] of this function may get invoked in an arbitrary context.

\* [Continuation.intercepted] can be used to acquire the intercepted continuation.

\* Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor].

\* Repeated invocation of any resume function

on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

public actual fun <T> (suspend () -> T).createCoroutineUnintercepted(
  completion: Continuation<T>): Continuation<Unit> =
  // Kotlin/JS suspend lambdas have an extra parameter `suspended`
  if (this.asDynamic().length == 2) {
    // When `suspended` is true the continuation is created,
    // but not executed
    this.asDynamic()(completion, true)
  } else {
    createCoroutineFromSuspendFunction(completion) {
      this.asDynamic()(completion)
    }
  }

```

\* Creates unintercepted coroutine with receiver type [R] and result type [T]. \* This function creates a new, fresh instance of suspendable computation every time it is invoked. \* To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. \* The [completion] continuation is invoked when coroutine completes with result or exception. \* This function returns unintercepted continuation. \* Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. \* It is the invoker's responsibility to ensure that a proper invocation context is established. \* Note that [completion] of this function may get invoked in an arbitrary context. \* [Continuation.intercepted] can be used to acquire the intercepted continuation. \* Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor]. \* Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

public actual fun <R, T> (suspend R.() -> T).createCoroutineUnintercepted(
  receiver: R, completion: Continuation<T>):
  Continuation<Unit> =
  // Kotlin/JS suspend lambdas have an extra parameter `suspended`
  if (this.asDynamic().length == 3) {
    // When `suspended` is true the continuation is created, but not executed
    this.asDynamic()(receiver, completion, true)
  } else {
    createCoroutineFromSuspendFunction(completion) {
      this.asDynamic()(receiver, completion)
    }
  }

```

\* Intercepts this continuation with [ContinuationInterceptor]. \* This function shall be used on the immediate result of [createCoroutineUnintercepted] or [suspendCoroutineUninterceptedOrReturn], in which case it checks for [ContinuationInterceptor] in the continuation's [context][Continuation.context], invokes [ContinuationInterceptor.interceptContinuation], caches and returns the result. \* If this function is invoked on other [Continuation] instances it returns `this` continuation unchanged.

```

public actual fun <T> Continuation<T>.intercepted(): Continuation<T> =
  (this as? CoroutineImpl)?.intercepted() ?:
  this

```

```

a class) specific name in JavaScript.\n * This may be useful in the following cases:\n * * There are two
functions for which the compiler gives same name in JavaScript, you can\n *   mark one with `@JsName(...)` to
prevent the compiler from reporting error.\n * * You are writing a JavaScript library in Kotlin. The compiler
produces mangled names\n *   for functions with parameters, which is unnatural for usual JavaScript developer.\n *
You can put `@JsName(...)` on functions you want to be available from JavaScript.\n * * For some reason you
want to rename declaration, e.g. there's common term in JavaScript\n *   for a concept provided by the declaration,
which is uncommon in Kotlin.\n * * Example:\n * * ``` kotlin\n * class Person(val name: String) {\n *   fun
hello() {\n *     println("Hello $name!")\n *   }\n *   @JsName("helloWithGreeting")\n *   fun
hello(greeting: String) {\n *     println("$greeting $name!")\n *   }\n * }\n * * ```\n * * \n * @property name the
name which compiler uses both for declaration itself and for all references to the declaration.\n *   It's required
to denote a valid JavaScript identifier.\n * * \n */\n\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS,

```

FUNCTION, PROPERTY, CONSTRUCTOR, PROPERTY\_GETTER, PROPERTY\_SETTER)\npublic actual annotation class JsName(actual val name: String)\n\n\*\*\n \* Denotes an `external` declaration that must be imported from native JavaScript library.\n\n \* The compiler produces the code relevant for the target module system, for example, in case of CommonJS,\n\n \* it will import the declaration via the `require(...)` function.\n\n \* The annotation can be used on top-level external declarations (classes, properties, functions) and files.\n\n \* In case of file (which can't be `external`) the following rule applies: all the declarations in\n\n \* the file must be `external`. By applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript object\n\n \* that contain all the declarations from the file.\n\n \* Example:\n\n \* ``` kotlin\n\n \* @JsModule("jquery")\n\n \* external abstract class JQuery() {\n\n \* // some declarations here\n\n \* }\n\n \* @JsModule("jquery")\n\n \* external fun JQuery(element: Element): JQuery\n\n \* ```\n\n \* @property import name of a module to import declaration from.\n\n \* It is not interpreted by the Kotlin compiler, it's passed as is directly to the target module system.\n\n \* @see JsNonModule\n\n \*/\n\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\n\npublic annotation class JsModule(val import: String)\n\n\n\*\*\n \* Denotes an `external` declaration that can be used without module system.\n\n \* By default, an `external` declaration is available regardless your target module system.\n\n \* However, by applying [JsModule] annotation you can make a declaration unavailable to \*plain\* module system.\n\n \* Some JavaScript libraries are distributed both as a standalone downloadable piece of JavaScript and as a module available\n\n \* as an npm package.\n\n \* To tell the Kotlin compiler to accept both cases, you can augment [JsModule] with the `@JsNonModule` annotation.\n\n \* For example:\n\n \* ``` kotlin\n\n \* @JsModule("jquery")\n\n \* @JsNonModule\n\n \* @JsName("\$")\n\n \* external abstract class JQuery() {\n\n \* // some declarations here\n\n \* }\n\n \* @JsModule("jquery")\n\n \* @JsNonModule\n\n \* @JsName("\$")\n\n \* external fun JQuery(element: Element): JQuery\n\n \* ```\n\n \* @see JsModule\n\n \*/\n\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\n\npublic annotation class JsNonModule\n\n\n\*\*\n \* Adds prefix to `external` declarations in a source file.\n\n \* JavaScript does not have concept of packages (namespaces). They are usually emulated by nested objects.\n\n \* The compiler turns references to `external` declarations either to plain unprefixed names (in case of \*plain\* modules)\n\n \* or to plain imports.\n\n \* However, if a JavaScript library provides its declarations in packages, you won't be satisfied with this.\n\n \* You can tell the compiler to generate additional prefix before references to `external` declarations using the `@JsQualifier(...)`\n\n \* annotation.\n\n \* Note that a file marked with the `@JsQualifier(...)` annotation can't contain non-`external` declarations.\n\n \* Example:\n\n \* ```\n\n \* @file:JsQualifier("my.jsPackageName")\n\n \* package some.kotlinPackage\n\n \* external fun foo(x: Int)\n\n \* external fun bar(): String\n\n \* ```\n\n \* @property value the qualifier to add to the declarations in the generated code.\n\n \* It must be a sequence of valid JavaScript identifiers separated by the `.` character.\n\n \* Examples of valid qualifiers are: `foo`, `bar.Baz`, `\_.\$.f`\n\n \* @see JsModule\n\n \*/\n\n@Retention(AnnotationRetention.BINARY)\n@Target(AnnotationTarget.FILE)\n\npublic annotation class JsQualifier(val value: String)\n\n\n\*\*\n \* Marks experimental JS export annotations.\n\n \* Note that behaviour of these annotations will likely be changed in the future.\n\n \* Usages of such annotations will be reported as warnings unless an explicit opt-in with\n\n \* the [OptIn] annotation, e.g. `@OptIn(ExperimentalJsExport::class)`,\n\n \* or with the `-Xopt-in=kotlin.js.ExperimentalJsExport` compiler option is given.\n\n \*/\n\n@Suppress("DEPRECATION")\n@Experimental(level = Experimental.Level.WARNING)\n@RequiresOptIn(level = RequiresOptIn.Level.WARNING)\n@SinceKotlin("1.3")\n\npublic annotation class ExperimentalJsExport\n\n\n\*\*\n \* Exports top-level declaration.\n\n \* Used in future IR-based backend.\n\n \* Has no effect in current JS backend.\n\n \*/\n\n@ExperimentalJsExport\n@SinceKotlin("1.3")\n@Retention(AnnotationRetention.BINARY)\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\n\npublic annotation class JsExport\n\n\n\*\*\n \* Copyright 2010-2018 JetBrains s.r.o. and Kotlin Programming Language contributors.\n\n \* Use of this source code is governed by the Apache 2.0 license that can be found in the license/LICENSE.txt file.\n\n \*/\n\npackage kotlin.jvm\n\n// these are used in common generated code in stdlib\n\n// TODO: find how to deprecate these\n\nones\n\n@Target(AnnotationTarget.FIELD)\n@Retention(AnnotationRetention.SOURCE)\n\npublic actual

`NaN` when `x < 0` or `b <= 0` or `b == 1.0`.  
`-log(+Inf, +Inf)` is `NaN`.  
`-log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`.  
`-log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`.  
 See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.

```

@SinceKotlin("1.2")\npublic actual fun log(x: Double, base: Double): Double {
    if (base <= 0.0 || base == 1.0) return Double.NaN
    return nativeMath.log(x) / nativeMath.log(base)
}

```

Computes the natural logarithm (base `E`) of the value `[x]`.  
 Special cases:  
`-ln(NaN)` is `NaN`.  
`-ln(x)` is `NaN` when `x < 0.0`.  
`-ln(+Inf)` is `+Inf`.  
`-ln(0.0)` is `-Inf`.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun ln(x: Double): Double =
    nativeMath.log(x)

```

Computes the common logarithm (base 10) of the value `[x]`.  
 @see `[ln]` function for special cases.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun log10(x: Double): Double =
    nativeMath.log10(x)

```

Computes the binary logarithm (base 2) of the value `[x]`.  
 @see `[ln]` function for special cases.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun log2(x: Double): Double =
    nativeMath.log2(x)

```

Computes `ln(x + 1)`.  
 This function can be implemented to produce more precise result for `[x]` near zero.  
 Special cases:  
`-ln1p(NaN)` is `NaN`.  
`-ln1p(x)` is `NaN` where `x < -1.0`.  
`-ln1p(-1.0)` is `-Inf`.  
`-ln1p(+Inf)` is `+Inf`.  
 @see `[ln]` function.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun ln1p(x: Double): Double =
    nativeMath.log1p(x)

```

Rounds the given value `[x]` to an integer towards positive infinity.  
 @return the smallest double value that is greater than or equal to the given value `[x]` and is a mathematical integer.  
 Special cases:  
`-ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun ceil(x: Double): Double =
    nativeMath.ceil(x).unsafeCast<Double>() // TODO: Remove unsafe cast after removing public js.math

```

Rounds the given value `[x]` to an integer towards negative infinity.  
 @return the largest double value that is smaller than or equal to the given value `[x]` and is a mathematical integer.  
 Special cases:  
`-floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun floor(x: Double): Double =
    nativeMath.floor(x).unsafeCast<Double>()

```

Rounds the given value `[x]` to an integer towards zero.  
 @return the value `[x]` having its fractional part truncated.  
 Special cases:  
`-truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun truncate(x: Double): Double =
    nativeMath.trunc(x)

```

Rounds the given value `[x]` towards the closest integer with ties rounded towards even integer.  
 Special cases:  
`-round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.
 

```

@SinceKotlin("1.2")\npublic actual fun round(x: Double): Double {
    if (x % 0.5 != 0.0) {
        return nativeMath.round(x).unsafeCast<Double>()
    }
    val floor = floor(x)
    return if (floor % 2 == 0.0) floor else ceil(x)
}

```

Returns the absolute value of the given value `[x]`.  
 Special cases:  
`-abs(NaN)` is `NaN`.  
 @see `absoluteValue` extension property for `[Double]`.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun abs(x: Double): Double =
    nativeMath.abs(x)

```

Returns the sign of the given value `[x]`:  
`-1.0` if the value is negative,  
`0.0` if the value is zero,  
`1.0` if the value is positive.  
 Special case:  
`-sign(NaN)` is `NaN`.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun sign(x: Double): Double =
    nativeMath.sign(x)

```

Returns the smaller of two values.  
 If either value is `NaN`, then the result is `NaN`.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun min(a: Double, b: Double): Double =
    nativeMath.min(a, b)

```

Returns the greater of two values.  
 If either value is `NaN`, then the result is `NaN`.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun max(a: Double, b: Double): Double =
    nativeMath.max(a, b)

```

Raises this value to the power `[x]`.  
 Special cases:  
`-b.pow(0.0)` is `1.0`.  
`-b.pow(1.0) == b`.  
`-b.pow(NaN)` is `NaN`.  
`-NaN.pow(x)` is `NaN` for `x != 0.0`.  
`-b.pow(Inf)` is `NaN` for `abs(b) == 1.0`.  
`-b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun Double.pow(x: Double): Double =
    nativeMath.pow(this, x)

```

Raises this value to the integer power `[n]`.  
 See the other overload of `[pow]` for details.
 

```

@SinceKotlin("1.2")\n@InlineOnly\npublic actual inline fun Double.pow(n: Int): Double =
    nativeMath.pow(this, n.toDouble())

```

Returns the absolute value of this value.  
 Special cases:  
`-abs(NaN)` is `NaN`.

```

- `NaN.absoluteValue` is `NaN`  

actual inline val Double.absoluteValue: Double get() = nativeMath.abs(this)  

Returns the sign of this value:  

- 1.0 if the value is negative,  

- zero if the value is zero,  

- 1.0 if the value is positive  

Special case:  

`NaN.sign` is `NaN`  

actual inline val Double.sign: Double get() = nativeMath.sign(this)  

Returns this value with the sign bit same as of the [sign] value.  

`NaN.ulp` is `NaN`  

actual inline fun Double.withSign(sign: Int): Double = this.withSign(sign.toDouble())  

Returns the ulp (unit in the last place) of this value.  

An ulp is a positive distance between this value and the next nearest [Double] value larger in magnitude.  

Special Cases:  

- `NaN.ulp` is `NaN`  

- `x.ulp` is `+Inf` when `x` is `+Inf` or `-Inf`  

- `0.0.ulp` is `Double.MIN_VALUE`  

actual val Double.ulp: Double get() = when {  

  this < 0 -> (-this).ulp  

  this.isNaN() || this == Double.POSITIVE_INFINITY -> this  

  this == Double.MAX_VALUE -> this - this.nextDown()  

  else -> this.nextUp() - this  

}  

Returns the [Double] value nearest to this value in direction of positive infinity.  

actual fun Double.nextUp(): Double = when {  

  this.isNaN() || this == Double.POSITIVE_INFINITY -> this  

  this == 0.0 -> Double.MIN_VALUE  

  else -> Double.fromBits(this.toRawBits() + if (this > 0) 1 else -1)  

}  

Returns the [Double] value nearest to this value in direction of negative infinity.  

actual fun Double.nextDown(): Double = when {  

  this.isNaN() || this == Double.NEGATIVE_INFINITY -> this  

  this == 0.0 -> -Double.MIN_VALUE  

  else -> Double.fromBits(this.toRawBits() + if (this > 0) -1 else 1)  

}  

Returns the [Double] value nearest to this value in direction from this value towards the value [to].  

Special cases:  

- `x.nextTowards(y)` is `NaN` if either `x` or `y` are `NaN`  

- `x.nextTowards(x) == x`  

actual fun Double.nextTowards(to: Double): Double = when {  

  this.isNaN() || to.isNaN() -> Double.NaN  

  to == this -> to  

  to > this -> this.nextUp()  

  else /* to < this */ -> this.nextDown()  

}  

Rounds this [Double] value to the nearest integer and converts the result to [Int].  

Ties are rounded towards positive infinity.  

Special cases:  

- `x.roundToInt() == Int.MAX_VALUE` when `x > Int.MAX_VALUE`  

- `x.roundToInt() == Int.MIN_VALUE` when `x < Int.MIN_VALUE`  

@throws IllegalArgumentException when this value is `NaN`  

actual fun Double.roundToInt(): Int = when {  

  isNaN() -> throw IllegalArgumentException("Cannot round NaN value.")  

  this > Int.MAX_VALUE -> Int.MAX_VALUE  

  this < Int.MIN_VALUE -> Int.MIN_VALUE  

  else -> nativeMath.round(this).unsafeCast<Double>().toInt()  

}  

Rounds this [Double] value to the nearest integer and converts the result to [Long].  

Ties are rounded towards positive infinity.  

Special cases:  

- `x.roundToLong() == Long.MAX_VALUE` when `x > Long.MAX_VALUE`  

- `x.roundToLong() == Long.MIN_VALUE` when `x < Long.MIN_VALUE`  

@throws IllegalArgumentException when this value is `NaN`  

actual fun Double.roundToLong(): Long = when {  

  isNaN() -> throw IllegalArgumentException("Cannot round NaN value.")  

  this > Long.MAX_VALUE -> Long.MAX_VALUE  

  this < Long.MIN_VALUE -> Long.MIN_VALUE  

  else -> nativeMath.round(this).unsafeCast<Double>().toLong()  

}  

endregion  

region =====  

Float Math =====  

Computes the sine of the angle [x] given in radians.  

Special cases:  

- `sin(NaN|+Inf|-Inf)` is `NaN`  

actual inline fun sin(x: Float): Float = nativeMath.sin(x.toDouble()).toFloat()  

Computes the cosine of the angle [x] given in radians.  

Special cases:  

- `cos(NaN|+Inf|-Inf)` is `NaN`  

actual inline fun cos(x: Float): Float = nativeMath.cos(x.toDouble()).toFloat()  

Computes the tangent of the angle [x] given in radians.  

Special cases:  

- `tan(NaN|+Inf|-Inf)` is `NaN`  

actual inline fun tan(x: Float): Float = nativeMath.tan(x.toDouble()).toFloat()  

Computes the arc sine of the value [x];  

the returned value is an angle in the range from `-PI/2` to `PI/2` radians.  

Special cases:  

- `asin(x)` is `NaN`, when `abs(x) > 1` or x is `NaN`  

actual inline fun asin(x: Float): Float =

```

`nativeMath.asin(x.toDouble()).toFloat()` Computes the arc cosine of the value  $[x]$ ; the returned value is an angle in the range from  $0.0$  to  $\pi$  radians. Special cases: `asin(x)` is `NaN`, when `abs(x) > 1` or `x` is `NaN`.

`nativeMath.acos(x.toDouble()).toFloat()` Computes the arc tangent of the value  $[x]$ ; the returned value is an angle in the range from  $-\pi/2$  to  $\pi/2$  radians. Special cases: `atan(NaN)` is `NaN`.

`nativeMath.atan(x.toDouble()).toFloat()` Returns the angle  $\theta$  of the polar coordinates  $(r, \theta)$  that correspond to the rectangular coordinates  $(x, y)$  by computing the arc tangent of the value  $[y] / [x]$ ; the returned value is an angle in the range from  $-\pi$  to  $\pi$  radians. Special cases: `atan2(0.0, 0.0)` is `0.0`; `atan2(0.0, x)` is `0.0` for  $x > 0$  and  $\pi$  for  $x < 0$ ; `atan2(-0.0, x)` is `-0.0` for  $x > 0$  and  $-\pi$  for  $x < 0$ ; `atan2(y, +Inf)` is `0.0` for  $0 < y < +Inf$  and `-0.0` for  $-Inf < y < 0$ ; `atan2(y, -Inf)` is  $\pi$  for  $0 < y < +Inf$  and  $-\pi$  for  $-Inf < y < 0$ ; `atan2(y, 0.0)` is  $\pi/2$  for  $y > 0$  and  $-\pi/2$  for  $y < 0$ ; `atan2(+Inf, x)` is  $\pi/2$  for finite  $x$ ; `atan2(-Inf, x)` is  $-\pi/2$  for finite  $x$ ; `atan2(NaN, x)` and `atan2(y, NaN)` is `NaN`.

`nativeMath.atanh(x.toDouble()).toFloat()` Computes the hyperbolic sine of the value  $[x]$ . Special cases: `sinh(NaN)` is `NaN`; `sinh(+Inf)` is `+Inf`; `sinh(-Inf)` is `-Inf`.

`nativeMath.cosh(x.toDouble()).toFloat()` Computes the hyperbolic cosine of the value  $[x]$ . Special cases: `cosh(NaN)` is `NaN`; `cosh(+Inf)` is `+Inf`; `cosh(-Inf)` is `+Inf`.

`nativeMath.tanh(x.toDouble()).toFloat()` Computes the hyperbolic tangent of the value  $[x]$ . Special cases: `tanh(NaN)` is `NaN`; `tanh(+Inf)` is `1.0`; `tanh(-Inf)` is `-1.0`.

`nativeMath.asinh(x.toDouble()).toFloat()` Computes the inverse hyperbolic sine of the value  $[x]$ . The returned value is  $y$  such that  $\sinh(y) == x$ . Special cases: `asinh(NaN)` is `NaN`; `asinh(+Inf)` is `+Inf`; `asinh(-Inf)` is `-Inf`.

`nativeMath.acosh(x.toDouble()).toFloat()` Computes the inverse hyperbolic cosine of the value  $[x]$ . The returned value is positive  $y$  such that  $\cosh(y) == x$ . Special cases: `acosh(NaN)` is `NaN`; `acosh(x)` is `NaN` when  $x < 1$ ; `acosh(+Inf)` is `+Inf`.

`nativeMath.atanh(x.toDouble()).toFloat()` Computes the inverse hyperbolic tangent of the value  $[x]$ . The returned value is  $y$  such that  $\tanh(y) == x$ . Special cases: `atanh(NaN)` is `NaN`; `atanh(x)` is `NaN` when  $x > 1$  or  $x < -1$ ; `atanh(1.0)` is `+Inf`; `atanh(-1.0)` is `-Inf`.

`nativeMath.hypot(x.toDouble(), y.toDouble()).toFloat()` Computes  $\sqrt{x^2 + y^2}$  without intermediate overflow or underflow. Special cases: returns `+Inf` if any of arguments is infinite; returns `NaN` if any of arguments is `NaN` and the other is not infinite.

`nativeMath.sqrt(x.toDouble()).toFloat()` Computes the positive square root of the value  $[x]$ . Special cases: `sqrt(x)` is `NaN` when  $x < 0$  or  $x$  is `NaN`.

`nativeMath.exp(x.toDouble()).toFloat()` Computes Euler's number  $e$  raised to the power of the value  $[x]$ . Special cases: `exp(NaN)` is `NaN`; `exp(+Inf)` is `+Inf`; `exp(-Inf)` is `0.0`.

`nativeMath.expm1(x.toDouble()).toFloat()` Computes  $\exp(x) - 1$ . This function can be implemented to produce more precise result for  $[x]$  near zero. Special cases: `expm1(NaN)` is `NaN`; `expm1(+Inf)` is `+Inf`; `expm1(-Inf)` is `-1.0`. @see `[exp]` function.

`nativeMath.log(x.toDouble(), base.toDouble()).toFloat()` Computes the logarithm of the value  $[x]$  to the given  $[base]$ .

\*\n \* Special cases:\n \* - `log(x, b)` is `NaN` if either `x` or `b` are `NaN`\n \* - `log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`\n \* - `log(+Inf, +Inf)` is `NaN`\n \* - `log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`\n \* -
