On the evening of the first of September, after his interview with Kutuzov, Count Rostopchin had returned to Moscow mortified and offended because he had not been invited to attend the council of war, and because Kutuzov had paid no attention to his offer to take part in the defense of the city; amazed also at the novel outlook revealed to him at the camp, which treated the tranquillity of the capital and its patriotic fervor as not merely secondary but quite irrelevant and unimportant matters. Distressed, offended, and surprised by all this, Rostopchin had returned to Moscow. After supper he lay down on a sofa without undressing, and was awakened soon after midnight by a courier bringing him a letter from Kutuzov. This letter requested the count to send police officers to guide the troops through the town, as the army was retreating to the Ryazan road beyond Moscow. This was not news to Rostopchin. He had known that Moscow would be abandoned not merely since his interview the previous day with Kutuzov on the Poklonny Hill but ever since the battle of Borodino, for all the generals who came to Moscow after that battle had said unanimously that it was impossible to fight another battle, and since then the government property had been removed every night, and half the inhabitants had left the city with Rostopchin's own permission. Yet all the same this information astonished and irritated the count, coming as it did in the form of a simple note with an order from Kutuzov, and received at night, breaking in on his beauty sleep.

When later on in his memoirs Count Rostopchin explained his actions at this time, he repeatedly says that he was then actuated by two important considerations: to maintain tranquillity in Moscow and expedite the departure of the inhabitants. If one accepts this twofold aim all Rostopchin's actions appear irreproachable. "Why were the holy relics, the arms, ammunition, gunpowder, and stores of corn not removed? Why were thousands of inhabitants deceived into believing that Moscow would not be given up--and thereby ruined?" "To preserve the tranquillity of the city," explains Count Rostopchin. "Why were bundles of useless papers from the government offices, and Leppich's balloon and other articles removed?" "To leave the town

empty," explains Count Rostopchin. One need only admit that public tranquillity is in danger and any action finds a justification.

All the horrors of the reign of terror were based only on solicitude for public tranquillity.

On what, then, was Count Rostopchin's fear for the tranquillity of Moscow based in 1812? What reason was there for assuming any probability of an uprising in the city? The inhabitants were leaving it and the retreating troops were filling it. Why should that cause the masses to riot?

Neither in Moscow nor anywhere in Russia did anything resembling an insurrection ever occur when the enemy entered a town. More than ten thousand people were still in Moscow on the first and second of September, and except for a mob in the governor's courtyard, assembled there at his bidding, nothing happened. It is obvious that there would have been even less reason to expect a disturbance among the people if after the battle of Borodino, when the surrender of Moscow became certain or at least probable, Rostopchin instead of exciting the people by distributing arms and broadsheets had taken steps to remove all the holy relics, the gunpowder, munitions, and money, and had told the population plainly that the town would be abandoned.

Rostopchin, though he had patriotic sentiments, was a sanguine and impulsive man who had always moved in the highest administrative circles and had no understanding at all of the people he supposed himself to be guiding. Ever since the enemy's entry into Smolensk he had in imagination been playing the role of director of the popular feeling of "the heart of Russia." Not only did it seem to him (as to all administrators) that he controlled the external actions of Moscow's inhabitants, but he also thought he controlled their mental attitude by means of his broadsheets and posters, written in a coarse tone which the people despise in their own class and do not understand from those in authority. Rostopchin was so pleased with the fine role of leader of popular feeling, and had grown so used to it, that the necessity of relinquishing that role and abandoning Moscow without any heroic display took him unawares and he suddenly felt the ground slip away from under his feet, so that he positively did not know what to do. Though he knew it was coming, he did not till the last moment wholeheartedly believe that Moscow would be abandoned, and did not prepare for it. The inhabitants left against his wishes. If the government offices were removed, this was only done on the demand of officials to whom the count yielded reluctantly. He was absorbed in the role he had created for himself. As is often the case with those gifted with an ardent imagination, though he had long known that Moscow would be abandoned he knew it only with his intellect, he did not believe it in his heart and did not adapt

himself mentally to this new position of affairs.

All his painstaking and energetic activity (in how far it was useful and had any effect on the people is another question) had been simply directed toward arousing in the masses his own feeling of patriotic hatred of the French.

But when events assumed their true historical character, when expressing hatred for the French in words proved insufficient, when it was not even possible to express that hatred by fighting a battle, when self-confidence was of no avail in relation to the one question before Moscow, when the whole population streamed out of Moscow as one man, abandoning their belongings and proving by that negative action all the depth of their national feeling, then the role chosen by Rostopchin suddenly appeared senseless. He unexpectedly felt himself ridiculous, weak, and alone, with no ground to stand on.

When, awakened from his sleep, he received that cold, peremptory note from Kutuzov, he felt the more irritated the more he felt himself to blame. All that he had been specially put in charge of, the state property which he should have removed, was still in Moscow and it was no longer possible to take the whole of it away.

"Who is to blame for it? Who has let things come to such a pass?" he ruminated. "Not I, of course. I had everything ready. I had Moscow firmly in hand. And this is what they have let it come to! Villains! Traitors!" he thought, without clearly defining who the villains and traitors were, but feeling it necessary to hate those traitors whoever they might be who were to blame for the false and ridiculous position in which he found himself.

All that night Count Rostopchin issued orders, for which people came to him from all parts of Moscow. Those about him had never seen the count so morose and irritable.

"Your excellency, the Director of the Registrar's Department has sent for instructions... From the Consistory, from the Senate, from the University, from the Foundling Hospital, the Suffragan has sent... asking for information.... What are your orders about the Fire Brigade? From the governor of the prison... from the superintendent of the lunatic asylum..." All night long such announcements were continually being received by the count.

To all these inquiries he gave brief and angry replies indicating that orders from him were not now needed, that the whole affair, carefully prepared by him, had now been ruined by somebody, and that that somebody would have to bear the whole responsibility for all that might happen.

"Oh, tell that blockhead," he said in reply to the question from the Registrar's Department, "that he should remain to guard his documents. Now why are you asking silly questions about the Fire Brigade? They have horses, let them be off to Vladimir, and not leave them to the French."

"Your excellency, the superintendent of the lunatic asylum has come: what are your commands?"

"My commands? Let them go away, that's all.... And let the lunatics out into the town. When lunatics command our armies God evidently means these other madmen to be free."

In reply to an inquiry about the convicts in the prison, Count Rostopchin shouted angrily at the governor:

"Do you expect me to give you two battalions--which we have not got for a convoy? Release them, that's all about it!"

"Your excellency, there are some political prisoners, Meshkov, Vereshchagin..."

"Vereshchagin! Hasn't he been hanged yet?" shouted Rostopchin. "Bring him to me!"

CHAPTER XXV

Toward nine o'clock in the morning, when the troops were already moving through Moscow, nobody came to the count any more for instructions. Those who were able to get away were going of their own accord, those who remained behind decided for themselves what they must do.

The count ordered his carriage that he might drive to Sokolniki, and sat in his study with folded hands, morose, sallow, and taciturn.

In quiet and untroubled times it seems to every administrator that it is only by his efforts that the whole population under his rule is kept going, and in this consciousness of being indispensable every administrator finds the chief reward of his labor and efforts. While the sea of history remains calm the ruler-administrator in his frail bark, holding on with a boat hook to the ship of the people

and himself moving, naturally imagines that his efforts move the ship he is holding on to. But as soon as a storm arises and the sea begins to heave and the ship to move, such a delusion is no longer possible. The ship moves independently with its own enormous motion, the boat hook no longer reaches the moving vessel, and suddenly the administrator, instead of appearing a ruler and a source of power, becomes an insignificant, useless, feeble man.

Rostopchin felt this, and it was this which exasperated him.

The superintendent of police, whom the crowd had stopped, went in to see him at the same time as an adjutant who informed the count that the horses were harnessed. They were both pale, and the superintendent of police, after reporting that he had executed the instructions he had received, informed the count that an immense crowd had collected in the courtyard and wished to see him.

Without saying a word Rostopchin rose and walked hastily to his light, luxurious drawing room, went to the balcony door, took hold of the handle, let it go again, and went to the window from which he had a better view of the whole crowd. The tall lad was standing in front, flourishing his arm and saying something with a stern look. The blood stained smith stood beside him with a gloomy face. A drone of voices was audible through the closed window.

"Is my carriage ready?" asked Rostopchin, stepping back from the window.

"It is, your excellency," replied the adjutant.

Rostopchin went again to the balcony door.

"But what do they want?" he asked the superintendent of police.

"Your excellency, they say they have got ready, according to your orders, to go against the French, and they shouted something about treachery. But it is a turbulent crowd, your excellency--I hardly managed to get away from it. Your excellency, I venture to suggest..."

"You may go. I don't need you to tell me what to do!" exclaimed Rostopchin angrily.

He stood by the balcony door looking at the crowd.

"This is what they have done with Russia! This is what they have done with me!" thought he, full of an irrepressible fury that welled up within him against the someone to whom what was happening might be attributed. As often happens with passionate people, he was

mastered by anger but was still seeking an object on which to vent it. "Here is that mob, the dregs of the people," he thought as he gazed at the crowd: "this rabble they have roused by their folly! They want a victim," he thought as he looked at the tall lad flourishing his arm. And this thought occurred to him just because he himself desired a victim, something on which to vent his rage.

"Is the carriage ready?" he asked again.

"Yes, your excellency. What are your orders about Vereshchagin? He is waiting at the porch," said the adjutant.

"Ah!" exclaimed Rostopchin, as if struck by an unexpected recollection.

And rapidly opening the door he went resolutely out onto the balcony. The talking instantly ceased, hats and caps were doffed, and all eyes were raised to the count.

"Good morning, lads!" said the count briskly and loudly. "Thank you for coming. I'll come out to you in a moment, but we must first settle with the villain. We must punish the villain who has caused the ruin of Moscow. Wait for me!"

And the count stepped as briskly back into the room and slammed the door behind him.

A murmur of approbation and satisfaction ran through the crowd. "He'll settle with all the villains, you'll see! And you said the French... He'll show you what law is!" the mob were saying as if reproving one another for their lack of confidence.

A few minutes later an officer came hurriedly out of the front door, gave an order, and the dragoons formed up in line. The crowd moved eagerly from the balcony toward the porch. Rostopchin, coming out there with quick angry steps, looked hastily around as if seeking someone.

"Where is he?" he inquired. And as he spoke he saw a young man coming round the corner of the house between two dragoons. He had a long thin neck, and his head, that had been half shaved, was again covered by short hair. This young man was dressed in a threadbare blue cloth coat lined with fox fur, that had once been smart, and dirty hempen convict trousers, over which were pulled his thin, dirty, trodden-down boots. On his thin, weak legs were heavy chains which hampered his irresolute movements.

"Ah!" said Rostopchin, hurriedly turning away his eyes from the

young man in the fur-lined coat and pointing to the bottom step of the porch. "Put him there."

The young man in his clattering chains stepped clumsily to the spot indicated, holding away with one finger the coat collar which chafed his neck, turned his long neck twice this way and that, sighed, and submissively folded before him his thin hands, unused to work.

For several seconds while the young man was taking his place on the step the silence continued. Only among the back rows of the people, who were all pressing toward the one spot, could sighs, groans, and the shuffling of feet be heard.

While waiting for the young man to take his place on the step Rostopchin stood frowning and rubbing his face with his hand.

"Lads!" said he, with a metallic ring in his voice. "This man, Vereshchagin, is the scoundrel by whose doing Moscow is perishing."

The young man in the fur-lined coat, stooping a little, stood in a submissive attitude, his fingers clasped before him. His emaciated young face, disfigured by the half-shaven head, hung down hopelessly. At the count's first words he raised it slowly and looked up at him as if wishing to say something or at least to meet his eye. But Rostopchin did not look at him. A vein in the young man's long thin neck swelled like a cord and went blue behind the ear, and suddenly his face flushed.

All eyes were fixed on him. He looked at the crowd, and rendered more hopeful by the expression he read on the faces there, he smiled sadly and timidly, and lowering his head shifted his feet on the step.

"He has betrayed his Tsar and his country, he had gone over to Bonaparte. He alone of all the Russians has disgraced the Russian name, he has caused Moscow to perish," said Rostopchin in a sharp, even voice, but suddenly he glanced down at Vereshchagin who continued to stand in the same submissive attitude. As if inflamed by the sight, he raised his arm and addressed the people, almost shouting:

"Deal with him as you think fit! I hand him over to you."

The crowd remained silent and only pressed closer and closer to one another. To keep one another back, to breathe in that stifling atmosphere, to be unable to stir, and to await something unknown, uncomprehended, and terrible, was becoming unbearable. Those standing in front, who had seen and heard what had taken place before them, all stood with wide open eyes and mouths, straining with all their strength, and held back the crowd that was pushing

behind them.

"Beat him!... Let the traitor perish and not disgrace the Russian name!" shouted Rostopchin. "Cut him down. I command it."

Hearing not so much the words as the angry tone of Rostopchin's voice, the crowd moaned and heaved forward, but again paused.

"Count!" exclaimed the timid yet theatrical voice of Vereshchagin in the midst of the momentary silence that ensued, "Count! One God is above us both...." He lifted his head and again the thick vein in his thin neck filled with blood and the color rapidly came and went in his face.

He did not finish what he wished to say.

"Cut him down! I command it..." shouted Rostopchin, suddenly growing pale like Vereshchagin.

"Draw sabers!" cried the dragoon officer, drawing his own.

Another still stronger wave flowed through the crowd and reaching the front ranks carried it swaying to the very steps of the porch. The tall youth, with a stony look on his face, and rigid and uplifted arm, stood beside Vereshchagin.

"Saber him!" the dragoon officer almost whispered.

And one of the soldiers, his face all at once distorted with fury, struck Vereshchagin on the head with the blunt side of his saber.

"Ah!" cried Vereshchagin in meek surprise, looking round with a frightened glance as if not understanding why this was done to him. A similar moan of surprise and horror ran through the crowd. "O Lord!" exclaimed a sorrowful voice.

But after the exclamation of surprise that had escaped from Vereshchagin he uttered a plaintive cry of pain, and that cry was fatal. The barrier of human feeling, strained to the utmost, that had held the crowd in check suddenly broke. The crime had begun and must now be completed. The plaintive moan of reproach was drowned by the threatening and angry roar of the crowd. Like the seventh and last wave that shatters a ship, that last irresistible wave burst from the rear and reached the front ranks, carrying them off their feet and engulfing them all. The dragoon was about to repeat his blow. Vereshchagin with a cry of horror, covering his head with his hands, rushed toward the crowd. The tall youth, against whom he stumbled, seized his thin neck with his hands and, yelling wildly, fell with him

under the feet of the pressing, struggling crowd.

Some beat and tore at Vereshchagin, others at the tall youth. And the screams of those that were being trampled on and of those who tried to rescue the tall lad only increased the fury of the crowd. It was a long time before the dragoons could extricate the bleeding youth, beaten almost to death. And for a long time, despite the feverish haste with which the mob tried to end the work that had been begun, those who were hitting, throttling, and tearing at Vereshchagin were unable to kill him, for the crowd pressed from all sides, swaying as one mass with them in the center and rendering it impossible for them either to kill him or let him go.

"Hit him with an ax, eh!... Crushed?... Traitor, he sold Christ.... Still alive... tenacious... serves him right! Torture serves a thief right. Use the hatchet!... What--still alive?"

Only when the victim ceased to struggle and his cries changed to a long-drawn, measured death rattle did the crowd around his prostrate, bleeding corpse begin rapidly to change places. Each one came up, glanced at what had been done, and with horror, reproach, and astonishment pushed back again.

"O Lord! The people are like wild beasts! How could he be alive?" voices in the crowd could be heard saying. "Quite a young fellow too... must have been a merchant's son. What men!... and they say he's not the right one.... How not the right one?... O Lord! And there's another has been beaten too--they say he's nearly done for.... Oh, the people... Aren't they afraid of sinning?..." said the same mob now, looking with pained distress at the dead body with its long, thin, half-severed neck and its livid face stained with blood and dust.

A painstaking police officer, considering the presence of a corpse in his excellency's courtyard unseemly, told the dragoons to take it away. Two dragoons took it by its distorted legs and dragged it along the ground. The gory, dust-stained, half-shaven head with its long neck trailed twisting along the ground. The crowd shrank back from it.

At the moment when Vereshchagin fell and the crowd closed in with savage yells and swayed about him, Rostopchin suddenly turned pale and, instead of going to the back entrance where his carriage awaited him, went with hurried steps and bent head, not knowing where and why, along the passage leading to the rooms on the ground floor. The count's face was white and he could not control the feverish twitching of his lower jaw.

"This way, your excellency... Where are you going?... This way, please..." said a trembling, frightened voice behind him.

Count Rostopchin was unable to reply and, turning obediently, went in the direction indicated. At the back entrance stood his caleche. The distant roar of the yelling crowd was audible even there. He hastily took his seat and told the coachman to drive him to his country house in Sokolniki.

When they reached the Myasnitski Street and could no longer hear the shouts of the mob, the count began to repent. He remembered with dissatisfaction the agitation and fear he had betrayed before his subordinates. "The mob is terrible--disgusting," he said to himself in French. "They are like wolves whom nothing but flesh can appease." "Count! One God is above us both!"--Vereshchagin's words suddenly recurred to him, and a disagreeable shiver ran down his back. But this was only a momentary feeling and Count Rostopchin smiled disdainfully at himself. "I had other duties," thought he. "The people had to be appeased. Many other victims have perished and are perishing for the public good"--and he began thinking of his social duties to his family and to the city entrusted to him, and of himself--not himself as Theodore Vasilyevich Rostopchin (he fancied that Theodore Vasilyevich Rostopchin was sacrificing himself for the public good) but himself as governor, the representative of authority and of the Tsar. "Had I been simply Theodore Vasilyevich my course of action would have been quite different, but it was my duty to safeguard my life and dignity as commander in chief."

Lightly swaying on the flexible springs of his carriage and no longer hearing the terrible sounds of the crowd, Rostopchin grew physically calm and, as always happens, as soon as he became physically tranquil his mind devised reasons why he should be mentally tranquil too. The thought which tranquillized Rostopchin was not a new one. Since the world began and men have killed one another no one has ever committed such a crime against his fellow man without comforting himself with this same idea. This idea is *le bien public*, the hypothetical welfare of other people.

To a man not swayed by passion that welfare is never certain, but he who commits such a crime always knows just where that welfare lies. And Rostopchin now knew it.

Not only did his reason not reproach him for what he had done, but he even found cause for self-satisfaction in having so successfully contrived to avail himself of a convenient opportunity to punish a criminal and at the same time pacify the mob.

"Vereshchagin was tried and condemned to death," thought

Rostopchin (though the Senate had only condemned Vereshchagin to hard labor), "he was a traitor and a spy. I could not let him go unpunished and so I have killed two birds with one stone: to appease the mob I gave them a victim and at the same time punished a miscreant."

Having reached his country house and begun to give orders about domestic arrangements, the count grew quite tranquil.

Half an hour later he was driving with his fast horses across the Sokolniki field, no longer thinking of what had occurred but considering what was to come. He was driving to the Yauza bridge where he had heard that Kutuzov was. Count Rostopchin was mentally preparing the angry and stinging reproaches he meant to address to Kutuzov for his deception. He would make that foxy old courtier feel that the responsibility for all the calamities that would follow the abandonment of the city and the ruin of Russia (as Rostopchin regarded it) would fall upon his dotting old head. Planning beforehand what he would say to Kutuzov, Rostopchin turned angrily in his caleche and gazed sternly from side to side.

The Sokolniki field was deserted. Only at the end of it, in front of the almshouse and the lunatic asylum, could be seen some people in white and others like them walking singly across the field shouting and gesticulating.

One of these was running to cross the path of Count Rostopchin's carriage, and the count himself, his coachman, and his dragoons looked with vague horror and curiosity at these released lunatics and especially at the one running toward them.

Swaying from side to side on his long, thin legs in his fluttering dressing gown, this lunatic was running impetuously, his gaze fixed on Rostopchin, shouting something in a hoarse voice and making signs to him to stop. The lunatic's solemn, gloomy face was thin and yellow, with its beard growing in uneven tufts. His black, agate pupils with saffron-yellow whites moved restlessly near the lower eyelids.

"Stop! Pull up, I tell you!" he cried in a piercing voice, and again shouted something breathlessly with emphatic intonations and gestures.

Coming abreast of the caleche he ran beside it.

"Thrice have they slain me, thrice have I risen from the dead. They stoned me, crucified me... I shall rise... shall rise... shall rise. They have torn my body. The kingdom of God will be overthrown... Thrice will I overthrow it and thrice re-establish it!" he cried, raising his voice higher and higher.

Count Rostopchin suddenly grew pale as he had done when the crowd closed in on Vereshchagin. He turned away. "Go fas... faster!" he cried in a trembling voice to his coachman. The caleche flew over the ground as fast as the horses could draw it, but for a long time Count Rostopchin still heard the insane despairing screams growing fainter in the distance, while his eyes saw nothing but the astonished, frightened, bloodstained face of "the traitor" in the fur-lined coat.

Recent as that mental picture was, Rostopchin already felt that it had cut deep into his heart and drawn blood. Even now he felt clearly that the gory trace of that recollection would not pass with time, but that the terrible memory would, on the contrary, dwell in his heart ever more cruelly and painfully to the end of his life. He seemed still to hear the sound of his own words: "Cut him down! I command it...."

"Why did I utter those words? It was by some accident I said them.... I need not have said them," he thought. "And then nothing would have happened." He saw the frightened and then infuriated face of the dragoon who dealt the blow, the look of silent, timid reproach that boy in the fur-lined coat had turned upon him. "But I did not do it for my own sake. I was bound to act that way.... The mob, the traitor... the public welfare," thought he.

Troops were still crowding at the Yauza bridge. It was hot. Kutuzov, dejected and frowning, sat on a bench by the bridge toying with his whip in the sand when a caleche dashed up noisily. A man in a general's uniform with plumes in his hat went up to Kutuzov and said something in French. It was Count Rostopchin. He told Kutuzov that he had come because Moscow, the capital, was no more and only the army remained.

"Things would have been different if your Serene Highness had not told me that you would not abandon Moscow without another battle; all this would not have happened," he said.

Kutuzov looked at Rostopchin as if, not grasping what was said to him, he was trying to read something peculiar written at that moment on the face of the man addressing him. Rostopchin grew confused and became silent. Kutuzov slightly shook his head and not taking his penetrating gaze from Rostopchin's face muttered softly:

"No! I shall not give up Moscow without a battle!"

Whether Kutuzov was thinking of something entirely different when he spoke those words, or uttered them purposely, knowing them to be

meaningless, at any rate Rostopchin made no reply and hastily left him. And strange to say, the Governor of Moscow, the proud Count Rostopchin, took up a Cossack whip and went to the bridge where he began with shouts to drive on the carts that blocked the way.

CHAPTER XXVI

Toward four o'clock in the afternoon Murat's troops were entering Moscow. In front rode a detachment of Wurtemberg hussars and behind them rode the King of Naples himself accompanied by a numerous suite.

About the middle of the Arbat Street, near the Church of the Miraculous Icon of St. Nicholas, Murat halted to await news from the advanced detachment as to the condition in which they had found the citadel, le Kremlin.

Around Murat gathered a group of those who had remained in Moscow. They all stared in timid bewilderment at the strange, long-haired commander dressed up in feathers and gold.

"Is that their Tsar himself? He's not bad!" low voices could be heard saying.

An interpreter rode up to the group.

"Take off your cap... your caps!" These words went from one to another in the crowd. The interpreter addressed an old porter and asked if it was far to the Kremlin. The porter, listening in perplexity to the unfamiliar Polish accent and not realizing that the interpreter was speaking Russian, did not understand what was being said to him and slipped behind the others.

Murat approached the interpreter and told him to ask where the Russian army was. One of the Russians understood what was asked and several voices at once began answering the interpreter. A French officer, returning from the advanced detachment, rode up to Murat and reported that the gates of the citadel had been barricaded and that there was probably an ambush there.

"Good!" said Murat and, turning to one of the gentlemen in his suite, ordered four light guns to be moved forward to fire at the gates.

The guns emerged at a trot from the column following Murat and advanced up the Arbat. When they reached the end of the Vozdvizhenka Street they halted and drew in the Square. Several French officers superintended the placing of the guns and looked at the Kremlin through field glasses.

The bells in the Kremlin were ringing for vespers, and this sound troubled the French. They imagined it to be a call to arms. A few infantrymen ran to the Kutafyev Gate. Beams and wooden screens had been put there, and two musket shots rang out from under the gate as soon as an officer and men began to run toward it. A general who was standing by the guns shouted some words of command to the officer, and the latter ran back again with his men.

The sound of three more shots came from the gate.

One shot struck a French soldier's foot, and from behind the screens came the strange sound of a few voices shouting. Instantly as at a word of command the expression of cheerful serenity on the faces of the French general, officers, and men changed to one of determined concentrated readiness for strife and suffering. To all of them from the marshal to the least soldier, that place was not the Vozdvizhenka, Mokhavaya, or Kutafyev Street, nor the Troitsa Gate (places familiar in Moscow), but a new battlefield which would probably prove sanguinary. And all made ready for that battle. The cries from the gates ceased. The guns were advanced, the artillerymen blew the ash off their linstocks, and an officer gave the word "Fire!" This was followed by two whistling sounds of canister shot, one after another. The shot rattled against the stone of the gate and upon the wooden beams and screens, and two wavering clouds of smoke rose over the Square.

A few instants after the echo of the reports resounding over the stone-built Kremlin had died away the French heard a strange sound above their head. Thousands of crows rose above the walls and circled in the air, cawing and noisily flapping their wings. Together with that sound came a solitary human cry from the gateway and amid the smoke appeared the figure of a bareheaded man in a peasant's coat. He grasped a musket and took aim at the French. "Fire!" repeated the officer once more, and the reports of a musket and of two cannon shots were heard simultaneously. The gate again hidden by smoke.

Nothing more stirred behind the screens and the French infantry soldiers and officers advanced to the gate. In the gateway lay three wounded and four dead. Two men in peasant coats ran away at the foot of the wall, toward the Znamenka.

"Clear that away!" said the officer, pointing to the beams and the corpses, and the French soldiers, after dispatching the wounded, threw the corpses over the parapet.

Who these men were nobody knew. "Clear that away!" was all that was said of them, and they were thrown over the parapet and removed later on that they might not stink. Thiers alone dedicates a few eloquent lines to their memory: "These wretches had occupied the sacred citadel, having supplied themselves with guns from the arsenal, and fired" (the wretches) "at the French. Some of them were sabered and the Kremlin was purged of their presence."

Murat was informed that the way had been cleared. The French entered the gates and began pitching their camp in the Senate Square. Out of the windows of the Senate House the soldiers threw chairs into the Square for fuel and kindled fires there.

Other detachments passed through the Kremlin and encamped along the Moroseyka, the Lubyanka, and Pokrovka Streets. Others quartered themselves along the Vozdvizhenka, the Nikolski, and the Tverskoy Streets. No masters of the houses being found anywhere, the French were not billeted on the inhabitants as is usual in towns but lived in it as in a camp.

Though tattered, hungry, worn out, and reduced to a third of their original number, the French entered Moscow in good marching order. It was a weary and famished, but still a fighting and menacing army. But it remained an army only until its soldiers had dispersed into their different lodgings. As soon as the men of the various regiments began to disperse among the wealthy and deserted houses, the army was lost forever and there came into being something nondescript, neither citizens nor soldiers but what are known as marauders. When five weeks later these same men left Moscow, they no longer formed an army. They were a mob of marauders, each carrying a quantity of articles which seemed to him valuable or useful. The aim of each man when he left Moscow was no longer, as it had been, to conquer, but merely to keep what he had acquired. Like a monkey which puts its paw into the narrow neck of a jug, and having seized a handful of nuts will not open its fist for fear of losing what it holds, and therefore perishes, the French when they left Moscow had inevitably to perish because they carried their loot with them, yet to abandon what they had stolen was as impossible for them as it is for the monkey to open its paw and let go of its nuts. Ten minutes after each regiment had entered a Moscow district, not a soldier or officer was left. Men in military uniforms and Hessian boots could be seen through the windows, laughing and walking through the rooms. In cellars and storerooms similar men were busy among the provisions, and in the yards unlocking or breaking open coach house and stable doors,

lighting fires in kitchens and kneading and baking bread with rolled-up sleeves, and cooking; or frightening, amusing, or caressing women and children. There were many such men both in the shops and houses--but there was no army.

Order after order was issued by the French commanders that day forbidding the men to disperse about the town, sternly forbidding any violence to the inhabitants or any looting, and announcing a roll call for that very evening. But despite all these measures the men, who had till then constituted an army, flowed all over the wealthy, deserted city with its comforts and plentiful supplies. As a hungry herd of cattle keeps well together when crossing a barren field, but gets out of hand and at once disperses uncontrollably as soon as it reaches rich pastures, so did the army disperse all over the wealthy city.

No residents were left in Moscow, and the soldiers--like water percolating through sand--spread irresistibly through the city in all directions from the Kremlin into which they had first marched. The cavalry, on entering a merchant's house that had been abandoned and finding there stabling more than sufficient for their horses, went on, all the same, to the next house which seemed to them better. Many of them appropriated several houses, chalked their names on them, and quarreled and even fought with other companies for them. Before they had had time to secure quarters the soldiers ran out into the streets to see the city and, hearing that everything had been abandoned, rushed to places where valuables were to be had for the taking. The officers followed to check the soldiers and were involuntarily drawn into doing the same. In Carriage Row carriages had been left in the shops, and generals flocked there to select caleches and coaches for themselves. The few inhabitants who had remained invited commanding officers to their houses, hoping thereby to secure themselves from being plundered. There were masses of wealth and there seemed no end to it. All around the quarters occupied by the French were other regions still unexplored and unoccupied where, they thought, yet greater riches might be found. And Moscow engulfed the army ever deeper and deeper. When water is spilled on dry ground both the dry ground and the water disappear and mud results; and in the same way the entry of the famished army into the rich and deserted city resulted in fires and looting and the destruction of both the army and the wealthy city.

The French attributed the Fire of Moscow au patriotisme feroce de Rostopchine,* the Russians to the barbarity of the French. In reality, however, it was not, and could not be, possible to explain the burning of Moscow by making any individual, or any group of people, responsible for it. Moscow was burned because it found itself in a

position in which any town built of wood was bound to burn, quite apart from whether it had, or had not, a hundred and thirty inferior fire engines. Deserted Moscow had to burn as inevitably as a heap of shavings has to burn on which sparks continually fall for several days. A town built of wood, where scarcely a day passes without conflagrations when the house owners are in residence and a police force is present, cannot help burning when its inhabitants have left it and it is occupied by soldiers who smoke pipes, make campfires of the Senate chairs in the Senate Square, and cook themselves meals twice a day. In peacetime it is only necessary to billet troops in the villages of any district and the number of fires in that district immediately increases. How much then must the probability of fire be increased in an abandoned, wooden town where foreign troops are quartered. "Le patriotisme feroce de Rostopchine" and the barbarity of the French were not to blame in the matter. Moscow was set on fire by the soldiers' pipes, kitchens, and campfires, and by the carelessness of enemy soldiers occupying houses they did not own. Even if there was any arson (which is very doubtful, for no one had any reason to burn the houses--in any case a troublesome and dangerous thing to do), arson cannot be regarded as the cause, for the same thing would have happened without any incendiarism.

*To Rostopchin's ferocious patriotism.

However tempting it might be for the French to blame Rostopchin's ferocity and for Russians to blame the scoundrel Bonaparte, or later on to place an heroic torch in the hands of their own people, it is impossible not to see that there could be no such direct cause of the fire, for Moscow had to burn as every village, factory, or house must burn which is left by its owners and in which strangers are allowed to live and cook their porridge. Moscow was burned by its inhabitants, it is true, but by those who had abandoned it and not by those who remained in it. Moscow when occupied by the enemy did not remain intact like Berlin, Vienna, and other towns, simply because its inhabitants abandoned it and did not welcome the French with bread and salt, nor bring them the keys of the city.

CHAPTER XXVII

The absorption of the French by Moscow, radiating starwise as it did, only reached the quarter where Pierre was staying by the

evening of the second of September.

After the last two days spent in solitude and unusual circumstances, Pierre was in a state bordering on insanity. He was completely obsessed by one persistent thought. He did not know how or when this thought had taken such possession of him, but he remembered nothing of the past, understood nothing of the present, and all he saw and heard appeared to him like a dream.

He had left home only to escape the intricate tangle of life's demands that enmeshed him, and which in his present condition he was unable to unravel. He had gone to Joseph Alexeevich's house, on the plea of sorting the deceased's books and papers, only in search of rest from life's turmoil, for in his mind the memory of Joseph Alexeevich was connected with a world of eternal, solemn, and calm thoughts, quite contrary to the restless confusion into which he felt himself being drawn. He sought a quiet refuge, and in Joseph Alexeevich's study he really found it. When he sat with his elbows on the dusty writing table in the deathlike stillness of the study, calm and significant memories of the last few days rose one after another in his imagination, particularly of the battle of Borodino and of that vague sense of his own insignificance and insincerity compared with the truth, simplicity, and strength of the class of men he mentally classed as they. When Gerasim roused him from his reverie the idea occurred to him of taking part in the popular defense of Moscow which he knew was projected. And with that object he had asked Gerasim to get him a peasant's coat and a pistol, confiding to him his intentions of remaining in Joseph Alexeevich's house and keeping his name secret. Then during the first day spent in inaction and solitude (he tried several times to fix his attention on the Masonic manuscripts, but was unable to do so) the idea that had previously occurred to him of the cabalistic significance of his name in connection with Bonaparte's more than once vaguely presented itself. But the idea that he, L'russe Besuhof, was destined to set a limit to the power of the Beast was as yet only one of the fancies that often passed through his mind and left no trace behind.

When, having bought the coat merely with the object of taking part among the people in the defense of Moscow, Pierre had met the Rostovs and Natasha had said to him: "Are you remaining in Moscow?... How splendid!" the thought flashed into his mind that it really would be a good thing, even if Moscow were taken, for him to remain there and do what he was predestined to do.

Next day, with the sole idea of not sparing himself and not lagging in any way behind them, Pierre went to the Three Hills gate. But when he returned to the house convinced that Moscow would not be defended, he suddenly felt that what before had seemed to him merely a

possibility had now become absolutely necessary and inevitable. He must remain in Moscow, concealing his name, and must meet Napoleon and kill him, and either perish or put an end to the misery of all Europe--which it seemed to him was solely due to Napoleon.

Pierre knew all the details of the attempt on Bonaparte's life in 1809 by a German student in Vienna, and knew that the student had been shot. And the risk to which he would expose his life by carrying out his design excited him still more.

Two equally strong feelings drew Pierre irresistibly to this purpose. The first was a feeling of the necessity of sacrifice and suffering in view of the common calamity, the same feeling that had caused him to go to Mohaysk on the twenty-fifth and to make his way to the very thick of the battle and had now caused him to run away from his home and, in place of the luxury and comfort to which he was accustomed, to sleep on a hard sofa without undressing and eat the same food as Gerasim. The other was that vague and quite Russian feeling of contempt for everything conventional, artificial, and human--for everything the majority of men regard as the greatest good in the world. Pierre had first experienced this strange and fascinating feeling at the Sloboda Palace, when he had suddenly felt that wealth, power, and life--all that men so painstakingly acquire and guard--if it has any worth has so only by reason the joy with which it can all be renounced.

It was the feeling that induces a volunteer recruit to spend his last penny on drink, and a drunken man to smash mirrors or glasses for no apparent reason and knowing that it will cost him all the money he possesses: the feeling which causes a man to perform actions which from an ordinary point of view are insane, to test, as it were, his personal power and strength, affirming the existence of a higher, nonhuman criterion of life.

From the very day Pierre had experienced this feeling for the first time at the Sloboda Palace he had been continuously under its influence, but only now found full satisfaction for it. Moreover, at this moment Pierre was supported in his design and prevented from renouncing it by what he had already done in that direction. If he were now to leave Moscow like everyone else, his flight from home, the peasant coat, the pistol, and his announcement to the Rostovs that he would remain in Moscow would all become not merely meaningless but contemptible and ridiculous, and to this Pierre was very sensitive.

Pierre's physical condition, as is always the case, corresponded to his mental state. The unaccustomed coarse food, the vodka he drank during those days, the absence of wine and cigars, his dirty

unchanged linen, two almost sleepless nights passed on a short sofa without bedding--all this kept him in a state of excitement bordering on insanity.

It was two o'clock in the afternoon. The French had already entered Moscow. Pierre knew this, but instead of acting he only thought about his undertaking, going over its minutest details in his mind. In his fancy he did not clearly picture to himself either the striking of the blow or the death of Napoleon, but with extraordinary vividness and melancholy enjoyment imagined his own destruction and heroic endurance.

"Yes, alone, for the sake of all, I must do it or perish!" he thought. "Yes, I will approach... and then suddenly... with pistol or dagger? But that is all the same! 'It is not I but the hand of Providence that punishes thee,' I shall say," thought he, imagining what he would say when killing Napoleon. "Well then, take me and execute me!" he went on, speaking to himself and bowing his head with a sad but firm expression.

While Pierre, standing in the middle of the room, was talking to himself in this way, the study door opened and on the threshold appeared the figure of Makar Alexeevich, always so timid before but now quite transformed.

His dressing gown was unfastened, his face red and distorted. He was obviously drunk. On seeing Pierre he grew confused at first, but noticing embarrassment on Pierre's face immediately grew bold and, staggering on his thin legs, advanced into the middle of the room.

"They're frightened," he said confidentially in a hoarse voice. "I say I won't surrender, I say... Am I not right, sir?"

He paused and then suddenly seeing the pistol on the table seized it with unexpected rapidity and ran out into the corridor.

Gerasim and the porter, who had followed Makar Alexeevich, stopped him in the vestibule and tried to take the pistol from him. Pierre, coming out into the corridor, looked with pity and repulsion at the half-crazy old man. Makar Alexeevich, frowning with exertion, held on to the pistol and screamed hoarsely, evidently with some heroic fancy in his head.

"To arms! Board them! No, you shan't get it," he yelled.

"That will do, please, that will do. Have the goodness--please, sir, to let go! Please, sir..." pleaded Gerasim, trying carefully to steer Makar Alexeevich by the elbows back to the door.

"Who are you? Bonaparte!..." shouted Makar Alexeevich.

"That's not right, sir. Come to your room, please, and rest. Allow me to have the pistol."

"Be off, thou base slave! Touch me not! See this?" shouted Makar Alexeevich, brandishing the pistol. "Board them!"

"Catch hold!" whispered Gerasim to the porter.

They seized Makar Alexeevich by the arms and dragged him to the door.

The vestibule was filled with the discordant sounds of a struggle and of a tipsy, hoarse voice.

Suddenly a fresh sound, a piercing feminine scream, reverberated from the porch and the cook came running into the vestibule.

"It's them! Gracious heavens! O Lord, four of them, horsemen!" she cried.

Gerasim and the porter let Makar Alexeevich go, and in the now silent corridor the sound of several hands knocking at the front door could be heard.

CHAPTER XXVIII

Pierre, having decided that until he had carried out his design he would disclose neither his identity nor his knowledge of French, stood at the half-open door of the corridor, intending to conceal himself as soon as the French entered. But the French entered and still Pierre did not retire--an irresistible curiosity kept him there.

There were two of them. One was an officer--a tall, soldierly, handsome man--the other evidently a private or an orderly, sunburned, short, and thin, with sunken cheeks and a dull expression. The officer walked in front, leaning on a stick and slightly limping. When he had advanced a few steps he stopped, having apparently decided that these were good quarters, turned round to the soldiers standing at the entrance, and in a loud voice of command ordered them to put up the horses. Having done that, the

officer, lifting his elbow with a smart gesture, stroked his mustache and lightly touched his hat.

"Bonjour, la compagnie!"* said he gaily, smiling and looking about him.

*"Good day, everybody!"

No one gave any reply.

"Vous etes le bourgeois?"* the officer asked Gerasim.

*"Are you the master here?"

Gerasim gazed at the officer with an alarmed and inquiring look.

"Quartier, quartier, logement!" said the officer, looking down at the little man with a condescending and good-natured smile. "Les francais sont de bons enfants. Que diable! Voyons! Ne nous fachons pas, mon vieux!"* added he, clapping the scared and silent Gerasim on the shoulder. "Well, does no one speak French in this establishment?" he asked again in French, looking around and meeting Pierre's eyes. Pierre moved away from the door.

*"Quarters, quarters, lodgings! The French are good fellows. What the devil! There, don't let us be cross, old fellow!"

Again the officer turned to Gerasim and asked him to show him the rooms in the house.

"Master, not here--don't understand... me, you..." said Gerasim, trying to render his words more comprehensible by contorting them.

Still smiling, the French officer spread out his hands before Gerasim's nose, intimating that he did not understand him either, and moved, limping, to the door at which Pierre was standing. Pierre wished to go away and conceal himself, but at that moment he saw Makar Alexeevich appearing at the open kitchen door with the pistol in his hand. With a madman's cunning, Makar Alexeevich eyed the Frenchman, raised his pistol, and took aim.

"Board them!" yelled the tipsy man, trying to press the trigger.

Hearing the yell the officer turned round, and at the same moment Pierre threw himself on the drunkard. Just when Pierre snatched at and struck up the pistol Makar Alexeevich at last got his fingers on the trigger, there was a deafening report, and all were enveloped in a cloud of smoke. The Frenchman turned pale and rushed to the door.

Forgetting his intention of concealing his knowledge of French, Pierre, snatching away the pistol and throwing it down, ran up to the officer and addressed him in French.

"You are not wounded?" he asked.

"I think not," answered the Frenchman, feeling himself over. "But I have had a lucky escape this time," he added, pointing to the damaged plaster of the wall. "Who is that man?" said he, looking sternly at Pierre.

"Oh, I am really in despair at what has occurred," said Pierre rapidly, quite forgetting the part he had intended to play. "He is an unfortunate madman who did not know what he was doing."

The officer went up to Makar Alexeevich and took him by the collar.

Makar Alexeevich was standing with parted lips, swaying, as if about to fall asleep, as he leaned against the wall.

"Brigand! You shall pay for this," said the Frenchman, letting go of him. "We French are merciful after victory, but we do not pardon traitors," he added, with a look of gloomy dignity and a fine energetic gesture.

Pierre continued, in French, to persuade the officer not to hold that drunken imbecile to account. The Frenchman listened in silence with the same gloomy expression, but suddenly turned to Pierre with a smile. For a few seconds he looked at him in silence. His handsome face assumed a melodramatically gentle expression and he held out his hand.

"You have saved my life. You are French," said he.

For a Frenchman that deduction was indubitable. Only a Frenchman could perform a great deed, and to save his life--the life of M. Ramballe, captain of the 13th Light Regiment--was undoubtedly a very great deed.

But however indubitable that conclusion and the officer's conviction based upon it, Pierre felt it necessary to disillusion him.

"I am Russian," he said quickly.

"Tut, tut, tut! Tell that to others," said the officer, waving his finger before his nose and smiling. "You shall tell me all about that presently. I am delighted to meet a compatriot. Well, and what are we to do with this man?" he added, addressing himself to Pierre as to a brother.

Even if Pierre were not a Frenchman, having once received that loftiest of human appellations he could not renounce it, said the officer's look and tone. In reply to his last question Pierre again explained who Makar Alexeevich was and how just before their arrival that drunken imbecile had seized the loaded pistol which they had not had time to recover from him, and begged the officer to let the deed go unpunished.

The Frenchman expanded his chest and made a majestic gesture with his arm.

"You have saved my life! You are French. You ask his pardon? I grant it you. Lead that man away!" said he quickly and energetically, and taking the arm of Pierre whom he had promoted to be a Frenchman for saving his life, he went with him into the room.

The soldiers in the yard, hearing the shot, came into the passage asking what had happened, and expressed their readiness to punish the culprits, but the officer sternly checked them.

"You will be called in when you are wanted," he said.

The soldiers went out again, and the orderly, who had meanwhile had time to visit the kitchen, came up to his officer.

"Captain, there is soup and a leg of mutton in the kitchen," said he. "Shall I serve them up?"

"Yes, and some wine," answered the captain.

CHAPTER XXIX

When the French officer went into the room with Pierre the latter again thought it his duty to assure him that he was not French and wished to go away, but the officer would not hear of it. He was so

very polite, amiable, good-natured, and genuinely grateful to Pierre for saving his life that Pierre had not the heart to refuse, and sat down with him in the parlor--the first room they entered. To Pierre's assurances that he was not a Frenchman, the captain, evidently not understanding how anyone could decline so flattering an appellation, shrugged his shoulders and said that if Pierre absolutely insisted on passing for a Russian let it be so, but for all that he would be forever bound to Pierre by gratitude for saving his life.

Had this man been endowed with the slightest capacity for perceiving the feelings of others, and had he at all understood what Pierre's feelings were, the latter would probably have left him, but the man's animated obtuseness to everything other than himself disarmed Pierre.

"A Frenchman or a Russian prince incognito," said the officer, looking at Pierre's fine though dirty linen and at the ring on his finger. "I owe my life to you and offer you my friendship. A Frenchman never forgets either an insult or a service. I offer you my friendship. That is all I can say."

There was so much good nature and nobility (in the French sense of the word) in the officer's voice, in the expression of his face and in his gestures, that Pierre, unconsciously smiling in response to the Frenchman's smile, pressed the hand held out to him.

"Captain Ramballe, of the 13th Light Regiment, Chevalier of the Legion of Honor for the affair on the seventh of September," he introduced himself, a self-satisfied irrepressible smile puckering his lips under his mustache. "Will you now be so good as to tell me with whom I have the honor of conversing so pleasantly, instead of being in the ambulance with that maniac's bullet in my body?"

Pierre replied that he could not tell him his name and, blushing, began to try to invent a name and to say something about his reason for concealing it, but the Frenchman hastily interrupted him.

"Oh, please!" said he. "I understand your reasons. You are an officer... a superior officer perhaps. You have borne arms against us. That's not my business. I owe you my life. That is enough for me. I am quite at your service. You belong to the gentry?" he concluded with a shade of inquiry in his tone. Pierre bent his head. "Your baptismal name, if you please. That is all I ask. Monsieur Pierre, you say.... That's all I want to know."

When the mutton and an omelet had been served and a samovar and vodka brought, with some wine which the French had taken from a

Russian cellar and brought with them, Ramballe invited Pierre to share his dinner, and himself began to eat greedily and quickly like a healthy and hungry man, munching his food rapidly with his strong teeth, continually smacking his lips, and repeating--"Excellent! Delicious!" His face grew red and was covered with perspiration. Pierre was hungry and shared the dinner with pleasure. Morel, the orderly, brought some hot water in a saucepan and placed a bottle of claret in it. He also brought a bottle of kvass, taken from the kitchen for them to try. That beverage was already known to the French and had been given a special name. They called it limonade de cochon (pig's lemonade), and Morel spoke well of the limonade de cochon he had found in the kitchen. But as the captain had the wine they had taken while passing through Moscow, he left the kvass to Morel and applied himself to the bottle of Bordeaux. He wrapped the bottle up to its neck in a table napkin and poured out wine for himself and for Pierre. The satisfaction of his hunger and the wine rendered the captain still more lively and he chatted incessantly all through dinner.

"Yes, my dear Monsieur Pierre, I owe you a fine votive candle for saving me from that maniac.... You see, I have bullets enough in my body already. Here is one I got at Wagram" (he touched his side) "and a second at Smolensk"--he showed a scar on his cheek--"and this leg which as you see does not want to march, I got that on the seventh at the great battle of la Moskowa. Sacre Dieu! It was splendid! That deluge of fire was worth seeing. It was a tough job you set us there, my word! You may be proud of it! And on my honor, in spite of the cough I caught there, I should be ready to begin again. I pity those who did not see it."

"I was there," said Pierre.

"Bah, really? So much the better! You are certainly brave foes. The great redoubt held out well, by my pipe!" continued the Frenchman. "And you made us pay dear for it. I was at it three times--sure as I sit here. Three times we reached the guns and three times we were thrown back like cardboard figures. Oh, it was beautiful, Monsieur Pierre! Your grenadiers were splendid, by heaven! I saw them close up their ranks six times in succession and march as if on parade. Fine fellows! Our King of Naples, who knows what's what, cried 'Bravo!' Ha, ha! So you are one of us soldiers!" he added, smiling, after a momentary pause. "So much the better, so much the better, Monsieur Pierre! Terrible in battle... gallant... with the fair" (he winked and smiled), "that's what the French are, Monsieur Pierre, aren't they?"

The captain was so naively and good-humoredly gay, so real, and so pleased with himself that Pierre almost winked back as he looked merrily at him. Probably the word "gallant" turned the captain's

thoughts to the state of Moscow.

"Apropos, tell me please, is it true that the women have all left Moscow? What a queer idea! What had they to be afraid of?"

"Would not the French ladies leave Paris if the Russians entered it?" asked Pierre.

"Ha, ha, ha!" The Frenchman emitted a merry, sanguine chuckle, patting Pierre on the shoulder. "What a thing to say!" he exclaimed. "Paris?... But Paris, Paris..."

"Paris--the capital of the world," Pierre finished his remark for him.

The captain looked at Pierre. He had a habit of stopping short in the middle of his talk and gazing intently with his laughing, kindly eyes.

"Well, if you hadn't told me you were Russian, I should have wagered that you were Parisian! You have that... I don't know what, that..." and having uttered this compliment, he again gazed at him in silence.

"I have been in Paris. I spent years there," said Pierre.

"Oh yes, one sees that plainly. Paris!... A man who doesn't know Paris is a savage. You can tell a Parisian two leagues off. Paris is Talma, la Duchenois, Potier, the Sorbonne, the boulevards," and noticing that his conclusion was weaker than what had gone before, he added quickly: "There is only one Paris in the world. You have been to Paris and have remained Russian. Well, I don't esteem you the less for it."

Under the influence of the wine he had drunk, and after the days he had spent alone with his depressing thoughts, Pierre involuntarily enjoyed talking with this cheerful and good-natured man.

"To return to your ladies--I hear they are lovely. What a wretched idea to go and bury themselves in the steppes when the French army is in Moscow. What a chance those girls have missed! Your peasants, now--that's another thing; but you civilized people, you ought to know us better than that. We took Vienna, Berlin, Madrid, Naples, Rome, Warsaw, all the world's capitals.... We are feared, but we are loved. We are nice to know. And then the Emperor..." he began, but Pierre interrupted him.

"The Emperor," Pierre repeated, and his face suddenly became sad and embarrassed, "is the Emperor...?"

"The Emperor? He is generosity, mercy, justice, order, genius—that's what the Emperor is! It is I, Ramballe, who tell you so.... I assure you I was his enemy eight years ago. My father was an emigrant count.... But that man has vanquished me. He has taken hold of me. I could not resist the sight of the grandeur and glory with which he has covered France. When I understood what he wanted--when I saw that he was preparing a bed of laurels for us, you know, I said to myself: 'That is a monarch,' and I devoted myself to him! So there! Oh yes, mon cher, he is the greatest man of the ages past or future."

"Is he in Moscow?" Pierre stammered with a guilty look.

The Frenchman looked at his guilty face and smiled.

"No, he will make his entry tomorrow," he replied, and continued his talk.

Their conversation was interrupted by the cries of several voices at the gate and by Morel, who came to say that some Wurttemberg hussars had come and wanted to put up their horses in the yard where the captain's horses were. This difficulty had arisen chiefly because the hussars did not understand what was said to them in French.

The captain had their senior sergeant called in, and in a stern voice asked him to what regiment he belonged, who was his commanding officer, and by what right he allowed himself to claim quarters that were already occupied. The German who knew little French, answered the two first questions by giving the names of his regiment and of his commanding officer, but in reply to the third question which he did not understand said, introducing broken French into his own German, that he was the quartermaster of the regiment and his commander had ordered him to occupy all the houses one after another. Pierre, who knew German, translated what the German said to the captain and gave the captain's reply to the Wurttemberg hussar in German. When he had understood what was said to him, the German submitted and took his men elsewhere. The captain went out into the porch and gave some orders in a loud voice.

When he returned to the room Pierre was sitting in the same place as before, with his head in his hands. His face expressed suffering. He really was suffering at that moment. When the captain went out and he was left alone, suddenly he came to himself and realized the position he was in. It was not that Moscow had been taken or that the happy conquerors were masters in it and were patronizing him. Painful as that was it was not that which tormented Pierre at the moment. He was tormented by the consciousness of his own weakness. The

few glasses of wine he had drunk and the conversation with this good-natured man had destroyed the mood of concentrated gloom in which he had spent the last few days and which was essential for the execution of his design. The pistol, dagger, and peasant coat were ready. Napoleon was to enter the town next day. Pierre still considered that it would be a useful and worthy action to slay the evildoer, but now he felt that he would not do it. He did not know why, but he felt a foreboding that he would not carry out his intention. He struggled against the confession of his weakness but dimly felt that he could not overcome it and that his former gloomy frame of mind, concerning vengeance, killing, and self-sacrifice, had been dispersed like dust by contact with the first man he met.

The captain returned to the room, limping slightly and whistling a tune.

The Frenchman's chatter which had previously amused Pierre now repelled him. The tune he was whistling, his gait, and the gesture with which he twirled his mustache, all now seemed offensive. "I will go away immediately. I won't say another word to him," thought Pierre. He thought this, but still sat in the same place. A strange feeling of weakness tied him to the spot; he wished to get up and go away, but could not do so.

The captain, on the other hand, seemed very cheerful. He paced up and down the room twice. His eyes shone and his mustache twitched as if he were smiling to himself at some amusing thought.

"The colonel of those Wurttembergers is delightful," he suddenly said. "He's a German, but a nice fellow all the same.... But he's a German." He sat down facing Pierre. "By the way, you know German, then?"

Pierre looked at him in silence.

"What is the German for 'shelter'?"

"Shelter?" Pierre repeated. "The German for shelter is Unterkunft."

"How do you say it?" the captain asked quickly and doubtfully.

"Unterkunft," Pierre repeated.

"Onterkoff," said the captain and looked at Pierre for some seconds with laughing eyes. "These Germans are first-rate fools, don't you think so, Monsieur Pierre?" he concluded.

"Well, let's have another bottle of this Moscow Bordeaux, shall

we? Morel will warm us up another little bottle. Morel!" he called out gaily.

Morel brought candles and a bottle of wine. The captain looked at Pierre by the candlelight and was evidently struck by the troubled expression on his companion's face. Ramballe, with genuine distress and sympathy in his face, went up to Pierre and bent over him.

"There now, we're sad," said he, touching Pierre's hand. "Have I upset you? No, really, have you anything against me?" he asked Pierre. "Perhaps it's the state of affairs?"

Pierre did not answer, but looked cordially into the Frenchman's eyes whose expression of sympathy was pleasing to him.

"Honestly, without speaking of what I owe you, I feel friendship for you. Can I do anything for you? Dispose of me. It is for life and death. I say it with my hand on my heart!" said he, striking his chest.

"Thank you," said Pierre.

The captain gazed intently at him as he had done when he learned that "shelter" was *Unterkunft* in German, and his face suddenly brightened.

"Well, in that case, I drink to our friendship!" he cried gaily, filling two glasses with wine.

Pierre took one of the glasses and emptied it. Ramballe emptied his too, again pressed Pierre's hand, and leaned his elbows on the table in a pensive attitude.

"Yes, my dear friend," he began, "such is fortune's caprice. Who would have said that I should be a soldier and a captain of dragoons in the service of Bonaparte, as we used to call him? Yet here I am in Moscow with him. I must tell you, *mon cher*," he continued in the sad and measured tones of a man who intends to tell a long story, "that our name is one of the most ancient in France."

And with a Frenchman's easy and naive frankness the captain told Pierre the story of his ancestors, his childhood, youth, and manhood, and all about his relations and his financial and family affairs, "*ma pauvre mere*" playing of course an important part in the story.

"But all that is only life's setting, the real thing is love-love! Am I not right, Monsieur Pierre?" said he, growing animated.

"Another glass?"

Pierre again emptied his glass and poured himself out a third.

"Oh, women, women!" and the captain, looking with glistening eyes at Pierre, began talking of love and of his love affairs.

There were very many of these, as one could easily believe, looking at the officer's handsome, self-satisfied face, and noting the eager enthusiasm with which he spoke of women. Though all Ramballe's love stories had the sensual character which Frenchmen regard as the special charm and poetry of love, yet he told his story with such sincere conviction that he alone had experienced and known all the charm of love and he described women so alluringly that Pierre listened to him with curiosity.

It was plain that l'amour which the Frenchman was so fond of was not that low and simple kind that Pierre had once felt for his wife, nor was it the romantic love stimulated by himself that he experienced for Natasha. (Ramballe despised both these kinds of love equally: the one he considered the "love of clodhoppers" and the other the "love of simpletons.") L'amour which the Frenchman worshiped consisted principally in the unnaturalness of his relation to the woman and in a combination of incongruities giving the chief charm to the feeling.

Thus the captain touchingly recounted the story of his love for a fascinating marquise of thirty-five and at the same time for a charming, innocent child of seventeen, daughter of the bewitching marquise. The conflict of magnanimity between the mother and the daughter, ending in the mother's sacrificing herself and offering her daughter in marriage to her lover, even now agitated the captain, though it was the memory of a distant past. Then he recounted an episode in which the husband played the part of the lover, and he--the lover--assumed the role of the husband, as well as several droll incidents from his recollections of Germany, where "shelter" is called Unterkunft and where the husbands eat sauerkraut and the young girls are "too blonde."

Finally, the latest episode in Poland still fresh in the captain's memory, and which he narrated with rapid gestures and glowing face, was of how he had saved the life of a Pole (in general, the saving of life continually occurred in the captain's stories) and the Pole had entrusted to him his enchanting wife (parisienne de coeur) while himself entering the French service. The captain was happy, the enchanting Polish lady wished to elope with him, but, prompted by magnanimity, the captain restored the wife to the husband, saying as he did so: "I have saved your life, and I save your honor!" Having repeated these words the captain wiped his eyes and gave himself a

shake, as if driving away the weakness which assailed him at this touching recollection.

Listening to the captain's tales, Pierre--as often happens late in the evening and under the influence of wine--followed all that was told him, understood it all, and at the same time followed a train of personal memories which, he knew not why, suddenly arose in his mind. While listening to these love stories his own love for Natasha unexpectedly rose to his mind, and going over the pictures of that love in his imagination he mentally compared them with Ramballe's tales. Listening to the story of the struggle between love and duty, Pierre saw before his eyes every minutest detail of his last meeting with the object of his love at the Sukharev water tower. At the time of that meeting it had not produced an effect upon him--he had not even once recalled it. But now it seemed to him that that meeting had had in it something very important and poetic.

"Peter Kirilovich, come here! We have recognized you," he now seemed to hear the words she had uttered and to see before him her eyes, her smile, her traveling hood, and a stray lock of her hair... and there seemed to him something pathetic and touching in all this.

Having finished his tale about the enchanting Polish lady, the captain asked Pierre if he had ever experienced a similar impulse to sacrifice himself for love and a feeling of envy of the legitimate husband.

Challenged by this question Pierre raised his head and felt a need to express the thoughts that filled his mind. He began to explain that he understood love for a woman somewhat differently. He said that in all his life he had loved and still loved only one woman, and that she could never be his.

"Tiens!" said the captain.

Pierre then explained that he had loved this woman from his earliest years, but that he had not dared to think of her because she was too young, and because he had been an illegitimate son without a name. Afterwards when he had received a name and wealth he dared not think of her because he loved her too well, placing her far above everything in the world, and especially therefore above himself.

When he had reached this point, Pierre asked the captain whether he understood that.

The captain made a gesture signifying that even if he did not understand it he begged Pierre to continue.

"Platonic love, clouds..." he muttered.

Whether it was the wine he had drunk, or an impulse of frankness, or the thought that this man did not, and never would, know any of those who played a part in his story, or whether it was all these things together, something loosened Pierre's tongue. Speaking thickly and with a faraway look in his shining eyes, he told the whole story of his life: his marriage, Natasha's love for his best friend, her betrayal of him, and all his own simple relations with her. Urged on by Ramballe's questions he also told what he had at first concealed--his own position and even his name.

More than anything else in Pierre's story the captain was impressed by the fact that Pierre was very rich, had two mansions in Moscow, and that he had abandoned everything and not left the city, but remained there concealing his name and station.

When it was late at night they went out together into the street. The night was warm and light. To the left of the house on the Pokrovka a fire glowed--the first of those that were beginning in Moscow. To the right and high up in the sky was the sickle of the waning moon and opposite to it hung that bright comet which was connected in Pierre's heart with his love. At the gate stood Gerasim, the cook, and two Frenchmen. Their laughter and their mutually incomprehensible remarks in two languages could be heard. They were looking at the glow seen in the town.

There was nothing terrible in the one small, distant fire in the immense city.

Gazing at the high starry sky, at the moon, at the comet, and at the glow from the fire, Pierre experienced a joyful emotion. "There now, how good it is, what more does one need?" thought he. And suddenly remembering his intention he grew dizzy and felt so faint that he leaned against the fence to save himself from falling.

Without taking leave of his new friend, Pierre left the gate with unsteady steps and returning to his room lay down on the sofa and immediately fell asleep.

CHAPTER XXX

The glow of the first fire that began on the second of September was

watched from the various roads by the fugitive Muscovites and by the retreating troops, with many different feelings.

The Rostov party spent the night at Mytishchi, fourteen miles from Moscow. They had started so late on the first of September, the road had been so blocked by vehicles and troops, so many things had been forgotten for which servants were sent back, that they had decided to spend that night at a place three miles out of Moscow. The next morning they woke late and were again delayed so often that they only got as far as Great Mytishchi. At ten o'clock that evening the Rostov family and the wounded traveling with them were all distributed in the yards and huts of that large village. The Rostovs' servants and coachmen and the orderlies of the wounded officers, after attending to their masters, had supper, fed the horses, and came out into the porches.

In a neighboring hut lay Raevski's adjutant with a fractured wrist. The awful pain he suffered made him moan incessantly and piteously, and his moaning sounded terrible in the darkness of the autumn night. He had spent the first night in the same yard as the Rostovs. The countess said she had been unable to close her eyes on account of his moaning, and at Mytishchi she moved into a worse hut simply to be farther away from the wounded man.

In the darkness of the night one of the servants noticed, above the high body of a coach standing before the porch, the small glow of another fire. One glow had long been visible and everybody knew that it was Little Mytishchi burning--set on fire by Mamonov's Cossacks.

"But look here, brothers, there's another fire!" remarked an orderly.

All turned their attention to the glow.

"But they told us Little Mytishchi had been set on fire by Mamonov's Cossacks."

"But that's not Mytishchi, it's farther away."

"Look, it must be in Moscow!"

Two of the gazers went round to the other side of the coach and sat down on its steps.

"It's more to the left, why, Little Mytishchi is over there, and this is right on the other side."

Several men joined the first two.

"See how it's flaring," said one. "That's a fire in Moscow: either in the Sushchevski or the Rogozhski quarter."

No one replied to this remark and for some time they all gazed silently at the spreading flames of the second fire in the distance.

Old Daniel Terentich, the count's valet (as he was called), came up to the group and shouted at Mishka.

"What are you staring at, you good-for-nothing?... The count will be calling and there's nobody there; go and gather the clothes together."

"I only ran out to get some water," said Mishka.

"But what do you think, Daniel Terentich? Doesn't it look as if that glow were in Moscow?" remarked one of the footmen.

Daniel Terentich made no reply, and again for a long time they were all silent. The glow spread, rising and falling, farther and farther still.

"God have mercy.... It's windy and dry..." said another voice.

"Just look! See what it's doing now. O Lord! You can even see the crows flying. Lord have mercy on us sinners!"

"They'll put it out, no fear!"

"Who's to put it out?" Daniel Terentich, who had hitherto been silent, was heard to say. His voice was calm and deliberate. "Moscow it is, brothers," said he. "Mother Moscow, the white..." his voice faltered, and he gave way to an old man's sob.

And it was as if they had all only waited for this to realize the significance for them of the glow they were watching. Sighs were heard, words of prayer, and the sobbing of the count's old valet.

CHAPTER XXXI

The valet, returning to the cottage, informed the count that Moscow was burning. The count donned his dressing gown and went out to

look. Sonya and Madame Schoss, who had not yet undressed, went out with him. Only Natasha and the countess remained in the room. Petya was no longer with the family, he had gone on with his regiment which was making for Troitsa.

The countess, on hearing that Moscow was on fire, began to cry. Natasha, pale, with a fixed look, was sitting on the bench under the icons just where she had sat down on arriving and paid no attention to her father's words. She was listening to the ceaseless moaning of the adjutant, three houses off.

"Oh, how terrible," said Sonya returning from the yard chilled and frightened. "I believe the whole of Moscow will burn, there's an awful glow! Natasha, do look! You can see it from the window," she said to her cousin, evidently wishing to distract her mind.

But Natasha looked at her as if not understanding what was said to her and again fixed her eyes on the corner of the stove. She had been in this condition of stupor since the morning, when Sonya, to the surprise and annoyance of the countess, had for some unaccountable reason found it necessary to tell Natasha of Prince Andrew's wound and of his being with their party. The countess had seldom been so angry with anyone as she was with Sonya. Sonya had cried and begged to be forgiven and now, as if trying to atone for her fault, paid unceasing attention to her cousin.

"Look, Natasha, how dreadfully it is burning!" said she.

"What's burning?" asked Natasha. "Oh, yes, Moscow."

And as if in order not to offend Sonya and to get rid of her, she turned her face to the window, looked out in such a way that it was evident that she could not see anything, and again settled down in her former attitude.

"But you didn't see it!"

"Yes, really I did," Natasha replied in a voice that pleaded to be left in peace.

Both the countess and Sonya understood that, naturally, neither Moscow nor the burning of Moscow nor anything else could seem of importance to Natasha.

The count returned and lay down behind the partition. The countess went up to her daughter and touched her head with the back of her hand as she was wont to do when Natasha was ill, then touched her forehead with her lips as if to feel whether she was feverish, and

finally kissed her.

"You are cold. You are trembling all over. You'd better lie down," said the countess.

"Lie down? All right, I will. I'll lie down at once," said Natasha.

When Natasha had been told that morning that Prince Andrew was seriously wounded and was traveling with their party, she had at first asked many questions: Where was he going? How was he wounded? Was it serious? And could she see him? But after she had been told that she could not see him, that he was seriously wounded but that his life was not in danger, she ceased to ask questions or to speak at all, evidently disbelieving what they told her, and convinced that say what she might she would still be told the same. All the way she had sat motionless in a corner of the coach with wide open eyes, and the expression in them which the countess knew so well and feared so much, and now she sat in the same way on the bench where she had seated herself on arriving. She was planning something and either deciding or had already decided something in her mind. The countess knew this, but what it might be she did not know, and this alarmed and tormented her.

"Natasha, undress, darling; lie down on my bed."

A bed had been made on a bedstead for the countess only. Madame Schoss and the two girls were to sleep on some hay on the floor.

"No, Mamma, I will lie down here on the floor," Natasha replied irritably and she went to the window and opened it. Through the open window the moans of the adjutant could be heard more distinctly. She put her head out into the damp night air, and the countess saw her slim neck shaking with sobs and throbbing against the window frame. Natasha knew it was not Prince Andrew who was moaning. She knew Prince Andrew was in the same yard as themselves and in a part of the hut across the passage; but this dreadful incessant moaning made her sob. The countess exchanged a look with Sonya.

"Lie down, darling; lie down, my pet," said the countess, softly touching Natasha's shoulders. "Come, lie down."

"Oh, yes... I'll lie down at once," said Natasha, and began hurriedly undressing, tugging at the tapes of her petticoat.

When she had thrown off her dress and put on a dressing jacket, she sat down with her foot under her on the bed that had been made up on the floor, jerked her thin and rather short plait of hair to the front, and began replaiting it. Her long, thin, practiced fingers rapidly unplaited, replaited, and tied up her plait. Her head moved

from side to side from habit, but her eyes, feverishly wide, looked fixedly before her. When her toilet for the night was finished she sank gently onto the sheet spread over the hay on the side nearest the door.

"Natasha, you'd better lie in the middle," said Sonya.

"I'll stay here," muttered Natasha. "Do lie down," she added crossly, and buried her face in the pillow.

The countess, Madame Schoss, and Sonya undressed hastily and lay down. The small lamp in front of the icons was the only light left in the room. But in the yard there was a light from the fire at Little Mytishchi a mile and a half away, and through the night came the noise of people shouting at a tavern Mamonov's Cossacks had set up across the street, and the adjutant's unceasing moans could still be heard.

For a long time Natasha listened attentively to the sounds that reached her from inside and outside the room and did not move. First she heard her mother praying and sighing and the creaking of her bed under her, then Madame Schoss' familiar whistling snore and Sonya's gentle breathing. Then the countess called to Natasha. Natasha did not answer.

"I think she's asleep, Mamma," said Sonya softly.

After short silence the countess spoke again but this time no one replied.

Soon after that Natasha heard her mother's even breathing. Natasha did not move, though her little bare foot, thrust out from under the quilt, was growing cold on the bare floor.

As if to celebrate a victory over everybody, a cricket chirped in a crack in the wall. A cock crowed far off and another replied near by. The shouting in the tavern had died down; only the moaning of the adjutant was heard. Natasha sat up.

"Sonya, are you asleep? Mamma?" she whispered.

No one replied. Natasha rose slowly and carefully, crossed herself, and stepped cautiously on the cold and dirty floor with her slim, supple, bare feet. The boards of the floor creaked. Stepping cautiously from one foot to the other she ran like a kitten the few steps to the door and grasped the cold door handle.

It seemed to her that something heavy was beating rhythmically against all the walls of the room: it was her own heart, sinking

with alarm and terror and overflowing with love.

She opened the door and stepped across the threshold and onto the cold, damp earthen floor of the passage. The cold she felt refreshed her. With her bare feet she touched a sleeping man, stepped over him, and opened the door into the part of the hut where Prince Andrew lay. It was dark in there. In the farthest corner, on a bench beside a bed on which something was lying, stood a tallow candle with a long, thick, and smoldering wick.

From the moment she had been told that of Prince Andrew's wound and his presence there, Natasha had resolved to see him. She did not know why she had to, she knew the meeting would be painful, but felt the more convinced that it was necessary.

All day she had lived only in hope of seeing him that night. But now that the moment had come she was filled with dread of what she might see. How was he maimed? What was left of him? Was he like that incessant moaning of the adjutant's? Yes, he was altogether like that. In her imagination he was that terrible moaning personified. When she saw an indistinct shape in the corner, and mistook his knees raised under the quilt for his shoulders, she imagined a horrible body there, and stood still in terror. But an irresistible impulse drew her forward. She cautiously took one step and then another, and found herself in the middle of a small room containing baggage. Another man--Timokhin--was lying in a corner on the benches beneath the icons, and two others--the doctor and a valet--lay on the floor.

The valet sat up and whispered something. Timokhin, kept awake by the pain in his wounded leg, gazed with wide-open eyes at this strange apparition of a girl in a white chemise, dressing jacket, and nightcap. The valet's sleepy, frightened exclamation, "What do you want? What's the matter?" made Natasha approach more swiftly to what was lying in the corner. Horribly unlike a man as that body looked, she must see him. She passed the valet, the snuff fell from the candle wick, and she saw Prince Andrew clearly with his arms outside the quilt, and such as she had always seen him.

He was the same as ever, but the feverish color of his face, his glittering eyes rapturously turned toward her, and especially his neck, delicate as a child's, revealed by the turn-down collar of his shirt, gave him a peculiarly innocent, childlike look, such as she had never seen on him before. She went up to him and with a swift, flexible, youthful movement dropped on her knees.

He smiled and held out his hand to her.

CHAPTER XXXII

Seven days had passed since Prince Andrew found himself in the ambulance station on the field of Borodino. His feverish state and the inflammation of his bowels, which were injured, were in the doctor's

opinion sure to carry him off. But on the seventh day he ate with pleasure a piece of bread with some tea, and the doctor noticed that his temperature was lower. He had regained consciousness that morning. The first night after they left Moscow had been fairly warm and he had remained in the caleche, but at Mytishchi the wounded man himself asked to be taken out and given some tea. The pain caused by his removal into the hut had made him groan aloud and again lose consciousness. When he had been placed on his camp bed he lay for a long time motionless with closed eyes. Then he opened them and whispered softly: "And the tea?" His remembering such a small detail of everyday life astonished the doctor. He felt Prince Andrew's pulse, and to his surprise and dissatisfaction found it had improved. He was dissatisfied because he knew by experience that if his patient did not die now, he would do so a little later with greater suffering. Timokhin, the red-nosed major of Prince Andrew's regiment, had joined him in Moscow and was being taken along with him, having been wounded in the leg at the battle of Borodino. They were accompanied by a doctor, Prince Andrew's valet, his coachman, and two orderlies.

They gave Prince Andrew some tea. He drank it eagerly, looking with feverish eyes at the door in front of him as if trying to understand and remember something.

"I don't want any more. Is Timokhin here?" he asked.

Timokhin crept along the bench to him.

"I am here, your excellency."

"How's your wound?"

"Mine, sir? All right. But how about you?"

Prince Andrew again pondered as if trying to remember something.

"Couldn't one get a book?" he asked.

"What book?"

"The Gospels. I haven't one."

The doctor promised to procure it for him and began to ask how he was feeling. Prince Andrew answered all his questions reluctantly but reasonably, and then said he wanted a bolster placed under him as he was uncomfortable and in great pain. The doctor and valet lifted the cloak with which he was covered and, making wry faces at the noisome smell of mortifying flesh that came from the wound, began examining that dreadful place. The doctor was very much displeased about something and made a change in the dressings, turning the wounded man over so that he groaned again and grew unconscious and delirious from the agony. He kept asking them to get him the book and put it under him.

"What trouble would it be to you?" he said. "I have not got one. Please get it for me and put it under for a moment," he pleaded in a piteous voice.

The doctor went into the passage to wash his hands.

"You fellows have no conscience," said he to the valet who was pouring water over his hands. "For just one moment I didn't look after you... It's such pain, you know, that I wonder how he can bear it."

"By the Lord Jesus Christ, I thought we had put something under him!" said the valet.

The first time Prince Andrew understood where he was and what was the matter with him and remembered being wounded and how was when he asked to be carried into the hut after his caleche had stopped at Mytishchi. After growing confused from pain while being carried into the hut he again regained consciousness, and while drinking tea once more recalled all that had happened to him, and above all vividly remembered the moment at the ambulance station when, at the sight of the sufferings of a man he disliked, those new thoughts had come to him which promised him happiness. And those thoughts, though now vague and indefinite, again possessed his soul. He remembered that he had now a new source of happiness and that this happiness had something to do with the Gospels. That was why he asked for a copy of them. The uncomfortable position in which they had put him and turned him over again confused his thoughts, and when he came to himself a third time it was in the complete stillness of the night. Everybody near him was sleeping. A cricket chirped from across the passage; someone was shouting and singing in the street; cockroaches rustled on the table, on the icons, and on the walls, and a big fly flopped at the head of the bed and around the candle beside him, the wick of which was charred and had shaped itself like a mushroom.

His mind was not in a normal state. A healthy man usually thinks of, feels, and remembers innumerable things simultaneously, but has the power and will to select one sequence of thoughts or events on which to fix his whole attention. A healthy man can tear himself away from the deepest reflections to say a civil word to someone who comes in and can then return again to his own thoughts. But Prince Andrew's mind was not in a normal state in that respect. All the powers of his mind were more active and clearer than ever, but they acted apart from his will. Most diverse thoughts and images occupied him simultaneously. At times his brain suddenly began to work with a vigor, clearness, and depth it had never reached when he was in health, but suddenly in the midst of its work it would turn to some unexpected idea and he had not the strength to turn it back again.

"Yes, a new happiness was revealed to me of which man cannot be deprived," he thought as he lay in the semi-darkness of the quiet hut, gazing fixedly before him with feverish wide open eyes. "A happiness lying beyond material forces, outside the material influences that act on man--a happiness of the soul alone, the happiness of loving. Every man can understand it, but to conceive it and enjoin it was possible only for God. But how did God enjoin that law? And why was the Son...?"

And suddenly the sequence of these thoughts broke off, and Prince Andrew heard (without knowing whether it was a delusion or reality) a soft whispering voice incessantly and rhythmically repeating "piti-piti-piti," and then "titi," and then again "piti-piti-piti," and "ti-ti" once more. At the same time he felt that above his face, above the very middle of it, some strange airy structure was being erected out of slender needles or splinters, to the sound of this whispered music. He felt that he had to balance carefully (though it was difficult) so that this airy structure should not collapse; but nevertheless it kept collapsing and again slowly rising to the sound of whispered rhythmic music--"it stretches, stretches, spreading out and stretching," said Prince Andrew to himself. While listening to this whispering and feeling the sensation of this drawing out and the construction of this edifice of needles, he also saw by glimpses a red halo round the candle, and heard the rustle of the cockroaches and the buzzing of the fly that flopped against his pillow and his face. Each time the fly touched his face it gave him a burning sensation and yet to his surprise it did not destroy the structure, though it knocked against the very region of his face where it was rising. But besides this there was something else of importance. It was something white by the door--the statue of a sphinx, which also oppressed him.

"But perhaps that's my shirt on the table," he thought, "and

that's my legs, and that is the door, but why is it always stretching and drawing itself out, and 'piti-piti-piti' and 'ti-ti' and 'piti-piti-piti'...? That's enough, please leave off!" Prince Andrew painfully entreated someone. And suddenly thoughts and feelings again swam to the surface of his mind with peculiar clearness and force.

"Yes--love," he thought again quite clearly. "But not love which loves for something, for some quality, for some purpose, or for some reason, but the love which I--while dying--first experienced when I saw my enemy and yet loved him. I experienced that feeling of love which is the very essence of the soul and does not require an object. Now again I feel that bliss. To love one's neighbors, to love one's enemies, to love everything, to love God in all His manifestations. It is possible to love someone dear to you with human love, but an enemy can only be loved by divine love. That is why I experienced such joy when I felt that I loved that man. What has become of him? Is he alive?..."

"When loving with human love one may pass from love to hatred, but divine love cannot change. No, neither death nor anything else can destroy it. It is the very essence of the soul. Yet how many people have I hated in my life? And of them all, I loved and hated none as I did her." And he vividly pictured to himself Natasha, not as he had done in the past with nothing but her charms which gave him delight, but for the first time picturing to himself her soul. And he understood her feelings, her sufferings, shame, and remorse. He now understood for the first time all the cruelty of his rejection of her, the cruelty of his rupture with her. "If only it were possible for me to see her once more! Just once, looking into those eyes to say..."

"Piti-piti-piti and ti-ti and piti-piti-piti boom!" flopped the fly... And his attention was suddenly carried into another world, a world of reality and delirium in which something particular was happening. In that world some structure was still being erected and did not fall, something was still stretching out, and the candle with its red halo was still burning, and the same shirtlike sphinx lay near the door; but besides all this something creaked, there was a whiff of fresh air, and a new white sphinx appeared, standing at the door. And that sphinx had the pale face and shining eyes of the very Natasha of whom he had just been thinking.

"Oh, how oppressive this continual delirium is," thought Prince Andrew, trying to drive that face from his imagination. But the face remained before him with the force of reality and drew nearer. Prince Andrew wished to return that former world of pure thought, but he could not, and delirium drew him back into its domain. The soft

whispering voice continued its rhythmic murmur, something oppressed him and stretched out, and the strange face was before him. Prince Andrew collected all his strength in an effort to recover his senses, he moved a little, and suddenly there was a ringing in his ears, a dimness in his eyes, and like a man plunged into water he lost consciousness. When he came to himself, Natasha, that same living Natasha whom of all people he most longed to love with this new pure divine love that had been revealed to him, was kneeling before him. He realized that it was the real living Natasha, and he was not surprised but quietly happy. Natasha, motionless on her knees (she was unable to stir), with frightened eyes riveted on him, was restraining her sobs. Her face was pale and rigid. Only in the lower part of it something quivered.

Prince Andrew sighed with relief, smiled, and held out his hand.

"You?" he said. "How fortunate!"

With a rapid but careful movement Natasha drew nearer to him on her knees and, taking his hand carefully, bent her face over it and began kissing it, just touching it lightly with her lips.

"Forgive me!" she whispered, raising her head and glancing at him.
"Forgive me!"

"I love you," said Prince Andrew.

"Forgive...!"

"Forgive what?" he asked.

"Forgive me for what I ha-ve do-ne!" faltered Natasha in a scarcely audible, broken whisper, and began kissing his hand more rapidly, just touching it with her lips.

"I love you more, better than before," said Prince Andrew, lifting her face with his hand so as to look into her eyes.

Those eyes, filled with happy tears, gazed at him timidly, compassionately, and with joyous love. Natasha's thin pale face, with its swollen lips, was more than plain--it was dreadful. But Prince Andrew did not see that, he saw her shining eyes which were beautiful. They heard the sound of voices behind them.

Peter the valet, who was now wide awake, had roused the doctor. Timokhin, who had not slept at all because of the pain in his leg, had long been watching all that was going on, carefully covering his bare body with the sheet as he huddled up on his bench.

"What's this?" said the doctor, rising from his bed. "Please go away, madam!"

At that moment a maid sent by the countess, who had noticed her daughter's absence, knocked at the door.

Like a somnambulist aroused from her sleep Natasha went out of the room and, returning to her hut, fell sobbing on her bed.

From that time, during all the rest of the Rostovs' journey, at every halting place and wherever they spent a night, Natasha never left the wounded Bolkonski, and the doctor had to admit that he had not expected from a young girl either such firmness or such skill in nursing a wounded man.

Dreadful as the countess imagined it would be should Prince Andrew die in her daughter's arms during the journey--as, judging by what the doctor said, it seemed might easily happen--she could not oppose Natasha. Though with the intimacy now established between the wounded man and Natasha the thought occurred that should he recover their former engagement would be renewed, no one--least of all Natasha and Prince Andrew--spoke of this: the unsettled question of life and death, which hung not only over Bolkonski but over all Russia, shut out all other considerations.

CHAPTER XXXIII

On the third of September Pierre awoke late. His head was aching, the clothes in which he had slept without undressing felt uncomfortable on his body, and his mind had a dim consciousness of something shameful he had done the day before. That something shameful was his yesterday's conversation with Captain Ramballe.

It was eleven by the clock, but it seemed peculiarly dark out of doors. Pierre rose, rubbed his eyes, and seeing the pistol with an engraved stock which Gerasim had replaced on the writing table, he remembered where he was and what lay before him that very day.

"Am I not too late?" he thought. "No, probably he won't make his entry into Moscow before noon."

Pierre did not allow himself to reflect on what lay before him, but hastened to act.

After arranging his clothes, he took the pistol and was about to go out. But it then occurred to him for the first time that he certainly could not carry the weapon in his hand through the streets. It was difficult to hide such a big pistol even under his wide coat. He could not carry it unnoticed in his belt or under his arm. Besides, it had been discharged, and he had not had time to reload it. "No matter, dagger will do," he said to himself, though when planning his design he had more than once come to the conclusion that the chief mistake made by the student in 1809 had been to try to kill Napoleon with a dagger. But as his chief aim consisted not in carrying out his design, but in proving to himself that he would not abandon his intention and was doing all he could to achieve it, Pierre hastily took the blunt jagged dagger in a green sheath which he had bought at the Sukharev market with the pistol, and hid it under his waistcoat.

Having tied a girdle over his coat and pulled his cap low on his head, Pierre went down the corridor, trying to avoid making a noise or meeting the captain, and passed out into the street.

The conflagration, at which he had looked with so much indifference the evening before, had greatly increased during the night. Moscow was on fire in several places. The buildings in Carriage Row, across the river, in the Bazaar and the Povarskoy, as well as the barges on the Moskva River and the timber yards by the Dorogomilov Bridge, were all ablaze.

Pierre's way led through side streets to the Povarskoy and from there to the church of St. Nicholas on the Arbat, where he had long before decided that the deed should be done. The gates of most of the houses were locked and the shutters up. The streets and lanes were deserted. The air was full of smoke and the smell of burning. Now and then he met Russians with anxious and timid faces, and Frenchmen with an air not of the city but of the camp, walking in the middle of the streets. Both the Russians and the French looked at Pierre with surprise. Besides his height and stoutness, and the strange morose look of suffering in his face and whole figure, the Russians stared at Pierre because they could not make out to what class he could belong. The French followed him with astonishment in their eyes chiefly because Pierre, unlike all the other Russians who gazed at the French with fear and curiosity, paid no attention to them. At the gate of one house three Frenchmen, who were explaining something to some Russians who did not understand them, stopped Pierre asking if he did not know French.

Pierre shook his head and went on. In another side street a sentinel standing beside a green caisson shouted at him, but only when the shout was threateningly repeated and he heard the click of the man's musket as he raised it did Pierre understand that he had to pass on the other side of the street. He heard nothing and saw nothing of what went on around him. He carried his resolution within himself in terror and haste, like something dreadful and alien to him, for, after the previous night's experience, he was afraid of losing it. But he was not destined to bring his mood safely to his destination. And even had he not been hindered by anything on the way, his intention could not now have been carried out, for Napoleon had passed the Arbat more than four hours previously on his way from the Dorogomilov suburb to the Kremlin, and was now sitting in a very gloomy frame of mind in a royal study in the Kremlin, giving detailed and exact orders as to measures to be taken immediately to extinguish the fire, to prevent looting, and to reassure the inhabitants. But Pierre did not know this; he was entirely absorbed in what lay before him, and was tortured--as those are who obstinately undertake a task that is impossible for them not because of its difficulty but because of its incompatibility with their natures--by the fear of weakening at the decisive moment and so losing his self-esteem.

Though he heard and saw nothing around him he found his way by instinct and did not go wrong in the side streets that led to the Povarskoy.

As Pierre approached that street the smoke became denser and denser--he even felt the heat of the fire. Occasionally curly tongues of flame rose from under the roofs of the houses. He met more people in the streets and they were more excited. But Pierre, though he felt that something unusual was happening around him, did not realize that he was approaching the fire. As he was going along a foot path across a wide-open space adjoining the Povarskoy on one side and the gardens of Prince Gruzinski's house on the other, Pierre suddenly heard the desperate weeping of a woman close to him. He stopped as if awakening from a dream and lifted his head.

By the side of the path, on the dusty dry grass, all sorts of household goods lay in a heap: featherbeds, a samovar, icons, and trunks. On the ground, beside the trunks, sat a thin woman no longer young, with long, prominent upper teeth, and wearing a black cloak and cap. This woman, swaying to and fro and muttering something, was choking with sobs. Two girls of about ten and twelve, dressed in dirty short frocks and cloaks, were staring at their mother with a look of stupefaction on their pale frightened faces. The youngest child, a boy of about seven, who wore an overcoat and an immense cap evidently not his own, was crying in his old nurse's arms. A dirty, barefooted maid was sitting on a trunk, and, having undone her pale-colored

plait, was pulling it straight and sniffing at her singed hair. The woman's husband, a short, round-shouldered man in the undress uniform of a civilian official, with sausage-shaped whiskers and showing under his square-set cap the hair smoothly brushed forward over his temples, with expressionless face was moving the trunks, which were placed one on another, and was dragging some garments from under them.

As soon as she saw Pierre, the woman almost threw herself at his feet.

"Dear people, good Christians, save me, help me, dear friends... help us, somebody," she muttered between her sobs. "My girl... My daughter! My youngest daughter is left behind. She's burned! Ooh! Was it for this I nursed you.... Ooh!"

"Don't, Mary Nikolievna!" said her husband to her in a low voice, evidently only to justify himself before the stranger. "Sister must have taken her, or else where can she be?" he added.

"Monster! Villain!" shouted the woman angrily, suddenly ceasing to weep. "You have no heart, you don't feel for your own child! Another man would have rescued her from the fire. But this is a monster and neither a man nor a father! You, honored sir, are a noble man," she went on, addressing Pierre rapidly between her sobs. "The fire broke out alongside, and blew our way, the maid called out 'Fire!' and we rushed to collect our things. We ran out just as we were.... This is what we have brought away.... The icons, and my dowry bed, all the rest is lost. We seized the children. But not Katie! Ooh! O Lord!..." and again she began to sob. "My child, my dear one! Burned, burned!"

"But where was she left?" asked Pierre.

From the expression of his animated face the woman saw that this man might help her.

"Oh, dear sir!" she cried, seizing him by the legs. "My benefactor, set my heart at ease.... Aniska, go, you horrid girl, show him the way!" she cried to the maid, angrily opening her mouth and still farther exposing her long teeth.

"Show me the way, show me, I... I'll do it," gasped Pierre rapidly.

The dirty maidservant stepped from behind the trunk, put up her plait, sighed, and went on her short, bare feet along the path. Pierre felt as if he had come back to life after a heavy swoon. He held his head higher, his eyes shone with the light of life, and with swift

steps he followed the maid, overtook her, and came out on the Povarskoy. The whole street was full of clouds of black smoke. Tongues of flame here and there broke through that cloud. A great number of people crowded in front of the conflagration. In the middle of the street stood a French general saying something to those around him. Pierre, accompanied by the maid, was advancing to the spot where the general stood, but the French soldiers stopped him.

"On ne passe pas!"* cried a voice.

*"You can't pass!"

"This way, uncle," cried the girl. "We'll pass through the side street, by the Nikulins'!"

Pierre turned back, giving a spring now and then to keep up with her. She ran across the street, turned down a side street to the left, and, passing three houses, turned into a yard on the right.

"It's here, close by," said she and, running across the yard, opened a gate in a wooden fence and, stopping, pointed out to him a small wooden wing of the house, which was burning brightly and fiercely. One of its sides had fallen in, another was on fire, and bright flames issued from the openings of the windows and from under the roof.

As Pierre passed through the fence gate, he was enveloped by hot air and involuntarily stopped.

"Which is it? Which is your house?" he asked.

"Ooh!" wailed the girl, pointing to the wing. "That's it, that was our lodging. You've burned to death, our treasure, Katie, my precious little missy! Ooh!" lamented Aniska, who at the sight of the fire felt that she too must give expression to her feelings.

Pierre rushed to the wing, but the heat was so great that he involuntarily passed round in a curve and came upon the large house that was as yet burning only at one end, just below the roof, and around which swarmed a crowd of Frenchmen. At first Pierre did not realize what these men, who were dragging something out, were about; but seeing before him a Frenchman hitting a peasant with a blunt saber and trying to take from him a fox-fur coat, he vaguely understood that looting was going on there, but he had no time to dwell on that idea.

The sounds of crackling and the din of falling walls and ceilings, the whistle and hiss of the flames, the excited shouts of the

people, and the sight of the swaying smoke, now gathering into thick black clouds and now soaring up with glittering sparks, with here and there dense sheaves of flame (now red and now like golden fish scales creeping along the walls), and the heat and smoke and rapidity of motion, produced on Pierre the usual animating effects of a conflagration. It had a peculiarly strong effect on him because at the sight of the fire he felt himself suddenly freed from the ideas that had weighed him down. He felt young, bright, adroit, and resolute. He ran round to the other side of the lodge and was about to dash into that part of it which was still standing, when just above his head he heard several voices shouting and then a cracking sound and the ring of something heavy falling close beside him.

Pierre looked up and saw at a window of the large house some Frenchmen who had just thrown out the drawer of a chest, filled with metal articles. Other French soldiers standing below went up to the drawer.

"What does this fellow want?" shouted one of them referring to Pierre.

"There's a child in that house. Haven't you seen a child?" cried Pierre.

"What's he talking about? Get along!" said several voices, and one of the soldiers, evidently afraid that Pierre might want to take from them some of the plate and bronzes that were in the drawer, moved threateningly toward him.

"A child?" shouted a Frenchman from above. "I did hear something squealing in the garden. Perhaps it's his brat that the fellow is looking for. After all, one must be human, you know...."

"Where is it? Where?" said Pierre.

"There! There!" shouted the Frenchman at the window, pointing to the garden at the back of the house. "Wait a bit--I'm coming down."

And a minute or two later the Frenchman, a black-eyed fellow with a spot on his cheek, in shirt sleeves, really did jump out of a window on the ground floor, and clapping Pierre on the shoulder ran with him into the garden.

"Hurry up, you others!" he called out to his comrades. "It's getting hot."

When they reached a gravel path behind the house the Frenchman pulled Pierre by the arm and pointed to a round, graveled space

where a three-year-old girl in a pink dress was lying under a seat.

"There is your child! Oh, a girl, so much the better!" said the Frenchman. "Good-by, Fatty. We must be human, we are all mortal you know!" and the Frenchman with the spot on his cheek ran back to his comrades.

Breathless with joy, Pierre ran to the little girl and was going to take her in his arms. But seeing a stranger the sickly, scrofulous-looking child, unattractively like her mother, began to yell and run away. Pierre, however, seized her and lifted her in his arms. She screamed desperately and angrily and tried with her little hands to pull Pierre's hands away and to bite them with her slobbering mouth. Pierre was seized by a sense of horror and repulsion such as he had experienced when touching some nasty little animal. But he made an effort not to throw the child down and ran with her to the large house. It was now, however, impossible to get back the way he had come; the maid, Aniska, was no longer there, and Pierre with a feeling of pity and disgust pressed the wet, painfully sobbing child to himself as tenderly as he could and ran with her through the garden seeking another way out.

CHAPTER XXXIV

Having run through different yards and side streets, Pierre got back with his little burden to the Gruzinski garden at the corner of the Povarskoy. He did not at first recognize the place from which he had set out to look for the child, so crowded was it now with people and goods that had been dragged out of the houses. Besides Russian families who had taken refuge here from the fire with their belongings, there were several French soldiers in a variety of clothing. Pierre took no notice of them. He hurried to find the family of that civil servant in order to restore the daughter to her mother and go to save someone else. Pierre felt that he had still much to do and to do quickly. Glowing with the heat and from running, he felt at that moment more strongly than ever the sense of youth, animation, and determination that had come on him when he ran to save the child. She had now become quiet and, clinging with her little hands to Pierre's coat, sat on his arm gazing about her like some little wild animal. He glanced at her occasionally with a slight smile. He fancied he saw something pathetically innocent in that frightened, sickly little face.

He did not find the civil servant or his wife where he had left them. He walked among the crowd with rapid steps, scanning the various faces he met. Involuntarily he noticed a Georgian or Armenian family consisting of a very handsome old man of Oriental type, wearing a new, cloth-covered, sheepskin coat and new boots, an old woman of similar type, and a young woman. That very young woman seemed to Pierre the perfection of Oriental beauty, with her sharply outlined, arched, black eyebrows and the extraordinarily soft, bright color of her long, beautiful, expressionless face. Amid the scattered property and the crowd on the open space, she, in her rich satin cloak with a bright lilac shawl on her head, suggested a delicate exotic plant thrown out onto the snow. She was sitting on some bundles a little behind the old woman, and looked from under her long lashes with motionless, large, almond-shaped eyes at the ground before her. Evidently she was aware of her beauty and fearful because of it. Her face struck Pierre and, hurrying along by the fence, he turned several times to look at her. When he had reached the fence, still without finding those he sought, he stopped and looked about him.

With the child in his arms his figure was now more conspicuous than before, and a group of Russians, both men and women, gathered about him.

"Have you lost anyone, my dear fellow? You're of the gentry yourself, aren't you? Whose child is it?" they asked him.

Pierre replied that the child belonged to a woman in a black coat who had been sitting there with her other children, and he asked whether anyone knew where she had gone.

"Why, that must be the Anferovs," said an old deacon, addressing a pockmarked peasant woman. "Lord have mercy, Lord have mercy!" he added in his customary bass.

"The Anferovs? No," said the woman. "They left in the morning. That must be either Mary Nikolievna's or the Ivanovs!"

"He says 'a woman,' and Mary Nikolievna is a lady," remarked a house serf.

"Do you know her? She's thin, with long teeth," said Pierre.

"That's Mary Nikolievna! They went inside the garden when these wolves swooped down," said the woman, pointing to the French soldiers.

"O Lord, have mercy!" added the deacon.

"Go over that way, they're there. It's she! She kept on lamenting

and crying," continued the woman. "It's she. Here, this way!"

But Pierre was not listening to the woman. He had for some seconds been intently watching what was going on a few steps away. He was looking at the Armenian family and at two French soldiers who had gone up to them. One of these, a nimble little man, was wearing a blue coat tied round the waist with a rope. He had a nightcap on his head and his feet were bare. The other, whose appearance particularly struck Pierre, was a long, lank, round-shouldered, fair-haired man, slow in his movements and with an idiotic expression of face. He wore a woman's loose gown of frieze, blue trousers, and large torn Hessian boots. The little barefooted Frenchman in the blue coat went up to the Armenians and, saying something, immediately seized the old man by his legs and the old man at once began pulling off his boots. The other in the frieze gown stopped in front of the beautiful Armenian girl and with his hands in his pockets stood staring at her, motionless and silent.

"Here, take the child!" said Pierre peremptorily and hurriedly to the woman, handing the little girl to her. "Give her back to them, give her back!" he almost shouted, putting the child, who began screaming, on the ground, and again looking at the Frenchman and the Armenian family.

The old man was already sitting barefoot. The little Frenchman had secured his second boot and was slapping one boot against the other. The old man was saying something in a voice broken by sobs, but Pierre caught but a glimpse of this, his whole attention was directed to the Frenchman in the frieze gown who meanwhile, swaying slowly from side to side, had drawn nearer to the young woman and taking his hands from his pockets had seized her by the neck.

The beautiful Armenian still sat motionless and in the same attitude, with her long lashes drooping as if she did not see or feel what the soldier was doing to her.

While Pierre was running the few steps that separated him from the Frenchman, the tall marauder in the frieze gown was already tearing from her neck the necklace the young Armenian was wearing, and the young woman, clutching at her neck, screamed piercingly.

"Let that woman alone!" exclaimed Pierre hoarsely in a furious voice, seizing the soldier by his round shoulders and throwing him aside.

The soldier fell, got up, and ran away. But his comrade, throwing down the boots and drawing his sword, moved threateningly toward Pierre.

"Voyons, Pas de betises!"* he cried.

*"Look here, no nonsense!"

Pierre was in such a transport of rage that he remembered nothing and his strength increased tenfold. He rushed at the barefooted Frenchman and, before the latter had time to draw his sword, knocked him off his feet and hammered him with his fists. Shouts of approval were heard from the crowd around, and at the same moment a mounted patrol of French Uhlans appeared from round the corner. The Uhlans came up at a trot to Pierre and the Frenchman and surrounded them. Pierre remembered nothing of what happened after that. He only remembered beating someone and being beaten and finally feeling that his hands were bound and that a crowd of French soldiers stood around him and were searching him.

"Lieutenant, he has a dagger," were the first words Pierre understood.

"Ah, a weapon?" said the officer and turned to the barefooted soldier who had been arrested with Pierre. "All right, you can tell all about it at the court-martial." Then he turned to Pierre. "Do you speak French?"

Pierre looked around him with bloodshot eyes and did not reply. His face probably looked very terrible, for the officer said something in a whisper and four more Uhlans left the ranks and placed themselves on both sides of Pierre.

"Do you speak French?" the officer asked again, keeping at a distance from Pierre. "Call the interpreter."

A little man in Russian civilian clothes rode out from the ranks, and by his clothes and manner of speaking Pierre at once knew him to be a French salesman from one of the Moscow shops.

"He does not look like a common man," said the interpreter, after a searching look at Pierre.

"Ah, he looks very much like an incendiary," remarked the officer. "And ask him who he is," he added.

"Who are you?" asked the interpreter in poor Russian. "You must answer the chief."

"I will not tell you who I am. I am your prisoner--take me!"

Pierre suddenly replied in French.

"Ah, ah!" muttered the officer with a frown. "Well then, march!"

A crowd had collected round the Uhlans. Nearest to Pierre stood the pockmarked peasant woman with the little girl, and when the patrol started she moved forward.

"Where are they taking you to, you poor dear?" said she. "And the little girl, the little girl, what am I to do with her if she's not theirs?" said the woman.

"What does that woman want?" asked the officer.

Pierre was as if intoxicated. His elation increased at the sight of the little girl he had saved.

"What does she want?" he murmured. "She is bringing me my daughter whom I have just saved from the flames," said he. "Good-by!" And without knowing how this aimless lie had escaped him, he went along with resolute and triumphant steps between the French soldiers.

The French patrol was one of those sent out through the various streets of Moscow by Durosnel's order to put a stop to the pillage, and especially to catch the incendiaries who, according to the general opinion which had that day originated among the higher French officers, were the cause of the conflagrations. After marching through a number of streets the patrol arrested five more Russian suspects: a small shopkeeper, two seminary students, a peasant, and a house serf, besides several looters. But of all these various suspected characters, Pierre was considered to be the most suspicious of all. When they had all been brought for the night to a large house on the Zubov Rampart that was being used as a guardhouse, Pierre was placed apart under strict guard.

BOOK TWELVE: 1812

CHAPTER I

In Petersburg at that time a complicated struggle was being carried on with greater heat than ever in the highest circles, between the parties of Rumyantsev, the French, Marya Fedorovna, the Tsarevich, and others, drowned as usual by the buzzing of the court drones. But the calm, luxurious life of Petersburg, concerned only about phantoms and reflections of real life, went on in its old way and made it hard, except by a great effort, to realize the danger and the difficult position of the Russian people. There were the same receptions and balls, the same French theater, the same court interests and service interests and intrigues as usual. Only in the very highest circles were attempts made to keep in mind the difficulties of the actual position. Stories were whispered of how differently the two Empresses behaved in these difficult circumstances. The Empress Marya, concerned for the welfare of the charitable and educational institutions under her patronage, had given directions that they should all be removed to Kazan, and the things belonging to these institutions had already been packed up. The Empress Elisabeth, however, when asked what instructions she would be pleased to give--with her characteristic Russian patriotism had replied that she could give no directions about state institutions for that was the affair of the sovereign, but as far as she personally was concerned she would be the last to quit Petersburg.

At Anna Pavlovna's on the twenty-sixth of August, the very day of the battle of Borodino, there was a soiree, the chief feature of which was to be the reading of a letter from His Lordship the Bishop when sending the Emperor an icon of the Venerable Sergius. It was regarded as a model of ecclesiastical, patriotic eloquence. Prince Vasili himself, famed for his elocution, was to read it. (He used to read at the Empress'.) The art of his reading was supposed to lie in rolling out the words, quite independently of their meaning, in a loud and singsong voice alternating between a despairing wail and a tender murmur, so that the wail fell quite at random on one word and the murmur on another. This reading, as was always the case at Anna Pavlovna's soirees, had a political significance. That evening she expected several important personages who had to be made ashamed of their visits to the French theater and aroused to a patriotic temper. A good many people had already arrived, but Anna Pavlovna, not yet seeing all those whom she wanted in her drawing room, did not let the reading begin but wound up the springs of a general conversation.

The news of the day in Petersburg was the illness of Countess Bezukhova. She had fallen ill unexpectedly a few days previously, had missed several gatherings of which she was usually ornament, and was said to be receiving no one, and instead of the celebrated Petersburg doctors who usually attended her had entrusted herself to

some Italian doctor who was treating her in some new and unusual way.

They all knew very well that the enchanting countess' illness arose from an inconvenience resulting from marrying two husbands at the same time, and that the Italian's cure consisted in removing such inconvenience; but in Anna Pavlovna's presence no one dared to think of this or even appear to know it.

"They say the poor countess is very ill. The doctor says it is angina pectoris."

"Angina? Oh, that's a terrible illness!"

"They say that the rivals are reconciled, thanks to the angina..." and the word angina was repeated with great satisfaction.

"The count is pathetic, they say. He cried like a child when the doctor told him the case was dangerous."

"Oh, it would be a terrible loss, she is an enchanting woman."

"You are speaking of the poor countess?" said Anna Pavlovna, coming up just then. "I sent to ask for news, and hear that she is a little better. Oh, she is certainly the most charming woman in the world," she went on, with a smile at her own enthusiasm. "We belong to different camps, but that does not prevent my esteeming her as she deserves. She is very unfortunate!" added Anna Pavlovna.

Supposing that by these words Anna Pavlovna was somewhat lifting the veil from the secret of the countess' malady, an unwary young man ventured to express surprise that well known doctors had not been called in and that the countess was being attended by a charlatan who might employ dangerous remedies.

"Your information maybe better than mine," Anna Pavlovna suddenly and venomously retorted on the inexperienced young man, "but I know on good authority that this doctor is a very learned and able man. He is private physician to the Queen of Spain."

And having thus demolished the young man, Anna Pavlovna turned to another group where Bilibin was talking about the Austrians: having wrinkled up his face he was evidently preparing to smooth it out again and utter one of his mots.

"I think it is delightful," he said, referring to a diplomatic note that had been sent to Vienna with some Austrian banners captured from the French by Wittgenstein, "the hero of Petropol" as he was then called in Petersburg.

"What? What's that?" asked Anna Pavlovna, securing silence for the mot, which she had heard before.

And Bilibin repeated the actual words of the diplomatic dispatch, which he had himself composed.

"The Emperor returns these Austrian banners," said Bilibin, "friendly banners gone astray and found on a wrong path," and his brow became smooth again.

"Charming, charming!" observed Prince Vasili.

"The path to Warsaw, perhaps," Prince Hippolyte remarked loudly and unexpectedly. Everybody looked at him, understanding what he meant. Prince Hippolyte himself glanced around with amused surprise. He knew no more than the others what his words meant. During his diplomatic career he had more than once noticed that such utterances were received as very witty, and at every opportunity he uttered in that way the first words that entered his head. "It may turn out very well," he thought, "but if not, they'll know how to arrange matters." And really, during the awkward silence that ensued, that insufficiently patriotic person entered whom Anna Pavlovna had been waiting for and wished to convert, and she, smiling and shaking a finger at Hippolyte, invited Prince Vasili to the table and bringing him two candles and the manuscript begged him to begin. Everyone became silent.

"Most Gracious Sovereign and Emperor!" Prince Vasili sternly declaimed, looking round at his audience as if to inquire whether anyone had anything to say to the contrary. But no one said anything. "Moscow, our ancient capital, the New Jerusalem, receives her Christ"--he placed a sudden emphasis on the word her--"as a mother receives her zealous sons into her arms, and through the gathering mists, foreseeing the brilliant glory of thy rule, sings in exultation, 'Hosanna, blessed is he that cometh!'"

Prince Vasili pronounced these last words in a tearful voice.

Bilibin attentively examined his nails, and many of those present appeared intimidated, as if asking in what they were to blame. Anna Pavlovna whispered the next words in advance, like an old woman muttering the prayer at Communion: "Let the bold and insolent Goliath..." she whispered.

Prince Vasili continued.

"Let the bold and insolent Goliath from the borders of France encompass the realms of Russia with death-bearing terrors; humble Faith, the sling of the Russian David, shall suddenly smite his head in his blood-thirsty pride. This icon of the Venerable Sergius, the servant of God and zealous champion of old of our country's weal, is offered to Your Imperial Majesty. I grieve that my waning strength prevents rejoicing in the sight of your most gracious presence. I raise fervent prayers to Heaven that the Almighty may exalt the race of the just, and mercifully fulfill the desires of Your Majesty."

"What force! What a style!" was uttered in approval both of reader and of author.

Animated by that address Anna Pavlovna's guests talked for a long time of the state of the fatherland and offered various conjectures as to the result of the battle to be fought in a few days.

"You will see," said Anna Pavlovna, "that tomorrow, on the Emperor's birthday, we shall receive news. I have a favorable presentiment!"

CHAPTER II

Anna Pavlovna's presentiment was in fact fulfilled. Next day during the service at the palace church in honor of the Emperor's birthday, Prince Volkonski was called out of the church and received a dispatch from Prince Kutuzov. It was Kutuzov's report, written from Tatarinova on the day of the battle. Kutuzov wrote that the Russians had not retreated a step, that the French losses were much heavier than ours, and that he was writing in haste from the field of battle before collecting full information. It followed that there must have been a victory. And at once, without leaving the church, thanks were rendered to the Creator for His help and for the victory.

Anna Pavlovna's presentiment was justified, and all that morning a joyously festive mood reigned in the city. Everyone believed the victory to have been complete, and some even spoke of Napoleon's having been captured, of his deposition, and of the choice of a new ruler for France.

It is very difficult for events to be reflected in their real

strength and completeness amid the conditions of court life and far from the scene of action. General events involuntarily group themselves around some particular incident. So now the courtiers' pleasure was based as much on the fact that the news had arrived on the Emperor's birthday as on the fact of the victory itself. It was like a successfully arranged surprise. Mention was made in Kutuzov's report of the Russian losses, among which figured the names of Tuchkov, Bagration, and Kutaysov. In the Petersburg world this sad side of the affair again involuntarily centered round a single incident: Kutaysov's death. Everybody knew him, the Emperor liked him, and he was young and interesting. That day everyone met with the words:

"What a wonderful coincidence! Just during the service. But what a loss Kutaysov is! How sorry I am!"

"What did I tell about Kutuzov?" Prince Vasili now said with a prophet's pride. "I always said he was the only man capable of defeating Napoleon."

But next day no news arrived from the army and the public mood grew anxious. The courtiers suffered because of the suffering the suspense occasioned the Emperor.

"Fancy the Emperor's position!" said they, and instead of extolling Kutuzov as they had done the day before, they condemned him as the cause of the Emperor's anxiety. That day Prince Vasili no longer boasted of his protegee Kutuzov, but remained silent when the commander in chief was mentioned. Moreover, toward evening, as if everything conspired to make Petersburg society anxious and uneasy, a terrible piece of news was added. Countess Helene Bezukhova had suddenly died of that terrible malady it had been so agreeable to mention. Officially, at large gatherings, everyone said that Countess Bezukhova had died of a terrible attack of angina pectoris, but in intimate circles details were mentioned of how the private physician of the Queen of Spain had prescribed small doses of a certain drug to produce a certain effect; but Helene, tortured by the fact that the old count suspected her and that her husband to whom she had written (that wretched, profligate Pierre) had not replied, had suddenly taken a very large dose of the drug, and had died in agony before assistance could be rendered her. It was said that Prince Vasili and the old count had turned upon the Italian, but the latter had produced such letters from the unfortunate deceased that they had immediately let the matter drop.

Talk in general centered round three melancholy facts: the Emperor's lack of news, the loss of Kutuzov, and the death of Helene.

On the third day after Kutuzov's report a country gentleman arrived from Moscow, and news of the surrender of Moscow to the French spread through the whole town. This was terrible! What a position for the Emperor to be in! Kutuzov was a traitor, and Prince Vasili during the visits of condolence paid to him on the occasion of his daughter's death said of Kutuzov, whom he had formerly praised (it was excusable for him in his grief to forget what he had said), that it was impossible to expect anything else from a blind and depraved old man.

"I only wonder that the fate of Russia could have been entrusted to such a man."

As long as this news remained unofficial it was possible to doubt it, but the next day the following communication was received from Count Rostopchin:

Prince Kutuzov's adjutant has brought me a letter in which he demands police officers to guide the army to the Ryazan road. He writes that he is regretfully abandoning Moscow. Sire! Kutuzov's action decides the fate of the capital and of your empire! Russia will shudder to learn of the abandonment of the city in which her greatness is centered and in which lie the ashes of your ancestors! I shall follow the army. I have had everything removed, and it only remains for me to weep over the fate of my fatherland.

On receiving this dispatch the Emperor sent Prince Volkonski to Kutuzov with the following rescript:

Prince Michael Ilarionovich! Since the twenty-ninth of August I have received no communication from you, yet on the first of September I received from the commander in chief of Moscow, via Yaroslavl, the sad news that you, with the army, have decided to abandon Moscow. You can yourself imagine the effect this news has had on me, and your silence increases my astonishment. I am sending this by Adjutant-General Prince Volkonski, to hear from you the situation of the army and the reasons that have induced you to take this melancholy decision.

CHAPTER III

Nine days after the abandonment of Moscow, a messenger from Kutuzov reached Petersburg with the official announcement of that event. This messenger was Michaud, a Frenchman who did not know Russian, but who was *quoique etranger, russe de coeur et d'ame*,* as he said of himself.

*Though a foreigner, Russian in heart and soul.

The Emperor at once received this messenger in his study at the palace on Stone Island. Michaud, who had never seen Moscow before the campaign and who did not know Russian, yet felt deeply moved (as he wrote) when he appeared before *notre tres gracieux souverain** with the news of the burning of Moscow, *dont les flammes eclairaient sa route*.*[2]

*Our most gracious sovereign.

*[2] Whose flames illumined his route.

Though the source of M. Michaud's chagrin must have been different from that which caused Russians to grieve, he had such a sad face when shown into the Emperor's study that the latter at once asked:

"Have you brought me sad news, Colonel?"

"Very sad, sire," replied Michaud, lowering his eyes with a sigh. "The abandonment of Moscow."

"Have they surrendered my ancient capital without a battle?" asked the Emperor quickly, his face suddenly flushing.

Michaud respectfully delivered the message Kutuzov had entrusted to him, which was that it had been impossible to fight before Moscow, and that as the only remaining choice was between losing the army as well as Moscow, or losing Moscow alone, the field marshal had to choose the latter.

The Emperor listened in silence, not looking at Michaud.

"Has the enemy entered the city?" he asked.

"Yes, sire, and Moscow is now in ashes. I left it all in flames," replied Michaud in a decided tone, but glancing at the Emperor he

was frightened by what he had done.

The Emperor began to breathe heavily and rapidly, his lower lip trembled, and tears instantly appeared in his fine blue eyes.

But this lasted only a moment. He suddenly frowned, as if blaming himself for his weakness, and raising his head addressed Michaud in a firm voice:

"I see, Colonel, from all that is happening, that Providence requires great sacrifices of us... I am ready to submit myself in all things to His will; but tell me, Michaud, how did you leave the army when it saw my ancient capital abandoned without a battle? Did you not notice discouragement?..."

Seeing that his most gracious ruler was calm once more, Michaud also grew calm, but was not immediately ready to reply to the Emperor's direct and relevant question which required a direct answer.

"Sire, will you allow me to speak frankly as befits a loyal soldier?" he asked to gain time.

"Colonel, I always require it," replied the Emperor. "Conceal nothing from me, I wish to know absolutely how things are."

"Sire!" said Michaud with a subtle, scarcely perceptible smile on his lips, having now prepared a well-phrased reply, "sire, I left the whole army, from its chiefs to the lowest soldier, without exception in desperate and agonized terror..."

"How is that?" the Emperor interrupted him, frowning sternly. "Would misfortune make my Russians lose heart?... Never!"

Michaud had only waited for this to bring out the phrase he had prepared.

"Sire," he said, with respectful playfulness, "they are only afraid lest Your Majesty, in the goodness of your heart, should allow yourself to be persuaded to make peace. They are burning for the combat," declared this representative of the Russian nation, "and to prove to Your Majesty by the sacrifice of their lives how devoted they are...."

"Ah!" said the Emperor reassured, and with a kindly gleam in his eyes, he patted Michaud on the shoulder. "You set me at ease, Colonel."

He bent his head and was silent for some time.

"Well, then, go back to the army," he said, drawing himself up to his full height and addressing Michaud with a gracious and majestic gesture, "and tell our brave men and all my good subjects wherever you go that when I have not a soldier left I shall put myself at the head of my beloved nobility and my good peasants and so use the last resources of my empire. It still offers me more than my enemies suppose," said the Emperor growing more and more animated; "but should it ever be ordained by Divine Providence," he continued, raising to heaven his fine eyes shining with emotion, "that my dynasty should cease to reign on the throne of my ancestors, then after exhausting all the means at my command, I shall let my beard grow to here" (he pointed halfway down his chest) "and go and eat potatoes with the meanest of my peasants, rather than sign the disgrace of my country and of my beloved people whose sacrifices I know how to appreciate."

Having uttered these words in an agitated voice the Emperor suddenly turned away as if to hide from Michaud the tears that rose to his eyes, and went to the further end of his study. Having stood there a few moments, he strode back to Michaud and pressed his arm below the elbow with a vigorous movement. The Emperor's mild and handsome face was flushed and his eyes gleamed with resolution and anger.

"Colonel Michaud, do not forget what I say to you here, perhaps we may recall it with pleasure someday... Napoleon or I," said the Emperor, touching his breast. "We can no longer both reign together. I have learned to know him, and he will not deceive me any more...."

And the Emperor paused, with a frown.

When he heard these words and saw the expression of firm resolution in the Emperor's eyes, Michaud--*quoique etranger, russe de coeur et d'ame*--at that solemn moment felt himself enraptured by all that he had heard (as he used afterwards to say), and gave expression to his own feelings and those of the Russian people whose representative he considered himself to be, in the following words:

"Sire!" said he, "Your Majesty is at this moment signing the glory of the nation and the salvation of Europe!"

With an inclination of the head the Emperor dismissed him.

CHAPTER IV

It is natural for us who were not living in those days to imagine that when half Russia had been conquered and the inhabitants were fleeing to distant provinces, and one levy after another was being raised for the defense of the fatherland, all Russians from the greatest to the least were solely engaged in sacrificing themselves, saving their fatherland, or weeping over its downfall. The tales and descriptions of that time without exception speak only of the self-sacrifice, patriotic devotion, despair, grief, and the heroism of the Russians. But it was not really so. It appears so to us because we see only the general historic interest of that time and do not see all the personal human interests that people had. Yet in reality those personal interests of the moment so much transcend the general interests that they always prevent the public interest from being felt or even noticed. Most of the people at that time paid no attention to the general progress of events but were guided only by their private interests, and they were the very people whose activities at that period were most useful.

Those who tried to understand the general course of events and to take part in it by self-sacrifice and heroism were the most useless members of society, they saw everything upside down, and all they did for the common good turned out to be useless and foolish--like Pierre's and Mamonov's regiments which looted Russian villages, and the lint the young ladies prepared and that never reached the wounded, and so on. Even those, fond of intellectual talk and of expressing their feelings, who discussed Russia's position at the time involuntarily introduced into their conversation either a shade of pretense and falsehood or useless condemnation and anger directed against people accused of actions no one could possibly be guilty of. In historic events the rule forbidding us to eat of the fruit of the Tree of Knowledge is specially applicable. Only unconscious action bears fruit, and he who plays a part in an historic event never understands its significance. If he tries to realize it his efforts are fruitless.

The more closely a man was engaged in the events then taking place in Russia the less did he realize their significance. In Petersburg and in the provinces at a distance from Moscow, ladies, and gentlemen in militia uniforms, wept for Russia and its ancient capital and talked of self-sacrifice and so on; but in the army which retired beyond Moscow there was little talk or thought of Moscow, and when they caught sight of its burned ruins no one swore to be avenged on the French, but they thought about their next pay, their next quarters, of Matreshka the vivandiere, and like matters.

As the war had caught him in the service, Nicholas Rostov took a close and prolonged part in the defense of his country, but did so

casually, without any aim at self-sacrifice, and he therefore looked at what was going on in Russia without despair and without dismally racking his brains over it. Had he been asked what he thought of the state of Russia, he would have said that it was not his business to think about it, that Kutuzov and others were there for that purpose, but that he had heard that the regiments were to be made up to their full strength, that fighting would probably go on for a long time yet, and that things being so it was quite likely he might be in command of a regiment in a couple of years' time.

As he looked at the matter in this way, he learned that he was being sent to Voronezh to buy remounts for his division, not only without regret at being prevented from taking part in the coming battle, but with the greatest pleasure--which he did not conceal and which his comrades fully understood.

A few days before the battle of Borodino, Nicholas received the necessary money and warrants, and having sent some hussars on in advance, he set out with post horses for Voronezh.

Only a man who has experienced it--that is, has passed some months continuously in an atmosphere of campaigning and war--can understand the delight Nicholas felt when he escaped from the region covered by the army's foraging operations, provision trains, and hospitals. When free from soldiers, wagons, and the filthy traces of a camp--he saw villages with peasants and peasant women, gentlemen's country houses, fields where cattle were grazing, posthouses with stationmasters asleep in them, he rejoiced as though seeing all this for the first time. What for a long while specially surprised and delighted him were the women, young and healthy, without a dozen officers making up to each of them; women, too, who were pleased and flattered that a passing officer should joke with them.

In the highest spirits Nicholas arrived at night at a hotel in Voronezh, ordered things he had long been deprived of in camp, and next day, very clean-shaven and in a full-dress uniform he had not worn for a long time, went to present himself to the authorities.

The commander of the militia was a civilian general, an old man who was evidently pleased with his military designation and rank. He received Nicholas brusquely (imagining this to be characteristically military) and questioned him with an important air, as if considering the general progress of affairs and approving and disapproving with full right to do so. Nicholas was in such good spirits that this merely amused him.

From the commander of the militia he drove to the governor. The governor was a brisk little man, very simple and affable. He indicated

the stud farms at which Nicholas might procure horses, recommended to him a horse dealer in the town and a landowner fourteen miles out of town who had the best horses, and promised to assist him in every way.

"You are Count Ilya Rostov's son? My wife was a great friend of your mother's. We are at home on Thursdays--today is Thursday, so please come and see us quite informally," said the governor, taking leave of him.

Immediately on leaving the governor's, Nicholas hired post horses and, taking his squadron quartermaster with him, drove at a gallop to the landowner, fourteen miles away, who had the stud. Everything seemed to him pleasant and easy during that first part of his stay in Voronezh and, as usually happens when a man is in a pleasant state of mind, everything went well and easily.

The landowner to whom Nicholas went was a bachelor, an old cavalryman, a horse fancier, a sportsman, the possessor of some century-old brandy and some old Hungarian wine, who had a snugger where he smoked, and who owned some splendid horses.

In very few words Nicholas bought seventeen picked stallions for six thousand rubles--to serve, as he said, as samples of his remounts. After dining and taking rather too much of the Hungarian wine, Nicholas--having exchanged kisses with the landowner, with whom he was already on the friendliest terms--galloped back over abominable roads, in the brightest frame of mind, continually urging on the driver so as to be in time for the governor's party.

When he had changed, poured water over his head, and scented himself, Nicholas arrived at the governor's rather late, but with the phrase "better late than never" on his lips.

It was not a ball, nor had dancing been announced, but everyone knew that Catherine Petrovna would play vales and the ecossaise on the clavichord and that there would be dancing, and so everyone had come as to a ball.

Provincial life in 1812 went on very much as usual, but with this difference, that it was livelier in the towns in consequence of the arrival of many wealthy families from Moscow, and as in everything that went on in Russia at that time a special recklessness was noticeable, an "in for a penny, in for a pound--who cares?" spirit, and the inevitable small talk, instead of turning on the weather and mutual acquaintances, now turned on Moscow, the army, and Napoleon.

The society gathered together at the governor's was the best in

Voronezh.

There were a great many ladies and some of Nicholas' Moscow acquaintances, but there were no men who could at all vie with the cavalier of St. George, the hussar remount officer, the good-natured and well-bred Count Rostov. Among the men was an Italian prisoner, an officer of the French army; and Nicholas felt that the presence of that prisoner enhanced his own importance as a Russian hero. The Italian was, as it were, a war trophy. Nicholas felt this, it seemed to him that everyone regarded the Italian in the same light, and he treated him cordially though with dignity and restraint.

As soon as Nicholas entered in his hussar uniform, diffusing around him a fragrance of perfume and wine, and had uttered the words "better late than never" and heard them repeated several times by others, people clustered around him; all eyes turned on him, and he felt at once that he had entered into his proper position in the province--that of a universal favorite: a very pleasant position, and intoxicatingly so after his long privations. At posting stations, at inns, and in the landowner's snugger, maidservants had been flattered by his notice, and here too at the governor's party there were (as it seemed to Nicholas) an inexhaustible number of pretty young women, married and unmarried, impatiently awaiting his notice. The women and girls flirted with him and, from the first day, the people concerned themselves to get this fine young daredevil of an hussar married and settled down. Among these was the governor's wife herself, who welcomed Rostov as a near relative and called him "Nicholas."

Catherine Petrovna did actually play vales and the ecossaise, and dancing began in which Nicholas still further captivated the provincial society by his agility. His particularly free manner of dancing even surprised them all. Nicholas was himself rather surprised at the way he danced that evening. He had never danced like that in Moscow and would even have considered such a very free and easy manner improper and in bad form, but here he felt it incumbent on him to astonish them all by something unusual, something they would have to accept as the regular thing in the capital though new to them in the provinces.

All the evening Nicholas paid attention to a blue-eyed, plump and pleasing little blonde, the wife of one of the provincial officials. With the naive conviction of young men in a merry mood that other men's wives were created for them, Rostov did not leave the lady's side and treated her husband in a friendly and conspiratorial style, as if, without speaking of it, they knew how capitally Nicholas and the lady would get on together. The husband, however, did not seem to share that conviction and tried to behave morosely with Rostov. But

the latter's good-natured naivete was so boundless that sometimes even he involuntarily yielded to Nicholas' good humor. Toward the end of the evening, however, as the wife's face grew more flushed and animated, the husband's became more and more melancholy and solemn, as though there were but a given amount of animation between them and as the wife's share increased the husband's diminished.

CHAPTER V

Nicholas sat leaning slightly forward in an armchair, bending closely over the blonde lady and paying her mythological compliments with a smile that never left his face. Jauntily shifting the position of his legs in their tight riding breeches, diffusing an odor of perfume, and admiring his partner, himself, and the fine outlines of his legs in their well-fitting Hessian boots, Nicholas told the blonde lady that he wished to run away with a certain lady here in Voronezh.

"Which lady?"

"A charming lady, a divine one. Her eyes" (Nicholas looked at his partner) "are blue, her mouth coral and ivory; her figure" (he glanced at her shoulders) "like Diana's...."

The husband came up and sullenly asked his wife what she was talking about.

"Ah, Nikita Ivanych!" cried Nicholas, rising politely, and as if wishing Nikita Ivanych to share his joke, he began to tell him of his intention to elope with a blonde lady.

The husband smiled gloomily, the wife gaily. The governor's good-natured wife came up with a look of disapproval.

"Anna Ignatyevna wants to see you, Nicholas," said she, pronouncing the name so that Nicholas at once understood that Anna Ignatyevna was a very important person. "Come, Nicholas! You know you let me call you so?"

"Oh, yes, Aunt. Who is she?"

"Anna Ignatyevna Malvintseva. She has heard from her niece how you rescued her... Can you guess?"

"I rescued such a lot of them!" said Nicholas.

"Her niece, Princess Bolkonskaya. She is here in Voronezh with her aunt. Oho! How you blush. Why, are...?"

"Not a bit! Please don't, Aunt!"

"Very well, very well!... Oh, what a fellow you are!"

The governor's wife led him up to a tall and very stout old lady with a blue headdress, who had just finished her game of cards with the most important personages of the town. This was Malvintseva, Princess Mary's aunt on her mother's side, a rich, childless widow who always lived in Voronezh. When Rostov approached her she was standing settling up for the game. She looked at him and, screwing up her eyes sternly, continued to upbraid the general who had won from her.

"Very pleased, mon cher," she then said, holding out her hand to Nicholas. "Pray come and see me."

After a few words about Princess Mary and her late father, whom Malvintseva had evidently not liked, and having asked what Nicholas knew of Prince Andrew, who also was evidently no favorite of hers, the important old lady dismissed Nicholas after repeating her invitation to come to see her.

Nicholas promised to come and blushed again as he bowed. At the mention of Princess Mary he experienced a feeling of shyness and even of fear, which he himself did not understand.

When he had parted from Malvintseva Nicholas wished to return to the dancing, but the governor's little wife placed her plump hand on his sleeve and, saying that she wanted to have a talk with him, led him to her sitting room, from which those who were there immediately withdrew so as not to be in her way.

"Do you know, dear boy," began the governor's wife with a serious expression on her kind little face, "that really would be the match for you: would you like me to arrange it?"

"Whom do you mean, Aunt?" asked Nicholas.

"I will make a match for you with the princess. Catherine Petrovna speaks of Lily, but I say, no--the princess! Do you want me to do it? I am sure your mother will be grateful to me. What a charming girl she is, really! And she is not at all so plain, either."

"Not at all," replied Nicholas as if offended at the idea. "As befits a soldier, Aunt, I don't force myself on anyone or refuse anything," he said before he had time to consider what he was saying.

"Well then, remember, this is not a joke!"

"Of course not!"

"Yes, yes," the governor's wife said as if talking to herself. "But, my dear boy, among other things you are too attentive to the other, the blonde. One is sorry for the husband, really...."

"Oh no, we are good friends with him," said Nicholas in the simplicity of his heart; it did not enter his head that a pastime so pleasant to himself might not be pleasant to someone else.

"But what nonsense I have been saying to the governor's wife!" thought Nicholas suddenly at supper. "She will really begin to arrange a match... and Soyna...?" And on taking leave of the governor's wife, when she again smilingly said to him, "Well then, remember!" he drew her aside.

"But see here, to tell the truth, Aunt..."

"What is it, my dear? Come, let's sit down here," said she.

Nicholas suddenly felt a desire and need to tell his most intimate thoughts (which he would not have told to his mother, his sister, or his friend) to this woman who was almost a stranger. When he afterwards recalled that impulse to unsolicited and inexplicable frankness which had very important results for him, it seemed to him--as it seems to everyone in such cases--that it was merely some silly whim that seized him: yet that burst of frankness, together with other trifling events, had immense consequences for him and for all his family.

"You see, Aunt, Mamma has long wanted me to marry an heiress, but the very idea of marrying for money is repugnant to me."

"Oh yes, I understand," said the governor's wife.

"But Princess Bolkonskaya--that's another matter. I will tell you the truth. In the first place I like her very much, I feel drawn to her; and then, after I met her under such circumstances--so strangely, the idea often occurred to me: 'This is fate.' Especially if you remember that Mamma had long been thinking of it; but I had never happened to meet her before, somehow it had always happened that we

did not meet. And as long as my sister Natasha was engaged to her brother it was of course out of the question for me to think of marrying her. And it must needs happen that I should meet her just when Natasha's engagement had been broken off... and then everything... So you see... I never told this to anyone and never will, only to you."

The governor's wife pressed his elbow gratefully.

"You know Sonya, my cousin? I love her, and promised to marry her, and will do so.... So you see there can be no question about-" said Nicholas incoherently and blushing.

"My dear boy, what a way to look at it! You know Sonya has nothing and you yourself say your Papa's affairs are in a very bad way. And what about your mother? It would kill her, that's one thing. And what sort of life would it be for Sonya--if she's a girl with a heart? Your mother in despair, and you all ruined.... No, my dear, you and Sonya ought to understand that."

Nicholas remained silent. It comforted him to hear these arguments.

"All the same, Aunt, it is impossible," he rejoined with a sigh, after a short pause. "Besides, would the princess have me? And besides, she is now in mourning. How can one think of it!"

"But you don't suppose I'm going to get you married at once? There is always a right way of doing things," replied the governor's wife.

"What a matchmaker you are, Aunt..." said Nicholas, kissing her plump little hand.

CHAPTER VI

On reaching Moscow after her meeting with Rostov, Princess Mary had found her nephew there with his tutor, and a letter from Prince Andrew giving her instructions how to get to her Aunt Malvintseva at Voronezh. That feeling akin to temptation which had tormented her during her father's illness, since his death, and especially since her meeting with Rostov was smothered by arrangements for the journey, anxiety about her brother, settling in a new house, meeting new people, and attending to her nephew's education. She was sad. Now, after a month passed in quiet surroundings, she felt more and more

deeply the loss of her father which was associated in her mind with the ruin of Russia. She was agitated and incessantly tortured by the thought of the dangers to which her brother, the only intimate person now remaining to her, was exposed. She was worried too about her nephew's education for which she had always felt herself incompetent, but in the depths of her soul she felt at peace--a peace arising from consciousness of having stifled those personal dreams and hopes that had been on the point of awakening within her and were related to her meeting with Rostov.

The day after her party the governor's wife came to see Malvintseva and, after discussing her plan with the aunt, remarked that though under present circumstances a formal betrothal was, of course, not to be thought of, all the same the young people might be brought together and could get to know one another. Malvintseva expressed approval, and the governor's wife began to speak of Rostov in Mary's presence, praising him and telling how he had blushed when Princess Mary's name was mentioned. But Princess Mary experienced a painful rather than a joyful feeling--her mental tranquillity was destroyed, and desires, doubts, self-reproach, and hopes reawoke.

During the two days that elapsed before Rostov called, Princess Mary continually thought of how she ought to behave to him. First she decided not to come to the drawing room when he called to see her aunt--that it would not be proper for her, in her deep mourning, to receive visitors; then she thought this would be rude after what he had done for her; then it occurred to her that her aunt and the governor's wife had intentions concerning herself and Rostov--their looks and words at times seemed to confirm this supposition--then she told herself that only she, with her sinful nature, could think this of them: they could not forget that situated as she was, while still wearing deep mourning, such matchmaking would be an insult to her and to her father's memory. Assuming that she did go down to see him, Princess Mary imagined the words he would say to her and what she would say to him, and these words sometimes seemed undeservedly cold and then to mean too much. More than anything she feared lest the confusion she felt might overwhelm her and betray her as soon as she saw him.

But when on Sunday after church the footman announced in the drawing room that Count Rostov had called, the princess showed no confusion, only a slight blush suffused her cheeks and her eyes lit up with a new and radiant light.

"You have met him, Aunt?" said she in a calm voice, unable herself to understand that she could be outwardly so calm and natural.

When Rostov entered the room, the princess dropped her eyes for an

instant, as if to give the visitor time to greet her aunt, and then just as Nicholas turned to her she raised her head and met his look with shining eyes. With a movement full of dignity and grace she half rose with a smile of pleasure, held out her slender, delicate hand to him, and began to speak in a voice in which for the first time new deep womanly notes vibrated. Mademoiselle Bourienne, who was in the drawing room, looked at Princess Mary in bewildered surprise. Herself a consummate coquette, she could not have maneuvered better on meeting a man she wished to attract.

"Either black is particularly becoming to her or she really has greatly improved without my having noticed it. And above all, what tact and grace!" thought Mademoiselle Bourienne.

Had Princess Mary been capable of reflection at that moment, she would have been more surprised than Mademoiselle Bourienne at the change that had taken place in herself. From the moment she recognized that dear, loved face, a new life force took possession of her and compelled her to speak and act apart from her own will. From the time Rostov entered, her face became suddenly transformed. It was as if a light had been kindled in a carved and painted lantern and the intricate, skillful, artistic work on its sides, that previously seemed dark, coarse, and meaningless, was suddenly shown up in unexpected and striking beauty. For the first time all that pure, spiritual, inward travail through which she had lived appeared on the surface. All her inward labor, her dissatisfaction with herself, her sufferings, her strivings after goodness, her meekness, love, and self-sacrifice--all this now shone in those radiant eyes, in her delicate smile, and in every trait of her gentle face.

Rostov saw all this as clearly as if he had known her whole life. He felt that the being before him was quite different from, and better than, anyone he had met before, and above all better than himself.

Their conversation was very simple and unimportant. They spoke of the war, and like everyone else unconsciously exaggerated their sorrow about it; they spoke of their last meeting--Nicholas trying to change the subject--they talked of the governor's kind wife, of Nicholas' relations, and of Princess Mary's.

She did not talk about her brother, diverting the conversation as soon as her aunt mentioned Andrew. Evidently she could speak of Russia's misfortunes with a certain artificiality, but her brother was too near her heart and she neither could nor would speak lightly of him. Nicholas noticed this, as he noticed every shade of Princess Mary's character with an observation unusual to him, and everything confirmed his conviction that she was a quite unusual and extraordinary being. Nicholas blushed and was confused when people

spoke to him about the princess (as she did when he was mentioned) and even when he thought of her, but in her presence he felt quite at ease, and said not at all what he had prepared, but what, quite appropriately, occurred to him at the moment.

When a pause occurred during his short visit, Nicholas, as is usual when there are children, turned to Prince Andrew's little son, caressing him and asking whether he would like to be an hussar. He took the boy on his knee, played with him, and looked round at Princess Mary. With a softened, happy, timid look she watched the boy she loved in the arms of the man she loved. Nicholas also noticed that look and, as if understanding it, flushed with pleasure and began to kiss the boy with good natured playfulness.

As she was in mourning Princess Mary did not go out into society, and Nicholas did not think it the proper thing to visit her again; but all the same the governor's wife went on with her matchmaking, passing on to Nicholas the flattering things Princess Mary said of him and vice versa, and insisting on his declaring himself to Princess Mary. For this purpose she arranged a meeting between the young people at the bishop's house before Mass.

Though Rostov told the governor's wife that he would not make any declaration to Princess Mary, he promised to go.

As at Tilsit Rostov had not allowed himself to doubt that what everybody considered right was right, so now, after a short but sincere struggle between his effort to arrange his life by his own sense of justice, and in obedient submission to circumstances, he chose the latter and yielded to the power he felt irresistibly carrying him he knew not where. He knew that after his promise to Sonya it would be what he deemed base to declare his feelings to Princess Mary. And he knew that he would never act basely. But he also knew (or rather felt at the bottom of his heart) that by resigning himself now to the force of circumstances and to those who were guiding him, he was not only doing nothing wrong, but was doing something very important--more important than anything he had ever done in his life.

After meeting Princess Mary, though the course of his life went on externally as before, all his former amusements lost their charm for him and he often thought about her. But he never thought about her as he had thought of all the young ladies without exception whom he had met in society, nor as he had for a long time, and at one time rapturously, thought about Sonya. He had pictured each of those young ladies as almost all honest-hearted young men do, that is, as a possible wife, adapting her in his imagination to all the conditions of married life: a white dressing gown, his wife at the tea table, his

wife's carriage, little ones, Mamma and Papa, their relations to her, and so on--and these pictures of the future had given him pleasure. But with Princess Mary, to whom they were trying to get him engaged, he could never picture anything of future married life. If he tried, his pictures seemed incongruous and false. It made him afraid.

CHAPTER VII

The dreadful news of the battle of Borodino, of our losses in killed and wounded, and the still more terrible news of the loss of Moscow reached Voronezh in the middle of September. Princess Mary, having learned of her brother's wound only from the Gazette and having no definite news of him, prepared (so Nicholas heard, he had not seen her again himself) to set off in search of Prince Andrew.

When he received the news of the battle of Borodino and the abandonment of Moscow, Rostov was not seized with despair, anger, the desire for vengeance, or any feeling of that kind, but everything in Voronezh suddenly seemed to him dull and tiresome, and he experienced an indefinite feeling of shame and awkwardness. The conversations he heard seemed to him insincere; he did not know how to judge all these affairs and felt that only in the regiment would everything again become clear to him. He made haste to finish buying the horses, and often became unreasonably angry with his servant and squadron quartermaster.

A few days before his departure a special thanksgiving, at which Nicholas was present, was held in the cathedral for the Russian victory. He stood a little behind the governor and held himself with military decorum through the service, meditating on a great variety of subjects. When the service was over the governor's wife beckoned him to her.

"Have you seen the princess?" she asked, indicating with a movement of her head a lady standing on the opposite side, beyond the choir.

Nicholas immediately recognized Princess Mary not so much by the profile he saw under her bonnet as by the feeling of solicitude, timidity, and pity that immediately overcame him. Princess Mary, evidently engrossed by her thoughts, was crossing herself for the last time before leaving the church.

Nicholas looked at her face with surprise. It was the same face he had seen before, there was the same general expression of refined, inner, spiritual labor, but now it was quite differently lit up. There was a pathetic expression of sorrow, prayer, and hope in it. As had occurred before when she was present, Nicholas went up to her without waiting to be prompted by the governor's wife and not asking himself whether or not it was right and proper to address her here in church, and told her he had heard of her trouble and sympathized with his whole soul. As soon as she heard his voice a vivid glow kindled in her face, lighting up both her sorrow and her joy.

"There is one thing I wanted to tell you, Princess," said Rostov.

"It is that if your brother, Prince Andrew Nikolievich, were not living, it would have been at once announced in the Gazette, as he is a colonel."

The princess looked at him, not grasping what he was saying, but cheered by the expression of regretful sympathy on his face.

"And I have known so many cases of a splinter wound" (the Gazette said it was a shell) "either proving fatal at once or being very slight," continued Nicholas. "We must hope for the best, and I am sure..."

Princess Mary interrupted him.

"Oh, that would be so dread..." she began and, prevented by agitation from finishing, she bent her head with a movement as graceful as everything she did in his presence and, looking up at him gratefully, went out, following her aunt.

That evening Nicholas did not go out, but stayed at home to settle some accounts with the horse dealers. When he had finished that business it was already too late to go anywhere but still too early to go to bed, and for a long time he paced up and down the room, reflecting on his life, a thing he rarely did.

Princess Mary had made an agreeable impression on him when he had met her in Smolensk province. His having encountered her in such exceptional circumstances, and his mother having at one time mentioned her to him as a good match, had drawn his particular attention to her. When he met her again in Voronezh the impression she made on him was not merely pleasing but powerful. Nicholas had been struck by the peculiar moral beauty he observed in her at this time. He was, however, preparing to go away and it had not entered his head to regret that he was thus depriving himself of chances of meeting her. But that day's encounter in church had, he felt, sunk deeper than

was desirable for his peace of mind. That pale, sad, refined face, that radiant look, those gentle graceful gestures, and especially the deep and tender sorrow expressed in all her features agitated him and evoked his sympathy. In men Rostov could not bear to see the expression of a higher spiritual life (that was why he did not like Prince Andrew) and he referred to it contemptuously as philosophy and dreaminess, but in Princess Mary that very sorrow which revealed the depth of a whole spiritual world foreign to him was an irresistible attraction.

"She must be a wonderful woman. A real angel!" he said to himself. "Why am I not free? Why was I in such a hurry with Sonya?" And he involuntarily compared the two: the lack of spirituality in the one and the abundance of it in the other--a spirituality he himself lacked and therefore valued most highly. He tried to picture what would happen were he free. How he would propose to her and how she would become his wife. But no, he could not imagine that. He felt awed, and no clear picture presented itself to his mind. He had long ago pictured to himself a future with Sonya, and that was all clear and simple just because it had all been thought out and he knew all there was in Sonya, but it was impossible to picture a future with Princess Mary, because he did not understand her but simply loved her.

Reveries about Sonya had had something merry and playful in them, but to dream of Princess Mary was always difficult and a little frightening.

"How she prayed!" he thought. "It was plain that her whole soul was in her prayer. Yes, that was the prayer that moves mountains, and I am sure her prayer will be answered. Why don't I pray for what I want?" he suddenly thought. "What do I want? To be free, released from Sonya... She was right," he thought, remembering what the governor's wife had said: "Nothing but misfortune can come of marrying Sonya. Muddles, grief for Mamma... business difficulties... muddles, terrible muddles! Besides, I don't love her--not as I should. O, God! release me from this dreadful, inextricable position!" he suddenly began to pray. "Yes, prayer can move mountains, but one must have faith and not pray as Natasha and I used to as children, that the snow might turn into sugar--and then run out into the yard to see whether it had done so. No, but I am not praying for trifles now," he thought as he put his pipe down in a corner, and folding his hands placed himself before the icon. Softened by memories of Princess Mary he began to pray as he had not done for a long time. Tears were in his eyes and in his throat when the door opened and Lavrushka came in with some papers.

"Blockhead! Why do you come in without being called?" cried Nicholas, quickly changing his attitude.

"From the governor," said Lavrushka in a sleepy voice. "A courier has arrived and there's a letter for you."

"Well, all right, thanks. You can go!"

Nicholas took the two letters, one of which was from his mother and the other from Sonya. He recognized them by the handwriting and opened Sonya's first. He had read only a few lines when he turned pale and his eyes opened wide with fear and joy.

"No, it's not possible!" he cried aloud.

Unable to sit still he paced up and down the room holding the letter and reading it. He glanced through it, then read it again, and then again, and standing still in the middle of the room he raised his shoulders, stretching out his hands, with his mouth wide open and his eyes fixed. What he had just been praying for with confidence that God would hear him had come to pass; but Nicholas was as much astonished as if it were something extraordinary and unexpected, and as if the very fact that it had happened so quickly proved that it had not come from God to whom he had prayed, but by some ordinary coincidence.

This unexpected and, as it seemed to Nicholas, quite voluntary letter from Sonya freed him from the knot that fettered him and from which there had seemed no escape. She wrote that the last unfortunate events--the loss of almost the whole of the Rostovs' Moscow property--and the countess' repeatedly expressed wish that Nicholas should marry Princess Bolkonskaya, together with his silence and coldness of late, had all combined to make her decide to release him from his promise and set him completely free.

It would be too painful to me to think that I might be a cause of sorrow or discord in the family that has been so good to me (she wrote), and my love has no aim but the happiness of those I love; so, Nicholas, I beg you to consider yourself free, and to be assured that, in spite of everything, no one can love you more than does

Your Sonya

Both letters were written from Troitsa. The other, from the countess, described their last days in Moscow, their departure, the fire, and the destruction of all their property. In this letter the countess also mentioned that Prince Andrew was among the wounded traveling with them; his state was very critical, but the doctor

said there was now more hope. Sonya and Natasha were nursing him.

Next day Nicholas took his mother's letter and went to see Princess Mary. Neither he nor she said a word about what "Natasha nursing him" might mean, but thanks to this letter Nicholas suddenly became almost as intimate with the princess as if they were relations.

The following day he saw Princess Mary off on her journey to Yaroslavl, and a few days later left to rejoin his regiment.

CHAPTER VIII

Sonya's letter written from Troitsa, which had come as an answer to Nicholas' prayer, was prompted by this: the thought of getting Nicholas married to an heiress occupied the old countess' mind more and more. She knew that Sonya was the chief obstacle to this happening, and Sonya's life in the countess' house had grown harder and harder, especially after they had received a letter from Nicholas telling of his meeting with Princess Mary in Bogucharovo. The countess let no occasion slip of making humiliating or cruel allusions to Sonya.

But a few days before they left Moscow, moved and excited by all that was going on, she called Sonya to her and, instead of reproaching and making demands on her, tearfully implored her to sacrifice herself and repay all that the family had done for her by breaking off her engagement with Nicholas.

"I shall not be at peace till you promise me this."

Sonya burst into hysterical tears and replied through her sobs that she would do anything and was prepared for anything, but gave no actual promise and could not bring herself to decide to do what was demanded of her. She must sacrifice herself for the family that had reared and brought her up. To sacrifice herself for others was Sonya's habit. Her position in the house was such that only by sacrifice could she show her worth, and she was accustomed to this and loved doing it. But in all her former acts of self-sacrifice she had been happily conscious that they raised her in her own esteem and in that of others, and so made her more worthy of Nicholas whom she loved more than anything in the world. But now they wanted her to sacrifice the very thing that constituted the whole reward for her self-sacrifice and the whole meaning of her life. And for the first time she felt

bitterness against those who had been her benefactors only to torture her the more painfully; she felt jealous of Natasha who had never experienced anything of this sort, had never needed to sacrifice herself, but made others sacrifice themselves for her and yet was beloved by everybody. And for the first time Sonya felt that out of her pure, quiet love for Nicholas a passionate feeling was beginning to grow up which was stronger than principle, virtue, or religion. Under the influence of this feeling Sonya, whose life of dependence had taught her involuntarily to be secretive, having answered the countess in vague general terms, avoided talking with her and resolved to wait till she should see Nicholas, not in order to set him free but on the contrary at that meeting to bind him to her forever.

The bustle and terror of the Rostovs' last days in Moscow stifled the gloomy thoughts that oppressed Sonya. She was glad to find escape from them in practical activity. But when she heard of Prince Andrew's presence in their house, despite her sincere pity for him and for Natasha, she was seized by a joyful and superstitious feeling that God did not intend her to be separated from Nicholas. She knew that Natasha loved no one but Prince Andrew and had never ceased to love him. She knew that being thrown together again under such terrible circumstances they would again fall in love with one another, and that Nicholas would then not be able to marry Princess Mary as they would be within the prohibited degrees of affinity. Despite all the terror of what had happened during those last days and during the first days of their journey, this feeling that Providence was intervening in her personal affairs cheered Sonya.

At the Troitsa monastery the Rostovs first broke their journey for a whole day.

Three large rooms were assigned to them in the monastery hostelry, one of which was occupied by Prince Andrew. The wounded man was much better that day and Natasha was sitting with him. In the next room sat the count and countess respectfully conversing with the prior, who was calling on them as old acquaintances and benefactors of the monastery. Sonya was there too, tormented by curiosity as to what Prince Andrew and Natasha were talking about. She heard the sound of their voices through the door. That door opened and Natasha came out, looking excited. Not noticing the monk, who had risen to greet her and was drawing back the wide sleeve on his right arm, she went up to Sonya and took her hand.

"Natasha, what are you about? Come here!" said the countess.

Natasha went up to the monk for his blessing, and advised her to pray for aid to God and His saint.

As soon as the prior withdrew, Natasha took her friend by the hand and went with her into the unoccupied room.

"Sonya, will he live?" she asked. "Sonya, how happy I am, and how unhappy!... Sonya, dovey, everything is as it used to be. If only he lives! He cannot... because... because... of" and Natasha burst into tears.

"Yes! I knew it! Thank God!" murmured Sonya. "He will live."

Sonya was not less agitated than her friend by the latter's fear and grief and by her own personal feelings which she shared with no one. Sobbing, she kissed and comforted Natasha. "If only he lives!" she thought. Having wept, talked, and wiped away their tears, the two friends went together to Prince Andrew's door. Natasha opened it cautiously and glanced into the room, Sonya standing beside her at the half-open door.

Prince Andrew was lying raised high on three pillows. His pale face was calm, his eyes closed, and they could see his regular breathing.

"O, Natasha!" Sonya suddenly almost screamed, catching her companion's arm and stepping back from the door.

"What? What is it?" asked Natasha.

"It's that, that..." said Sonya, with a white face and trembling lips.

Natasha softly closed the door and went with Sonya to the window, not yet understanding what the latter was telling her.

"You remember," said Sonya with a solemn and frightened expression. "You remember when I looked in the mirror for you... at Otradnoe at Christmas? Do you remember what I saw?"

"Yes, yes!" cried Natasha opening her eyes wide, and vaguely recalling that Sonya had told her something about Prince Andrew whom she had seen lying down.

"You remember?" Sonya went on. "I saw it then and told everybody, you and Dunyasha. I saw him lying on a bed," said she, making a gesture with her hand and a lifted finger at each detail, "and that he had his eyes closed and was covered just with a pink quilt, and that his hands were folded," she concluded, convincing herself that the details she had just seen were exactly what she had seen in the mirror.

She had in fact seen nothing then but had mentioned the first thing that came into her head, but what she had invented then seemed to her now as real as any other recollection. She not only remembered what she had then said--that he turned to look at her and smiled and was covered with something red--but was firmly convinced that she had then seen and said that he was covered with a pink quilt and that his eyes were closed.

"Yes, yes, it really was pink!" cried Natasha, who now thought she too remembered the word pink being used, and saw in this the most extraordinary and mysterious part of the prediction.

"But what does it mean?" she added meditatively.

"Oh, I don't know, it is all so strange," replied Sonya, clutching at her head.

A few minutes later Prince Andrew rang and Natasha went to him, but Sonya, feeling unusually excited and touched, remained at the window thinking about the strangeness of what had occurred.

They had an opportunity that day to send letters to the army, and the countess was writing to her son.

"Sonya!" said the countess, raising her eyes from her letter as her niece passed, "Sonya, won't you write to Nicholas?" She spoke in a soft, tremulous voice, and in the weary eyes that looked over her spectacles Sonya read all that the countess meant to convey with these words. Those eyes expressed entreaty, shame at having to ask, fear of a refusal, and readiness for relentless hatred in case of such refusal.

Sonya went up to the countess and, kneeling down, kissed her hand.

"Yes, Mamma, I will write," said she.

Sonya was softened, excited, and touched by all that had occurred that day, especially by the mysterious fulfillment she had just seen of her vision. Now that she knew that the renewal of Natasha's relations with Prince Andrew would prevent Nicholas from marrying Princess Mary, she was joyfully conscious of a return of that self-sacrificing spirit in which she was accustomed to live and loved to live. So with a joyful consciousness of performing a magnanimous deed--interrupted several times by the tears that dimmed her velvety black eyes--she wrote that touching letter the arrival of which had so amazed Nicholas.

CHAPTER IX

The officer and soldiers who had arrested Pierre treated him with hostility but yet with respect, in the guardhouse to which he was taken. In their attitude toward him could still be felt both uncertainty as to who he might be--perhaps a very important person--and hostility as a result of their recent personal conflict with him.

But when the guard was relieved next morning, Pierre felt that for the new guard--both officers and men--he was not as interesting as he had been to his captors; and in fact the guard of the second day did not recognize in this big, stout man in a peasant coat the vigorous person who had fought so desperately with the marauder and the convoy and had uttered those solemn words about saving a child; they saw in him only No. 17 of the captured Russians, arrested and detained for some reason by order of the Higher Command. If they noticed anything remarkable about Pierre, it was only his unabashed, meditative concentration and thoughtfulness, and the way he spoke French, which struck them as surprisingly good. In spite of this he was placed that day with the other arrested suspects, as the separate room he had occupied was required by an officer.

All the Russians confined with Pierre were men of the lowest class and, recognizing him as a gentleman, they all avoided him, more especially as he spoke French. Pierre felt sad at hearing them making fun of him.

That evening he learned that all these prisoners (he, probably, among them) were to be tried for incendiarism. On the third day he was taken with the others to a house where a French general with a white mustache sat with two colonels and other Frenchmen with scarves on their arms. With the precision and definiteness customary in addressing prisoners, and which is supposed to preclude human frailty, Pierre like the others was questioned as to who he was, where he had been, with what object, and so on.

These questions, like questions put at trials generally, left the essence of the matter aside, shut out the possibility of that essence's being revealed, and were designed only to form a channel through which the judges wished the answers of the accused to flow so as to lead to the desired result, namely a conviction. As soon as Pierre began to say anything that did not fit in with that aim, the

channel was removed and the water could flow to waste. Pierre felt, moreover, what the accused always feel at their trial, perplexity as to why these questions were put to him. He had a feeling that it was only out of condescension or a kind of civility that this device of placing a channel was employed. He knew he was in these men's power, that only by force had they brought him there, that force alone gave them the right to demand answers to their questions, and that the sole object of that assembly was to inculcate him. And so, as they had the power and wish to inculcate him, this expedient of an inquiry and trial seemed unnecessary. It was evident that any answer would lead to conviction. When asked what he was doing when he was arrested, Pierre replied in a rather tragic manner that he was restoring to its parents a child he had saved from the flames. Why had he fought the marauder? Pierre answered that he "was protecting a woman," and that "to protect a woman who was being insulted was the duty of every man; that..." They interrupted him, for this was not to the point. Why was he in the yard of a burning house where witnesses had seen him? He replied that he had gone out to see what was happening in Moscow. Again they interrupted him: they had not asked where he was going, but why he was found near the fire? Who was he? they asked, repeating their first question, which he had declined to answer. Again he replied that he could not answer it.

"Put that down, that's bad... very bad," sternly remarked the general with the white mustache and red flushed face.

On the fourth day fires broke out on the Zubovski rampart.

Pierre and thirteen others were moved to the coach house of a merchant's house near the Crimean bridge. On his way through the streets Pierre felt stifled by the smoke which seemed to hang over the whole city. Fires were visible on all sides. He did not then realize the significance of the burning of Moscow, and looked at the fires with horror.

He passed four days in the coach house near the Crimean bridge and during that time learned, from the talk of the French soldiers, that all those confined there were awaiting a decision which might come any day from the marshal. What marshal this was, Pierre could not learn from the soldiers. Evidently for them "the marshal" represented a very high and rather mysterious power.

These first days, before the eighth of September when the prisoners were had up for a second examination, were the hardest of all for Pierre.

CHAPTER X

On the eighth of September an officer--a very important one judging by the respect the guards showed him--entered the coach house where the prisoners were. This officer, probably someone on the staff, was holding a paper in his hand, and called over all the Russians there, naming Pierre as "the man who does not give his name." Glancing indolently and indifferently at all the prisoners, he ordered the officer in charge to have them decently dressed and tidied up before taking them to the marshal. An hour later a squad of soldiers arrived and Pierre with thirteen others was led to the Virgin's Field. It was a fine day, sunny after rain, and the air was unusually pure. The smoke did not hang low as on the day when Pierre had been taken from the guardhouse on the Zubovski rampart, but rose through the pure air in columns. No flames were seen, but columns of smoke rose on all sides, and all Moscow as far as Pierre could see was one vast charred ruin. On all sides there were waste spaces with only stoves and chimney stacks still standing, and here and there the blackened walls of some brick houses. Pierre gazed at the ruins and did not recognize districts he had known well. Here and there he could see churches that had not been burned. The Kremlin, which was not destroyed, gleamed white in the distance with its towers and the belfry of Ivan the Great. The domes of the New Convent of the Virgin glittered brightly and its bells were ringing particularly clearly. These bells reminded Pierre that it was Sunday and the feast of the Nativity of the Virgin. But there seemed to be no one to celebrate this holiday: everywhere were blackened ruins, and the few Russians to be seen were tattered and frightened people who tried to hide when they saw the French.

It was plain that the Russian nest was ruined and destroyed, but in place of the Russian order of life that had been destroyed, Pierre unconsciously felt that a quite different, firm, French order had been established over this ruined nest. He felt this in the looks of the soldiers who, marching in regular ranks briskly and gaily, were escorting him and the other criminals; he felt it in the looks of an important French official in a carriage and pair driven by a soldier, whom they met on the way. He felt it in the merry sounds of regimental music he heard from the left side of the field, and felt and realized it especially from the list of prisoners the French officer had read out when he came that morning. Pierre had been taken by one set of soldiers and led first to one and then to another place with dozens of other men, and it seemed that they might have forgotten him, or confused him with the others. But no: the

answers he had given when questioned had come back to him in his designation as "the man who does not give his name," and under that appellation, which to Pierre seemed terrible, they were now leading him somewhere with unhesitating assurance on their faces that he and all the other prisoners were exactly the ones they wanted and that they were being taken to the proper place. Pierre felt himself to be an insignificant chip fallen among the wheels of a machine whose action he did not understand but which was working well.

He and the other prisoners were taken to the right side of the Virgin's Field, to a large white house with an immense garden not far from the convent. This was Prince Shcherbitov's house, where Pierre had often been in other days, and which, as he learned from the talk of the soldiers, was now occupied by the marshal, the Duke of Eckmuhl (Davout).

They were taken to the entrance and led into the house one by one. Pierre was the sixth to enter. He was conducted through a glass gallery, an anteroom, and a hall, which were familiar to him, into a long low study at the door of which stood an adjutant.

Davout, spectacles on nose, sat bent over a table at the further end of the room. Pierre went close up to him, but Davout, evidently consulting a paper that lay before him, did not look up. Without raising his eyes, he said in a low voice:

"Who are you?"

Pierre was silent because he was incapable of uttering a word. To him Davout was not merely a French general, but a man notorious for his cruelty. Looking at his cold face, as he sat like a stern schoolmaster who was prepared to wait awhile for an answer, Pierre felt that every instant of delay might cost him his life; but he did not know what to say. He did not venture to repeat what he had said at his first examination, yet to disclose his rank and position was dangerous and embarrassing. So he was silent. But before he had decided what to do, Davout raised his head, pushed his spectacles back on his forehead, screwed up his eyes, and looked intently at him.

"I know that man," he said in a cold, measured tone, evidently calculated to frighten Pierre.

The chill that had been running down Pierre's back now seized his head as in a vise.

"You cannot know me, General, I have never seen you..."

"He is a Russian spy," Davout interrupted, addressing another

general who was present, but whom Pierre had not noticed.

Davout turned away. With an unexpected reverberation in his voice Pierre rapidly began:

"No, monseigneur," he said, suddenly remembering that Davout was a duke. "No, monseigneur, you cannot have known me. I am a militia officer and have not quitted Moscow."

"Your name?" asked Davout.

"Bezukhov."

"What proof have I that you are not lying?"

"Monseigneur!" exclaimed Pierre, not in an offended but in a pleading voice.

Davout looked up and gazed intently at him. For some seconds they looked at one another, and that look saved Pierre. Apart from conditions of war and law, that look established human relations between the two men. At that moment an immense number of things passed dimly through both their minds, and they realized that they were both children of humanity and were brothers.

At the first glance, when Davout had only raised his head from the papers where human affairs and lives were indicated by numbers, Pierre was merely a circumstance, and Davout could have shot him without burdening his conscience with an evil deed, but now he saw in him a human being. He reflected for a moment.

"How can you show me that you are telling the truth?" said Davout coldly.

Pierre remembered Ramballe, and named him and his regiment and the street where the house was.

"You are not what you say," returned Davout.

In a trembling, faltering voice Pierre began adducing proofs of the truth of his statements.

But at that moment an adjutant entered and reported something to Davout.

Davout brightened up at the news the adjutant brought, and began buttoning up his uniform. It seemed that he had quite forgotten Pierre.

When the adjutant reminded him of the prisoner, he jerked his head in Pierre's direction with a frown and ordered him to be led away. But where they were to take him Pierre did not know: back to the coach house or to the place of execution his companions had pointed out to him as they crossed the Virgin's Field.

He turned his head and saw that the adjutant was putting another question to Davout.

"Yes, of course!" replied Davout, but what this "yes" meant, Pierre did not know.

Pierre could not afterwards remember how he went, whether it was far, or in which direction. His faculties were quite numbed, he was stupefied, and noticing nothing around him went on moving his legs as the others did till they all stopped and he stopped too. The only thought in his mind at that time was: who was it that had really sentenced him to death? Not the men on the commission that had first examined him--not one of them wished to or, evidently, could have done it. It was not Davout, who had looked at him in so human a way. In another moment Davout would have realized that he was doing wrong, but just then the adjutant had come in and interrupted him. The adjutant, also, had evidently had no evil intent though he might have refrained from coming in. Then who was executing him, killing him, depriving him of life--him, Pierre, with all his memories, aspirations, hopes, and thoughts? Who was doing this? And Pierre felt that it was no one.

It was a system--a concurrence of circumstances.

A system of some sort was killing him--Pierre--depriving him of life, of everything, annihilating him.

CHAPTER XI

From Prince Shcherbatov's house the prisoners were led straight down the Virgin's Field, to the left of the nunnery, as far as a kitchen garden in which a post had been set up. Beyond that post a fresh pit had been dug in the ground, and near the post and the pit a large crowd stood in a semicircle. The crowd consisted of a few Russians and many of Napoleon's soldiers who were not on duty--Germans, Italians, and Frenchmen, in a variety of uniforms. To the right and left of

the post stood rows of French troops in blue uniforms with red epaulets and high boots and shakos.

The prisoners were placed in a certain order, according to the list (Pierre was sixth), and were led to the post. Several drums suddenly began to beat on both sides of them, and at that sound Pierre felt as if part of his soul had been torn away. He lost the power of thinking or understanding. He could only hear and see. And he had only one wish--that the frightful thing that had to happen should happen quickly. Pierre looked round at his fellow prisoners and scrutinized them.

The two first were convicts with shaven heads. One was tall and thin, the other dark, shaggy, and sinewy, with a flat nose. The third was a domestic serf, about forty-five years old, with grizzled hair and a plump, well-nourished body. The fourth was a peasant, a very handsome man with a broad, light-brown beard and black eyes. The fifth was a factory hand, a thin, sallow-faced lad of eighteen in a loose coat.

Pierre heard the French consulting whether to shoot them separately or two at a time. "In couples," replied the officer in command in a calm voice. There was a stir in the ranks of the soldiers and it was evident that they were all hurrying--not as men hurry to do something they understand, but as people hurry to finish a necessary but unpleasant and incomprehensible task.

A French official wearing a scarf came up to the right of the row of prisoners and read out the sentence in Russian and in French.

Then two pairs of Frenchmen approached the criminals and at the officer's command took the two convicts who stood first in the row. The convicts stopped when they reached the post and, while sacks were being brought, looked dumbly around as a wounded beast looks at an approaching huntsman. One crossed himself continually, the other scratched his back and made a movement of the lips resembling a smile. With hurried hands the soldiers blindfolded them, drawing the sacks over their heads, and bound them to the post.

Twelve sharpshooters with muskets stepped out of the ranks with a firm regular tread and halted eight paces from the post. Pierre turned away to avoid seeing what was going to happen. Suddenly a crackling, rolling noise was heard which seemed to him louder than the most terrific thunder, and he looked round. There was some smoke, and the Frenchmen were doing something near the pit, with pale faces and trembling hands. Two more prisoners were led up. In the same way and with similar looks, these two glanced vainly at the onlookers with only a silent appeal for protection in their eyes, evidently unable to

understand or believe what was going to happen to them. They could not believe it because they alone knew what their life meant to them, and so they neither understood nor believed that it could be taken from them.

Again Pierre did not wish to look and again turned away; but again the sound as of a frightful explosion struck his ear, and at the same moment he saw smoke, blood, and the pale, scared faces of the Frenchmen who were again doing something by the post, their trembling hands impeding one another. Pierre, breathing heavily, looked around as if asking what it meant. The same question was expressed in all the looks that met his.

On the faces of all the Russians and of the French soldiers and officers without exception, he read the same dismay, horror, and conflict that were in his own heart. "But who, after all, is doing this? They are all suffering as I am. Who then is it? Who?" flashed for an instant through his mind.

"Sharpshooters of the 86th, forward!" shouted someone. The fifth prisoner, the one next to Pierre, was led away--alone. Pierre did not understand that he was saved, that he and the rest had been brought there only to witness the execution. With ever-growing horror, and no sense of joy or relief, he gazed at what was taking place. The fifth man was the factory lad in the loose cloak. The moment they laid hands on him he sprang aside in terror and clutched at Pierre. (Pierre shuddered and shook himself free.) The lad was unable to walk. They dragged him along, holding him up under the arms, and he screamed. When they got him to the post he grew quiet, as if he suddenly understood something. Whether he understood that screaming was useless or whether he thought it incredible that men should kill him, at any rate he took his stand at the post, waiting to be blindfolded like the others, and like a wounded animal looked around him with glittering eyes.

Pierre was no longer able to turn away and close his eyes. His curiosity and agitation, like that of the whole crowd, reached the highest pitch at this fifth murder. Like the others this fifth man seemed calm; he wrapped his loose cloak closer and rubbed one bare foot with the other.

When they began to blindfold him he himself adjusted the knot which hurt the back of his head; then when they propped him against the bloodstained post, he leaned back and, not being comfortable in that position, straightened himself, adjusted his feet, and leaned back again more comfortably. Pierre did not take his eyes from him and did not miss his slightest movement.

Probably a word of command was given and was followed by the reports of eight muskets; but try as he would Pierre could not afterwards remember having heard the slightest sound of the shots. He only saw how the workman suddenly sank down on the cords that held him, how blood showed itself in two places, how the ropes slackened under the weight of the hanging body, and how the workman sat down, his head hanging unnaturally and one leg bent under him. Pierre ran up to the post. No one hindered him. Pale, frightened people were doing something around the workman. The lower jaw of an old Frenchman with a thick mustache trembled as he untied the ropes. The body collapsed. The soldiers dragged it awkwardly from the post and began pushing it into the pit.

They all plainly and certainly knew that they were criminals who must hide the traces of their guilt as quickly as possible.

Pierre glanced into the pit and saw that the factory lad was lying with his knees close up to his head and one shoulder higher than the other. That shoulder rose and fell rhythmically and convulsively, but spadefuls of earth were already being thrown over the whole body. One of the soldiers, evidently suffering, shouted gruffly and angrily at Pierre to go back. But Pierre did not understand him and remained near the post, and no one drove him away.

When the pit had been filled up a command was given. Pierre was taken back to his place, and the rows of troops on both sides of the post made a half turn and went past it at a measured pace. The twenty-four sharpshooters with discharged muskets, standing in the center of the circle, ran back to their places as the companies passed by.

Pierre gazed now with dazed eyes at these sharpshooters who ran in couples out of the circle. All but one rejoined their companies. This one, a young soldier, his face deadly pale, his shako pushed back, and his musket resting on the ground, still stood near the pit at the spot from which he had fired. He swayed like a drunken man, taking some steps forward and back to save himself from falling. An old, noncommissioned officer ran out of the ranks and taking him by the elbow dragged him to his company. The crowd of Russians and Frenchmen began to disperse. They all went away silently and with drooping heads.

"That will teach them to start fires," said one of the Frenchmen.

Pierre glanced round at the speaker and saw that it was a soldier who was trying to find some relief after what had been done, but was not able to do so. Without finishing what he had begun to say he made a hopeless movement with his arm and went away.

CHAPTER XII

After the execution Pierre was separated from the rest of the prisoners and placed alone in a small, ruined, and befouled church.

Toward evening a noncommissioned officer entered with two soldiers and told him that he had been pardoned and would now go to the barracks for the prisoners of war. Without understanding what was said to him, Pierre got up and went with the soldiers. They took him to the upper end of the field, where there were some sheds built of charred planks, beams, and battens, and led him into one of them. In the darkness some twenty different men surrounded Pierre. He looked at them without understanding who they were, why they were there, or what they wanted of him. He heard what they said, but did not understand the meaning of the words and made no kind of deduction from or application of them. He replied to questions they put to him, but did not consider who was listening to his replies, nor how they would understand them. He looked at their faces and figures, but they all seemed to him equally meaningless.

From the moment Pierre had witnessed those terrible murders committed by men who did not wish to commit them, it was as if the mainspring of his life, on which everything depended and which made everything appear alive, had suddenly been wrenched out and everything had collapsed into a heap of meaningless rubbish. Though he did not acknowledge it to himself, his faith in the right ordering of the universe, in humanity, in his own soul, and in God, had been destroyed. He had experienced this before, but never so strongly as now. When similar doubts had assailed him before, they had been the result of his own wrongdoing, and at the bottom of his heart he had felt that relief from his despair and from those doubts was to be found within himself. But now he felt that the universe had crumbled before his eyes and only meaningless ruins remained, and this not by any fault of his own. He felt that it was not in his power to regain faith in the meaning of life.

Around him in the darkness men were standing and evidently something about him interested them greatly. They were telling him something and asking him something. Then they led him away somewhere, and at last he found himself in a corner of the shed among men who were laughing and talking on all sides.

"Well, then, mates... that very prince who..." some voice at the other end of the shed was saying, with a strong emphasis on the word who.

Sitting silent and motionless on a heap of straw against the wall, Pierre sometimes opened and sometimes closed his eyes. But as soon as he closed them he saw before him the dreadful face of the factory lad--especially dreadful because of its simplicity--and the faces of the murderers, even more dreadful because of their disquiet. And he opened his eyes again and stared vacantly into the darkness around him.

Beside him in a stooping position sat a small man of whose presence he was first made aware by a strong smell of perspiration which came from him every time he moved. This man was doing something to his legs in the darkness, and though Pierre could not see his face he felt that the man continually glanced at him. On growing used to the darkness Pierre saw that the man was taking off his leg bands, and the way he did it aroused Pierre's interest.

Having unwound the string that tied the band on one leg, he carefully coiled it up and immediately set to work on the other leg, glancing up at Pierre. While one hand hung up the first string the other was already unwinding the band on the second leg. In this way, having carefully removed the leg bands by deft circular motions of his arm following one another uninterruptedly, the man hung the leg bands up on some pegs fixed above his head. Then he took out a knife, cut something, closed the knife, placed it under the head of his bed, and, seating himself comfortably, clasped his arms round his lifted knees and fixed his eyes on Pierre. The latter was conscious of something pleasant, comforting, and well rounded in these deft movements, in the man's well-ordered arrangements in his corner, and even in his very smell, and he looked at the man without taking his eyes from him.

"You've seen a lot of trouble, sir, eh?" the little man suddenly said.

And there was so much kindness and simplicity in his singsong voice that Pierre tried to reply, but his jaw trembled and he felt tears rising to his eyes. The little fellow, giving Pierre no time to betray his confusion, instantly continued in the same pleasant tones:

"Eh, lad, don't fret!" said he, in the tender singsong caressing voice old Russian peasant women employ. "Don't fret, friend--'suffer an hour, live for an age!' that's how it is, my dear fellow. And here we live, thank heaven, without offense. Among these folk, too,

there are good men as well as bad," said he, and still speaking, he turned on his knees with a supple movement, got up, coughed, and went off to another part of the shed.

"Eh, you rascal!" Pierre heard the same kind voice saying at the other end of the shed. "So you've come, you rascal? She remembers... Now, now, that'll do!"

And the soldier, pushing away a little dog that was jumping up at him, returned to his place and sat down. In his hands he had something wrapped in a rag.

"Here, eat a bit, sir," said he, resuming his former respectful tone as he unwrapped and offered Pierre some baked potatoes. "We had soup for dinner and the potatoes are grand!"

Pierre had not eaten all day and the smell of the potatoes seemed extremely pleasant to him. He thanked the soldier and began to eat.

"Well, are they all right?" said the soldier with a smile. "You should do like this."

He took a potato, drew out his clasp knife, cut the potato into two equal halves on the palm of his hand, sprinkled some salt on it from the rag, and handed it to Pierre.

"The potatoes are grand!" he said once more. "Eat some like that!"

Pierre thought he had never eaten anything that tasted better.

"Oh, I'm all right," said he, "but why did they shoot those poor fellows? The last one was hardly twenty."

"Tss, tt...!" said the little man. "Ah, what a sin... what a sin!" he added quickly, and as if his words were always waiting ready in his mouth and flew out involuntarily he went on: "How was it, sir, that you stayed in Moscow?"

"I didn't think they would come so soon. I stayed accidentally," replied Pierre.

"And how did they arrest you, dear lad? At your house?"

"No, I went to look at the fire, and they arrested me there, and tried me as an incendiary."

"Where there's law there's injustice," put in the little man.

"And have you been here long?" Pierre asked as he munched the last of the potato.

"I? It was last Sunday they took me, out of a hospital in Moscow."

"Why, are you a soldier then?"

"Yes, we are soldiers of the Apsheron regiment. I was dying of fever. We weren't told anything. There were some twenty of us lying there. We had no idea, never guessed at all."

"And do you feel sad here?" Pierre inquired.

"How can one help it, lad? My name is Platon, and the surname is Karataev," he added, evidently wishing to make it easier for Pierre to address him. "They call me 'little falcon' in the regiment. How is one to help feeling sad? Moscow--she's the mother of cities. How can one see all this and not feel sad? But 'the maggot gnaws the cabbage, yet dies first'; that's what the old folks used to tell us," he added rapidly.

"What? What did you say?" asked Pierre.

"Who? I?" said Karataev. "I say things happen not as we plan but as God judges," he replied, thinking that he was repeating what he had said before, and immediately continued:

"Well, and you, have you a family estate, sir? And a house? So you have abundance, then? And a housewife? And your old parents, are they still living?" he asked.

And though it was too dark for Pierre to see, he felt that a suppressed smile of kindness puckered the soldier's lips as he put these questions. He seemed grieved that Pierre had no parents, especially that he had no mother.

"A wife for counsel, a mother-in-law for welcome, but there's none as dear as one's own mother!" said he. "Well, and have you little ones?" he went on asking.

Again Pierre's negative answer seemed to distress him, and he hastened to add:

"Never mind! You're young folks yet, and please God may still have some. The great thing is to live in harmony...."

"But it's all the same now," Pierre could not help saying.

"Ah, my dear fellow!" rejoined Karataev, "never decline a prison or a beggar's sack!"

He seated himself more comfortably and coughed, evidently preparing to tell a long story.

"Well, my dear fellow, I was still living at home," he began. "We had a well-to-do homestead, plenty of land, we peasants lived well and our house was one to thank God for. When Father and we went out mowing there were seven of us. We lived well. We were real peasants. It so happened..."

And Platon Karataev told a long story of how he had gone into someone's copse to take wood, how he had been caught by the keeper, had been tried, flogged, and sent to serve as a soldier.

"Well, lad," and a smile changed the tone of his voice "we thought it was a misfortune but it turned out a blessing! If it had not been for my sin, my brother would have had to go as a soldier. But he, my younger brother, had five little ones, while I, you see, only left a wife behind. We had a little girl, but God took her before I went as a soldier. I come home on leave and I'll tell you how it was, I look and see that they are living better than before. The yard full of cattle, the women at home, two brothers away earning wages, and only Michael the youngest, at home. Father, he says, 'All my children are the same to me: it hurts the same whichever finger gets bitten. But if Platon hadn't been shaved for a soldier, Michael would have had to go.' called us all to him and, will you believe it, placed us in front of the icons. 'Michael,' he says, 'come here and bow down to his feet; and you, young woman, you bow down too; and you, grandchildren, also bow down before him! Do you understand?' he says. That's how it is, dear fellow. Fate looks for a head. But we are always judging, 'that's not well--that's not right!' Our luck is like water in a dragnet: you pull at it and it bulges, but when you've drawn it out it's empty! That's how it is."

And Platon shifted his seat on the straw.

After a short silence he rose.

"Well, I think you must be sleepy," said he, and began rapidly crossing himself and repeating:

"Lord Jesus Christ, holy Saint Nicholas, Frola and Lavra! Lord Jesus Christ, holy Saint Nicholas, Frola and Lavra! Lord Jesus Christ, have mercy on us and save us!" he concluded, then bowed to the ground, got up, sighed, and sat down again on his heap of straw. "That's the way. Lay me down like a stone, O God, and raise me up like a loaf," he

muttered as he lay down, pulling his coat over him.

"What prayer was that you were saying?" asked Pierre.

"Eh?" murmured Platon, who had almost fallen asleep. "What was I saying? I was praying. Don't you pray?"

"Yes, I do," said Pierre. "But what was that you said: Frola and Lavra?"

"Well, of course," replied Platon quickly, "the horses' saints. One must pity the animals too. Eh, the rascal! Now you've curled up and got warm, you daughter of a bitch!" said Karataev, touching the dog that lay at his feet, and again turning over he fell asleep immediately.

Sounds of crying and screaming came from somewhere in the distance outside, and flames were visible through the cracks of the shed, but inside it was quiet and dark. For a long time Pierre did not sleep, but lay with eyes open in the darkness, listening to the regular snoring of Platon who lay beside him, and he felt that the world that had been shattered was once more stirring in his soul with a new beauty and on new and unshakable foundations.

CHAPTER XIII

Twenty-three soldiers, three officers, and two officials were confined in the shed in which Pierre had been placed and where he remained for four weeks.

When Pierre remembered them afterwards they all seemed misty figures to him except Platon Karataev, who always remained in his mind a most vivid and precious memory and the personification of everything Russian, kindly, and round. When Pierre saw his neighbor next morning at dawn the first impression of him, as of something round, was fully confirmed: Platon's whole figure--in a French overcoat girdled with a cord, a soldier's cap, and bast shoes--was round. His head was quite round, his back, chest, shoulders, and even his arms, which he held as if ever ready to embrace something, were rounded, his pleasant smile and his large, gentle brown eyes were also round.

Platon Karataev must have been fifty, judging by his stories of campaigns he had been in, told as by an old soldier. He did not

himself know his age and was quite unable to determine it. But his brilliantly white, strong teeth which showed in two unbroken semicircles when he laughed--as he often did--were all sound and good, there was not a gray hair in his beard or on his head, and his whole body gave an impression of suppleness and especially of firmness and endurance.

His face, despite its fine, rounded wrinkles, had an expression of innocence and youth, his voice was pleasant and musical. But the chief peculiarity of his speech was its directness and appositeness. It was evident that he never considered what he had said or was going to say, and consequently the rapidity and justice of his intonation had an irresistible persuasiveness.

His physical strength and agility during the first days of his imprisonment were such that he seemed not to know what fatigue and sickness meant. Every night before lying down, he said: "Lord, lay me down as a stone and raise me up as a loaf!" and every morning on getting up, he said: "I lay down and curled up, I get up and shake myself." And indeed he only had to lie down, to fall asleep like a stone, and he only had to shake himself, to be ready without a moment's delay for some work, just as children are ready to play directly they awake. He could do everything, not very well but not badly. He baked, cooked, sewed, planed, and mended boots. He was always busy, and only at night allowed himself conversation--of which he was fond--and songs. He did not sing like a trained singer who knows he is listened to, but like the birds, evidently giving vent to the sounds in the same way that one stretches oneself or walks about to get rid of stiffness, and the sounds were always high-pitched, mournful, delicate, and almost feminine, and his face at such times was very serious.

Having been taken prisoner and allowed his beard to grow, he seemed to have thrown off all that had been forced upon him--everything military and alien to himself--and had returned to his former peasant habits.

"A soldier on leave--a shirt outside breeches," he would say.

He did not like talking about his life as a soldier, though he did not complain, and often mentioned that he had not been flogged once during the whole of his army service. When he related anything it was generally some old and evidently precious memory of his "Christian" life, as he called his peasant existence. The proverbs, of which his talk was full, were for the most part not the coarse and indecent saws soldiers employ, but those folk sayings which taken without a context seem so insignificant, but when used appositely suddenly acquire a significance of profound wisdom.

He would often say the exact opposite of what he had said on a previous occasion, yet both would be right. He liked to talk and he talked well, adorning his speech with terms of endearment and with folk sayings which Pierre thought he invented himself, but the chief charm of his talk lay in the fact that the commonest events--sometimes just such as Pierre had witnessed without taking notice of them--assumed in Karataev's a character of solemn fitness. He liked to hear the folk tales one of the soldiers used to tell of an evening (they were always the same), but most of all he liked to hear stories of real life. He would smile joyfully when listening to such stories, now and then putting in a word or asking a question to make the moral beauty of what he was told clear to himself. Karataev had no attachments, friendships, or love, as Pierre understood them, but loved and lived affectionately with everything life brought him in contact with, particularly with man--not any particular man, but those with whom he happened to be. He loved his dog, his comrades, the French, and Pierre who was his neighbor, but Pierre felt that in spite of Karataev's affectionate tenderness for him (by which he unconsciously gave Pierre's spiritual life its due) he would not have grieved for a moment at parting from him. And Pierre began to feel in the same way toward Karataev.

To all the other prisoners Platon Karataev seemed a most ordinary soldier. They called him "little falcon" or "Platosha," chaffed him good-naturedly, and sent him on errands. But to Pierre he always remained what he had seemed that first night: an unfathomable, rounded, eternal personification of the spirit of simplicity and truth.

Platon Karataev knew nothing by heart except his prayers. When he began to speak he seemed not to know how he would conclude.

Sometimes Pierre, struck by the meaning of his words, would ask him to repeat them, but Platon could never recall what he had said a moment before, just as he never could repeat to Pierre the words of his favorite song: native and birch tree and my heart is sick occurred in it, but when spoken and not sung, no meaning could be got out of it. He did not, and could not, understand the meaning of words apart from their context. Every word and action of his was the manifestation of an activity unknown to him, which was his life. But his life, as he regarded it, had no meaning as a separate thing. It had meaning only as part of a whole of which he was always conscious. His words and actions flowed from him as evenly, inevitably, and spontaneously as fragrance exhales from a flower. He could not understand the value or significance of any word or deed taken separately.

CHAPTER XIV

When Princess Mary heard from Nicholas that her brother was with the Rostovs at Yaroslavl she at once prepared to go there, in spite of her aunt's efforts to dissuade her--and not merely to go herself but to take her nephew with her. Whether it were difficult or easy, possible or impossible, she did not ask and did not want to know: it was her duty not only herself to be near her brother who was perhaps dying, but to do everything possible to take his son to him, and so she prepared to set off. That she had not heard from Prince Andrew himself, Princess Mary attributed to his being too weak to write or to his considering the long journey too hard and too dangerous for her and his son.

In a few days Princess Mary was ready to start. Her equipages were the huge family coach in which she had traveled to Voronezh, a semiopen trap, and a baggage cart. With her traveled Mademoiselle Bourienne, little Nicholas and his tutor, her old nurse, three maids, Tikhon, and a young footman and courier her aunt had sent to accompany her.

The usual route through Moscow could not be thought of, and the roundabout way Princess Mary was obliged to take through Lipetsk, Ryazan, Vladimir, and Shuya was very long and, as post horses were not everywhere obtainable, very difficult, and near Ryazan where the French were said to have shown themselves was even dangerous.

During this difficult journey Mademoiselle Bourienne, Dessalles, and Princess Mary's servants were astonished at her energy and firmness of spirit. She went to bed later and rose earlier than any of them, and no difficulties daunted her. Thanks to her activity and energy, which infected her fellow travelers, they approached Yaroslavl by the end of the second week.

The last days of her stay in Voronezh had been the happiest of her life. Her love for Rostov no longer tormented or agitated her. It filled her whole soul, had become an integral part of herself, and she no longer struggled against it. Latterly she had become convinced that she loved and was beloved, though she never said this definitely to herself in words. She had become convinced of it at her last interview with Nicholas, when he had come to tell her that her brother was with the Rostovs. Not by a single word had Nicholas alluded to the fact that Prince Andrew's relations with Natasha might, if he recovered, be renewed, but Princess Mary saw by his face that he

knew and thought of this.

Yet in spite of that, his relation to her--considerate, delicate, and loving--not only remained unchanged, but it sometimes seemed to Princess Mary that he was even glad that the family connection between them allowed him to express his friendship more freely. She knew that she loved for the first and only time in her life and felt that she was beloved, and was happy in regard to it.

But this happiness on one side of her spiritual nature did not prevent her feeling grief for her brother with full force; on the contrary, that spiritual tranquility on the one side made it the more possible for her to give full play to her feeling for her brother. That feeling was so strong at the moment of leaving Voronezh that those who saw her off, as they looked at her careworn, despairing face, felt sure she would fall ill on the journey. But the very difficulties and preoccupations of the journey, which she took so actively in hand, saved her for a while from her grief and gave her strength.

As always happens when traveling, Princess Mary thought only of the journey itself, forgetting its object. But as she approached Yaroslavl the thought of what might await her there--not after many days, but that very evening--again presented itself to her and her agitation increased to its utmost limit.

The courier who had been sent on in advance to find out where the Rostovs were staying in Yaroslavl, and in what condition Prince Andrew was, when he met the big coach just entering the town gates was appalled by the terrible pallor of the princess' face that looked out at him from the window.

"I have found out everything, your excellency: the Rostovs are staying at the merchant Bronnikov's house, in the Square not far from here, right above the Volga," said the courier.

Princess Mary looked at him with frightened inquiry, not understanding why he did not reply to what she chiefly wanted to know: how was her brother? Mademoiselle Bourienne put that question for her.

"How is the prince?" she asked.

"His excellency is staying in the same house with them."

"Then he is alive," thought Princess Mary, and asked in a low voice: "How is he?"

"The servants say he is still the same."

What "still the same" might mean Princess Mary did not ask, but with an unnoticed glance at little seven-year-old Nicholas, who was sitting in front of her looking with pleasure at the town, she bowed her head and did not raise it again till the heavy coach, rumbling, shaking and swaying, came to a stop. The carriage steps clattered as they were let down.

The carriage door was opened. On the left there was water--a great river--and on the right a porch. There were people at the entrance: servants, and a rosy girl with a large plait of black hair, smiling as it seemed to Princess Mary in an unpleasantly affected way. (This was Sonya.) Princess Mary ran up the steps. "This way, this way!" said the girl, with the same artificial smile, and the princess found herself in the hall facing an elderly woman of Oriental type, who came rapidly to meet her with a look of emotion. This was the countess. She embraced Princess Mary and kissed her.

"Mon enfant!" she muttered, "je vous aime et vous connais depuis longtemps."*

*"My child! I love you and have known you a long time."

Despite her excitement, Princess Mary realized that this was the countess and that it was necessary to say something to her. Hardly knowing how she did it, she contrived to utter a few polite phrases in French in the same tone as those that had been addressed to her, and asked: "How is he?"

"The doctor says that he is not in danger," said the countess, but as she spoke she raised her eyes with a sigh, and her gesture conveyed a contradiction of her words.

"Where is he? Can I see him--can I?" asked the princess.

"One moment, Princess, one moment, my dear! Is this his son?" said the countess, turning to little Nicholas who was coming in with Dessalles. "There will be room for everybody, this is a big house. Oh, what a lovely boy!"

The countess took Princess Mary into the drawing room, where Sonya was talking to Mademoiselle Bourienne. The countess caressed the boy, and the old count came in and welcomed the princess. He had changed very much since Princess Mary had last seen him. Then he had been a brisk, cheerful, self-assured old man; now he seemed a pitiful, bewildered person. While talking to Princess Mary he continually looked round as if asking everyone whether he was doing the right

thing. After the destruction of Moscow and of his property, thrown out of his accustomed groove he seemed to have lost the sense of his own significance and to feel that there was no longer a place for him in life.

In spite of her one desire to see her brother as soon as possible, and her vexation that at the moment when all she wanted was to see him they should be trying to entertain her and pretending to admire her nephew, the princess noticed all that was going on around her and felt the necessity of submitting, for a time, to this new order of things which she had entered. She knew it to be necessary, and though it was hard for her she was not vexed with these people.

"This is my niece," said the count, introducing Sonya--"You don't know her, Princess?"

Princess Mary turned to Sonya and, trying to stifle the hostile feeling that arose in her toward the girl, she kissed her. But she felt oppressed by the fact that the mood of everyone around her was so far from what was in her own heart.

"Where is he?" she asked again, addressing them all.

"He is downstairs. Natasha is with him," answered Sonya, flushing.
"We have sent to ask. I think you must be tired, Princess."

Tears of vexation showed themselves in Princess Mary's eyes. She turned away and was about to ask the countess again how to go to him, when light, impetuous, and seemingly buoyant steps were heard at the door. The princess looked round and saw Natasha coming in, almost running--that Natasha whom she had liked so little at their meeting in Moscow long since.

But hardly had the princess looked at Natasha's face before she realized that here was a real comrade in her grief, and consequently a friend. She ran to meet her, embraced her, and began to cry on her shoulder.

As soon as Natasha, sitting at the head of Prince Andrew's bed, heard of Princess Mary's arrival, she softly left his room and hastened to her with those swift steps that had sounded buoyant to Princess Mary.

There was only one expression on her agitated face when she ran into the drawing room--that of love--boundless love for him, for her, and for all that was near to the man she loved; and of pity, suffering for others, and passionate desire to give herself entirely to helping them. It was plain that at that moment there was in Natasha's heart no

thought of herself or of her own relations with Prince Andrew.

Princess Mary, with her acute sensibility, understood all this at the first glance at Natasha's face, and wept on her shoulder with sorrowful pleasure.

"Come, come to him, Mary," said Natasha, leading her into the other room.

Princess Mary raised her head, dried her eyes, and turned to Natasha. She felt that from her she would be able to understand and learn everything.

"How..." she began her question but stopped short.

She felt that it was impossible to ask, or to answer, in words. Natasha's face eyes would have to tell her all more clearly and profoundly.

Natasha was gazing at her, but seemed afraid and in doubt whether to say all she knew or not; she seemed to feel that before those luminous eyes which penetrated into the very depths of her heart, it was impossible not to tell the whole truth which she saw. And suddenly, Natasha's lips twitched, ugly wrinkles gathered round her mouth, and covering her face with her hands she burst into sobs.

Princess Mary understood.

But she still hoped, and asked, in words she herself did not trust:

"But how is his wound? What is his general condition?"

"You, you... will see," was all Natasha could say.

They sat a little while downstairs near his room till they had left off crying and were able to go to him with calm faces.

"How has his whole illness gone? Is it long since he grew worse? When did this happen?" Princess Mary inquired.

Natasha told her that at first there had been danger from his feverish condition and the pain he suffered, but at Troitsa that had passed and the doctor had only been afraid of gangrene. That danger had also passed. When they reached Yaroslavl the wound had begun to fester (Natasha knew all about such things as festering) and the doctor had said that the festering might take a normal course. Then fever set in, but the doctor had said the fever was not very serious.

"But two days ago this suddenly happened," said Natasha, struggling with her sobs. "I don't know why, but you will see what he is like."

"Is he weaker? Thinner?" asked the princess.

"No, it's not that, but worse. You will see. O, Mary, he is too good, he cannot, cannot live, because..."

CHAPTER XV

When Natasha opened Prince Andrew's door with a familiar movement and let Princess Mary pass into the room before her, the princess felt the sobs in her throat. Hard as she had tried to prepare herself, and now tried to remain tranquil, she knew that she would be unable to look at him without tears.

The princess understood what Natasha had meant by the words: "two days ago this suddenly happened." She understood those words to mean that he had suddenly softened and that this softening and gentleness were signs of approaching death. As she stepped to the door she already saw in imagination Andrew's face as she remembered it in childhood, a gentle, mild, sympathetic face which he had rarely shown, and which therefore affected her very strongly. She was sure he would speak soft, tender words to her such as her father had uttered before his death, and that she would not be able to bear it and would burst into sobs in his presence. Yet sooner or later it had to be, and she went in. The sobs rose higher and higher in her throat as she more and more clearly distinguished his form and her shortsighted eyes tried to make out his features, and then she saw his face and met his gaze.

He was lying in a squirrel-fur dressing gown on a divan, surrounded by pillows. He was thin and pale. In one thin, translucently white hand he held a handkerchief, while with the other he stroked the delicate mustache he had grown, moving his fingers slowly. His eyes gazed at them as they entered.

On seeing his face and meeting his eyes Princess Mary's pace suddenly slackened, she felt her tears dry up and her sobs ceased. She suddenly felt guilty and grew timid on catching the expression of his face and eyes.

"But in what am I to blame?" she asked herself. And his cold, stern look replied: "Because you are alive and thinking of the living, while I..."

In the deep gaze that seemed to look not outwards but inwards there was an almost hostile expression as he slowly regarded his sister and Natasha.

He kissed his sister, holding her hand in his as was their wont.

"How are you, Mary? How did you manage to get here?" said he in a voice as calm and aloof as his look.

Had he screamed in agony, that scream would not have struck such horror into Princess Mary's heart as the tone of his voice.

"And have you brought little Nicholas?" he asked in the same slow, quiet manner and with an obvious effort to remember.

"How are you now?" said Princess Mary, herself surprised at what she was saying.

"That, my dear, you must ask the doctor," he replied, and again making an evident effort to be affectionate, he said with his lips only (his words clearly did not correspond to his thoughts):

"Merci, chere amie, d'etre venue."*

*"Thank you for coming, my dear."

Princess Mary pressed his hand. The pressure made him wince just perceptibly. He was silent, and she did not know what to say. She now understood what had happened to him two days before. In his words, his tone, and especially in that calm, almost antagonistic look could be felt an estrangement from everything belonging to this world, terrible in one who is alive. Evidently only with an effort did he understand anything living; but it was obvious that he failed to understand, not because he lacked the power to do so but because he understood something else--something the living did not and could not understand--and which wholly occupied his mind.

"There, you see how strangely fate has brought us together," said he, breaking the silence and pointing to Natasha. "She looks after me all the time."

Princess Mary heard him and did not understand how he could say such

a thing. He, the sensitive, tender Prince Andrew, how could he say that, before her whom he loved and who loved him? Had he expected to live he could not have said those words in that offensively cold tone. If he had not known that he was dying, how could he have failed to pity her and how could he speak like that in her presence? The only explanation was that he was indifferent, because something else, much more important, had been revealed to him.

The conversation was cold and disconnected and continually broke off.

"Mary came by way of Ryazan," said Natasha.

Prince Andrew did not notice that she called his sister Mary, and only after calling her so in his presence did Natasha notice it herself.

"Really?" he asked.

"They told her that all Moscow has been burned down, and that..."

Natasha stopped. It was impossible to talk. It was plain that he was making an effort to listen, but could not do so.

"Yes, they say it's burned," he said. "It's a great pity," and he gazed straight before him, absently stroking his mustache with his fingers.

"And so you have met Count Nicholas, Mary?" Prince Andrew suddenly said, evidently wishing to speak pleasantly to them. "He wrote here that he took a great liking to you," he went on simply and calmly, evidently unable to understand all the complex significance his words had for living people. "If you liked him too, it would be a good thing for you to get married," he added rather more quickly, as if pleased at having found words he had long been seeking.

Princess Mary heard his words but they had no meaning for her, except as a proof of how far away he now was from everything living.

"Why talk of me?" she said quietly and glanced at Natasha.

Natasha, who felt her glance, did not look at her. All three were again silent.

"Andrew, would you like..." Princess Mary suddenly said in a trembling voice, "would you like to see little Nicholas? He is always talking about you!"

Prince Andrew smiled just perceptibly and for the first time, but Princess Mary, who knew his face so well, saw with horror that he did not smile with pleasure or affection for his son, but with quiet, gentle irony because he thought she was trying what she believed to be the last means of arousing him.

"Yes, I shall be very glad to see him. Is he quite well?"

When little Nicholas was brought into Prince Andrew's room he looked at his father with frightened eyes, but did not cry, because no one else was crying. Prince Andrew kissed him and evidently did not know what to say to him.

When Nicholas had been led away, Princess Mary again went up to her brother, kissed him, and unable to restrain her tears any longer began to cry.

He looked at her attentively.

"Is it about Nicholas?" he asked.

Princess Mary nodded her head, weeping.

"Mary, you know the Gosp..." but he broke off.

"What did you say?"

"Nothing. You mustn't cry here," he said, looking at her with the same cold expression.

When Princess Mary began to cry, he understood that she was crying at the thought that little Nicholas would be left without a father. With a great effort he tried to return to life and to see things from their point of view.

"Yes, to them it must seem sad!" he thought. "But how simple it is.

"The fowls of the air sow not, neither do they reap, yet your Father feedeth them," he said to himself and wished to say to Princess Mary; "but no, they will take it their own way, they won't understand! They can't understand that all those feelings they prize so--all our feelings, all those ideas that seem so important to us, are unnecessary. We cannot understand one another," and he remained silent.

Prince Andrew's little son was seven. He could scarcely read, and

knew nothing. After that day he lived through many things, gaining knowledge, observation, and experience, but had he possessed all the faculties he afterwards acquired, he could not have had a better or more profound understanding of the meaning of the scene he had witnessed between his father, Mary, and Natasha, than he had then. He understood it completely, and, leaving the room without crying, went silently up to Natasha who had come out with him and looked shyly at her with his beautiful, thoughtful eyes, then his uplifted, rosy upper lip trembled and leaning his head against her he began to cry.

After that he avoided Dessalles and the countess who caressed him and either sat alone or came timidly to Princess Mary, or to Natasha of whom he seemed even fonder than of his aunt, and clung to them quietly and shyly.

When Princess Mary had left Prince Andrew she fully understood what Natasha's face had told her. She did not speak any more to Natasha of hopes of saving his life. She took turns with her beside his sofa, and did not cry any more, but prayed continually, turning in soul to that Eternal and Unfathomable, whose presence above the dying man was now so evident.

CHAPTER XVI

Not only did Prince Andrew know he would die, but he felt that he was dying and was already half dead. He was conscious of an aloofness from everything earthly and a strange and joyous lightness of existence. Without haste or agitation he awaited what was coming. That inexorable, eternal, distant, and unknown the presence of which he had felt continually all his life--was now near to him and, by the strange lightness he experienced, almost comprehensible and palpable...

Formerly he had feared the end. He had twice experienced that terribly tormenting fear of death--the end--but now he no longer understood that fear.

He had felt it for the first time when the shell spun like a top before him, and he looked at the fallow field, the bushes, and the sky, and knew that he was face to face with death. When he came to himself after being wounded and the flower of eternal, unfettered love had instantly unfolded itself in his soul as if freed from the bondage

of life that had restrained it, he no longer feared death and ceased to think about it.

During the hours of solitude, suffering, and partial delirium he spent after he was wounded, the more deeply he penetrated into the new principle of eternal love revealed to him, the more he unconsciously detached himself from earthly life. To love everything and everybody and always to sacrifice oneself for love meant not to love anyone, not to live this earthly life. And the more imbued he became with that principle of love, the more he renounced life and the more completely he destroyed that dreadful barrier which--in the absence of such love--stands between life and death. When during those first days he remembered that he would have to die, he said to himself: "Well, what of it? So much the better!"

But after the night in Mytishchi when, half delirious, he had seen her for whom he longed appear before him and, having pressed her hand to his lips, had shed gentle, happy tears, love for a particular woman again crept unobserved into his heart and once more bound him to life. And joyful and agitating thoughts began to occupy his mind. Recalling the moment at the ambulance station when he had seen Kuragin, he could not now regain the feeling he then had, but was tormented by the question whether Kuragin was alive. And he dared not inquire.

His illness pursued its normal physical course, but what Natasha referred to when she said: "This suddenly happened," had occurred two days before Princess Mary arrived. It was the last spiritual struggle between life and death, in which death gained the victory. It was the unexpected realization of the fact that he still valued life as presented to him in the form of his love for Natasha, and a last, though ultimately vanquished, attack of terror before the unknown.

It was evening. As usual after dinner he was slightly feverish, and his thoughts were preternaturally clear. Sonya was sitting by the table. He began to doze. Suddenly a feeling of happiness seized him.

"Ah, she has come!" thought he.

And so it was: in Sonya's place sat Natasha who had just come in noiselessly.

Since she had begun looking after him, he had always experienced this physical consciousness of her nearness. She was sitting in an armchair placed sideways, screening the light of the candle from him, and was knitting a stocking. She had learned to knit stockings since Prince Andrew had casually mentioned that no one nursed the sick

so well as old nurses who knit stockings, and that there is something soothing in the knitting of stockings. The needles clicked lightly in her slender, rapidly moving hands, and he could clearly see the thoughtful profile of her drooping face. She moved, and the ball rolled off her knees. She started, glanced round at him, and screening the candle with her hand stooped carefully with a supple and exact movement, picked up the ball, and regained her former position.

He looked at her without moving and saw that she wanted to draw a deep breath after stooping, but refrained from doing so and breathed cautiously.

At the Troitsa monastery they had spoken of the past, and he had told her that if he lived he would always thank God for his wound which had brought them together again, but after that they never spoke of the future.

"Can it or can it not be?" he now thought as he looked at her and listened to the light click of the steel needles. "Can fate have brought me to her so strangely only for me to die?... Is it possible that the truth of life has been revealed to me only to show me that I have spent my life in falsity? I love her more than anything in the world! But what am I to do if I love her?" he thought, and he involuntarily groaned, from a habit acquired during his sufferings.

On hearing that sound Natasha put down the stocking, leaned nearer to him, and suddenly, noticing his shining eyes, stepped lightly up to him and bent over him.

"You are not asleep?"

"No, I have been looking at you a long time. I felt you come in. No one else gives me that sense of soft tranquillity that you do... that light. I want to weep for joy."

Natasha drew closer to him. Her face shone with rapturous joy.

"Natasha, I love you too much! More than anything in the world."

"And I!"--She turned away for an instant. "Why too much?" she asked.

"Why too much?... Well, what do you, what do you feel in your soul, your whole soul--shall I live? What do you think?"

"I am sure of it, sure!" Natasha almost shouted, taking hold of both his hands with a passionate movement.

He remained silent awhile.

"How good it would be!" and taking her hand he kissed it.

Natasha felt happy and agitated, but at once remembered that this would not do and that he had to be quiet.

"But you have not slept," she said, repressing her joy. "Try to sleep... please!"

He pressed her hand and released it, and she went back to the candle and sat down again in her former position. Twice she turned and looked at him, and her eyes met his beaming at her. She set herself a task on her stocking and resolved not to turn round till it was finished.

Soon he really shut his eyes and fell asleep. He did not sleep long and suddenly awoke with a start and in a cold perspiration.

As he fell asleep he had still been thinking of the subject that now always occupied his mind--about life and death, and chiefly about death. He felt himself nearer to it.

"Love? What is love?" he thought.

"Love hinders death. Love is life. All, everything that I understand, I understand only because I love. Everything is, everything exists, only because I love. Everything is united by it alone. Love is God, and to die means that I, a particle of love, shall return to the general and eternal source." These thoughts seemed to him comforting. But they were only thoughts. Something was lacking in them, they were not clear, they were too one-sidedly personal and brain-spun. And there was the former agitation and obscurity. He fell asleep.

He dreamed that he was lying in the room he really was in, but that he was quite well and unwounded. Many various, indifferent, and insignificant people appeared before him. He talked to them and discussed something trivial. They were preparing to go away somewhere. Prince Andrew dimly realized that all this was trivial and that he had more important cares, but he continued to speak, surprising them by empty witticisms. Gradually, unnoticed, all these persons began to disappear and a single question, that of the closed door, superseded all else. He rose and went to the door to bolt and lock it. Everything depended on whether he was, or was not, in time to lock it. He went, and tried to hurry, but his legs refused to move and he knew he would not be in time to lock the door though he painfully strained all his powers. He was seized by an agonizing fear. And that fear was the fear of death. It stood behind the door. But just when he was clumsily creeping toward the door, that dreadful something on the

other side was already pressing against it and forcing its way in. Something not human--death--was breaking in through that door, and had to be kept out. He seized the door, making a final effort to hold it back--to lock it was no longer possible--but his efforts were weak and clumsy and the door, pushed from behind by that terror, opened and closed again.

Once again it pushed from outside. His last superhuman efforts were vain and both halves of the door noiselessly opened. It entered, and it was death, and Prince Andrew died.

But at the instant he died, Prince Andrew remembered that he was asleep, and at the very instant he died, having made an effort, he awoke.

"Yes, it was death! I died--and woke up. Yes, death is an awakening!" And all at once it grew light in his soul and the veil that had till then concealed the unknown was lifted from his spiritual vision. He felt as if powers till then confined within him had been liberated, and that strange lightness did not again leave him.

When, waking in a cold perspiration, he moved on the divan, Natasha went up and asked him what was the matter. He did not answer and looked at her strangely, not understanding.

That was what had happened to him two days before Princess Mary's arrival. From that day, as the doctor expressed it, the wasting fever assumed a malignant character, but what the doctor said did not interest Natasha, she saw the terrible moral symptoms which to her were more convincing.

From that day an awakening from life came to Prince Andrew together with his awakening from sleep. And compared to the duration of life it did not seem to him slower than an awakening from sleep compared to the duration of a dream.

There was nothing terrible or violent in this comparatively slow awakening.

His last days and hours passed in an ordinary and simple way. Both Princess Mary and Natasha, who did not leave him, felt this. They did not weep or shudder and during these last days they themselves felt that they were not attending on him (he was no longer there, he had left them) but on what reminded them most closely of him--his body. Both felt this so strongly that the outward and terrible side of death did not affect them and they did not feel it necessary to foment their grief. Neither in his presence nor out of it did they weep, nor did they ever talk to one another about him. They felt that they

could not express in words what they understood.

They both saw that he was sinking slowly and quietly, deeper and deeper, away from them, and they both knew that this had to be so and that it was right.

He confessed, and received communion: everyone came to take leave of him. When they brought his son to him, he pressed his lips to the boy's and turned away, not because he felt it hard and sad (Princess Mary and Natasha understood that) but simply because he thought it was all that was required of him, but when they told him to bless the boy, he did what was demanded and looked round as if asking whether there was anything else he should do.

When the last convulsions of the body, which the spirit was leaving, occurred, Princess Mary and Natasha were present.

"Is it over?" said Princess Mary when his body had for a few minutes lain motionless, growing cold before them. Natasha went up, looked at the dead eyes, and hastened to close them. She closed them but did not kiss them, but clung to that which reminded her most nearly of him--his body.

"Where has he gone? Where is he now?..."

When the body, washed and dressed, lay in the coffin on a table, everyone came to take leave of him and they all wept.

Little Nicholas cried because his heart was rent by painful perplexity. The countess and Sonya cried from pity for Natasha and because he was no more. The old count cried because he felt that before long, he, too, must take the same terrible step.

Natasha and Princess Mary also wept now, but not because of their own personal grief; they wept with a reverent and softening emotion which had taken possession of their souls at the consciousness of the simple and solemn mystery of death that had been accomplished in their presence.

BOOK THIRTEEN: 1812

CHAPTER I

Man's mind cannot grasp the causes of events in their completeness, but the desire to find those causes is implanted in man's soul. And without considering the multiplicity and complexity of the conditions any one of which taken separately may seem to be the cause, he snatches at the first approximation to a cause that seems to him intelligible and says: "This is the cause!" In historical events (where the actions of men are the subject of observation) the first and most primitive approximation to present itself was the will of the gods and, after that, the will of those who stood in the most prominent position--the heroes of history. But we need only penetrate to the essence of any historic event--which lies in the activity of the general mass of men who take part in it--to be convinced that the will of the historic hero does not control the actions of the mass but is itself continually controlled. It may seem to be a matter of indifference whether we understand the meaning of historical events this way or that; yet there is the same difference between a man who says that the people of the West moved on the East because Napoleon wished it and a man who says that this happened because it had to happen, as there is between those who declared that the earth was stationary and that the planets moved round it and those who admitted that they did not know what upheld the earth, but knew there were laws directing its movement and that of the other planets. There is, and can be, no cause of an historical event except the one cause of all causes. But there are laws directing events, and some of these laws are known to us while we are conscious of others we cannot comprehend. The discovery of these laws is only possible when we have quite abandoned the attempt to find the cause in the will of some one man, just as the discovery of the laws of the motion of the planets was possible only when men abandoned the conception of the fixity of the earth.

The historians consider that, next to the battle of Borodino and the occupation of Moscow by the enemy and its destruction by fire, the most important episode of the war of 1812 was the movement of the Russian army from the Ryazana to the Kaluga road and to the Tarutino camp--the so-called flank march across the Krasnaya Pakhra River. They ascribe the glory of that achievement of genius to different men and dispute as to whom the honor is due. Even foreign historians, including the French, acknowledge the genius of the Russian commanders when they speak of that flank march. But it is hard to understand why military writers, and following them others, consider this flank march to be the profound conception of some one man who saved Russia and destroyed Napoleon. In the first place it is hard to understand where the profundity and genius of this movement lay, for not much

mental effort was needed to see that the best position for an army when it is not being attacked is where there are most provisions; and even a dull boy of thirteen could have guessed that the best position for an army after its retreat from Moscow in 1812 was on the Kaluga road. So it is impossible to understand by what reasoning the historians reach the conclusion that this maneuver was a profound one. And it is even more difficult to understand just why they think that this maneuver was calculated to save Russia and destroy the French; for this flank march, had it been preceded, accompanied, or followed by other circumstances, might have proved ruinous to the Russians and salutary for the French. If the position of the Russian army really began to improve from the time of that march, it does not at all follow that the march was the cause of it.

That flank march might not only have failed to give any advantage to the Russian army, but might in other circumstances have led to its destruction. What would have happened had Moscow not burned down? If Murat had not lost sight of the Russians? If Napoleon had not remained inactive? If the Russian army at Krasnaya Pakhra had given battle as Bennigsen and Barclay advised? What would have happened had the French attacked the Russians while they were marching beyond the Pakhra? What would have happened if on approaching Tarutino, Napoleon had attacked the Russians with but a tenth of the energy he had shown when he attacked them at Smolensk? What would have happened had the French moved on Petersburg?... In any of these eventualities the flank march that brought salvation might have proved disastrous.

The third and most incomprehensible thing is that people studying history deliberately avoid seeing that this flank march cannot be attributed to any one man, that no one ever foresaw it, and that in reality, like the retreat from Fili, it did not suggest itself to anyone in its entirety, but resulted--moment by moment, step by step, event by event--from an endless number of most diverse circumstances and was only seen in its entirety when it had been accomplished and belonged to the past.

At the council at Fili the prevailing thought in the minds of the Russian commanders was the one naturally suggesting itself, namely, a direct retreat by the Nizhni road. In proof of this there is the fact that the majority of the council voted for such a retreat, and above all there is the well-known conversation after the council, between the commander in chief and Lanskoj, who was in charge of the commissariat department. Lanskoj informed the commander in chief that the army supplies were for the most part stored along the Oka in the Tula and Ryazan provinces, and that if they retreated on Nizhni the army would be separated from its supplies by the broad river Oka, which cannot be crossed early in winter. This was the first indication of the necessity of deviating from what had previously

seemed the most natural course--a direct retreat on Nizhni-Novgorod. The army turned more to the south, along the Ryazan road and nearer to its supplies. Subsequently the inactivity of the French (who even lost sight of the Russian army), concern for the safety of the arsenal at Tula, and especially the advantages of drawing nearer to its supplies caused the army to turn still further south to the Tula road. Having crossed over, by a forced march, to the Tula road beyond the Pakhra, the Russian commanders intended to remain at Podolsk and had no thought of the Tarutino position; but innumerable circumstances and the reappearance of French troops who had for a time lost touch with the Russians, and projects of giving battle, and above all the abundance of provisions in Kaluga province, obliged our army to turn still more to the south and to cross from the Tula to the Kaluga road and go to Tarutino, which was between the roads along which those supplies lay. Just as it is impossible to say when it was decided to abandon Moscow, so it is impossible to say precisely when, or by whom, it was decided to move to Tarutino. Only when the army had got there, as the result of innumerable and varying forces, did people begin to assure themselves that they had desired this movement and long ago foreseen its result.

CHAPTER II

The famous flank movement merely consisted in this: after the advance of the French had ceased, the Russian army, which had been continually retreating straight back from the invaders, deviated from that direct course and, not finding itself pursued, was naturally drawn toward the district where supplies were abundant.

If instead of imagining to ourselves commanders of genius leading the Russian army, we picture that army without any leaders, it could not have done anything but make a return movement toward Moscow, describing an arc in the direction where most provisions were to be found and where the country was richest.

That movement from the Nizhni to the Ryazan, Tula, and Kaluga roads was so natural that even the Russian marauders moved in that direction, and demands were sent from Petersburg for Kutuzov to take his army that way. At Tarutino Kutuzov received what was almost a reprimand from the Emperor for having moved his army along the Ryazan road, and the Emperor's letter indicated to him the very position he had already occupied near Kaluga.

Having rolled like a ball in the direction of the impetus given by the whole campaign and by the battle of Borodino, the Russian army--when the strength of that impetus was exhausted and no fresh push was received--assumed the position natural to it.

Kutuzov's merit lay, not in any strategic maneuver of genius, as it is called, but in the fact that he alone understood the significance of what had happened. He alone then understood the meaning of the French army's inactivity, he alone continued to assert that the battle of Borodino had been a victory, he alone--who as commander in chief might have been expected to be eager to attack--employed his whole strength to restrain the Russian army from useless engagements.

The beast wounded at Borodino was lying where the fleeing hunter had left him; but whether he was still alive, whether he was strong and merely lying low, the hunter did not know. Suddenly the beast was heard to moan.

The moan of that wounded beast (the French army) which betrayed its calamitous condition was the sending of Lauriston to Kutuzov's camp with overtures for peace.

Napoleon, with his usual assurance that whatever entered his head was right, wrote to Kutuzov the first words that occurred to him, though they were meaningless.

MONSIEUR LE PRINCE KOUTOUZOV: I am sending one of my adjutants-general to discuss several interesting questions with you. I beg your Highness to credit what he says to you, especially when he expresses the sentiment of esteem and special regard I have long entertained for your person. This letter having no other object, I pray God, monsieur le Prince Koutouzov, to keep you in His holy and gracious protection!

NAPOLEON

MOSCOW, OCTOBER 30, 1812

Kutuzov replied: "I should be cursed by posterity were I looked on as the initiator of a settlement of any sort. Such is the present spirit of my nation." But he continued to exert all his powers to restrain his troops from attacking.

During the month that the French troops were pillaging in Moscow and the Russian troops were quietly encamped at Tarutino, a change had

taken place in the relative strength of the two armies--both in spirit and in number--as a result of which the superiority had passed to the Russian side. Though the condition and numbers of the French army were unknown to the Russians, as soon as that change occurred the need of attacking at once showed itself by countless signs. These signs were: Lauriston's mission; the abundance of provisions at Tarutino; the reports coming in from all sides of the inactivity and disorder of the French; the flow of recruits to our regiments; the fine weather; the long rest the Russian soldiers had enjoyed, and the impatience to do what they had been assembled for, which usually shows itself in an army that has been resting; curiosity as to what the French army, so long lost sight of, was doing; the boldness with which our outposts now scouted close up to the French stationed at Tarutino; the news of easy successes gained by peasants and guerrilla troops over the French, the envy aroused by this; the desire for revenge that lay in the heart of every Russian as long as the French were in Moscow, and (above all) a dim consciousness in every soldier's mind that the relative strength of the armies had changed and that the advantage was now on our side. There was a substantial change in the relative strength, and an advance had become inevitable. And at once, as a clock begins to strike and chime as soon as the minute hand has completed a full circle, this change was shown by an increased activity, whirring, and chiming in the higher spheres.

CHAPTER III

The Russian army was commanded by Kutuzov and his staff, and also by the Emperor from Petersburg. Before the news of the abandonment of Moscow had been received in Petersburg, a detailed plan of the whole campaign had been drawn up and sent to Kutuzov for his guidance. Though this plan had been drawn up on the supposition that Moscow was still in our hands, it was approved by the staff and accepted as a basis for action. Kutuzov only replied that movements arranged from a distance were always difficult to execute. So fresh instructions were sent for the solution of difficulties that might be encountered, as well as fresh people who were to watch Kutuzov's actions and report upon them.

Besides this, the whole staff of the Russian army was now reorganized. The posts left vacant by Bagration, who had been killed, and by Barclay, who had gone away in dudgeon, had to be filled. Very serious consideration was given to the question whether it would be better to put A in B's place and B in D's, or on the

contrary to put D in A's place, and so on--as if anything more than A's or B's satisfaction depended on this.

As a result of the hostility between Kutuzov and Bennigsen, his Chief of Staff, the presence of confidential representatives of the Emperor, and these transfers, a more than usually complicated play of parties was going on among the staff of the army. A was undermining B, D was undermining C, and so on in all possible combinations and permutations. In all these plottings the subject of intrigue was generally the conduct of the war, which all these men believed they were directing; but this affair of the war went on independently of them, as it had to go: that is, never in the way people devised, but flowing always from the essential attitude of the masses. Only in the highest spheres did all these schemes, crossings, and interminglings appear to be a true reflection of what had to happen.

Prince Michael Ilarionovich! (wrote the Emperor on the second of October in a letter that reached Kutuzov after the battle at Tarutino) Since September 2 Moscow has been in the hands of the enemy. Your last reports were written on the twentieth, and during all this time not only has no action been taken against the enemy or for the relief of the ancient capital, but according to your last report you have even retreated farther. Serpukhov is already occupied by an enemy detachment and Tula with its famous arsenal so indispensable to the army, is in danger. From General Wintzingerode's reports, I see that an enemy corps of ten thousand men is moving on the Petersburg road. Another corps of several thousand men is moving on Dmitrov. A third has advanced along the Vladimir road, and a fourth, rather considerable detachment is stationed between Ruza and Mozhaysk. Napoleon himself was in Moscow as late as the twenty-fifth. In view of all this information, when the enemy has scattered his forces in large detachments, and with Napoleon and his Guards in Moscow, is it possible that the enemy's forces confronting you are so considerable as not to allow of your taking the offensive? On the contrary, he is probably pursuing you with detachments, or at most with an army corps much weaker than the army entrusted to you. It would seem that, availing yourself of these circumstances, you might advantageously attack a weaker one and annihilate him, or at least oblige him to retreat, retaining in our hands an important part of the provinces now occupied by the enemy, and thereby averting danger from Tula and other towns in the interior. You will be responsible if the enemy is able to direct a force of any size against Petersburg to threaten this capital in which it has not been possible to retain many troops; for with the army entrusted to you, and acting with resolution and energy, you have ample means to avert this fresh calamity. Remember that you have still to answer to our offended country for the loss of Moscow. You have experienced my

readiness to reward you. That readiness will not weaken in me, but I and Russia have a right to expect from you all the zeal, firmness, and success which your intellect, military talent, and the courage of the troops you command justify us in expecting.

But by the time this letter, which proved that the real relation of the forces had already made itself felt in Petersburg, was dispatched, Kutuzov had found himself unable any longer to restrain the army he commanded from attacking and a battle had taken place.

On the second of October a Cossack, Shapovalov, who was out scouting, killed one hare and wounded another. Following the wounded hare he made his way far into the forest and came upon the left flank of Murat's army, encamped there without any precautions. The Cossack laughingly told his comrades how he had almost fallen into the hands of the French. A cornet, hearing the story, informed his commander.

The Cossack was sent for and questioned. The Cossack officers wished to take advantage of this chance to capture some horses, but one of the superior officers, who was acquainted with the higher authorities, reported the incident to a general on the staff. The state of things on the staff had of late been exceedingly strained. Ermolov had been to see Bennigsen a few days previously and had entreated him to use his influence with the commander in chief to induce him to take the offensive.

"If I did not know you I should think you did not want what you are asking for. I need only advise anything and his Highness is sure to do the opposite," replied Bennigsen.

The Cossack's report, confirmed by horse patrols who were sent out, was the final proof that events had matured. The tightly coiled spring was released, the clock began to whirr and the chimes to play. Despite all his supposed power, his intellect, his experience, and his knowledge of men, Kutuzov--having taken into consideration the Cossack's report, a note from Bennigsen who sent personal reports to the Emperor, the wishes he supposed the Emperor to hold, and the fact that all the generals expressed the same wish--could no longer check the inevitable movement, and gave the order to do what he regarded as useless and harmful--gave his approval, that is, to the accomplished fact.

CHAPTER IV

Bennigsen's note and the Cossack's information that the left flank of the French was unguarded were merely final indications that it was necessary to order an attack, and it was fixed for the fifth of October.

On the morning of the fourth of October Kutuzov signed the dispositions. Toll read them to Ermolov, asking him to attend to the further arrangements.

"All right--all right. I haven't time just now," replied Ermolov, and left the hut.

The dispositions drawn up by Toll were very good. As in the Austerlitz dispositions, it was written--though not in German this time:

"The First Column will march here and here," "the Second Column will march there and there," and so on; and on paper, all these columns arrived at their places at the appointed time and destroyed the enemy. Everything had been admirably thought out as is usual in dispositions, and as is always the case, not a single column reached its place at the appointed time.

When the necessary number of copies of the dispositions had been prepared, an officer was summoned and sent to deliver them to Ermolov to deal with. A young officer of the Horse Guards, Kutuzov's orderly, pleased at the importance of the mission entrusted to him, went to Ermolov's quarters.

"Gone away," said Ermolov's orderly.

The officer of the Horse Guards went to a general with whom Ermolov was often to be found.

"No, and the general's out too."

The officer, mounting his horse, rode off to someone else.

"No, he's gone out."

"If only they don't make me responsible for this delay! What a nuisance it is!" thought the officer, and he rode round the whole camp. One man said he had seen Ermolov ride past with some other generals, others said he must have returned home. The officer searched till six o'clock in the evening without even stopping to eat.

Ermolov was nowhere to be found and no one knew where he was. The officer snatched a little food at a comrade's, and rode again to the vanguard to find Miloradovich. Miloradovich too was away, but here he was told that he had gone to a ball at General Kikin's and that Ermolov was probably there too.

"But where is it?"

"Why, there, over at Echkino," said a Cossack officer, pointing to a country house in the far distance.

"What, outside our line?"

"They've put two regiments as outposts, and they're having such a spree there, it's awful! Two bands and three sets of singers!"

The officer rode out beyond our lines to Echkino. While still at a distance he heard as he rode the merry sounds of a soldier's dance song proceeding from the house.

"In the meadows... in the meadows!" he heard, accompanied by whistling and the sound of a torban, drowned every now and then by shouts. These sounds made his spirits rise, but at the same time he was afraid that he would be blamed for not having executed sooner the important order entrusted to him. It was already past eight o'clock. He dismounted and went up into the porch of a large country house which had remained intact between the Russian and French forces. In the refreshment room and the hall, footmen were bustling about with wine and viands. Groups of singers stood outside the windows. The officer was admitted and immediately saw all the chief generals of the army together, and among them Ermolov's big imposing figure. They all had their coats unbuttoned and were standing in a semicircle with flushed and animated faces, laughing loudly. In the middle of the room a short handsome general with a red face was dancing the trepak with much spirit and agility.

"Ha, ha, ha! Bravo, Nicholas Ivanych! Ha, ha, ha!"

The officer felt that by arriving with important orders at such a moment he was doubly to blame, and he would have preferred to wait; but one of the generals espied him and, hearing what he had come about, informed Ermolov.

Ermolov came forward with a frown on his face and, hearing what the officer had to say, took the papers from him without a word.

"You think he went off just by chance?" said a comrade, who was on

the staff that evening, to the officer of the Horse Guards, referring to Ermolov. "It was a trick. It was done on purpose to get Konovnitsyn into trouble. You'll see what a mess there'll be tomorrow."

CHAPTER V

Next day the decrepit Kutuzov, having given orders to be called early, said his prayers, dressed, and, with an unpleasant consciousness of having to direct a battle he did not approve of, got into his caleche and drove from Letashovka (a village three and a half miles from Tarutino) to the place where the attacking columns were to meet. He sat in the caleche, dozing and waking up by turns, and listening for any sound of firing on the right as an indication that the action had begun. But all was still quiet. A damp dull autumn morning was just dawning. On approaching Tarutino Kutuzov noticed cavalymen leading their horses to water across the road along which he was driving. Kutuzov looked at them searchingly, stopped his carriage, and inquired what regiment they belonged to. They belonged to a column that should have been far in front and in ambush long before then. "It may be a mistake," thought the old commander in chief. But a little further on he saw infantry regiments with their arms piled and the soldiers, only partly dressed, eating their rye porridge and carrying fuel. He sent for an officer. The officer reported that no order to advance had been received.

"How! Not rec..." Kutuzov began, but checked himself immediately and sent for a senior officer. Getting out of his caleche, he waited with drooping head and breathing heavily, pacing silently up and down. When Eykhen, the officer of the general staff whom he had summoned, appeared, Kutuzov went purple in the face, not because that officer was to blame for the mistake, but because he was an object of sufficient importance for him to vent his wrath on. Trembling and panting the old man fell into that state of fury in which he sometimes used to roll on the ground, and he fell upon Eykhen, threatening him with his hands, shouting and loading him with gross abuse. Another man, Captain Brozin, who happened to turn up and who was not at all to blame, suffered the same fate.

"What sort of another blackguard are you? I'll have you shot! Scoundrels!" yelled Kutuzov in a hoarse voice, waving his arms and reeling.

He was suffering physically. He, the commander in chief, a Serene Highness who everybody said possessed powers such as no man had ever had in Russia, to be placed in this position--made the laughingstock of the whole army! "I needn't have been in such a hurry to pray about today, or have kept awake thinking everything over all night," thought he to himself. "When I was a child of an officer no one would have dared to mock me so... and now!" He was in a state of physical suffering as if from corporal punishment, and could not avoid expressing it by cries of anger and distress. But his strength soon began to fail him, and looking about him, conscious of having said much that was amiss, he again got into his caleche and drove back in silence.

His wrath, once expended, did not return, and blinking feebly he listened to excuses and self-justifications (Ermolov did not come to see him till the next day) and to the insistence of Bennigsen, Konovnitsyn, and Toll that the movement that had miscarried should be executed next day. And once more Kutuzov had to consent.

CHAPTER VI

Next day the troops assembled in their appointed places in the evening and advanced during the night. It was an autumn night with dark purple clouds, but no rain. The ground was damp but not muddy, and the troops advanced noiselessly, only occasionally a jingling of the artillery could be faintly heard. The men were forbidden to talk out loud, to smoke their pipes, or to strike a light, and they tried to prevent their horses neighing. The secrecy of the undertaking heightened its charm and they marched gaily. Some columns, supposing they had reached their destination, halted, piled arms, and settled down on the cold ground, but the majority marched all night and arrived at places where they evidently should not have been.

Only Count Orlov-Denisov with his Cossacks (the least important detachment of all) got to his appointed place at the right time. This detachment halted at the outskirts of a forest, on the path leading from the village of Stromilova to Dmitrovsk.

Toward dawn, Count Orlov-Denisov, who had dozed off, was awakened by a deserter from the French army being brought to him. This was a Polish sergeant of Poniatowski's corps, who explained in Polish that he had come over because he had been slighted in the service: that he ought long ago to have been made an officer, that he was braver

than any of them, and so he had left them and wished to pay them out. He said that Murat was spending the night less than a mile from where they were, and that if they would let him have a convoy of a hundred men he would capture him alive. Count Orlov-Denisov consulted his fellow officers.

The offer was too tempting to be refused. Everyone volunteered to go and everybody advised making the attempt. After much disputing and arguing, Major-General Grekov with two Cossack regiments decided to go with the Polish sergeant.

"Now, remember," said Count Orlov-Denisov to the sergeant at parting, "if you have been lying I'll have you hanged like a dog; but if it's true you shall have a hundred gold pieces!"

Without replying, the sergeant, with a resolute air, mounted and rode away with Grekov whose men had quickly assembled. They disappeared into the forest, and Count Orlov-Denisov, having seen Grekov off, returned, shivering from the freshness of the early dawn and excited by what he had undertaken on his own responsibility, and began looking at the enemy camp, now just visible in the deceptive light of dawn and the dying campfires. Our columns ought to have begun to appear on an open declivity to his right. He looked in that direction, but though the columns would have been visible quite far off, they were not to be seen. It seemed to the count that things were beginning to stir in the French camp, and his keen-sighted adjutant confirmed this.

"Oh, it is really too late," said Count Orlov, looking at the camp.

As often happens when someone we have trusted is no longer before our eyes, it suddenly seemed quite clear and obvious to him that the sergeant was an impostor, that he had lied, and that the whole Russian attack would be ruined by the absence of those two regiments, which he would lead away heaven only knew where. How could one capture a commander in chief from among such a mass of troops!

"I am sure that rascal was lying," said the count.

"They can still be called back," said one of his suite, who like Count Orlov felt distrustful of the adventure when he looked at the enemy's camp.

"Eh? Really... what do you think? Should we let them go on or not?"

"Will you have them fetched back?"

"Fetch them back, fetch them back!" said Count Orlov with sudden

determination, looking at his watch. "It will be too late. It is quite light."

And the adjutant galloped through the forest after Grekov. When Grekov returned, Count Orlov-Denisov, excited both by the abandoned attempt and by vainly awaiting the infantry columns that still did not appear, as well as by the proximity of the enemy, resolved to advance. All his men felt the same excitement.

"Mount!" he commanded in a whisper. The men took their places and crossed themselves.... "Forward, with God's aid!"

"Hurrah-ah-ah!" reverberated in the forest, and the Cossack companies, trailing their lances and advancing one after another as if poured out of a sack, dashed gaily across the brook toward the camp.

One desperate, frightened yell from the first French soldier who saw the Cossacks, and all who were in the camp, undressed and only just waking up, ran off in all directions, abandoning cannons, muskets, and horses.

Had the Cossacks pursued the French, without heeding what was behind and around them, they would have captured Murat and everything there. That was what the officers desired. But it was impossible to make the Cossacks budge when once they had got booty and prisoners. None of them listened to orders. Fifteen hundred prisoners and thirty-eight guns were taken on the spot, besides standards and (what seemed most important to the Cossacks) horses, saddles, horsecloths, and the like. All this had to be dealt with, the prisoners and guns secured, the booty divided--not without some shouting and even a little themselves--and it was on this that the Cossacks all busied themselves.

The French, not being farther pursued, began to recover themselves: they formed into detachments and began firing. Orlov-Denisov, still waiting for the other columns to arrive, advanced no further.

Meantime, according to the dispositions which said that "the First Column will march" and so on, the infantry of the belated columns, commanded by Bennigsen and directed by Toll, had started in due order and, as always happens, had got somewhere, but not to their appointed places. As always happens the men, starting cheerfully, began to halt; murmurs were heard, there was a sense of confusion, and finally a backward movement. Adjutants and generals galloped about, shouted, grew angry, quarreled, said they had come quite wrong and were late, gave vent to a little abuse, and at last gave it all up and went forward, simply to get somewhere. "We shall get somewhere or

other!" And they did indeed get somewhere, though not to their right places; a few eventually even got to their right place, but too late to be of any use and only in time to be fired at. Toll, who in this battle played the part of Weyrother at Austerlitz, galloped assiduously from place to place, finding everything upside down everywhere. Thus he stumbled on Bagovut's corps in a wood when it was already broad daylight, though the corps should long before have joined Orlov-Denisov. Excited and vexed by the failure and supposing that someone must be responsible for it, Toll galloped up to the commander of the corps and began upbraiding him severely, saying that he ought to be shot. General Bagovut, a fighting old soldier of placid temperament, being also upset by all the delay, confusion, and cross-purposes, fell into a rage to everybody's surprise and quite contrary to his usual character and said disagreeable things to Toll.

"I prefer not to take lessons from anyone, but I can die with my men as well as anybody," he said, and advanced with a single division.

Coming out onto a field under the enemy's fire, this brave general went straight ahead, leading his men under fire, without considering in his agitation whether going into action now, with a single division, would be of any use or no. Danger, cannon balls, and bullets were just what he needed in his angry mood. One of the first bullets killed him, and other bullets killed many of his men. And his division remained under fire for some time quite uselessly.

CHAPTER VII

Meanwhile another column was to have attacked the French from the front, but Kutuzov accompanied that column. He well knew that nothing but confusion would come of this battle undertaken against his will, and as far as was in his power held the troops back. He did not advance.

He rode silently on his small gray horse, indolently answering suggestions that they should attack.

"The word attack is always on your tongue, but you don't see that we are unable to execute complicated maneuvers," said he to Miloradovich who asked permission to advance.

"We couldn't take Murat prisoner this morning or get to the place in time, and nothing can be done now!" he replied to someone else.

When Kutuzov was informed that at the French rear--where according to the reports of the Cossacks there had previously been nobody--there were now two battalions of Poles, he gave a sidelong glance at Ermolov who was behind him and to whom he had not spoken since the previous day.

"You see! They are asking to attack and making plans of all kinds, but as soon as one gets to business nothing is ready, and the enemy, forewarned, takes measures accordingly."

Ermolov screwed up his eyes and smiled faintly on hearing these words. He understood that for him the storm had blown over, and that Kutuzov would content himself with that hint.

"He's having a little fun at my expense," said Ermolov softly, nudging with his knee Raevski who was at his side.

Soon after this, Ermolov moved up to Kutuzov and respectfully remarked:

"It is not too late yet, your Highness--the enemy has not gone away--if you were to order an attack! If not, the Guards will not so much as see a little smoke."

Kutuzov did not reply, but when they reported to him that Murat's troops were in retreat he ordered an advance, though at every hundred paces he halted for three quarters of an hour.

The whole battle consisted in what Orlov-Denisov's Cossacks had done: the rest of the army merely lost some hundreds of men uselessly.

In consequence of this battle Kutuzov received a diamond decoration, and Bennigsen some diamonds and a hundred thousand rubles, others also received pleasant recognitions corresponding to their various grades, and following the battle fresh changes were made in the staff.

"That's how everything is done with us, all topsy-turvy!" said the Russian officers and generals after the Tarutino battle, letting it be understood that some fool there is doing things all wrong but that we ourselves should not have done so, just as people speak today. But people who talk like that either do not know what they are talking about or deliberately deceive themselves. No battle--Tarutino, Borodino, or Austerlitz--takes place as those who planned it anticipated. That is an essential condition.

A countless number of free forces (for nowhere is man freer than during a battle, where it is a question of life and death) influence

the course taken by the fight, and that course never can be known in advance and never coincides with the direction of any one force.

If many simultaneously and variously directed forces act on a given body, the direction of its motion cannot coincide with any one of those forces, but will always be a mean--what in mechanics is represented by the diagonal of a parallelogram of forces.

If in the descriptions given by historians, especially French ones, we find their wars and battles carried out in accordance with previously formed plans, the only conclusion to be drawn is that those descriptions are false.

The battle of Tarutino obviously did not attain the aim Toll had in view--to lead the troops into action in the order prescribed by the dispositions; nor that which Count Orlov-Denisov may have had in view--to take Murat prisoner; nor the result of immediately destroying the whole corps, which Bennigsen and others may have had in view; nor the aim of the officer who wished to go into action to distinguish himself; nor that of the Cossack who wanted more booty than he got, and so on. But if the aim of the battle was what actually resulted and what all the Russians of that day desired--to drive the French out of Russia and destroy their army--it is quite clear that the battle of Tarutino, just because of its incongruities, was exactly what was wanted at that stage of the campaign. It would be difficult and even impossible to imagine any result more opportune than the actual outcome of this battle. With a minimum of effort and insignificant losses, despite the greatest confusion, the most important results of the whole campaign were attained: the transition from retreat to advance, an exposure of the weakness of the French, and the administration of that shock which Napoleon's army had only awaited to begin its flight.

CHAPTER VIII

Napoleon enters Moscow after the brilliant victory de la Moskowa; there can be no doubt about the victory for the battlefield remains in the hands of the French. The Russians retreat and abandon their ancient capital. Moscow, abounding in provisions, arms, munitions, and incalculable wealth, is in Napoleon's hands. The Russian army, only half the strength of the French, does not make a single attempt to attack for a whole month. Napoleon's position is most brilliant. He can either fall on the Russian army with double its strength and

destroy it; negotiate an advantageous peace, or in case of a refusal make a menacing move on Petersburg, or even, in the case of a reverse, return to Smolensk or Vilna; or remain in Moscow; in short, no special genius would seem to be required to retain the brilliant position the French held at that time. For that, only very simple and easy steps were necessary: not to allow the troops to loot, to prepare winter clothing--of which there was sufficient in Moscow for the whole army--and methodically to collect the provisions, of which (according to the French historians) there were enough in Moscow to supply the whole army for six months. Yet Napoleon, that greatest of all geniuses, who the historians declare had control of the army, took none of these steps.

He not merely did nothing of the kind, but on the contrary he used his power to select the most foolish and ruinous of all the courses open to him. Of all that Napoleon might have done: wintering in Moscow, advancing on Petersburg or on Nizhni-Novgorod, or retiring by a more northerly or more southerly route (say by the road Kutuzov afterwards took), nothing more stupid or disastrous can be imagined than what he actually did. He remained in Moscow till October, letting the troops plunder the city; then, hesitating whether to leave a garrison behind him, he quitted Moscow, approached Kutuzov without joining battle, turned to the right and reached Malo-Yaroslavets, again without attempting to break through and take the road Kutuzov took, but retiring instead to Mozhaysk along the devastated Smolensk road. Nothing more stupid than that could have been devised, or more disastrous for the army, as the sequel showed. Had Napoleon's aim been to destroy his army, the most skillful strategist could hardly have devised any series of actions that would so completely have accomplished that purpose, independently of anything the Russian army might do.

Napoleon, the man of genius, did this! But to say that he destroyed his army because he wished to, or because he was very stupid, would be as unjust as to say that he had brought his troops to Moscow because he wished to and because he was very clever and a genius.

In both cases his personal activity, having no more force than the personal activity of any soldier, merely coincided with the laws that guided the event.

The historians quite falsely represent Napoleon's faculties as having weakened in Moscow, and do so only because the results did not justify his actions. He employed all his ability and strength to do the best he could for himself and his army, as he had done previously and as he did subsequently in 1813. His activity at that

time was no less astounding than it was in Egypt, in Italy, in Austria, and in Prussia. We do not know for certain in how far his genius was genuine in Egypt--where forty centuries looked down upon his grandeur--for his great exploits there are all told us by Frenchmen. We cannot accurately estimate his genius in Austria or Prussia, for we have to draw our information from French or German sources, and the incomprehensible surrender of whole corps without fighting and of fortresses without a siege must incline Germans to recognize his genius as the only explanation of the war carried on in Germany. But we, thank God, have no need to recognize his genius in order to hide our shame. We have paid for the right to look at the matter plainly and simply, and we will not abandon that right.

His activity in Moscow was as amazing and as full of genius as elsewhere. Order after order and plan after plan were issued by him from the time he entered Moscow till the time he left it. The absence of citizens and of a deputation, and even the burning of Moscow, did not disconcert him. He did not lose sight either of the welfare of his army or of the doings of the enemy, or of the welfare of the people of Russia, or of the direction of affairs in Paris, or of diplomatic considerations concerning the terms of the anticipated peace.

CHAPTER IX

With regard to military matters, Napoleon immediately on his entry into Moscow gave General Sabastiani strict orders to observe the movements of the Russian army, sent army corps out along the different roads, and charged Murat to find Kutuzov. Then he gave careful directions about the fortification of the Kremlin, and drew up a brilliant plan for a future campaign over the whole map of Russia.

With regard to diplomatic questions, Napoleon summoned Captain Yakovlev, who had been robbed and was in rags and did not know how to get out of Moscow, minutely explained to him his whole policy and his magnanimity, and having written a letter to the Emperor Alexander in which he considered it his duty to inform his Friend and Brother that Rostopchin had managed affairs badly in Moscow, he dispatched Yakovlev to Petersburg.

Having similarly explained his views and his magnanimity to Tutolmin, he dispatched that old man also to Petersburg to negotiate.

With regard to legal matters, immediately after the fires he gave orders to find and execute the incendiaries. And the scoundrel Rostopchin was punished by an order to burn down his houses.

With regard to administrative matters, Moscow was granted a constitution. A municipality was established and the following announcement issued:

INHABITANTS OF MOSCOW!

Your misfortunes are cruel, but His Majesty the Emperor and King desires to arrest their course. Terrible examples have taught you how he punishes disobedience and crime. Strict measures have been taken to put an end to disorder and to re-establish public security. A paternal administration, chosen from among yourselves, will form your municipality or city government. It will take care of you, of your needs, and of your welfare. Its members will be distinguished by a red ribbon worn across the shoulder, and the mayor of the city will wear a white belt as well. But when not on duty they will only wear a red ribbon round the left arm.

The city police is established on its former footing, and better order already prevails in consequence of its activity. The government has appointed two commissaries general, or chiefs of police, and twenty commissaries or captains of wards have been appointed to the different wards of the city. You will recognize them by the white ribbon they will wear on the left arm. Several churches of different denominations are open, and divine service is performed in them unhindered. Your fellow citizens are returning every day to their homes, and orders have been given that they should find in them the help and protection due to their misfortunes. These are the measures the government has adopted to re-establish order and relieve your condition. But to achieve this aim it is necessary that you should add your efforts and should, if possible, forget the misfortunes you have suffered, should entertain the hope of a less cruel fate, should be certain that inevitable and ignominious death awaits those who make any attempt on your persons or on what remains of your property, and finally that you should not doubt that these will be safeguarded, since such is the will of the greatest and most just of monarchs. Soldiers and citizens, of whatever nation you may be, re-establish public confidence, the source of the welfare of a state, live like brothers, render mutual aid and protection one to another, unite to defeat the intentions of the evil-minded, obey the military and civil authorities, and your tears will soon cease to flow!

With regard to supplies for the army, Napoleon decreed that all the troops in turn should enter Moscow a la maraude* to obtain provisions for themselves, so that the army might have its future provided for.

*As looters.

With regard to religion, Napoleon ordered the priests to be brought back and services to be again performed in the churches.

With regard to commerce and to provisioning the army, the following was placarded everywhere:

PROCLAMATION!

You, peaceful inhabitants of Moscow, artisans and workmen whom misfortune has driven from the city, and you scattered tillers of the soil, still kept out in the fields by groundless fear, listen! Tranquillity is returning to this capital and order is being restored in it. Your fellow countrymen are emerging boldly from their hiding places on finding that they are respected. Any violence to them or to their property is promptly punished. His Majesty the Emperor and King protects them, and considers no one among you his enemy except those who disobey his orders. He desires to end your misfortunes and restore you to your homes and families. Respond, therefore, to his benevolent intentions and come to us without fear. Inhabitants, return with confidence to your abodes! You will soon find means of satisfying your needs. Craftsmen and industrious artisans, return to your work, your houses, your shops, where the protection of guards awaits you! You shall receive proper pay for your work. And lastly you too, peasants, come from the forests where you are hiding in terror, return to your huts without fear, in full assurance that you will find protection! Markets are established in the city where peasants can bring their surplus supplies and the products of the soil. The government has taken the following steps to ensure freedom of sale for them: (1) From today, peasants, husbandmen, and those living in the neighborhood of Moscow may without any danger bring their supplies of all kinds to two appointed markets, of which one is on the Mokhovaya Street and the other at the Provision Market. (2) Such supplies will be bought from them at such prices as seller and buyer may agree on, and if a seller is unable to obtain a fair price he will be free to take his goods back to his village and no one may hinder him under any pretense. (3) Sunday and Wednesday of each week are appointed as the chief market days and to that end a sufficient number of troops will be stationed along the highroads on

Tuesdays and Saturdays at such distances from the town as to protect the carts. (4) Similar measures will be taken that peasants with their carts and horses may meet with no hindrance on their return journey. (5) Steps will immediately be taken to re-establish ordinary trading.

Inhabitants of the city and villages, and you, workingmen and artisans, to whatever nation you belong, you are called on to carry out the paternal intentions of His Majesty the Emperor and King and to co-operate with him for the public welfare! Lay your respect and confidence at his feet and do not delay to unite with us!

With the object of raising the spirits of the troops and of the people, reviews were constantly held and rewards distributed. The Emperor rode through the streets to comfort the inhabitants, and, despite his preoccupation with state affairs, himself visited the theaters that were established by his order.

In regard to philanthropy, the greatest virtue of crowned heads, Napoleon also did all in his power. He caused the words *Maison de ma Mere* to be inscribed on the charitable institutions, thereby combining tender filial affection with the majestic benevolence of a monarch. He visited the Foundling Hospital and, allowing the orphans saved by him to kiss his white hands, graciously conversed with Tutolmin. Then, as Thiers eloquently recounts, he ordered his soldiers to be paid in forged Russian money which he had prepared: "Raising the use of these means by an act worthy of himself and of the French army, he let relief be distributed to those who had been burned out. But as food was too precious to be given to foreigners, who were for the most part enemies, Napoleon preferred to supply them with money with which to purchase food from outside, and had paper rubles distributed to them."

With reference to army discipline, orders were continually being issued to inflict severe punishment for the nonperformance of military duties and to suppress robbery.

CHAPTER X

But strange to say, all these measures, efforts, and plans--which were not at all worse than others issued in similar circumstances--did not affect the essence of the matter but, like the hands of a clock detached from the mechanism, swung about in an arbitrary and aimless way without engaging the cogwheels.

With reference to the military side--the plan of campaign--that work of genius of which Thiers remarks that, "His genius never devised anything more profound, more skillful, or more admirable," and enters into a polemic with M. Fain to prove that this work of genius must be referred not to the fourth but to the fifteenth of October--that plan never was or could be executed, for it was quite out of touch with the facts of the case. The fortifying of the Kremlin, for which la Mosquee (as Napoleon termed the church of Basil the Beatified) was to have been razed to the ground, proved quite useless. The mining of the Kremlin only helped toward fulfilling Napoleon's wish that it should be blown up when he left Moscow--as a child wants the floor on which he has hurt himself to be beaten. The pursuit of the Russian army, about which Napoleon was so concerned, produced an unheard-of result. The French generals lost touch with the Russian army of sixty thousand men, and according to Thiers it was only eventually found, like a lost pin, by the skill--and apparently the genius--of Murat.

With reference to diplomacy, all Napoleon's arguments as to his magnanimity and justice, both to Tutolmin and to Yakovlev (whose chief concern was to obtain a greatcoat and a conveyance), proved useless; Alexander did not receive these envoys and did not reply to their embassy.

With regard to legal matters, after the execution of the supposed incendiaries the rest of Moscow burned down.

With regard to administrative matters, the establishment of a municipality did not stop the robberies and was only of use to certain people who formed part of that municipality and under pretext of preserving order looted Moscow or saved their own property from being looted.

With regard to religion, as to which in Egypt matters had so easily been settled by Napoleon's visit to a mosque, no results were achieved. Two or three priests who were found in Moscow did try to carry out Napoleon's wish, but one of them was slapped in the face by a French soldier while conducting service, and a French official reported of another that: "The priest whom I found and invited to say Mass cleaned and locked up the church. That night the doors were again broken open, the padlocks smashed, the books mutilated, and other disorders perpetrated."

With reference to commerce, the proclamation to industrious workmen and to peasants evoked no response. There were no industrious workmen, and the peasants caught the commissaries who ventured too far out of town with the proclamation and killed them.

As to the theaters for the entertainment of the people and the troops, these did not meet with success either. The theaters set up in the Kremlin and in Posnyakov's house were closed again at once because the actors and actresses were robbed.

Even philanthropy did not have the desired effect. The genuine as well as the false paper money which flooded Moscow lost its value. The French, collecting booty, cared only for gold. Not only was the paper money valueless which Napoleon so graciously distributed to the unfortunate, but even silver lost its value in relation to gold.

But the most amazing example of the ineffectiveness of the orders given by the authorities at that time was Napoleon's attempt to stop the looting and re-establish discipline.

This is what the army authorities were reporting:

"Looting continues in the city despite the decrees against it. Order is not yet restored and not a single merchant is carrying on trade in a lawful manner. The sutlers alone venture to trade, and they sell stolen goods."

"The neighborhood of my ward continues to be pillaged by soldiers of the 3rd Corps who, not satisfied with taking from the unfortunate inhabitants hiding in the cellars the little they have left, even have the ferocity to wound them with their sabers, as I have repeatedly witnessed."

"Nothing new, except that the soldiers are robbing and pillaging--October 9."

"Robbery and pillaging continue. There is a band of thieves in our district who ought to be arrested by a strong force--October 11."

"The Emperor is extremely displeased that despite the strict orders to stop pillage, parties of marauding Guards are continually seen returning to the Kremlin. Among the Old Guard disorder and pillage were renewed more violently than ever yesterday evening, last night, and today. The Emperor sees with regret that the picked soldiers appointed to guard his person, who should set an example of discipline, carry disobedience to such a point that they break into the cellars and stores containing army supplies. Others have disgraced themselves to the extent of disobeying sentinels and officers, and have abused and beaten them."

"The Grand Marshal of the palace," wrote the governor, "complains bitterly that in spite of repeated orders, the soldiers continue to

commit nuisances in all the courtyards and even under the very windows of the Emperor."

That army, like a herd of cattle run wild and trampling underfoot the provender which might have saved it from starvation, disintegrated and perished with each additional day it remained in Moscow. But it did not go away.

It began to run away only when suddenly seized by a panic caused by the capture of transport trains on the Smolensk road, and by the battle of Tarutino. The news of that battle of Tarutino, unexpectedly received by Napoleon at a review, evoked in him a desire to punish the Russians (Thiers says), and he issued the order for departure which the whole army was demanding.

Fleeing from Moscow the soldiers took with them everything they had stolen. Napoleon, too, carried away his own personal treasure, but on seeing the baggage trains that impeded the army, he was (Thiers says) horror-struck. And yet with his experience of war he did not order all the superfluous vehicles to be burned, as he had done with those of a certain marshal when approaching Moscow. He gazed at the caleches and carriages in which soldiers were riding and remarked that it was a very good thing, as those vehicles could be used to carry provisions, the sick, and the wounded.

The plight of the whole army resembled that of a wounded animal which feels it is perishing and does not know what it is doing. To study the skillful tactics and aims of Napoleon and his army from the time it entered Moscow till it was destroyed is like studying the dying leaps and shudders of a mortally wounded animal. Very often a wounded animal, hearing a rustle, rushes straight at the hunter's gun, runs forward and back again, and hastens its own end. Napoleon, under pressure from his whole army, did the same thing. The rustle of the battle of Tarutino frightened the beast, and it rushed forward onto the hunter's gun, reached him, turned back, and finally--like any wild beast--ran back along the most disadvantageous and dangerous path, where the old scent was familiar.

During the whole of that period Napoleon, who seems to us to have been the leader of all these movements--as the figurehead of a ship may seem to a savage to guide the vessel--acted like a child who, holding a couple of strings inside a carriage, thinks he is driving it.

CHAPTER XI

Early in the morning of the sixth of October Pierre went out of the shed, and on returning stopped by the door to play with a little blue-gray dog, with a long body and short bandy legs, that jumped about him. This little dog lived in their shed, sleeping beside Karataev at night; it sometimes made excursions into the town but always returned again. Probably it had never had an owner, and it still belonged to nobody and had no name. The French called it Azor; the soldier who told stories called it Femgalka; Karataev and others called it Gray, or sometimes Flabby. Its lack of a master, a name, or even of a breed or any definite color did not seem to trouble the blue-gray dog in the least. Its furry tail stood up firm and round as a plume, its bandy legs served it so well that it would often gracefully lift a hind leg and run very easily and quickly on three legs, as if disdainfully to use all four. Everything pleased it. Now it would roll on its back, yelping with delight, now bask in the sun with a thoughtful air of importance, and now frolic about playing with a chip of wood or a straw.

Pierre's attire by now consisted of a dirty torn shirt (the only remnant of his former clothing), a pair of soldier's trousers which by Karataev's advice he tied with string round the ankles for warmth, and a peasant coat and cap. Physically he had changed much during this time. He no longer seemed stout, though he still had the appearance of solidity and strength hereditary in his family. A beard and mustache covered the lower part of his face, and a tangle of hair, infested with lice, curled round his head like a cap. The look of his eyes was resolute, calm, and animatedly alert, as never before. The former slackness which had shown itself even in his eyes was now replaced by an energetic readiness for action and resistance. His feet were bare.

Pierre first looked down the field across which vehicles and horsemen were passing that morning, then into the distance across the river, then at the dog who was pretending to be in earnest about biting him, and then at his bare feet which he placed with pleasure in various positions, moving his dirty thick big toes. Every time he looked at his bare feet a smile of animated self-satisfaction flitted across his face. The sight of them reminded him of all he had experienced and learned during these weeks and this recollection was pleasant to him.

For some days the weather had been calm and clear with slight frosts in the mornings--what is called an "old wives' summer."

In the sunshine the air was warm, and that warmth was particularly

pleasant with the invigorating freshness of the morning frost still in the air.

On everything--far and near--lay the magic crystal glitter seen only at that time autumn. The Sparrow Hills were visible in the distance, with the village, the church, and the large white house. The bare trees, the sand, the bricks and roofs of the houses, the green church spire, and the corners of the white house in the distance, all stood out in the transparent air in most delicate outline and with unnatural clearness. Near by could be seen the familiar ruins of a half-burned mansion occupied by the French, with lilac bushes still showing dark green beside the fence. And even that ruined and befouled house--which in dull weather was repulsively ugly--seemed quietly beautiful now, in the clear, motionless brilliance.

A French corporal, with coat unbuttoned in a homely way, a skullcap on his head, and a short pipe in his mouth, came from behind a corner of the shed and approached Pierre with a friendly wink.

"What sunshine, Monsieur Kiril!" (Their name for Pierre.) "Eh? Just like spring!"

And the corporal leaned against the door and offered Pierre his pipe, though whenever he offered it Pierre always declined it.

"To be on the march in such weather..." he began.

Pierre inquired what was being said about leaving, and the corporal told him that nearly all the troops were starting and there ought to be an order about the prisoners that day. Sokolov, one of the soldiers in the shed with Pierre, was dying, and Pierre told the corporal that something should be done about him. The corporal replied that Pierre need not worry about that as they had an ambulance and a permanent hospital and arrangements would be made for the sick, and that in general everything that could happen had been foreseen by the authorities.

"Besides, Monsieur Kiril, you have only to say a word to the captain, you know. He is a man who never forgets anything. Speak to the captain when he makes his round, he will do anything for you."

(The captain of whom the corporal spoke often had long chats with Pierre and showed him all sorts of favors.)

"You see, St. Thomas,' he said to me the other day. 'Monsieur Kiril is a man of education, who speaks French. He is a Russian seigneur who has had misfortunes, but he is a man. He knows what's what.... If he

wants anything and asks me, he won't get a refusal. When one has studied, you see, one likes education and well-bred people.' It is for your sake I mention it, Monsieur Kiril. The other day if it had not been for you that affair would have ended ill."

And after chatting a while longer, the corporal went away. (The affair he had alluded to had happened a few days before--a fight between the prisoners and the French soldiers, in which Pierre had succeeded in pacifying his comrades.) Some of the prisoners who had heard Pierre talking to the corporal immediately asked what the Frenchman had said. While Pierre was repeating what he had been told about the army leaving Moscow, a thin, sallow, tattered French soldier came up to the door of the shed. Rapidly and timidly raising his fingers to his forehead by way of greeting, he asked Pierre whether the soldier Platoche to whom he had given a shirt to sew was in that shed.

A week before the French had had boot leather and linen issued to them, which they had given out to the prisoners to make up into boots and shirts for them.

"Ready, ready, dear fellow!" said Karataev, coming out with a neatly folded shirt.

Karataev, on account of the warm weather and for convenience at work, was wearing only trousers and a tattered shirt as black as soot. His hair was bound round, workman fashion, with a wisp of lime-tree bast, and his round face seemed rounder and pleasanter than ever.

"A promise is own brother to performance! I said Friday and here it is, ready," said Platon, smiling and unfolding the shirt he had sewn.

The Frenchman glanced around uneasily and then, as if overcoming his hesitation, rapidly threw off his uniform and put on the shirt. He had a long, greasy, flowered silk waistcoat next to his sallow, thin bare body, but no shirt. He was evidently afraid the prisoners looking on would laugh at him, and thrust his head into the shirt hurriedly. None of the prisoners said a word.

"See, it fits well!" Platon kept repeating, pulling the shirt straight.

The Frenchman, having pushed his head and hands through, without raising his eyes, looked down at the shirt and examined the seams.

"You see, dear man, this is not a sewing shop, and I had no proper tools; and, as they say, one needs a tool even to kill a louse,"

said Platon with one of his round smiles, obviously pleased with his work.

"It's good, quite good, thank you," said the Frenchman, in French, "but there must be some linen left over.

"It will fit better still when it sets to your body," said Karataev, still admiring his handiwork. "You'll be nice and comfortable...."

"Thanks, thanks, old fellow.... But the bits left over?" said the Frenchman again and smiled. He took out an assignation ruble note and gave it to Karataev. "But give me the pieces that are over."

Pierre saw that Platon did not want to understand what the Frenchman was saying, and he looked on without interfering. Karataev thanked the Frenchman for the money and went on admiring his own work. The Frenchman insisted on having the pieces returned that were left over and asked Pierre to translate what he said.

"What does he want the bits for?" said Karataev. "They'd make fine leg bands for us. Well, never mind."

And Karataev, with a suddenly changed and saddened expression, took a small bundle of scraps from inside his shirt and gave it to the Frenchman without looking at him. "Oh dear!" muttered Karataev and went away. The Frenchman looked at the linen, considered for a moment, then looked inquiringly at Pierre and, as if Pierre's look had told him something, suddenly blushed and shouted in a squeaky voice:

"Platoche! Eh, Platoche! Keep them yourself!" And handing back the odd bits he turned and went out.

"There, look at that," said Karataev, swaying his head. "People said they were not Christians, but they too have souls. It's what the old folk used to say: 'A sweating hand's an open hand, a dry hand's close.' He's naked, but yet he's given it back."

Karataev smiled thoughtfully and was silent awhile looking at the pieces.

"But they'll make grand leg bands, dear friend," he said, and went back into the shed.

CHAPTER XII

Four weeks had passed since Pierre had been taken prisoner and though the French had offered to move him from the men's to the officers' shed, he had stayed in the shed where he was first put.

In burned and devastated Moscow Pierre experienced almost the extreme limits of privation a man can endure; but thanks to his physical strength and health, of which he had till then been unconscious, and thanks especially to the fact that the privations came so gradually that it was impossible to say when they began, he endured his position not only lightly but joyfully. And just at this time he obtained the tranquillity and ease of mind he had formerly striven in vain to reach. He had long sought in different ways that tranquillity of mind, that inner harmony which had so impressed him in the soldiers at the battle of Borodino. He had sought it in philanthropy, in Freemasonry, in the dissipations of town life, in wine, in heroic feats of self-sacrifice, and in romantic love for Natasha; he had sought it by reasoning--and all these quests and experiments had failed him. And now without thinking about it he had found that peace and inner harmony only through the horror of death, through privation, and through what he recognized in Karataev.

Those dreadful moments he had lived through at the executions had as it were forever washed away from his imagination and memory the agitating thoughts and feelings that had formerly seemed so important. It did not now occur to him to think of Russia, or the war, or politics, or Napoleon. It was plain to him that all these things were no business of his, and that he was not called on to judge concerning them and therefore could not do so. "Russia and summer weather are not bound together," he thought, repeating words of Karataev's which he found strangely consoling. His intention of killing Napoleon and his calculations of the cabalistic number of the beast of the Apocalypse now seemed to him meaningless and even ridiculous. His anger with his wife and anxiety that his name should not be smirched now seemed not merely trivial but even amusing. What concern was it of his that somewhere or other that woman was leading the life she preferred? What did it matter to anybody, and especially to him, whether or not they found out that their prisoner's name was Count Bezukhov?

He now often remembered his conversation with Prince Andrew and quite agreed with him, though he understood Prince Andrew's thoughts somewhat differently. Prince Andrew had thought and said that happiness could only be negative, but had said it with a shade of bitterness and irony as though he was really saying that all desire for positive happiness is implanted in us merely to torment us and never be satisfied. But Pierre believed it without any mental

reservation. The absence of suffering, the satisfaction of one's needs and consequent freedom in the choice of one's occupation, that is, of one's way of life, now seemed to Pierre to be indubitably man's highest happiness. Here and now for the first time he fully appreciated the enjoyment of eating when he wanted to eat, drinking when he wanted to drink, sleeping when he wanted to sleep, of warmth when he was cold, of talking to a fellow man when he wished to talk and to hear a human voice. The satisfaction of one's needs--good food, cleanliness, and freedom--now that he was deprived of all this, seemed to Pierre to constitute perfect happiness; and the choice of occupation, that is, of his way of life--now that that was so restricted--seemed to him such an easy matter that he forgot that a superfluity of the comforts of life destroys all joy in satisfying one's needs, while great freedom in the choice of occupation--such freedom as his wealth, his education, and his social position had given him in his own life--is just what makes the choice of occupation insolubly difficult and destroys the desire and possibility of having an occupation.

All Pierre's daydreams now turned on the time when he would be free. Yet subsequently, and for the rest of his life, he thought and spoke with enthusiasm of that month of captivity, of those irrecoverable, strong, joyful sensations, and chiefly of the complete peace of mind and inner freedom which he experienced only during those weeks.

When on the first day he got up early, went out of the shed at dawn, and saw the cupolas and crosses of the New Convent of the Virgin still dark at first, the hoarfrost on the dusty grass, the Sparrow Hills, and the wooded banks above the winding river vanishing in the purple distance, when he felt the contact of the fresh air and heard the noise of the crows flying from Moscow across the field, and when afterwards light gleamed from the east and the sun's rim appeared solemnly from behind a cloud, and the cupolas and crosses, the hoarfrost, the distance and the river, all began to sparkle in the glad light--Pierre felt a new joy and strength in life such as he had never before known. And this not only stayed with him during the whole of his imprisonment, but even grew in strength as the hardships of his position increased.

That feeling of alertness and of readiness for anything was still further strengthened in him by the high opinion his fellow prisoners formed of him soon after his arrival at the shed. With his knowledge of languages, the respect shown him by the French, his simplicity, his readiness to give anything asked of him (he received the allowance of three rubles a week made to officers); with his strength, which he showed to the soldiers by pressing nails into the walls of the hut; his gentleness to his companions, and his capacity for sitting still and thinking without doing anything (which seemed to them

incomprehensible), he appeared to them a rather mysterious and superior being. The very qualities that had been a hindrance, if not actually harmful, to him in the world he had lived in--his strength, his disdain for the comforts of life, his absent-mindedness and simplicity--here among these people gave him almost the status of a hero. And Pierre felt that their opinion placed responsibilities upon him.

CHAPTER XIII

The French evacuation began on the night between the sixth and seventh of October: kitchens and sheds were dismantled, carts loaded, and troops and baggage trains started.

At seven in the morning a French convoy in marching trim, wearing shakos and carrying muskets, knapsacks, and enormous sacks, stood in front of the sheds, and animated French talk mingled with curses sounded all along the lines.

In the shed everyone was ready, dressed, belted, shod, and only awaited the order to start. The sick soldier, Sokolov, pale and thin with dark shadows round his eyes, alone sat in his place barefoot and not dressed. His eyes, prominent from the emaciation of his face, gazed inquiringly at his comrades who were paying no attention to him, and he moaned regularly and quietly. It was evidently not so much his sufferings that caused him to moan (he had dysentery) as his fear and grief at being left alone.

Pierre, girt with a rope round his waist and wearing shoes Karataev had made for him from some leather a French soldier had torn off a tea chest and brought to have his boots mended with, went up to the sick man and squatted down beside him.

"You know, Sokolov, they are not all going away! They have a hospital here. You may be better off than we others," said Pierre.

"O Lord! Oh, it will be the death of me! O Lord!" moaned the man in a louder voice.

"I'll go and ask them again directly," said Pierre, rising and going to the door of the shed.

Just as Pierre reached the door, the corporal who had offered him a pipe the day before came up to it with two soldiers. The corporal

and soldiers were in marching kit with knapsacks and shakos that had metal straps, and these changed their familiar faces.

The corporal came, according to orders, to shut the door. The prisoners had to be counted before being let out.

"Corporal, what will they do with the sick man?..." Pierre began.

But even as he spoke he began to doubt whether this was the corporal he knew or a stranger, so unlike himself did the corporal seem at that moment. Moreover, just as Pierre was speaking a sharp rattle of drums was suddenly heard from both sides. The corporal frowned at Pierre's words and, uttering some meaningless oaths, slammed the door. The shed became semidark, and the sharp rattle of the drums on two sides drowned the sick man's groans.

"There it is!... It again!..." said Pierre to himself, and an involuntary shudder ran down his spine. In the corporal's changed face, in the sound of his voice, in the stirring and deafening noise of the drums, he recognized that mysterious, callous force which compelled people against their will to kill their fellow men--that force the effect of which he had witnessed during the executions. To fear or to try to escape that force, to address entreaties or exhortations to those who served as its tools, was useless. Pierre knew this now. One had to wait and endure. He did not again go to the sick man, nor turn to look at him, but stood frowning by the door of the hut.

When that door was opened and the prisoners, crowding against one another like a flock of sheep, squeezed into the exit, Pierre pushed his way forward and approached that very captain who as the corporal had assured him was ready to do anything for him. The captain was also in marching kit, and on his cold face appeared that same it which Pierre had recognized in the corporal's words and in the roll of the drums.

"Pass on, pass on!" the captain reiterated, frowning sternly, and looking at the prisoners who thronged past him.

Pierre went up to him, though he knew his attempt would be vain.

"What now?" the officer asked with a cold look as if not recognizing Pierre.

Pierre told him about the sick man.

"He'll manage to walk, devil take him!" said the captain. "Pass on, pass on!" he continued without looking at Pierre.

"But he is dying," Pierre again began.

"Be so good..." shouted the captain, frowning angrily.

"Dram-da-da-dam, dam-dam..." rattled the drums, and Pierre understood that this mysterious force completely controlled these men and that it was now useless to say any more.

The officer prisoners were separated from the soldiers and told to march in front. There were about thirty officers, with Pierre among them, and about three hundred men.

The officers, who had come from the other sheds, were all strangers to Pierre and much better dressed than he. They looked at him and at his shoes mistrustfully, as at an alien. Not far from him walked a fat major with a sallow, bloated, angry face, who was wearing a Kazan dressing gown tied round with a towel, and who evidently enjoyed the respect of his fellow prisoners. He kept one hand, in which he clasped his tobacco pouch, inside the bosom of his dressing gown and held the stem of his pipe firmly with the other. Panting and puffing, the major grumbled and growled at everybody because he thought he was being pushed and that they were all hurrying when they had nowhere to hurry to and were all surprised at something when there was nothing to be surprised at. Another, a thin little officer, was speaking to everyone, conjecturing where they were now being taken and how far they would get that day. An official in felt boots and wearing a commissariat uniform ran round from side to side and gazed at the ruins of Moscow, loudly announcing his observations as to what had been burned down and what this or that part of the city was that they could see. A third officer, who by his accent was a Pole, disputed with the commissariat officer, arguing that he was mistaken in his identification of the different wards of Moscow.

"What are you disputing about?" said the major angrily. "What does it matter whether it is St. Nicholas or St. Blasius? You see it's burned down, and there's an end of it.... What are you pushing for? Isn't the road wide enough?" said he, turning to a man behind him who was not pushing him at all.

"Oh, oh, oh! What have they done?" the prisoners on one side and another were heard saying as they gazed on the charred ruins. "All beyond the river, and Zubova, and in the Kremlin.... Just look! There's not half of it left. Yes, I told you--the whole quarter beyond the river, and so it is."

"Well, you know it's burned, so what's the use of talking?" said the major.

As they passed near a church in the Khamovniki (one of the few unburned quarters of Moscow) the whole mass of prisoners suddenly started to one side and exclamations of horror and disgust were heard.

"Ah, the villains! What heathens! Yes; dead, dead, so he is... And smeared with something!"

Pierre too drew near the church where the thing was that evoked these exclamations, and dimly made out something leaning against the palings surrounding the church. From the words of his comrades who saw better than he did, he found that this was the body of a man, set upright against the palings with its face smeared with soot.

"Go on! What the devil... Go on! Thirty thousand devils!..." the convoy guards began cursing and the French soldiers, with fresh virulence, drove away with their swords the crowd of prisoners who were gazing at the dead man.

CHAPTER XIV

Through the cross streets of the Khamovniki quarter the prisoners marched, followed only by their escort and the vehicles and wagons belonging to that escort, but when they reached the supply stores they came among a huge and closely packed train of artillery mingled with private vehicles.

At the bridge they all halted, waiting for those in front to get across. From the bridge they had a view of endless lines of moving baggage trains before and behind them. To the right, where the Kaluga road turns near Neskuchny, endless rows of troops and carts stretched away into the distance. These were troops of Beauharnais' corps which had started before any of the others. Behind, along the riverside and across the Stone Bridge, were Ney's troops and transport.

Davout's troops, in whose charge were the prisoners, were crossing the Crimean bridge and some were already debouching into the Kaluga road. But the baggage trains stretched out so that the last of Beauharnais' train had not yet got out of Moscow and reached the Kaluga road when the vanguard of Ney's army was already emerging from the Great Ordynka Street.

When they had crossed the Crimean bridge the prisoners moved a few steps forward, halted, and again moved on, and from all sides vehicles and men crowded closer and closer together. They advanced the few hundred paces that separated the bridge from the Kaluga road, taking more than an hour to do so, and came out upon the square where the streets of the Transmoskva ward and the Kaluga road converge, and the prisoners jammed close together had to stand for some hours at that crossway. From all sides, like the roar of the sea, were heard the rattle of wheels, the tramp of feet, and incessant shouts of anger and abuse. Pierre stood pressed against the wall of a charred house, listening to that noise which mingled in his imagination with the roll of the drums.

To get a better view, several officer prisoners climbed onto the wall of the half-burned house against which Pierre was leaning.

"What crowds! Just look at the crowds!... They've loaded goods even on the cannon! Look there, those are furs!" they exclaimed. "Just see what the blackguards have looted.... There! See what that one has behind in the cart.... Why, those are settings taken from some icons, by heaven!... Oh, the rascals!... See how that fellow has loaded himself up, he can hardly walk! Good lord, they've even grabbed those chaises!... See that fellow there sitting on the trunks.... Heavens! They're fighting."

"That's right, hit him on the snout--on his snout! Like this, we shan't get away before evening. Look, look there.... Why, that must be Napoleon's own. See what horses! And the monograms with a crown! It's like a portable house.... That fellow's dropped his sack and doesn't see it. Fighting again... A woman with a baby, and not bad-looking either! Yes, I dare say, that's the way they'll let you pass... Just look, there's no end to it. Russian wenches, by heaven, so they are! In carriages--see how comfortably they've settled themselves!"

Again, as at the church in Khamovniki, a wave of general curiosity bore all the prisoners forward onto the road, and Pierre, thanks to his stature, saw over the heads of the others what so attracted their curiosity. In three carriages involved among the munition carts, closely squeezed together, sat women with rouged faces, dressed in glaring colors, who were shouting something in shrill voices.

From the moment Pierre had recognized the appearance of the mysterious force nothing had seemed to him strange or dreadful: neither the corpse smeared with soot for fun nor these women hurrying away nor the burned ruins of Moscow. All that he now witnessed scarcely made an impression on him--as if his soul, making ready for a hard struggle, refused to receive impressions that might

weaken it.

The women's vehicles drove by. Behind them came more carts, soldiers, wagons, soldiers, gun carriages, carriages, soldiers, ammunition carts, more soldiers, and now and then women.

Pierre did not see the people as individuals but saw their movement.

All these people and horses seemed driven forward by some invisible power. During the hour Pierre watched them they all came flowing from the different streets with one and the same desire to get on quickly; they all jostled one another, began to grow angry and to fight, white teeth gleamed, brows frowned, ever the same words of abuse flew from side to side, and all the faces bore the same swaggeringly resolute and coldly cruel expression that had struck Pierre that morning on the corporal's face when the drums were beating.

It was not till nearly evening that the officer commanding the escort collected his men and with shouts and quarrels forced his way in among the baggage trains, and the prisoners, hemmed in on all sides, emerged onto the Kaluga road.

They marched very quickly, without resting, and halted only when the sun began to set. The baggage carts drew up close together and the men began to prepare for their night's rest. They all appeared angry and dissatisfied. For a long time, oaths, angry shouts, and fighting could be heard from all sides. A carriage that followed the escort ran into one of the carts and knocked a hole in it with its pole. Several soldiers ran toward the cart from different sides: some beat the carriage horses on their heads, turning them aside, others fought among themselves, and Pierre saw that one German was badly wounded on the head by a sword.

It seemed that all these men, now that they had stopped amid fields in the chill dusk of the autumn evening, experienced one and the same feeling of unpleasant awakening from the hurry and eagerness to push on that had seized them at the start. Once at a standstill they all seemed to understand that they did not yet know where they were going, and that much that was painful and difficult awaited them on this journey.

During this halt the escort treated the prisoners even worse than they had done at the start. It was here that the prisoners for the first time received horseflesh for their meat ration.

From the officer down to the lowest soldier they showed what seemed like personal spite against each of the prisoners, in

unexpected contrast to their former friendly relations.

This spite increased still more when, on calling over the roll of prisoners, it was found that in the bustle of leaving Moscow one Russian soldier, who had pretended to suffer from colic, had escaped. Pierre saw a Frenchman beat a Russian soldier cruelly for straying too far from the road, and heard his friend the captain reprimand and threaten to court-martial a noncommissioned officer on account of the escape of the Russian. To the noncommissioned officer's excuse that the prisoner was ill and could not walk, the officer replied that the order was to shoot those who lagged behind. Pierre felt that that fatal force which had crushed him during the executions, but which he had not felt during his imprisonment, now again controlled his existence. It was terrible, but he felt that in proportion to the efforts of that fatal force to crush him, there grew and strengthened in his soul a power of life independent of it.

He ate his supper of buckwheat soup with horseflesh and chatted with his comrades.

Neither Pierre nor any of the others spoke of what they had seen in Moscow, or of the roughness of their treatment by the French, or of the order to shoot them which had been announced to them. As if in reaction against the worsening of their position they were all particularly animated and gay. They spoke of personal reminiscences, of amusing scenes they had witnessed during the campaign, and avoided all talk of their present situation.

The sun had set long since. Bright stars shone out here and there in the sky. A red glow as of a conflagration spread above the horizon from the rising full moon, and that vast red ball swayed strangely in the gray haze. It grew light. The evening was ending, but the night had not yet come. Pierre got up and left his new companions, crossing between the campfires to the other side of the road where he had been told the common soldier prisoners were stationed. He wanted to talk to them. On the road he was stopped by a French sentinel who ordered him back.

Pierre turned back, not to his companions by the campfire, but to an unharnessed cart where there was nobody. Tucking his legs under him and dropping his head he sat down on the cold ground by the wheel of the cart and remained motionless a long while sunk in thought. Suddenly he burst out into a fit of his broad, good-natured laughter, so loud that men from various sides turned with surprise to see what this strange and evidently solitary laughter could mean.

"Ha-ha-ha!" laughed Pierre. And he said aloud to himself: "The soldier did not let me pass. They took me and shut me up. They hold me

captive. What, me? Me? My immortal soul? Ha-ha-ha! Ha-ha-ha!..." and he laughed till tears started to his eyes.

A man got up and came to see what this queer big fellow was laughing at all by himself. Pierre stopped laughing, got up, went farther away from the inquisitive man, and looked around him.

The huge, endless bivouac that had previously resounded with the crackling of campfires and the voices of many men had grown quiet, the red campfires were growing paler and dying down. High up in the light sky hung the full moon. Forests and fields beyond the camp, unseen before, were now visible in the distance. And farther still, beyond those forests and fields, the bright, oscillating, limitless distance lured one to itself. Pierre glanced up at the sky and the twinkling stars in its faraway depths. "And all that is me, all that is within me, and it is all I!" thought Pierre. "And they caught all that and put it into a shed boarded up with planks!" He smiled, and went and lay down to sleep beside his companions.

CHAPTER XV

In the early days of October another envoy came to Kutuzov with a letter from Napoleon proposing peace and falsely dated from Moscow, though Napoleon was already not far from Kutuzov on the old Kaluga road. Kutuzov replied to this letter as he had done to the one formerly brought by Lauriston, saying that there could be no question of peace.

Soon after that a report was received from Dorokhov's guerrilla detachment operating to the left of Tarutino that troops of Broussier's division had been seen at Forminsk and that being separated from the rest of the French army they might easily be destroyed. The soldiers and officers again demanded action. Generals on the staff, excited by the memory of the easy victory at Tarutino, urged Kutuzov to carry out Dorokhov's suggestion. Kutuzov did not consider any offensive necessary. The result was a compromise which was inevitable: a small detachment was sent to Forminsk to attack Broussier.

By a strange coincidence, this task, which turned out to be a most difficult and important one, was entrusted to Dokhturov--that same modest little Dokhturov whom no one had described to us as drawing up plans of battles, dashing about in front of regiments, showering

crosses on batteries, and so on, and who was thought to be and was spoken of as undecided and undiscerning--but whom we find commanding wherever the position was most difficult all through the Russo-French wars from Austerlitz to the year 1813. At Austerlitz he remained last at the Augezd dam, rallying the regiments, saving what was possible when all were flying and perishing and not a single general was left in the rear guard. Ill with fever he went to Smolensk with twenty thousand men to defend the town against Napoleon's whole army. In Smolensk, at the Malakhov Gate, he had hardly dozed off in a paroxysm of fever before he was awakened by the bombardment of the town--and Smolensk held out all day long. At the battle of Borodino, when Bagration was killed and nine tenths of the men of our left flank had fallen and the full force of the French artillery fire was directed against it, the man sent there was this same irresolute and undiscerning Dokhturov--Kutuzov hastening to rectify a mistake he had made by sending someone else there first. And the quiet little Dokhturov rode thither, and Borodino became the greatest glory of the Russian army. Many heroes have been described to us in verse and prose, but of Dokhturov scarcely a word has been said.

It was Dokhturov again whom they sent to Forminsk and from there to Malo-Yaroslavets, the place where the last battle with the French was fought and where the obvious disintegration of the French army began; and we are told of many geniuses and heroes of that period of the campaign, but of Dokhturov nothing or very little is said and that dubiously. And this silence about Dokhturov is the clearest testimony to his merit.

It is natural for a man who does not understand the workings of a machine to imagine that a shaving that has fallen into it by chance and is interfering with its action and tossing about in it is its most important part. The man who does not understand the construction of the machine cannot conceive that the small connecting cogwheel which revolves quietly is one of the most essential parts of the machine, and not the shaving which merely harms and hinders the working.

On the tenth of October when Dokhturov had gone halfway to Forminsk and stopped at the village of Aristovo, preparing faithfully to execute the orders he had received, the whole French army having, in its convulsive movement, reached Murat's position apparently in order to give battle--suddenly without any reason turned off to the left onto the new Kaluga road and began to enter Forminsk, where only Broussier had been till then. At that time Dokhturov had under his command, besides Dorokhov's detachment, the two small guerrilla detachments of Figner and Soslavin.

On the evening of October 11 Soslavin came to the Aristovo headquarters with a French guardsman he had captured. The prisoner

said that the troops that had entered Forminsk that day were the vanguard of the whole army, that Napoleon was there and the whole army had left Moscow four days previously. That same evening a house serf who had come from Borovsk said he had seen an immense army entering the town. Some Cossacks of Dokhturov's detachment reported having sighted the French Guards marching along the road to Borovsk. From all these reports it was evident that where they had expected to meet a single division there was now the whole French army marching from Moscow in an unexpected direction--along the Kaluga road. Dokhturov was unwilling to undertake any action, as it was not clear to him now what he ought to do. He had been ordered to attack Forminsk. But only Broussier had been there at that time and now the whole French army was there. Ermolov wished to act on his own judgment, but Dokhturov insisted that he must have Kutuzov's instructions. So it was decided to send a dispatch to the staff.

For this purpose a capable officer, Bolkhovitinov, was chosen, who was to explain the whole affair by word of mouth, besides delivering a written report. Toward midnight Bolkhovitinov, having received the dispatch and verbal instructions, galloped off to the General Staff accompanied by a Cossack with spare horses.

CHAPTER XVI

It was a warm, dark, autumn night. It had been raining for four days. Having changed horses twice and galloped twenty miles in an hour and a half over a sticky, muddy road, Bolkhovitinov reached Litashevka after one o'clock at night. Dismounting at a cottage on whose wattle fence hung a signboard, GENERAL STAFF, and throwing down his reins, he entered a dark passage.

"The general on duty, quick! It's very important!" said he to someone who had risen and was sniffing in the dark passage.

"He has been very unwell since the evening and this is the third night he has not slept," said the orderly pleadingly in a whisper. "You should wake the captain first."

"But this is very important, from General Dokhturov," said Bolkhovitinov, entering the open door which he had found by feeling in the dark.

The orderly had gone in before him and began waking somebody.

"Your honor, your honor! A courier."

"What? What's that? From whom?" came a sleepy voice.

"From Dokhturov and from Alexey Petrovich. Napoleon is at Forminsk," said Bolkhovitinov, unable to see in the dark who was speaking but guessing by the voice that it was not Konovnitsyn.

The man who had wakened yawned and stretched himself.

"I don't like waking him," he said, fumbling for something. "He is very ill. Perhaps this is only a rumor."

"Here is the dispatch," said Bolkhovitinov. "My orders are to give it at once to the general on duty."

"Wait a moment, I'll light a candle. You damned rascal, where do you always hide it?" said the voice of the man who was stretching himself, to the orderly. (This was Shcherbinin, Konovnitsyn's adjutant.)

"I've found it, I've found it!" he added.

The orderly was striking a light and Shcherbinin was fumbling for something on the candlestick.

"Oh, the nasty beasts!" said he with disgust.

By the light of the sparks Bolkhovitinov saw Shcherbinin's youthful face as he held the candle, and the face of another man who was still asleep. This was Konovnitsyn.

When the flame of the sulphur splinters kindled by the tinder burned up, first blue and then red, Shcherbinin lit the tallow candle, from the candlestick of which the cockroaches that had been gnawing it were running away, and looked at the messenger. Bolkhovitinov was bespattered all over with mud and had smeared his face by wiping it with his sleeve.

"Who gave the report?" inquired Shcherbinin, taking the envelope.

"The news is reliable," said Bolkhovitinov. "Prisoners, Cossacks, and the scouts all say the same thing."

"There's nothing to be done, we'll have to wake him," said Shcherbinin, rising and going up to the man in the nightcap who lay covered by a greatcoat. "Peter Petrovich!" said he. (Konovnitsyn did not stir.) "To the General Staff!" he said with a smile, knowing that those words would be sure to arouse him.

And in fact the head in the nightcap was lifted at once. On Konovnitsyn's handsome, resolute face with cheeks flushed by fever, there still remained for an instant a faraway dreamy expression remote from present affairs, but then he suddenly started and his face assumed its habitual calm and firm appearance.

"Well, what is it? From whom?" he asked immediately but without hurry, blinking at the light.

While listening to the officer's report Konovnitsyn broke the seal and read the dispatch. Hardly had he done so before he lowered his legs in their woolen stockings to the earthen floor and began putting on his boots. Then he took off his nightcap, combed his hair over his temples, and donned his cap.

"Did you get here quickly? Let us go to his Highness."

Konovnitsyn had understood at once that the news brought was of great importance and that no time must be lost. He did not consider or ask himself whether the news was good or bad. That did not interest him. He regarded the whole business of the war not with his intelligence or his reason but by something else. There was within him a deep unexpressed conviction that all would be well, but that one must not trust to this and still less speak about it, but must only attend to one's own work. And he did his work, giving his whole strength to the task.

Peter Petrovich Konovnitsyn, like Dokhturov, seems to have been included merely for propriety's sake in the list of the so-called heroes of 1812--the Barclays, Raevskis, Ermolovs, Platovs, and Miloradoviches. Like Dokhturov he had the reputation of being a man of very limited capacity and information, and like Dokhturov he never made plans of battle but was always found where the situation was most difficult. Since his appointment as general on duty he had always slept with his door open, giving orders that every messenger should be allowed to wake him up. In battle he was always under fire, so that Kutuzov reproved him for it and feared to send him to the front, and like Dokhturov he was one of those unnoticed cogwheels that, without clatter or noise, constitute the most essential part of the machine.

Coming out of the hut into the damp, dark night Konovnitsyn frowned--partly from an increased pain in his head and partly at the unpleasant thought that occurred to him, of how all that nest of influential men on the staff would be stirred up by this news, especially Bennigsen, who ever since Tarutino had been at daggers drawn with Kutuzov; and how they would make suggestions, quarrel, issue orders, and rescind them. And this premonition was disagreeable to him

though he knew it could not be helped.

And in fact Toll, to whom he went to communicate the news, immediately began to expound his plans to a general sharing his quarters, until Konovnitsyn, who listened in weary silence, reminded him that they must go to see his Highness.

CHAPTER XVII

Kutuzov like all old people did not sleep much at night. He often fell asleep unexpectedly in the daytime, but at night, lying on his bed without undressing, he generally remained awake thinking.

So he lay now on his bed, supporting his large, heavy, scarred head on his plump hand, with his one eye open, meditating and peering into the darkness.

Since Bennigsen, who corresponded with the Emperor and had more influence than anyone else on the staff, had begun to avoid him, Kutuzov was more at ease as to the possibility of himself and his troops being obliged to take part in useless aggressive movements. The lesson of the Tarutino battle and of the day before it, which Kutuzov remembered with pain, must, he thought, have some effect on others too.

"They must understand that we can only lose by taking the offensive. Patience and time are my warriors, my champions," thought Kutuzov. He knew that an apple should not be plucked while it is green. It will fall of itself when ripe, but if picked unripe the apple is spoiled, the tree is harmed, and your teeth are set on edge. Like an experienced sportsman he knew that the beast was wounded, and wounded as only the whole strength of Russia could have wounded it, but whether it was mortally wounded or not was still an undecided question. Now by the fact of Lauriston and Barthelemi having been sent, and by the reports of the guerrillas, Kutuzov was almost sure that the wound was mortal. But he needed further proofs and it was necessary to wait.

"They want to run to see how they have wounded it. Wait and we shall see! Continual maneuvers, continual advances!" thought he. "What for? Only to distinguish themselves! As if fighting were fun. They are like children from whom one can't get any sensible account of what has happened because they all want to show how well they can fight. But

that's not what is needed now.

"And what ingenious maneuvers they all propose to me! It seems to them that when they have thought of two or three contingencies" (he remembered the general plan sent him from Petersburg) "they have foreseen everything. But the contingencies are endless."

The undecided question as to whether the wound inflicted at Borodino was mortal or not had hung over Kutuzov's head for a whole month. On the one hand the French had occupied Moscow. On the other Kutuzov felt assured with all his being that the terrible blow into which he and all the Russians had put their whole strength must have been mortal. But in any case proofs were needed; he had waited a whole month for them and grew more impatient the longer he waited. Lying on his bed during those sleepless nights he did just what he reproached those younger generals for doing. He imagined all sorts of possible contingencies, just like the younger men, but with this difference, that he saw thousands of contingencies instead of two or three and based nothing on them. The longer he thought the more contingencies presented themselves. He imagined all sorts of movements of the Napoleonic army as a whole or in sections--against Petersburg, or against him, or to outflank him. He thought too of the possibility (which he feared most of all) that Napoleon might fight him with his own weapon and remain in Moscow awaiting him. Kutuzov even imagined that Napoleon's army might turn back through Medyn and Yukhnov, but the one thing he could not foresee was what happened--the insane, convulsive stampede of Napoleon's army during its first eleven days after leaving Moscow: a stampede which made possible what Kutuzov had not yet even dared to think of--the complete extermination of the French. Dorokhov's report about Broussier's division, the guerrillas' reports of distress in Napoleon's army, rumors of preparations for leaving Moscow, all confirmed the supposition that the French army was beaten and preparing for flight. But these were only suppositions, which seemed important to the younger men but not to Kutuzov. With his sixty years' experience he knew what value to attach to rumors, knew how apt people who desire anything are to group all news so that it appears to confirm what they desire, and he knew how readily in such cases they omit all that makes for the contrary. And the more he desired it the less he allowed himself to believe it. This question absorbed all his mental powers. All else was to him only life's customary routine. To such customary routine belonged his conversations with the staff, the letters he wrote from Tarutino to Madame de Stael, the reading of novels, the distribution of awards, his correspondence with Petersburg, and so on. But the destruction of the French, which he alone foresaw, was his heart's one desire.

On the night of the eleventh of October he lay leaning on his arm

and thinking of that.

There was a stir in the next room and he heard the steps of Toll, Konovnitsyn, and Bolkhovitinov.

"Eh, who's there? Come in, come in! What news?" the field marshal called out to them.

While a footman was lighting a candle, Toll communicated the substance of the news.

"Who brought it?" asked Kutuzov with a look which, when the candle was lit, struck Toll by its cold severity.

"There can be no doubt about it, your Highness."

"Call him in, call him here."

Kutuzov sat up with one leg hanging down from the bed and his big paunch resting against the other which was doubled under him. He screwed up his seeing eye to scrutinize the messenger more carefully, as if wishing to read in his face what preoccupied his own mind.

"Tell me, tell me, friend," said he to Bolkhovitinov in his low, aged voice, as he pulled together the shirt which gaped open on his chest, "come nearer--nearer. What news have you brought me? Eh? That Napoleon has left Moscow? Are you sure? Eh?"

Bolkhovitinov gave a detailed account from the beginning of all he had been told to report.

"Speak quicker, quicker! Don't torture me!" Kutuzov interrupted him.

Bolkhovitinov told him everything and was then silent, awaiting instructions. Toll was beginning to say something but Kutuzov checked him. He tried to say something, but his face suddenly puckered and wrinkled; he waved his arm at Toll and turned to the opposite side of the room, to the corner darkened by the icons that hung there.

"O Lord, my Creator, Thou has heard our prayer..." said he in a tremulous voice with folded hands. "Russia is saved. I thank Thee, O Lord!" and he wept.

CHAPTER XVIII

From the time he received this news to the end of the campaign all Kutuzov's activity was directed toward restraining his troops, by authority, by guile, and by entreaty, from useless attacks, maneuvers, or encounters with the perishing enemy. Dokhturov went to Malo-Yaroslavets, but Kutuzov lingered with the main army and gave orders for the evacuation of Kaluga--a retreat beyond which town seemed to him quite possible.

Everywhere Kutuzov retreated, but the enemy without waiting for his retreat fled in the opposite direction.

Napoleon's historians describe to us his skilled maneuvers at Tarutino and Malo-Yaroslavets, and make conjectures as to what would have happened had Napoleon been in time to penetrate into the rich southern provinces.

But not to speak of the fact that nothing prevented him from advancing into those southern provinces (for the Russian army did not bar his way), the historians forget that nothing could have saved his army, for then already it bore within itself the germs of inevitable ruin. How could that army--which had found abundant supplies in Moscow and had trampled them underfoot instead of keeping them, and on arriving at Smolensk had looted provisions instead of storing them--how could that army recuperate in Kaluga province, which was inhabited by Russians such as those who lived in Moscow, and where fire had the same property of consuming what was set ablaze?

That army could not recover anywhere. Since the battle of Borodino and the pillage of Moscow it had borne within itself, as it were, the chemical elements of dissolution.

The members of what had once been an army--Napoleon himself and all his soldiers fled--without knowing whither, each concerned only to make his escape as quickly as possible from this position, of the hopelessness of which they were all more or less vaguely conscious.

So it came about that at the council at Malo-Yaroslavets, when the generals pretending to confer together expressed various opinions, all mouths were closed by the opinion uttered by the simple-minded soldier Mouton who, speaking last, said what they all felt: that the one thing needful was to get away as quickly as possible; and no one, not even Napoleon, could say anything against that truth which they all recognized.

But though they all realized that it was necessary to get away, there still remained a feeling of shame at admitting that they must flee. An external shock was needed to overcome that shame, and this shock came in due time. It was what the French called "le hourra de l'Empereur."

The day after the council at Malo-Yaroslavets Napoleon rode out early in the morning amid the lines of his army with his suite of marshals and an escort, on the pretext of inspecting the army and the scene of the previous and of the impending battle. Some Cossacks on the prowl for booty fell in with the Emperor and very nearly captured him. If the Cossacks did not capture Napoleon then, what saved him was the very thing that was destroying the French army, the booty on which the Cossacks fell. Here as at Tarutino they went after plunder, leaving the men. Disregarding Napoleon they rushed after the plunder and Napoleon managed to escape.

When les enfants du Don might so easily have taken the Emperor himself in the midst of his army, it was clear that there was nothing for it but to fly as fast as possible along the nearest, familiar road. Napoleon with his forty-year-old stomach understood that hint, not feeling his former agility and boldness, and under the influence of the fright the Cossacks had given him he at once agreed with Mouton and issued orders--as the historians tell us--to retreat by the Smolensk road.

That Napoleon agreed with Mouton, and that the army retreated, does not prove that Napoleon caused it to retreat, but that the forces which influenced the whole army and directed it along the Mozhaysk (that is, the Smolensk) road acted simultaneously on him also.

CHAPTER XIX

A man in motion always devises an aim for that motion. To be able to go a thousand miles he must imagine that something good awaits him at the end of those thousand miles. One must have the prospect of a promised land to have the strength to move.

The promised land for the French during their advance had been Moscow, during their retreat it was their native land. But that native land was too far off, and for a man going a thousand miles it is absolutely necessary to set aside his final goal and to say to himself: "Today I shall get to a place twenty-five miles off where I

shall rest and spend the night," and during the first day's journey that resting place eclipses his ultimate goal and attracts all his hopes and desires. And the impulses felt by a single person are always magnified in a crowd.

For the French retreating along the old Smolensk road, the final goal--their native land--was too remote, and their immediate goal was Smolensk, toward which all their desires and hopes, enormously intensified in the mass, urged them on. It was not that they knew that much food and fresh troops awaited them in Smolensk, nor that they were told so (on the contrary their superior officers, and Napoleon himself, knew that provisions were scarce there), but because this alone could give them strength to move on and endure their present privations. So both those who knew and those who did not know deceived themselves, and pushed on to Smolensk as to a promised land.

Coming out onto the highroad the French fled with surprising energy and unheard-of rapidity toward the goal they had fixed on. Besides the common impulse which bound the whole crowd of French into one mass and supplied them with a certain energy, there was another cause binding them together--their great numbers. As with the physical law of gravity, their enormous mass drew the individual human atoms to itself. In their hundreds of thousands they moved like a whole nation.

Each of them desired nothing more than to give himself up as a prisoner to escape from all this horror and misery; but on the one hand the force of this common attraction to Smolensk, their goal, drew each of them in the same direction; on the other hand an army corps could not surrender to a company, and though the French availed themselves of every convenient opportunity to detach themselves and to surrender on the slightest decent pretext, such pretexts did not always occur. Their very numbers and their crowded and swift movement deprived them of that possibility and rendered it not only difficult but impossible for the Russians to stop this movement, to which the French were directing all their energies. Beyond a certain limit no mechanical disruption of the body could hasten the process of decomposition.

A lump of snow cannot be melted instantaneously. There is a certain limit of time in less than which no amount of heat can melt the snow. On the contrary the greater the heat the more solidified the remaining snow becomes.

Of the Russian commanders Kutuzov alone understood this. When the flight of the French army along the Smolensk road became well defined, what Konovnitsyn had foreseen on the night of the eleventh of October began to occur. The superior officers all wanted to

distinguish themselves, to cut off, to seize, to capture, and to overthrow the French, and all clamored for action.

Kutuzov alone used all his power (and such power is very limited in the case of any commander in chief) to prevent an attack.

He could not tell them what we say now: "Why fight, why block the road, losing our own men and inhumanly slaughtering unfortunate wretches? What is the use of that, when a third of their army has melted away on the road from Moscow to Vyazma without any battle?" But drawing from his aged wisdom what they could understand, he told them of the golden bridge, and they laughed at and slandered him, flinging themselves on, rending and exulting over the dying beast.

Ermolov, Miloradovich, Platov, and others in proximity to the French near Vyazma could not resist their desire to cut off and break up two French corps, and by way of reporting their intention to Kutuzov they sent him a blank sheet of paper in an envelope.

And try as Kutuzov might to restrain the troops, our men attacked, trying to bar the road. Infantry regiments, we are told, advanced to the attack with music and with drums beating, and killed and lost thousands of men.

But they did not cut off or overthrow anybody and the French army, closing up more firmly at the danger, continued, while steadily melting away, to pursue its fatal path to Smolensk.

BOOK FOURTEEN: 1812

CHAPTER I

The Battle of Borodino, with the occupation of Moscow that followed it and the flight of the French without further conflicts, is one of the most instructive phenomena in history.

All historians agree that the external activity of states and nations in their conflicts with one another is expressed in wars,

and that as a direct result of greater or less success in war the political strength of states and nations increases or decreases.

Strange as may be the historical account of how some king or emperor, having quarreled with another, collects an army, fights his enemy's army, gains a victory by killing three, five, or ten thousand men, and subjugates a kingdom and an entire nation of several millions, all the facts of history (as far as we know it) confirm the truth of the statement that the greater or lesser success of one army against another is the cause, or at least an essential indication, of an increase or decrease in the strength of the nation--even though it is unintelligible why the defeat of an army--a hundredth part of a nation--should oblige that whole nation to submit. An army gains a victory, and at once the rights of the conquering nation have increased to the detriment of the defeated. An army has suffered defeat, and at once a people loses its rights in proportion to the severity of the reverse, and if its army suffers a complete defeat the nation is quite subjugated.

So according to history it has been found from the most ancient times, and so it is to our own day. All Napoleon's wars serve to confirm this rule. In proportion to the defeat of the Austrian army Austria loses its rights, and the rights and the strength of France increase. The victories of the French at Jena and Auerstadt destroy the independent existence of Prussia.

But then, in 1812, the French gain a victory near Moscow. Moscow is taken and after that, with no further battles, it is not Russia that ceases to exist, but the French army of six hundred thousand, and then Napoleonic France itself. To strain the facts to fit the rules of history: to say that the field of battle at Borodino remained in the hands of the Russians, or that after Moscow there were other battles that destroyed Napoleon's army, is impossible.

After the French victory at Borodino there was no general engagement nor any that were at all serious, yet the French army ceased to exist. What does this mean? If it were an example taken from the history of China, we might say that it was not an historic phenomenon (which is the historians' usual expedient when anything does not fit their standards); if the matter concerned some brief conflict in which only a small number of troops took part, we might treat it as an exception; but this event occurred before our fathers' eyes, and for them it was a question of the life or death of their fatherland, and it happened in the greatest of all known wars.

The period of the campaign of 1812 from the battle of Borodino to the expulsion of the French proved that the winning of a battle does not produce a conquest and is not even an invariable indication of

conquest; it proved that the force which decides the fate of peoples lies not in the conquerors, nor even in armies and battles, but in something else.

The French historians, describing the condition of the French army before it left Moscow, affirm that all was in order in the Grand Army, except the cavalry, the artillery, and the transport--there was no forage for the horses or the cattle. That was a misfortune no one could remedy, for the peasants of the district burned their hay rather than let the French have it.

The victory gained did not bring the usual results because the peasants Karp and Vlas (who after the French had evacuated Moscow drove in their carts to pillage the town, and in general personally failed to manifest any heroic feelings), and the whole innumerable multitude of such peasants, did not bring their hay to Moscow for the high price offered them, but burned it instead.

Let us imagine two men who have come out to fight a duel with rapiers according to all the rules of the art of fencing. The fencing has gone on for some time; suddenly one of the combatants, feeling himself wounded and understanding that the matter is no joke but concerns his life, throws down his rapier, and seizing the first cudgel that comes to hand begins to brandish it. Then let us imagine that the combatant who so sensibly employed the best and simplest means to attain his end was at the same time influenced by traditions of chivalry and, desiring to conceal the facts of the case, insisted that he had gained his victory with the rapier according to all the rules of art. One can imagine what confusion and obscurity would result from such an account of the duel.

The fencer who demanded a contest according to the rules of fencing was the French army; his opponent who threw away the rapier and snatched up the cudgel was the Russian people; those who try to explain the matter according to the rules of fencing are the historians who have described the event.

After the burning of Smolensk a war began which did not follow any previous traditions of war. The burning of towns and villages, the retreats after battles, the blow dealt at Borodino and the renewed retreat, the burning of Moscow, the capture of marauders, the seizure of transports, and the guerrilla war were all departures from the rules.

Napoleon felt this, and from the time he took up the correct fencing attitude in Moscow and instead of his opponent's rapier saw a cudgel raised above his head, he did not cease to complain to Kutuzov and to the Emperor Alexander that the war was being carried on contrary to

all the rules--as if there were any rules for killing people. In spite of the complaints of the French as to the nonobservance of the rules, in spite of the fact that to some highly placed Russians it seemed rather disgraceful to fight with a cudgel and they wanted to assume a pose en quarte or en tierce according to all the rules, and to make an adroit thrust en prime, and so on--the cudgel of the people's war was lifted with all its menacing and majestic strength, and without consulting anyone's tastes or rules and regardless of anything else, it rose and fell with stupid simplicity, but consistently, and belabored the French till the whole invasion had perished.

And it is well for a people who do not--as the French did in 1813--salute according to all the rules of art, and, presenting the hilt of their rapier gracefully and politely, hand it to their magnanimous conqueror, but at the moment of trial, without asking what rules others have adopted in similar cases, simply and easily pick up the first cudgel that comes to hand and strike with it till the feeling of resentment and revenge in their soul yields to a feeling of contempt and compassion.

CHAPTER II

One of the most obvious and advantageous departures from the so-called laws of war is the action of scattered groups against men pressed together in a mass. Such action always occurs in wars that take on a national character. In such actions, instead of two crowds opposing each other, the men disperse, attack singly, run away when attacked by stronger forces, but again attack when opportunity offers. This was done by the guerrillas in Spain, by the mountain tribes in the Caucasus, and by the Russians in 1812.

People have called this kind of war "guerrilla warfare" and assume that by so calling it they have explained its meaning. But such a war does not fit in under any rule and is directly opposed to a well-known rule of tactics which is accepted as infallible. That rule says that an attacker should concentrate his forces in order to be stronger than his opponent at the moment of conflict.

Guerrilla war (always successful, as history shows) directly infringes that rule.

This contradiction arises from the fact that military science

assumes the strength of an army to be identical with its numbers.
Military science says that the more troops the greater the strength.
Les gros bataillons ont toujours raison.*

*Large battalions are always victorious.

For military science to say this is like defining momentum in mechanics by reference to the mass only: stating that momenta are equal or unequal to each other simply because the masses involved are equal or unequal.

Momentum (quantity of motion) is the product of mass and velocity.

In military affairs the strength of an army is the product of its mass and some unknown x .

Military science, seeing in history innumerable instances of the fact that the size of any army does not coincide with its strength and that small detachments defeat larger ones, obscurely admits the existence of this unknown factor and tries to discover it--now in a geometric formation, now in the equipment employed, now, and most usually, in the genius of the commanders. But the assignment of these various meanings to the factor does not yield results which accord with the historic facts.

Yet it is only necessary to abandon the false view (adopted to gratify the "heroes") of the efficacy of the directions issued in wartime by commanders, in order to find this unknown quantity.

That unknown quantity is the spirit of the army, that is to say, the greater or lesser readiness to fight and face danger felt by all the men composing an army, quite independently of whether they are, or are not, fighting under the command of a genius, in two--or three-line formation, with cudgels or with rifles that repeat thirty times a minute. Men who want to fight will always put themselves in the most advantageous conditions for fighting.

The spirit of an army is the factor which multiplied by the mass gives the resulting force. To define and express the significance of this unknown factor--the spirit of an army--is a problem for science.

This problem is only solvable if we cease arbitrarily to substitute for the unknown x itself the conditions under which that force becomes apparent--such as the commands of the general, the equipment employed, and so on--mistaking these for the real significance of the factor, and if we recognize this unknown

quantity in its entirety as being the greater or lesser desire to fight and to face danger. Only then, expressing known historic facts by equations and comparing the relative significance of this factor, can we hope to define the unknown.

Ten men, battalions, or divisions, fighting fifteen men, battalions, or divisions, conquer--that is, kill or take captive--all the others, while themselves losing four, so that on the one side four and on the other fifteen were lost. Consequently the four were equal to the fifteen, and therefore $4x = 15y$. Consequently $x/y = 15/4$. This equation does not give us the value of the unknown factor but gives us a ratio between two unknowns. And by bringing variously selected historic units (battles, campaigns, periods of war) into such equations, a series of numbers could be obtained in which certain laws should exist and might be discovered.

The tactical rule that an army should act in masses when attacking, and in smaller groups in retreat, unconsciously confirms the truth that the strength of an army depends on its spirit. To lead men forward under fire more discipline (obtainable only by movement in masses) is needed than is needed to resist attacks. But this rule which leaves out of account the spirit of the army continually proves incorrect and is in particularly striking contrast to the facts when some strong rise or fall in the spirit of the troops occurs, as in all national wars.

The French, retreating in 1812--though according to tactics they should have separated into detachments to defend themselves--congregated into a mass because the spirit of the army had so fallen that only the mass held the army together. The Russians, on the contrary, ought according to tactics to have attacked in mass, but in fact they split up into small units, because their spirit had so risen that separate individuals, without orders, dealt blows at the French without needing any compulsion to induce them to expose themselves to hardships and dangers.

CHAPTER III

The so-called partisan war began with the entry of the French into Smolensk.

Before partisan warfare had been officially recognized by the government, thousands of enemy stragglers, marauders, and foragers had

been destroyed by the Cossacks and the peasants, who killed them off as instinctively as dogs worry a stray mad dog to death. Denis Davydov, with his Russian instinct, was the first to recognize the value of this terrible cudgel which regardless of the rules of military science destroyed the French, and to him belongs the credit for taking the first step toward regularizing this method of warfare.

On August 24 Davydov's first partisan detachment was formed and then others were recognized. The further the campaign progressed the more numerous these detachments became.

The irregulars destroyed the great army piecemeal. They gathered the fallen leaves that dropped of themselves from that withered tree--the French army--and sometimes shook that tree itself. By October, when the French were fleeing toward Smolensk, there were hundreds of such companies, of various sizes and characters. There were some that adopted all the army methods and had infantry, artillery, staffs, and the comforts of life. Others consisted solely of Cossack cavalry. There were also small scratch groups of foot and horse, and groups of peasants and landowners that remained unknown. A sacristan commanded one party which captured several hundred prisoners in the course of a month; and there was Vasilisa, the wife of a village elder, who slew hundreds of the French.

The partisan warfare flamed up most fiercely in the latter days of October. Its first period had passed: when the partisans themselves, amazed at their own boldness, feared every minute to be surrounded and captured by the French, and hid in the forests without unsaddling, hardly daring to dismount and always expecting to be pursued. By the end of October this kind of warfare had taken definite shape: it had become clear to all what could be ventured against the French and what could not. Now only the commanders of detachments with staffs, and moving according to rules at a distance from the French, still regarded many things as impossible. The small bands that had started their activities long before and had already observed the French closely considered things possible which the commanders of the big detachments did not dare to contemplate. The Cossacks and peasants who crept in among the French now considered everything possible.

On October 22, Denisov (who was one of the irregulars) was with his group at the height of the guerrilla enthusiasm. Since early morning he and his party had been on the move. All day long he had been watching from the forest that skirted the highroad a large French convoy of cavalry baggage and Russian prisoners separated from the rest of the army, which--as was learned from spies and prisoners--was moving under a strong escort to Smolensk. Besides Denisov and Dolokhov (who also led a small party and moved in Denisov's vicinity), the commanders of some large divisions with staffs also knew of this

convoy and, as Denisov expressed it, were sharpening their teeth for it. Two of the commanders of large parties--one a Pole and the other a German--sent invitations to Denisov almost simultaneously, requesting him to join up with their divisions to attack the convoy.

"No, bwother, I have gwown mustaches myself," said Denisov on reading these documents, and he wrote to the German that, despite his heartfelt desire to serve under so valiant and renowned a general, he had to forgo that pleasure because he was already under the command of the Polish general. To the Polish general he replied to the same effect, informing him that he was already under the command of the German.

Having arranged matters thus, Denisov and Dolokhov intended, without reporting matters to the higher command, to attack and seize that convoy with their own small forces. On October 22 it was moving from the village of Mikulino to that of Shamshevo. To the left of the road between Mikulino and Shamshevo there were large forests, extending in some places up to the road itself though in others a mile or more back from it. Through these forests Denisov and his party rode all day, sometimes keeping well back in them and sometimes coming to the very edge, but never losing sight of the moving French. That morning, Cossacks of Denisov's party had seized and carried off into the forest two wagons loaded with cavalry saddles, which had stuck in the mud not far from Mikulino where the forest ran close to the road. Since then, and until evening, the party had the movements of the French without attacking. It was necessary to let the French reach Shamshevo quietly without alarming them and then, after joining Dolokhov who was to come that evening to a consultation at a watchman's hut in the forest less than a mile from Shamshevo, to surprise the French at dawn, falling like an avalanche on their heads from two sides, and rout and capture them all at one blow.

In their rear, more than a mile from Mikulino where the forest came right up to the road, six Cossacks were posted to report if any fresh columns of French should show themselves.

Beyond Shamshevo, Dolokhov was to observe the road in the same way, to find out at what distance there were other French troops. They reckoned that the convoy had fifteen hundred men. Denisov had two hundred, and Dolokhov might have as many more, but the disparity of numbers did not deter Denisov. All that he now wanted to know was what troops these were and to learn that he had to capture a "tongue"--that is, a man from the enemy column. That morning's attack on the wagons had been made so hastily that the Frenchmen with the wagons had all been killed; only a little drummer boy had been taken alive, and as he was a straggler he could tell them nothing definite about the troops in that column.

Denisov considered it dangerous to make a second attack for fear of putting the whole column on the alert, so he sent Tikhon Shcherbaty, a peasant of his party, to Shamshevo to try and seize at least one of the French quartermasters who had been sent on in advance.

CHAPTER IV

It was a warm rainy autumn day. The sky and the horizon were both the color of muddy water. At times a sort of mist descended, and then suddenly heavy slanting rain came down.

Denisov in a felt cloak and a sheepskin cap from which the rain ran down was riding a thin thoroughbred horse with sunken sides. Like his horse, which turned its head and laid its ears back, he shrank from the driving rain and gazed anxiously before him. His thin face with its short, thick black beard looked angry.

Beside Denisov rode an esaul,* Denisov's fellow worker, also in felt cloak and sheepskin cap, and riding a large sleek Don horse.

*A captain of Cossacks.

Esaul Lovayski the Third was a tall man as straight as an arrow, pale-faced, fair-haired, with narrow light eyes and with calm self-satisfaction in his face and bearing. Though it was impossible to say in what the peculiarity of the horse and rider lay, yet at first glance at the esaul and Denisov one saw that the latter was wet and uncomfortable and was a man mounted on a horse, while looking at the esaul one saw that he was as comfortable and as much at ease as always and that he was not a man who had mounted a horse, but a man who was one with his horse, a being consequently possessed of twofold strength.

A little ahead of them walked a peasant guide, wet to the skin and wearing a gray peasant coat and a white knitted cap.

A little behind, on a poor, small, lean Kirghiz mount with an enormous tail and mane and a bleeding mouth, rode a young officer in a blue French overcoat.

Beside him rode an hussar, with a boy in a tattered French uniform and blue cap behind him on the crupper of his horse. The boy held on to the hussar with cold, red hands, and raising his eyebrows gazed about him with surprise. This was the French drummer boy captured that morning.

Behind them along the narrow, sodden, cutup forest road came hussars in threes and fours, and then Cossacks: some in felt cloaks, some in French greatcoats, and some with horsecloths over their heads. The horses, being drenched by the rain, all looked black whether chestnut or bay. Their necks, with their wet, close-clinging manes, looked strangely thin. Steam rose from them. Clothes, saddles, reins, were all wet, slippery, and sodden, like the ground and the fallen leaves that strewn the road. The men sat huddled up trying not to stir, so as to warm the water that had trickled to their bodies and not admit the fresh cold water that was leaking in under their seats, their knees, and at the back of their necks. In the midst of the outspread line of Cossacks two wagons, drawn by French horses and by saddled Cossack horses that had been hitched on in front, rumbled over the tree stumps and branches and splashed through the water that lay in the ruts.

Denisov's horse swerved aside to avoid a pool in the track and bumped his rider's knee against a tree.

"Oh, the devil!" exclaimed Denisov angrily, and showing his teeth he struck his horse three times with his whip, splashing himself and his comrades with mud.

Denisov was out of sorts both because of the rain and also from hunger (none of them had eaten anything since morning), and yet more because he still had no news from Dolokhov and the man sent to capture a "tongue" had not returned.

"There'll hardly be another such chance to fall on a transport as today. It's too risky to attack them by oneself, and if we put it off till another day one of the big guerrilla detachments will snatch the prey from under our noses," thought Denisov, continually peering forward, hoping to see a messenger from Dolokhov.

On coming to a path in the forest along which he could see far to the right, Denisov stopped.

"There's someone coming," said he.

The esaul looked in the direction Denisov indicated.

"There are two, an officer and a Cossack. But it is not

presupposable that it is the lieutenant colonel himself," said the esaul, who was fond of using words the Cossacks did not know.

The approaching riders having descended a decline were no longer visible, but they reappeared a few minutes later. In front, at a weary gallop and using his leather whip, rode an officer, disheveled and drenched, whose trousers had worked up to above his knees. Behind him, standing in the stirrups, trotted a Cossack. The officer, a very young lad with a broad rosy face and keen merry eyes, galloped up to Denisov and handed him a sodden envelope.

"From the general," said the officer. "Please excuse its not being quite dry."

Denisov, frowning, took the envelope and opened it.

"There, they kept telling us: 'It's dangerous, it's dangerous,'" said the officer, addressing the esaul while Denisov was reading the dispatch. "But Komarov and I"--he pointed to the Cossack--"were prepared. We have each of us two pistols.... But what's this?" he asked, noticing the French drummer boy. "A prisoner? You've already been in action? May I speak to him?"

"Wostov! Petya!" exclaimed Denisov, having run through the dispatch. "Why didn't you say who you were?" and turning with a smile he held out his hand to the lad.

The officer was Petya Rostov.

All the way Petya had been preparing himself to behave with Denisov as befitted a grownup man and an officer--without hinting at their previous acquaintance. But as soon as Denisov smiled at him Petya brightened up, blushed with pleasure, forgot the official manner he had been rehearsing, and began telling him how he had already been in a battle near Vyazma and how a certain hussar had distinguished himself there.

"Well, I am glad to see you," Denisov interrupted him, and his face again assumed its anxious expression.

"Michael Feoklitych," said he to the esaul, "this is again from that German, you know. He"--he indicated Petya--"is serving under him."

And Denisov told the esaul that the dispatch just delivered was a repetition of the German general's demand that he should join forces with him for an attack on the transport.

"If we don't take it tomowwow, he'll snatch it from under our

noses," he added.

While Denisov was talking to the esaul, Petya--abashed by Denisov's cold tone and supposing that it was due to the condition of his trousers--furtively tried to pull them down under his greatcoat so that no one should notice it, while maintaining as martial an air as possible.

"Will there be any orders, your honor?" he asked Denisov, holding his hand at the salute and resuming the game of adjutant and general for which he had prepared himself, "or shall I remain with your honor?"

"Orders?" Denisov repeated thoughtfully. "But can you stay till tomowwow?"

"Oh, please... May I stay with you?" cried Petya.

"But, just what did the genewal tell you? To weturn at once?" asked Denisov.

Petya blushed.

"He gave me no instructions. I think I could?" he returned, inquiringly.

"Well, all wight," said Denisov.

And turning to his men he directed a party to go on to the halting place arranged near the watchman's hut in the forest, and told the officer on the Kirghiz horse (who performed the duties of an adjutant) to go and find out where Dolokhov was and whether he would come that evening. Denisov himself intended going with the esaul and Petya to the edge of the forest where it reached out to Shamshevo, to have a look at the part of the French bivouac they were to attack next day.

"Well, old fellow," said he to the peasant guide, "lead us to Shamshevo."

Denisov, Petya, and the esaul, accompanied by some Cossacks and the hussar who had the prisoner, rode to the left across a ravine to the edge of the forest.

CHAPTER V

The rain had stopped, and only the mist was falling and drops from the trees. Denisov, the esaul, and Petya rode silently, following the peasant in the knitted cap who, stepping lightly with outturned toes and moving noiselessly in his bast shoes over the roots and wet leaves, silently led them to the edge of the forest.

He ascended an incline, stopped, looked about him, and advanced to where the screen of trees was less dense. On reaching a large oak tree that had not yet shed its leaves, he stopped and beckoned mysteriously to them with his hand.

Denisov and Petya rode up to him. From the spot where the peasant was standing they could see the French. Immediately beyond the forest, on a downward slope, lay a field of spring rye. To the right, beyond a steep ravine, was a small village and a landowner's house with a broken roof. In the village, in the house, in the garden, by the well, by the pond, over all the rising ground, and all along the road uphill from the bridge leading to the village, not more than five hundred yards away, crowds of men could be seen through the shimmering mist. Their un-Russian shouting at their horses which were straining uphill with the carts, and their calls to one another, could be clearly heard.

"Bwing the prisoner here," said Denisov in a low voice, not taking his eyes off the French.

A Cossack dismounted, lifted the boy down, and took him to Denisov. Pointing to the French troops, Denisov asked him what these and those of them were. The boy, thrusting his cold hands into his pockets and lifting his eyebrows, looked at Denisov in affright, but in spite of an evident desire to say all he knew gave confused answers, merely assenting to everything Denisov asked him. Denisov turned away from him frowning and addressed the esaul, conveying his own conjectures to him.

Petya, rapidly turning his head, looked now at the drummer boy, now at Denisov, now at the esaul, and now at the French in the village and along the road, trying not to miss anything of importance.

"Whether Dolokhov comes or not, we must seize it, eh?" said Denisov with a merry sparkle in his eyes.

"It is a very suitable spot," said the esaul.

"We'll send the infantwy down by the swamps," Denisov continued.

"They'll cweep up to the garden; you'll wide up fwom there with the

Cossacks"--he pointed to a spot in the forest beyond the village--"and I with my hussars from here. And at the signal shot..."

"The hollow is impassable--there's a swamp there," said the esaul.
"The horses would sink. We must ride round more to the left...."

While they were talking in undertones the crack of a shot sounded from the low ground by the pond, a puff of white smoke appeared, then another, and the sound of hundreds of seemingly merry French voices shouting together came up from the slope. For a moment Denisov and the esaul drew back. They were so near that they thought they were the cause of the firing and shouting. But the firing and shouting did not relate to them. Down below, a man wearing something red was running through the marsh. The French were evidently firing and shouting at him.

"Why, that's our Tikhon," said the esaul.

"So it is! It is!"

"The wascal!" said Denisov.

"He'll get away!" said the esaul, screwing up his eyes.

The man whom they called Tikhon, having run to the stream, plunged in so that the water splashed in the air, and, having disappeared for an instant, scrambled out on all fours, all black with the wet, and ran on. The French who had been pursuing him stopped.

"Smart, that!" said the esaul.

"What a beast!" said Denisov with his former look of vexation. "What has he been doing all this time?"

"Who is he?" asked Petya.

"He's our plastun. I sent him to capture a 'tongue.'"

"Oh, yes," said Petya, nodding at the first words Denisov uttered as if he understood it all, though he really did not understand anything of it.

Tikhon Shcherbaty was one of the most indispensable men in their band. He was a peasant from Pokrovsk, near the river Gzhat. When Denisov had come to Pokrovsk at the beginning of his operations and had as usual summoned the village elder and asked him what he knew about the French, the elder, as though shielding himself, had replied, as all village elders did, that he had neither seen nor heard anything

of them. But when Denisov explained that his purpose was to kill the French, and asked if no French had strayed that way, the elder replied that some "more-orderers" had really been at their village, but that Tikhon Shcherbaty was the only man who dealt with such matters. Denisov had Tikhon called and, having praised him for his activity, said a few words in the elder's presence about loyalty to the Tsar and the country and the hatred of the French that all sons of the fatherland should cherish.

"We don't do the French any harm," said Tikhon, evidently frightened by Denisov's words. "We only fooled about with the lads for fun, you know! We killed a score or so of 'more-orderers,' but we did no harm else..."

Next day when Denisov had left Pokrovsk, having quite forgotten about this peasant, it was reported to him that Tikhon had attached himself to their party and asked to be allowed to remain with it. Denisov gave orders to let him do so.

Tikhon, who at first did rough work, laying campfires, fetching water, flaying dead horses, and so on, soon showed a great liking and aptitude for partisan warfare. At night he would go out for booty and always brought back French clothing and weapons, and when told to would bring in French captives also. Denisov then relieved him from drudgery and began taking him with him when he went out on expeditions and had him enrolled among the Cossacks.

Tikhon did not like riding, and always went on foot, never lagging behind the cavalry. He was armed with a musketoon (which he carried rather as a joke), a pike and an ax, which latter he used as a wolf uses its teeth, with equal case picking fleas out of its fur or crunching thick bones. Tikhon with equal accuracy would split logs with blows at arm's length, or holding the head of the ax would cut thin little pegs or carve spoons. In Denisov's party he held a peculiar and exceptional position. When anything particularly difficult or nasty had to be done--to push a cart out of the mud with one's shoulders, pull a horse out of a swamp by its tail, skin it, slink in among the French, or walk more than thirty miles in a day--everybody pointed laughingly at Tikhon.

"It won't hurt that devil--he's as strong as a horse!" they said of him.

Once a Frenchman Tikhon was trying to capture fired a pistol at him and shot him in the fleshy part of the back. That wound (which Tikhon treated only with internal and external applications of vodka) was the subject of the liveliest jokes by the whole detachment--jokes in which Tikhon readily joined.

"Hallo, mate! Never again? Gave you a twist?" the Cossacks would banter him. And Tikhon, purposely writhing and making faces, pretended to be angry and swore at the French with the funniest curses. The only effect of this incident on Tikhon was that after being wounded he seldom brought in prisoners.

He was the bravest and most useful man in the party. No one found more opportunities for attacking, no one captured or killed more Frenchmen, and consequently he was made the buffoon of all the Cossacks and hussars and willingly accepted that role. Now he had been sent by Denisov overnight to Shamshevo to capture a "tongue." But whether because he had not been content to take only one Frenchman or because he had slept through the night, he had crept by day into some bushes right among the French and, as Denisov had witnessed from above, had been detected by them.

CHAPTER VI

After talking for some time with the esaul about next day's attack, which now, seeing how near they were to the French, he seemed to have definitely decided on, Denisov turned his horse and rode back.

"Now, my lad, we'll go and get dwy," he said to Petya.

As they approached the watchhouse Denisov stopped, peering into the forest. Among the trees a man with long legs and long, swinging arms, wearing a short jacket, bast shoes, and a Kazan hat, was approaching with long, light steps. He had a musketoone over his shoulder and an ax stuck in his girdle. When he espied Denisov he hastily threw something into the bushes, removed his sodden hat by its floppy brim, and approached his commander. It was Tikhon. His wrinkled and pockmarked face and narrow little eyes beamed with self-satisfied merriment. He lifted his head high and gazed at Denisov as if repressing a laugh.

"Well, where did you disappear to?" inquired Denisov.

"Where did I disappear to? I went to get Frenchmen," answered Tikhon boldly and hurriedly, in a husky but melodious bass voice.

"Why did you push yourself in there by daylight? You ass! Well,

why haven't you taken one?"

"Oh, I took one all right," said Tikhon.

"Where is he?"

"You see, I took him first thing at dawn," Tikhon continued, spreading out his flat feet with outturned toes in their bast shoes.

"I took him into the forest. Then I see he's no good and think I'll go and fetch a likelier one."

"You see?... What a wogue--it's just as I thought," said Denisov to the esaul. "Why didn't you bwing that one?"

"What was the good of bringing him?" Tikhon interrupted hastily and angrily--"that one wouldn't have done for you. As if I don't know what sort you want!"

"What a bwute you are!... Well?"

"I went for another one," Tikhon continued, "and I crept like this through the wood and lay down." (He suddenly lay down on his stomach with a supple movement to show how he had done it.) "One turned up and I grabbed him, like this." (He jumped up quickly and lightly.)

"Come along to the colonel," I said. He starts yelling, and suddenly there were four of them. They rushed at me with their little swords. So I went for them with my ax, this way: 'What are you up to?' says I. 'Christ be with you!'" shouted Tikhon, waving his arms with an angry scowl and throwing out his chest.

"Yes, we saw from the hill how you took to your heels through the puddles!" said the esaul, screwing up his glittering eyes.

Petya badly wanted to laugh, but noticed that they all refrained from laughing. He turned his eyes rapidly from Tikhon's face to the esaul's and Denisov's, unable to make out what it all meant.

"Don't play the fool!" said Denisov, coughing angrily. "Why didn't you bwing the first one?"

Tikhon scratched his back with one hand and his head with the other, then suddenly his whole face expanded into a beaming, foolish grin, disclosing a gap where he had lost a tooth (that was why he was called Shcherbaty--the gap-toothed). Denisov smiled, and Petya burst into a peal of merry laughter in which Tikhon himself joined.

"Oh, but he was a regular good-for-nothing," said Tikhon. "The clothes on him--poor stuff! How could I bring him? And so rude, your

honor! Why, he says: 'I'm a general's son myself, I won't go!' he says."

"You are a bwute!" said Denisov. "I wanted to question..."

"But I questioned him," said Tikhon. "He said he didn't know much. 'There are a lot of us,' he says, 'but all poor stuff--only soldiers in name,' he says. 'Shout loud at them,' he says, 'and you'll take them all,'" Tikhon concluded, looking cheerfully and resolutely into Denisov's eyes.

"I'll give you a hundwed sharp lashes--that'll teach you to play the fool!" said Denisov severely.

"But why are you angry?" remonstrated Tikhon, "just as if I'd never seen your Frenchmen! Only wait till it gets dark and I'll fetch you any of them you want--three if you like."

"Well, let's go," said Denisov, and rode all the way to the watchhouse in silence and frowning angrily.

Tikhon followed behind and Petya heard the Cossacks laughing with him and at him, about some pair of boots he had thrown into the bushes.

When the fit of laughter that had seized him at Tikhon's words and smile had passed and Petya realized for a moment that this Tikhon had killed a man, he felt uneasy. He looked round at the captive drummer boy and felt a pang in his heart. But this uneasiness lasted only a moment. He felt it necessary to hold his head higher, to brace himself, and to question the esaul with an air of importance about tomorrow's undertaking, that he might not be unworthy of the company in which he found himself.

The officer who had been sent to inquire met Denisov on the way with the news that Dolokhov was soon coming and that all was well with him.

Denisov at once cheered up and, calling Petya to him, said: "Well, tell me about yourself."

CHAPTER VII

Petya, having left his people after their departure from Moscow,

joined his regiment and was soon taken as orderly by a general commanding a large guerrilla detachment. From the time he received his commission, and especially since he had joined the active army and taken part in the battle of Vyazma, Petya had been in a constant state of blissful excitement at being grown-up and in a perpetual ecstatic hurry not to miss any chance to do something really heroic. He was highly delighted with what he saw and experienced in the army, but at the same time it always seemed to him that the really heroic exploits were being performed just where he did not happen to be. And he was always in a hurry to get where he was not.

When on the twenty-first of October his general expressed a wish to send somebody to Denisov's detachment, Petya begged so piteously to be sent that the general could not refuse. But when dispatching him he recalled Petya's mad action at the battle of Vyazma, where instead of riding by the road to the place to which he had been sent, he had galloped to the advanced line under the fire of the French and had there twice fired his pistol. So now the general explicitly forbade his taking part in any action whatever of Denisov's. That was why Petya had blushed and grown confused when Denisov asked him whether he could stay. Before they had ridden to the outskirts of the forest Petya had considered he must carry out his instructions strictly and return at once. But when he saw the French and saw Tikhon and learned that there would certainly be an attack that night, he decided, with the rapidity with which young people change their views, that the general, whom he had greatly respected till then, was a rubbishy German, that Denisov was a hero, the esaul a hero, and Tikhon a hero too, and that it would be shameful for him to leave them at a moment of difficulty.

It was already growing dusk when Denisov, Petya, and the esaul rode up to the watchhouse. In the twilight saddled horses could be seen, and Cossacks and hussars who had rigged up rough shelters in the glade and were kindling glowing fires in a hollow of the forest where the French could not see the smoke. In the passage of the small watchhouse a Cossack with sleeves rolled up was chopping some mutton. In the room three officers of Denisov's band were converting a door into a tabletop. Petya took off his wet clothes, gave them to be dried, and at once began helping the officers to fix up the dinner table.

In ten minutes the table was ready and a napkin spread on it. On the table were vodka, a flask of rum, white bread, roast mutton, and salt.

Sitting at table with the officers and tearing the fat savory mutton with his hands, down which the grease trickled, Petya was in an ecstatic childish state of love for all men, and consequently of confidence that others loved him in the same way.

"So then what do you think, Vasili Dmitrich?" said he to Denisov. "It's all right my staying a day with you?" And not waiting for a reply he answered his own question: "You see I was told to find out-well, I am finding out.... Only do let me into the very... into the chief... I don't want a reward... But I want..."

Petya clenched his teeth and looked around, throwing back his head and flourishing his arms.

"Into the vevy chief..." Denisov repeated with a smile.

"Only, please let me command something, so that I may really command..." Petya went on. "What would it be to you?... Oh, you want a knife?" he said, turning to an officer who wished to cut himself a piece of mutton.

And he handed him his clasp knife. The officer admired it.

"Please keep it. I have several like it," said Petya, blushing. "Heavens! I was quite forgetting!" he suddenly cried. "I have some raisins, fine ones; you know, seedless ones. We have a new sutler and he has such capital things. I bought ten pounds. I am used to something sweet. Would you like some?..." and Petya ran out into the passage to his Cossack and brought back some bags which contained about five pounds of raisins. "Have some, gentlemen, have some!"

"You want a coffeepot, don't you?" he asked the esaul. "I bought a capital one from our sutler! He has splendid things. And he's very honest, that's the chief thing. I'll be sure to send it to you. Or perhaps your flints are giving out, or are worn out--that happens sometimes, you know. I have brought some with me, here they are"- and he showed a bag--"a hundred flints. I bought them very cheap. Please take as many as you want, or all if you like...."

Then suddenly, dismayed lest he had said too much, Petya stopped and blushed.

He tried to remember whether he had not done anything else that was foolish. And running over the events of the day he remembered the French drummer boy. "It's capital for us here, but what of him? Where have they put him? Have they fed him? Haven't they hurt his feelings?" he thought. But having caught himself saying too much about the flints, he was now afraid to speak out.

"I might ask," he thought, "but they'll say: 'He's a boy himself and so he pities the boy.' I'll show them tomorrow whether I'm a boy. Will it seem odd if I ask?" Petya thought. "Well, never mind!" and

immediately, blushing and looking anxiously at the officers to see if they appeared ironical, he said:

"May I call in that boy who was taken prisoner and give him something to eat?... Perhaps..."

"Yes, he's a poor little fellow," said Denisov, who evidently saw nothing shameful in this reminder. "Call him in. His name is Vincent Bosse. Have him fetched."

"I'll call him," said Petya.

"Yes, yes, call him. A poor little fellow," Denisov repeated.

Petya was standing at the door when Denisov said this. He slipped in between the officers, came close to Denisov, and said:

"Let me kiss you, dear old fellow! Oh, how fine, how splendid!"

And having kissed Denisov he ran out of the hut.

"Bosse! Vincent!" Petya cried, stopping outside the door.

"Who do you want, sir?" asked a voice in the darkness.

Petya replied that he wanted the French lad who had been captured that day.

"Ah, Vesenny?" said a Cossack.

Vincent, the boy's name, had already been changed by the Cossacks into Vesenny (vernal) and into Vesenya by the peasants and soldiers. In both these adaptations the reference to spring (vesna) matched the impression made by the young lad.

"He is warming himself there by the bonfire. Ho, Vesenya! Vesenya!--Vesenny!" laughing voices were heard calling to one another in the darkness.

"He's a smart lad," said an hussar standing near Petya. "We gave him something to eat a while ago. He was awfully hungry!"

The sound of bare feet splashing through the mud was heard in the darkness, and the drummer boy came to the door.

"Ah, c'est vous!" said Petya. "Voulez-vous manger? N'ayez pas peur, on ne vous fera pas de mal,"* he added shyly and affectionately, touching the boy's hand. "Entrez, entrez."*[2]

*"Ah, it's you! Do you want something to eat? Don't be afraid, they won't hurt you."

*[2] "Come in, come in."

"Merci, monsieur,"* said the drummer boy in a trembling almost childish voice, and he began scraping his dirty feet on the threshold.

*"Thank you, sir."

There were many things Petya wanted to say to the drummer boy, but did not dare to. He stood irresolutely beside him in the passage. Then in the darkness he took the boy's hand and pressed it.

"Come in, come in!" he repeated in a gentle whisper. "Oh, what can I do for him?" he thought, and opening the door he let the boy pass in first.

When the boy had entered the hut, Petya sat down at a distance from him, considering it beneath his dignity to pay attention to him. But he fingered the money in his pocket and wondered whether it would seem ridiculous to give some to the drummer boy.

CHAPTER VIII

The arrival of Dolokhov diverted Petya's attention from the drummer boy, to whom Denisov had had some mutton and vodka given, and whom he had had dressed in a Russian coat so that he might be kept with their band and not sent away with the other prisoners. Petya had heard in the army many stories of Dolokhov's extraordinary bravery and of his cruelty to the French, so from the moment he entered the hut Petya did not take his eyes from him, but braced himself up more and more and held his head high, that he might not be unworthy even of such company.

Dolokhov's appearance amazed Petya by its simplicity.

Denisov wore a Cossack coat, had a beard, had an icon of Nicholas

the Wonder-Worker on his breast, and his way of speaking and everything he did indicated his unusual position. But Dolokhov, who in Moscow had worn a Persian costume, had now the appearance of a most correct officer of the Guards. He was clean-shaven and wore a Guardsman's padded coat with an Order of St. George at his buttonhole and a plain forage cap set straight on his head. He took off his wet felt cloak in a corner of the room, and without greeting anyone went up to Denisov and began questioning him about the matter in hand. Denisov told him of the designs the large detachments had on the transport, of the message Petya had brought, and his own replies to both generals. Then he told him all he knew of the French detachment.

"That's so. But we must know what troops they are and their numbers," said Dolokhov. "It will be necessary to go there. We can't start the affair without knowing for certain how many there are. I like to work accurately. Here now--wouldn't one of these gentlemen like to ride over to the French camp with me? I have brought a spare uniform."

"I, I... I'll go with you!" cried Petya.

"There's no need for you to go at all," said Denisov, addressing Dolokhov, "and as for him, I won't let him go on any account."

"I like that!" exclaimed Petya. "Why shouldn't I go?"

"Because it's useless."

"Well, you must excuse me, because... because... I shall go, and that's all. You'll take me, won't you?" he said, turning to Dolokhov.

"Why not?" Dolokhov answered absently, scrutinizing the face of the French drummer boy. "Have you had that youngster with you long?" he asked Denisov.

"He was taken today but he knows nothing. I'm keeping him with me."

"Yes, and where do you put the others?" inquired Dolokhov.

"Where? I send them away and take a receipt for them," shouted Denisov, suddenly flushing. "And I say boldly that I have not a single man's life on my conscience. Would it be difficult for you to send thirty or three hundred men to town under escort, instead of staining--I speak bluntly--staining the honor of a soldier?"

"That kind of amiable talk would be suitable from this young count of sixteen," said Dolokhov with cold irony, "but it's time for you

to drop it."

"Why, I've not said anything! I only say that I'll certainly go with you," said Petya shyly.

"But for you and me, old fellow, it's time to drop these amenities," continued Dolokhov, as if he found particular pleasure in speaking of this subject which irritated Denisov. "Now, why have you kept this lad?" he went on, swaying his head. "Because you are sorry for him! Don't we know those 'receipts' of yours? You send a hundred men away, and thirty get there. The rest either starve or get killed. So isn't it all the same not to send them?"

The esaul, screwing up his light-colored eyes, nodded approvingly.

"That's not the point. I'm not going to discuss the matter. I do not wish to take it on my conscience. You say they'll die. All wight. Only not by my fault!"

Dolokhov began laughing.

"Who has told them not to capture me these twenty times over? But if they did catch me they'd string me up to an aspen tree, and with all your chivalry just the same." He paused. "However, we must get to work. Tell the Cossack to fetch my kit. I have two French uniforms in it. Well, are you coming with me?" he asked Petya.

"I? Yes, yes, certainly!" cried Petya, blushing almost to tears and glancing at Denisov.

While Dolokhov had been disputing with Denisov what should be done with prisoners, Petya had once more felt awkward and restless; but again he had no time to grasp fully what they were talking about. "If grown-up, distinguished men think so, it must be necessary and right," thought he. "But above all Denisov must not dare to imagine that I'll obey him and that he can order me about. I will certainly go to the French camp with Dolokhov. If he can, so can I!"

And to all Denisov's persuasions, Petya replied that he too was accustomed to do everything accurately and not just anyhow, and that he never considered personal danger.

"For you'll admit that if we don't know for sure how many of them there are... hundreds of lives may depend on it, while there are only two of us. Besides, I want to go very much and certainly will go, so don't hinder me," said he. "It will only make things worse..."

CHAPTER IX

Having put on French greatcoats and shakos, Petya and Dolokhov rode to the clearing from which Denisov had reconnoitered the French camp, and emerging from the forest in pitch darkness they descended into the hollow. On reaching the bottom, Dolokhov told the Cossacks accompanying him to await him there and rode on at a quick trot along the road to the bridge. Petya, his heart in his mouth with excitement, rode by his side.

"If we're caught, I won't be taken alive! I have a pistol," whispered he.

"Don't talk Russian," said Dolokhov in a hurried whisper, and at that very moment they heard through the darkness the challenge: "Qui vive?"* and the click of a musket.

*"Who goes there?"

The blood rushed to Petya's face and he grasped his pistol.

"Lanciers du 6-me,"* replied Dolokhov, neither hastening nor slackening his horse's pace.

*"Lancers of the 6th Regiment."

The black figure of a sentinel stood on the bridge.

"Mot d'ordre."*

*"Password."

Dolokhov reined in his horse and advanced at a walk.

"Dites donc, le colonel Gerard est ici?"* he asked.

*"Tell me, is Colonel Gerard here?"

"Mot d'ordre," repeated the sentinel, barring the way and not replying.

"Quand un officier fait sa ronde, les sentinelles ne demandent pas le mot d'ordre..." cried Dolokhov suddenly flaring up and riding straight at the sentinel. "Je vous demande si le colonel est ici."*

*"When an officer is making his round, sentinels don't ask him for the password.... I am asking you if the colonel is here."

And without waiting for an answer from the sentinel, who had stepped aside, Dolokhov rode up the incline at a walk.

Noticing the black outline of a man crossing the road, Dolokhov stopped him and inquired where the commander and officers were. The man, a soldier with a sack over his shoulder, stopped, came close up to Dolokhov's horse, touched it with his hand, and explained simply and in a friendly way that the commander and the officers were higher up the hill to the right in the courtyard of the farm, as he called the landowner's house.

Having ridden up the road, on both sides of which French talk could be heard around the campfires, Dolokhov turned into the courtyard of the landowner's house. Having ridden in, he dismounted and approached a big blazing campfire, around which sat several men talking noisily. Something was boiling in a small cauldron at the edge of the fire and a soldier in a peaked cap and blue overcoat, lit up by the fire, was kneeling beside it stirring its contents with a ramrod.

"Oh, he's a hard nut to crack," said one of the officers who was sitting in the shadow at the other side of the fire.

"He'll make them get a move on, those fellows!" said another, laughing.

Both fell silent, peering out through the darkness at the sound of Dolokhov's and Petya's steps as they advanced to the fire leading their horses.

"Bonjour, messieurs!"* said Dolokhov loudly and clearly.

*"Good day, gentlemen."

There was a stir among the officers in the shadow beyond the fire, and one tall, long-necked officer, walking round the fire, came up to Dolokhov.

"Is that you, Clement?" he asked. "Where the devil...?" But, noticing his mistake, he broke off short and, with a frown, greeted Dolokhov as a stranger, asking what he could do for him.

Dolokhov said that he and his companion were trying to overtake their regiment, and addressing the company in general asked whether they knew anything of the 6th Regiment. None of them knew anything, and Petya thought the officers were beginning to look at him and Dolokhov with hostility and suspicion. For some seconds all were silent.

"If you were counting on the evening soup, you have come too late," said a voice from behind the fire with a repressed laugh.

Dolokhov replied that they were not hungry and must push on farther that night.

He handed the horses over to the soldier who was stirring the pot and squatted down on his heels by the fire beside the officer with the long neck. That officer did not take his eyes from Dolokhov and again asked to what regiment he belonged. Dolokhov, as if he had not heard the question, did not reply, but lighting a short French pipe which he took from his pocket began asking the officer in how far the road before them was safe from Cossacks.

"Those brigands are everywhere," replied an officer from behind the fire.

Dolokhov remarked that the Cossacks were a danger only to stragglers such as his companion and himself, "but probably they would not dare to attack large detachments?" he added inquiringly. No one replied.

"Well, now he'll come away," Petya thought every moment as he stood by the campfire listening to the talk.

But Dolokhov restarted the conversation which had dropped and began putting direct questions as to how many men there were in the battalion, how many battalions, and how many prisoners. Asking about the Russian prisoners with that detachment, Dolokhov said:

"A horrid business dragging these corpses about with one! It would be better to shoot such rabble," and burst into loud laughter, so strange that Petya thought the French would immediately detect their

disguise, and involuntarily took a step back from the campfire.

No one replied a word to Dolokhov's laughter, and a French officer whom they could not see (he lay wrapped in a greatcoat) rose and whispered something to a companion. Dolokhov got up and called to the soldier who was holding their horses.

"Will they bring our horses or not?" thought Petya, instinctively drawing nearer to Dolokhov.

The horses were brought.

"Good evening, gentlemen," said Dolokhov.

Petya wished to say "Good night" but could not utter a word. The officers were whispering together. Dolokhov was a long time mounting his horse which would not stand still, then he rode out of the yard at a footpace. Petya rode beside him, longing to look round to see whether or no the French were running after them, but not daring to.

Coming out onto the road Dolokhov did not ride back across the open country, but through the village. At one spot he stopped and listened. "Do you hear?" he asked. Petya recognized the sound of Russian voices and saw the dark figures of Russian prisoners round their campfires. When they had descended to the bridge Petya and Dolokhov rode past the sentinel, who without saying a word paced morosely up and down it, then they descended into the hollow where the Cossacks awaited them.

"Well now, good-by. Tell Denisov, 'at the first shot at daybreak,'" said Dolokhov and was about to ride away, but Petya seized hold of him.

"Really!" he cried, "you are such a hero! Oh, how fine, how splendid! How I love you!"

"All right, all right!" said Dolokhov. But Petya did not let go of him and Dolokhov saw through the gloom that Petya was bending toward him and wanted to kiss him. Dolokhov kissed him, laughed, turned his horse, and vanished into the darkness.

CHAPTER X

Having returned to the watchman's hut, Petya found Denisov in the passage. He was awaiting Petya's return in a state of agitation, anxiety, and self-reproach for having let him go.

"Thank God!" he exclaimed. "Yes, thank God!" he repeated, listening to Petya's rapturous account. "But, devil take you, I haven't slept because of you! Well, thank God. Now lie down. We can still get a nap before morning."

"But... no," said Petya, "I don't want to sleep yet. Besides I know myself, if I fall asleep it's finished. And then I am used to not sleeping before a battle."

He sat awhile in the hut joyfully recalling the details of his expedition and vividly picturing to himself what would happen next day.

Then, noticing that Denisov was asleep, he rose and went out of doors.

It was still quite dark outside. The rain was over, but drops were still falling from the trees. Near the watchman's hut the black shapes of the Cossacks' shanties and of horses tethered together could be seen. Behind the hut the dark shapes of the two wagons with their horses beside them were discernible, and in the hollow the dying campfire gleamed red. Not all the Cossacks and hussars were asleep; here and there, amid the sounds of falling drops and the munching of the horses near by, could be heard low voices which seemed to be whispering.

Petya came out, peered into the darkness, and went up to the wagons. Someone was snoring under them, and around them stood saddled horses munching their oats. In the dark Petya recognized his own horse, which he called "Karabakh" though it was of Ukrainian breed, and went up to it.

"Well, Karabakh! We'll do some service tomorrow," said he, sniffing its nostrils and kissing it.

"Why aren't you asleep, sir?" said a Cossack who was sitting under a wagon.

"No, ah... Likhachev--isn't that your name? Do you know I have only just come back! We've been into the French camp."

And Petya gave the Cossack a detailed account not only of his ride but also of his object, and why he considered it better to risk his life than to act "just anyhow."

"Well, you should get some sleep now," said the Cossack.

"No, I am used to this," said Petya. "I say, aren't the flints in your pistols worn out? I brought some with me. Don't you want any? You can have some."

The Cossack bent forward from under the wagon to get a closer look at Petya.

"Because I am accustomed to doing everything accurately," said Petya. "Some fellows do things just anyhow, without preparation, and then they're sorry for it afterwards. I don't like that."

"Just so," said the Cossack.

"Oh yes, another thing! Please, my dear fellow, will you sharpen my saber for me? It's got bl..." (Petya feared to tell a lie, and the saber never had been sharpened.) "Can you do it?"

"Of course I can."

Likhachev got up, rummaged in his pack, and soon Petya heard the warlike sound of steel on whetstone. He climbed onto the wagon and sat on its edge. The Cossack was sharpening the saber under the wagon.

"I say! Are the lads asleep?" asked Petya.

"Some are, and some aren't--like us."

"Well, and that boy?"

"Vesenny? Oh, he's thrown himself down there in the passage. Fast asleep after his fright. He was that glad!"

After that Petya remained silent for a long time, listening to the sounds. He heard footsteps in the darkness and a black figure appeared.

"What are you sharpening?" asked a man coming up to the wagon.

"Why, this gentleman's saber."

"That's right," said the man, whom Petya took to be an hussar.

"Was the cup left here?"

"There, by the wheel!"

The hussar took the cup.

"It must be daylight soon," said he, yawning, and went away.

Petya ought to have known that he was in a forest with Denisov's guerrilla band, less than a mile from the road, sitting on a wagon captured from the French beside which horses were tethered, that under it Likhachev was sitting sharpening a saber for him, that the big dark blotch to the right was the watchman's hut, and the red blotch below to the left was the dying embers of a campfire, that the man who had come for the cup was an hussar who wanted a drink; but he neither knew nor waited to know anything of all this. He was in a fairy kingdom where nothing resembled reality. The big dark blotch might really be the watchman's hut or it might be a cavern leading to the very depths of the earth. Perhaps the red spot was a fire, or it might be the eye of an enormous monster. Perhaps he was really sitting on a wagon, but it might very well be that he was not sitting on a wagon but on a terribly high tower from which, if he fell, he would have to fall for a whole day or a whole month, or go on falling and never reach the bottom. Perhaps it was just the Cossack, Likhachev, who was sitting under the wagon, but it might be the kindest, bravest, most wonderful, most splendid man in the world, whom no one knew of. It might really have been that the hussar came for water and went back into the hollow, but perhaps he had simply vanished--disappeared altogether and dissolved into nothingness.

Nothing Petya could have seen now would have surprised him. He was in a fairy kingdom where everything was possible.

He looked up at the sky. And the sky was a fairy realm like the earth. It was clearing, and over the tops of the trees clouds were swiftly sailing as if unveiling the stars. Sometimes it looked as if the clouds were passing, and a clear black sky appeared. Sometimes it seemed as if the black spaces were clouds. Sometimes the sky seemed to be rising high, high overhead, and then it seemed to sink so low that one could touch it with one's hand.

Petya's eyes began to close and he swayed a little.

The trees were dripping. Quiet talking was heard. The horses neighed and jostled one another. Someone snored.

"Ozheg-zheg, Ozheg-zheg..." hissed the saber against the whetstone, and suddenly Petya heard an harmonious orchestra playing some unknown, sweetly solemn hymn. Petya was as musical as Natasha and more so than Nicholas, but had never learned music or thought about it, and so the melody that unexpectedly came to his mind seemed to him

particularly fresh and attractive. The music became more and more audible. The melody grew and passed from one instrument to another. And what was played was a fugue--though Petya had not the least conception of what a fugue is. Each instrument--now resembling a violin and now a horn, but better and clearer than violin or horn--played its own part, and before it had finished the melody merged with another instrument that began almost the same air, and then with a third and a fourth; and they all blended into one and again became separate and again blended, now into solemn church music, now into something dazzlingly brilliant and triumphant.

"Oh--why, that was in a dream!" Petya said to himself, as he lurched forward. "It's in my ears. But perhaps it's music of my own. Well, go on, my music! Now!..."

He closed his eyes, and, from all sides as if from a distance, sounds fluttered, grew into harmonies, separated, blended, and again all mingled into the same sweet and solemn hymn. "Oh, this is delightful! As much as I like and as I like!" said Petya to himself. He tried to conduct that enormous orchestra.

"Now softly, softly die away!" and the sounds obeyed him. "Now fuller, more joyful. Still more and more joyful!" And from an unknown depth rose increasingly triumphant sounds. "Now voices join in!" ordered Petya. And at first from afar he heard men's voices and then women's. The voices grew in harmonious triumphant strength, and Petya listened to their surpassing beauty in awe and joy.

With a solemn triumphal march there mingled a song, the drip from the trees, and the hissing of the saber, "Ozheg-zheg-zheg..." and again the horses jostled one another and neighed, not disturbing the choir but joining in it.

Petya did not know how long this lasted: he enjoyed himself all the time, wondered at his enjoyment and regretted that there was no one to share it. He was awakened by Likhachev's kindly voice.

"It's ready, your honor; you can split a Frenchman in half with it!"

Petya woke up.

"It's getting light, it's really getting light!" he exclaimed.

The horses that had previously been invisible could now be seen to their very tails, and a watery light showed itself through the bare branches. Petya shook himself, jumped up, took a ruble from his pocket and gave it to Likhachev; then he flourished the saber, tested it, and sheathed it. The Cossacks were untying their horses and tightening

their saddle girths.

"And here's the commander," said Likhachev.

Denisov came out of the watchman's hut and, having called Petya, gave orders to get ready.

CHAPTER XI

The men rapidly picked out their horses in the semidarkness, tightened their saddle girths, and formed companies. Denisov stood by the watchman's hut giving final orders. The infantry of the detachment passed along the road and quickly disappeared amid the trees in the mist of early dawn, hundreds of feet splashing through the mud. The esaul gave some orders to his men. Petya held his horse by the bridle, impatiently awaiting the order to mount. His face, having been bathed in cold water, was all aglow, and his eyes were particularly brilliant. Cold shivers ran down his spine and his whole body pulsed rhythmically.

"Well, is ev'wything weady?" asked Denisov. "Bwing the horses."

The horses were brought. Denisov was angry with the Cossack because the saddle girths were too slack, reproved him, and mounted. Petya put his foot in the stirrup. His horse by habit made as if to nip his leg, but Petya leaped quickly into the saddle unconscious of his own weight and, turning to look at the hussars starting in the darkness behind him, rode up to Denisov.

"Vasili Dmitrich, entrust me with some commission! Please... for God's sake...!" said he.

Denisov seemed to have forgotten Petya's very existence. He turned to glance at him.

"I ask one thing of you," he said sternly, "to obey me and not shove yourself forward anywhere."

He did not say another word to Petya but rode in silence all the way. When they had come to the edge of the forest it was noticeably growing light over the field. Denisov talked in whispers with the esaul and the Cossacks rode past Petya and Denisov. When they had all ridden by, Denisov touched his horse and rode down the hill. Slipping onto their haunches and sliding, the horses descended with

their riders into the ravine. Petya rode beside Denisov, the pulsation of his body constantly increasing. It was getting lighter and lighter, but the mist still hid distant objects. Having reached the valley, Denisov looked back and nodded to a Cossack beside him.

"The signal!" said he.

The Cossack raised his arm and a shot rang out. In an instant the tramp of horses galloping forward was heard, shouts came from various sides, and then more shots.

At the first sound of trampling hoofs and shouting, Petya lashed his horse and loosening his rein galloped forward, not heeding Denisov who shouted at him. It seemed to Petya that at the moment the shot was fired it suddenly became as bright as noon. He galloped to the bridge. Cossacks were galloping along the road in front of him. On the bridge he collided with a Cossack who had fallen behind, but he galloped on. In front of him soldiers, probably Frenchmen, were running from right to left across the road. One of them fell in the mud under his horse's feet.

Cossacks were crowding about a hut, busy with something. From the midst of that crowd terrible screams arose. Petya galloped up, and the first thing he saw was the pale face and trembling jaw of a Frenchman, clutching the handle of a lance that had been aimed at him.

"Hurrah!... Lads!... ours!" shouted Petya, and giving rein to his excited horse he galloped forward along the village street.

He could hear shooting ahead of him. Cossacks, hussars, and ragged Russian prisoners, who had come running from both sides of the road, were shouting something loudly and incoherently. A gallant-looking Frenchman, in a blue overcoat, capless, and with a frowning red face, had been defending himself against the hussars. When Petya galloped up the Frenchman had already fallen. "Too late again!" flashed through Petya's mind and he galloped on to the place from which the rapid firing could be heard. The shots came from the yard of the landowner's house he had visited the night before with Dolokhov. The French were making a stand there behind a wattle fence in a garden thickly overgrown with bushes and were firing at the Cossacks who crowded at the gateway. Through the smoke, as he approached the gate, Petya saw Dolokhov, whose face was of a pale-greenish tint, shouting to his men. "Go round! Wait for the infantry!" he exclaimed as Petya rode up to him.

"Wait?... Hurrah-ah-ah!" shouted Petya, and without pausing a moment galloped to the place whence came the sounds of firing and where the smoke was thickest.

A volley was heard, and some bullets whistled past, while others plashed against something. The Cossacks and Dolokhov galloped after Petya into the gateway of the courtyard. In the dense wavering smoke some of the French threw down their arms and ran out of the bushes to meet the Cossacks, while others ran down the hill toward the pond. Petya was galloping along the courtyard, but instead of holding the reins he waved both his arms about rapidly and strangely, slipping farther and farther to one side in his saddle. His horse, having galloped up to a campfire that was smoldering in the morning light, stopped suddenly, and Petya fell heavily on to the wet ground. The Cossacks saw that his arms and legs jerked rapidly though his head was quite motionless. A bullet had pierced his skull.

After speaking to the senior French officer, who came out of the house with a white handkerchief tied to his sword and announced that they surrendered, Dolokhov dismounted and went up to Petya, who lay motionless with outstretched arms.

"Done for!" he said with a frown, and went to the gate to meet Denisov who was riding toward him.

"Killed?" cried Denisov, recognizing from a distance the unmistakably lifeless attitude--very familiar to him--in which Petya's body was lying.

"Done for!" repeated Dolokhov as if the utterance of these words afforded him pleasure, and he went quickly up to the prisoners, who were surrounded by Cossacks who had hurried up. "We won't take them!" he called out to Denisov.

Denisov did not reply; he rode up to Petya, dismounted, and with trembling hands turned toward himself the bloodstained, mud-bespattered face which had already gone white.

"I am used to something sweet. Raisins, fine ones... take them all!" he recalled Petya's words. And the Cossacks looked round in surprise at the sound, like the yelp of a dog, with which Denisov turned away, walked to the wattle fence, and seized hold of it.

Among the Russian prisoners rescued by Denisov and Dolokhov was Pierre Bezukhov.

CHAPTER XII

During the whole of their march from Moscow no fresh orders had been issued by the French authorities concerning the party of prisoners among whom was Pierre. On the twenty-second of October that party was no longer with the same troops and baggage trains with which it had left Moscow. Half the wagons laden with hardtack that had traveled the first stages with them had been captured by Cossacks, the other half had gone on ahead. Not one of those dismounted cavalymen who had marched in front of the prisoners was left; they had all disappeared. The artillery the prisoners had seen in front of them during the first days was now replaced by Marshal Junot's enormous baggage train, convoyed by Westphalians. Behind the prisoners came a cavalry baggage train.

From Vyazma onwards the French army, which had till then moved in three columns, went on as a single group. The symptoms of disorder that Pierre had noticed at their first halting place after leaving Moscow had now reached the utmost limit.

The road along which they moved was bordered on both sides by dead horses; ragged men who had fallen behind from various regiments continually changed about, now joining the moving column, now again lagging behind it.

Several times during the march false alarms had been given and the soldiers of the escort had raised their muskets, fired, and run headlong, crushing one another, but had afterwards reassembled and abused each other for their causeless panic.

These three groups traveling together--the cavalry stores, the convoy of prisoners, and Junot's baggage train--still constituted a separate and united whole, though each of the groups was rapidly melting away.

Of the artillery baggage train which had consisted of a hundred and twenty wagons, not more than sixty now remained; the rest had been captured or left behind. Some of Junot's wagons also had been captured or abandoned. Three wagons had been raided and robbed by stragglers from Davout's corps. From the talk of the Germans Pierre learned that a larger guard had been allotted to that baggage train than to the prisoners, and that one of their comrades, a German soldier, had been shot by the marshal's own order because a silver spoon belonging to the marshal had been found in his possession.

The group of prisoners had melted away most of all. Of the three hundred and thirty men who had set out from Moscow fewer than a hundred now remained. The prisoners were more burdensome to the escort than even the cavalry saddles or Junot's baggage. They understood that

the saddles and Junot's spoon might be of some use, but that cold and hungry soldiers should have to stand and guard equally cold and hungry Russians who froze and lagged behind on the road (in which case the order was to shoot them) was not merely incomprehensible but revolting. And the escort, as if afraid, in the grievous condition they themselves were in, of giving way to the pity they felt for the prisoners and so rendering their own plight still worse, treated them with particular moroseness and severity.

At Dorogobuzh while the soldiers of the convoy, after locking the prisoners in a stable, had gone off to pillage their own stores, several of the soldier prisoners tunneled under the wall and ran away, but were recaptured by the French and shot.

The arrangement adopted when they started, that the officer prisoners should be kept separate from the rest, had long since been abandoned. All who could walk went together, and after the third stage Pierre had rejoined Karataev and the gray-blue bandy-legged dog that had chosen Karataev for its master.

On the third day after leaving Moscow Karataev again fell ill with the fever he had suffered from in the hospital in Moscow, and as he grew gradually weaker Pierre kept away from him. Pierre did not know why, but since Karataev had begun to grow weaker it had cost him an effort to go near him. When he did so and heard the subdued moaning with which Karataev generally lay down at the halting places, and when he smelled the odor emanating from him which was now stronger than before, Pierre moved farther away and did not think about him.

While imprisoned in the shed Pierre had learned not with his intellect but with his whole being, by life itself, that man is created for happiness, that happiness is within him, in the satisfaction of simple human needs, and that all unhappiness arises not from privation but from superfluity. And now during these last three weeks of the march he had learned still another new, consolatory truth--that nothing in this world is terrible. He had learned that as there is no condition in which man can be happy and entirely free, so there is no condition in which he need be unhappy and lack freedom. He learned that suffering and freedom have their limits and that those limits are very near together; that the person in a bed of roses with one crumpled petal suffered as keenly as he now, sleeping on the bare damp earth with one side growing chilled while the other was warming; and that when he had put on tight dancing shoes he had suffered just as he did now when he walked with bare feet that were covered with sores--his footgear having long since fallen to pieces. He discovered that when he had married his wife--of his own free will as it had seemed to him--he had been no more free than now when they locked him up at night in a stable. Of all that he himself

subsequently termed his sufferings, but which at the time he scarcely felt, the worst was the state of his bare, raw, and scab-covered feet. (The horseflesh was appetizing and nourishing, the saltpeter flavor of the gunpowder they used instead of salt was even pleasant; there was no great cold, it was always warm walking in the daytime, and at night there were the campfires; the lice that devoured him warmed his body.) The one thing that was at first hard to bear was his feet.

After the second day's march Pierre, having examined his feet by the campfire, thought it would be impossible to walk on them; but when everybody got up he went along, limping, and, when he had warmed up, walked without feeling the pain, though at night his feet were more terrible to look at than before. However, he did not look at them now, but thought of other things.

Only now did Pierre realize the full strength of life in man and the saving power he has of transferring his attention from one thing to another, which is like the safety valve of a boiler that allows superfluous steam to blow off when the pressure exceeds a certain limit.

He did not see and did not hear how they shot the prisoners who lagged behind, though more than a hundred perished in that way. He did not think of Karataev who grew weaker every day and evidently would soon have to share that fate. Still less did Pierre think about himself. The harder his position became and the more terrible the future, the more independent of that position in which he found himself were the joyful and comforting thoughts, memories, and imaginings that came to him.

CHAPTER XIII

At midday on the twenty-second of October Pierre was going uphill along the muddy, slippery road, looking at his feet and at the roughness of the way. Occasionally he glanced at the familiar crowd around him and then again at his feet. The former and the latter were alike familiar and his own. The blue-gray bandy legged dog ran merrily along the side of the road, sometimes in proof of its agility and self-satisfaction lifting one hind leg and hopping along on three, and then again going on all four and rushing to bark at the crows that sat on the carrion. The dog was merrier and sleeker than it had been in Moscow. All around lay the flesh of different

animals--from men to horses--in various stages of decomposition; and as the wolves were kept off by the passing men the dog could eat all it wanted.

It had been raining since morning and had seemed as if at any moment it might cease and the sky clear, but after a short break it began raining harder than before. The saturated road no longer absorbed the water, which ran along the ruts in streams.

Pierre walked along, looking from side to side, counting his steps in threes, and reckoning them off on his fingers. Mentally addressing the rain, he repeated: "Now then, now then, go on! Pelt harder!"

It seemed to him that he was thinking of nothing, but far down and deep within him his soul was occupied with something important and comforting. This something was a most subtle spiritual deduction from a conversation with Karataev the day before.

At their yesterday's halting place, feeling chilly by a dying campfire, Pierre had got up and gone to the next one, which was burning better. There Platon Karataev was sitting covered up--head and all--with his greatcoat as if it were a vestment, telling the soldiers in his effective and pleasant though now feeble voice a story Pierre knew. It was already past midnight, the hour when Karataev was usually free of his fever and particularly lively. When Pierre reached the fire and heard Platon's voice enfeebled by illness, and saw his pathetic face brightly lit up by the blaze, he felt a painful prick at his heart. His feeling of pity for this man frightened him and he wished to go away, but there was no other fire, and Pierre sat down, trying not to look at Platon.

"Well, how are you?" he asked.

"How am I? If we grumble at sickness, God won't grant us death," replied Platon, and at once resumed the story he had begun.

"And so, brother," he continued, with a smile on his pale emaciated face and a particularly happy light in his eyes, "you see, brother..."

Pierre had long been familiar with that story. Karataev had told it to him alone some half-dozen times and always with a specially joyful emotion. But well as he knew it, Pierre now listened to that tale as to something new, and the quiet rapture Karataev evidently felt as he told it communicated itself also to Pierre. The story was of an old merchant who lived a good and God-fearing life with his family, and who went once to the Nizhni fair with a companion--a

rich merchant.

Having put up at an inn they both went to sleep, and next morning his companion was found robbed and with his throat cut. A bloodstained knife was found under the old merchant's pillow. He was tried, knouted, and his nostrils having been torn off, "all in due form" as Karataev put it, he was sent to hard labor in Siberia.

"And so, brother" (it was at this point that Pierre came up), "ten years or more passed by. The old man was living as a convict, submitting as he should and doing no wrong. Only he prayed to God for death. Well, one night the convicts were gathered just as we are, with the old man among them. And they began telling what each was suffering for, and how they had sinned against God. One told how he had taken a life, another had taken two, a third had set a house on fire, while another had simply been a vagrant and had done nothing. So they asked the old man: 'What are you being punished for, Daddy?'--'I, my dear brothers,' said he, 'am being punished for my own and other men's sins. But I have not killed anyone or taken anything that was not mine, but have only helped my poorer brothers. I was a merchant, my dear brothers, and had much property. 'And he went on to tell them all about it in due order. 'I don't grieve for myself,' he says, 'God, it seems, has chastened me. Only I am sorry for my old wife and the children,' and the old man began to weep. Now it happened that in the group was the very man who had killed the other merchant. 'Where did it happen, Daddy?' he said. 'When, and in what month?' He asked all about it and his heart began to ache. So he comes up to the old man like this, and falls down at his feet! 'You are perishing because of me, Daddy,' he says. 'It's quite true, lads, that this man,' he says, 'is being tortured innocently and for nothing! I,' he says, 'did that deed, and I put the knife under your head while you were asleep. Forgive me, Daddy,' he says, 'for Christ's sake!'"

Karataev paused, smiling joyously as he gazed into the fire, and he drew the logs together.

"And the old man said, 'God will forgive you, we are all sinners in His sight. I suffer for my own sins,' and he wept bitter tears. Well, and what do you think, dear friends?" Karataev continued, his face brightening more and more with a rapturous smile as if what he now had to tell contained the chief charm and the whole meaning of his story: "What do you think, dear fellows? That murderer confessed to the authorities. 'I have taken six lives,' he says (he was a great sinner), 'but what I am most sorry for is this old man. Don't let him suffer because of me.' So he confessed and it was all written down and the papers sent off in due form. The place was a long way off, and while they were judging, what with one thing and another, filling in the papers all in due form--the authorities I mean--time passed. The

affair reached the Tsar. After a while the Tsar's decree came: to set the merchant free and give him a compensation that had been awarded. The paper arrived and they began to look for the old man. 'Where is the old man who has been suffering innocently and in vain? A paper has come from the Tsar!' so they began looking for him," here Karataev's lower jaw trembled, "but God had already forgiven him--he was dead! That's how it was, dear fellows!" Karataev concluded and sat for a long time silent, gazing before him with a smile.

And Pierre's soul was dimly but joyfully filled not by the story itself but by its mysterious significance: by the rapturous joy that lit up Karataev's face as he told it, and the mystic significance of that joy.

CHAPTER XIV

"A vos places!"* suddenly cried a voice.

*"To your places."

A pleasant feeling of excitement and an expectation of something joyful and solemn was aroused among the soldiers of the convoy and the prisoners. From all sides came shouts of command, and from the left came smartly dressed cavalymen on good horses, passing the prisoners at a trot. The expression on all faces showed the tension people feel at the approach of those in authority. The prisoners thronged together and were pushed off the road. The convoy formed up.

"The Emperor! The Emperor! The Marshal! The Duke!" and hardly had the sleek cavalry passed, before a carriage drawn by six gray horses rattled by. Pierre caught a glimpse of a man in a three-cornered hat with a tranquil look on his handsome, plump, white face. It was one of the marshals. His eye fell on Pierre's large and striking figure, and in the expression with which he frowned and looked away Pierre thought he detected sympathy and a desire to conceal that sympathy.

The general in charge of the stores galloped after the carriage with a red and frightened face, whipping up his skinny horse. Several officers formed a group and some soldiers crowded round them. Their faces all looked excited and worried.

"What did he say? What did he say?" Pierre heard them ask.

While the marshal was passing, the prisoners had huddled together in a crowd, and Pierre saw Karataev whom he had not yet seen that morning. He sat in his short overcoat leaning against a birch tree. On his face, besides the look of joyful emotion it had worn yesterday while telling the tale of the merchant who suffered innocently, there was now an expression of quiet solemnity.

Karataev looked at Pierre with his kindly round eyes now filled with tears, evidently wishing him to come near that he might say something to him. But Pierre was not sufficiently sure of himself. He made as if he did not notice that look and moved hastily away.

When the prisoners again went forward Pierre looked round. Karataev was still sitting at the side of the road under the birch tree and two Frenchmen were talking over his head. Pierre did not look round again but went limping up the hill.

From behind, where Karataev had been sitting, came the sound of a shot. Pierre heard it plainly, but at that moment he remembered that he had not yet finished reckoning up how many stages still remained to Smolensk--a calculation he had begun before the marshal went by. And he again started reckoning. Two French soldiers ran past Pierre, one of whom carried a lowered and smoking gun. They both looked pale, and in the expression on their faces--one of them glanced timidly at Pierre--there was something resembling what he had seen on the face of the young soldier at the execution. Pierre looked at the soldier and remembered that, two days before, that man had burned his shirt while drying it at the fire and how they had laughed at him.

Behind him, where Karataev had been sitting, the dog began to howl. "What a stupid beast! Why is it howling?" thought Pierre.

His comrades, the prisoner soldiers walking beside him, avoided looking back at the place where the shot had been fired and the dog was howling, just as Pierre did, but there was a set look on all their faces.

CHAPTER XV

The stores, the prisoners, and the marshal's baggage train stopped at the village of Shamshevo. The men crowded together round the

campfires. Pierre went up to the fire, ate some roast horseflesh, lay down with his back to the fire, and immediately fell asleep. He again slept as he had done at Mozhaysk after the battle of Borodino.

Again real events mingled with dreams and again someone, he or another, gave expression to his thoughts, and even to the same thoughts that had been expressed in his dream at Mozhaysk.

"Life is everything. Life is God. Everything changes and moves and that movement is God. And while there is life there is joy in consciousness of the divine. To love life is to love God. Harder and more blessed than all else is to love this life in one's sufferings, in innocent sufferings."

"Karataev!" came to Pierre's mind.

And suddenly he saw vividly before him a long-forgotten, kindly old man who had given him geography lessons in Switzerland. "Wait a bit," said the old man, and showed Pierre a globe. This globe was alive--a vibrating ball without fixed dimensions. Its whole surface consisted of drops closely pressed together, and all these drops moved and changed places, sometimes several of them merging into one, sometimes one dividing into many. Each drop tried to spread out and occupy as much space as possible, but others striving to do the same compressed it, sometimes destroyed it, and sometimes merged with it.

"That is life," said the old teacher.

"How simple and clear it is," thought Pierre. "How is it I did not know it before?"

"God is in the midst, and each drop tries to expand so as to reflect Him to the greatest extent. And it grows, merges, disappears from the surface, sinks to the depths, and again emerges. There now, Karataev has spread out and disappeared. Do you understand, my child?" said the teacher.

"Do you understand, damn you?" shouted a voice, and Pierre woke up.

He lifted himself and sat up. A Frenchman who had just pushed a Russian soldier away was squatting by the fire, engaged in roasting a piece of meat stuck on a ramrod. His sleeves were rolled up and his sinewy, hairy, red hands with their short fingers deftly turned the ramrod. His brown morose face with frowning brows was clearly visible by the glow of the charcoal.

"It's all the same to him," he muttered, turning quickly to a soldier who stood behind him. "Brigand! Get away!"

And twisting the ramrod he looked gloomily at Pierre, who turned away and gazed into the darkness. A prisoner, the Russian soldier the Frenchman had pushed away, was sitting near the fire patting something with his hand. Looking more closely Pierre recognized the blue-gray dog, sitting beside the soldier, wagging its tail.

"Ah, he's come?" said Pierre. "And Plat-" he began, but did not finish.

Suddenly and simultaneously a crowd of memories awoke in his fancy--of the look Platon had given him as he sat under the tree, of the shot heard from that spot, of the dog's howl, of the guilty faces of the two Frenchmen as they ran past him, of the lowered and smoking gun, and of Karataev's absence at this halt--and he was on the point of realizing that Karataev had been killed, but just at that instant, he knew not why, the recollection came to his mind of a summer evening he had spent with a beautiful Polish lady on the veranda of his house in Kiev. And without linking up the events of the day or drawing a conclusion from them, Pierre closed his eyes, seeing a vision of the country in summertime mingled with memories of bathing and of the liquid, vibrating globe, and he sank into water so that it closed over his head.

Before sunrise he was awakened by shouts and loud and rapid firing. French soldiers were running past him.

"The Cossacks!" one of them shouted, and a moment later a crowd of Russians surrounded Pierre.

For a long time he could not understand what was happening to him. All around he heard his comrades sobbing with joy.

"Brothers! Dear fellows! Darlings!" old soldiers exclaimed, weeping, as they embraced Cossacks and hussars.

The hussars and Cossacks crowded round the prisoners; one offered them clothes, another boots, and a third bread. Pierre sobbed as he sat among them and could not utter a word. He hugged the first soldier who approached him, and kissed him, weeping.

Dolokhov stood at the gate of the ruined house, letting a crowd of disarmed Frenchmen pass by. The French, excited by all that had happened, were talking loudly among themselves, but as they passed Dolokhov who gently switched his boots with his whip and watched them with cold glassy eyes that boded no good, they became silent. On the opposite side stood Dolokhov's Cossack, counting the prisoners and marking off each hundred with a chalk line on the gate.

"How many?" Dolokhov asked the Cossack.

"The second hundred," replied the Cossack.

"Filez, filez!"* Dolokhov kept saying, having adopted this expression from the French, and when his eyes met those of the prisoners they flashed with a cruel light.

*"Get along, get along!"

Denisov, bareheaded and with a gloomy face, walked behind some Cossacks who were carrying the body of Petya Rostov to a hole that had been dug in the garden.

CHAPTER XVI

After the twenty-eighth of October when the frosts began, the flight of the French assumed a still more tragic character, with men freezing, or roasting themselves to death at the campfires, while carriages with people dressed in furs continued to drive past, carrying away the property that had been stolen by the Emperor, kings, and dukes; but the process of the flight and disintegration of the French army went on essentially as before.

From Moscow to Vyazma the French army of seventy-three thousand men not reckoning the Guards (who did nothing during the whole war but pillage) was reduced to thirty-six thousand, though not more than five thousand had fallen in battle. From this beginning the succeeding terms of the progression could be determined mathematically. The French army melted away and perished at the same rate from Moscow to Vyazma, from Vyazma to Smolensk, from Smolensk to the Berezina, and from the Berezina to Vilna--independently of the greater or lesser intensity of the cold, the pursuit, the barring of the way, or any other particular conditions. Beyond Vyazma the French army instead of moving in three columns huddled together into one mass, and so went on to the end. Berthier wrote to his Emperor (we know how far commanding officers allow themselves to diverge from the truth in describing the condition of an army) and this is what he said:

I deem it my duty to report to Your Majesty the condition of the various corps I have had occasion to observe during different stages of the last two or three days' march. They are almost disbanded. Scarcely a quarter of the soldiers remain with the standards of their regiments, the others go off by themselves in different directions hoping to find food and escape discipline. In general they regard Smolensk as the place where they hope to recover. During the last few days many of the men have been seen to throw away their cartridges and their arms. In such a state of affairs, whatever your ultimate plans may be, the interest of Your Majesty's service demands that the army should be rallied at Smolensk and should first of all be freed from ineffectives, such as dismounted cavalry, unnecessary baggage, and artillery material that is no longer in proportion to the present forces. The soldiers, who are worn out with hunger and fatigue, need these supplies as well as a few days' rest. Many have died last days on the road or at the bivouacs. This state of things is continually becoming worse and makes one fear that unless a prompt remedy is applied the troops will no longer be under control in case of an engagement.

November 9: twenty miles from Smolensk.

After staggering into Smolensk which seemed to them a promised land, the French, searching for food, killed one another, sacked their own stores, and when everything had been plundered fled farther.

They all went without knowing whither or why they were going. Still less did that genius, Napoleon, know it, for no one issued any orders to him. But still he and those about him retained their old habits: wrote commands, letters, reports, and orders of the day; called one another sire, mon cousin, prince d'Eckmuhl, roi de Naples, and so on. But these orders and reports were only on paper, nothing in them was acted upon for they could not be carried out, and though they entitled one another Majesties, Highnesses, or Cousins, they all felt that they were miserable wretches who had done much evil for which they had now to pay. And though they pretended to be concerned about the army, each was thinking only of himself and of how to get away quickly and save himself.

CHAPTER XVII

The movements of the Russian and French armies during the campaign from Moscow back to the Niemen were like those in a game of Russian

blindman's bluff, in which two players are blindfolded and one of them occasionally rings a little bell to inform the catcher of his whereabouts. First he rings his bell fearlessly, but when he gets into a tight place he runs away as quietly as he can, and often thinking to escape runs straight into his opponent's arms.

At first while they were still moving along the Kaluga road, Napoleon's armies made their presence known, but later when they reached the Smolensk road they ran holding the clapper of their bell tight--and often thinking they were escaping ran right into the Russians.

Owing to the rapidity of the French flight and the Russian pursuit and the consequent exhaustion of the horses, the chief means of approximately ascertaining the enemy's position--by cavalry scouting--was not available. Besides, as a result of the frequent and rapid change of position by each army, even what information was obtained could not be delivered in time. If news was received one day that the enemy had been in a certain position the day before, by the third day when something could have been done, that army was already two days' march farther on and in quite another position.

One army fled and the other pursued. Beyond Smolensk there were several different roads available for the French, and one would have thought that during their stay of four days they might have learned where the enemy was, might have arranged some more advantageous plan and undertaken something new. But after a four days' halt the mob, with no maneuvers or plans, again began running along the beaten track, neither to the right nor to the left but along the old--the worst--road, through Krasnoe and Orsha.

Expecting the enemy from behind and not in front, the French separated in their flight and spread out over a distance of twenty-four hours. In front of them all fled the Emperor, then the kings, then the dukes. The Russian army, expecting Napoleon to take the road to the right beyond the Dnieper--which was the only reasonable thing for him to do--themselves turned to the right and came out onto the highroad at Krasnoe. And here as in a game of blindman's buff the French ran into our vanguard. Seeing their enemy unexpectedly the French fell into confusion and stopped short from the sudden fright, but then they resumed their flight, abandoning their comrades who were farther behind. Then for three days separate portions of the French army--first Murat's (the vice-king's), then Davout's, and then Ney's--ran, as it were, the gauntlet of the Russian army. They abandoned one another, abandoned all their heavy baggage, their artillery, and half their men, and fled, getting past the Russians by night by making semicircles to the right.

Ney, who came last, had been busying himself blowing up the walls of Smolensk which were in nobody's way, because despite the unfortunate plight of the French or because of it, they wished to punish the floor against which they had hurt themselves. Ney, who had had a corps of ten thousand men, reached Napoleon at Orsha with only one thousand men left, having abandoned all the rest and all his cannon, and having crossed the Dnieper at night by stealth at a wooded spot.

From Orsha they fled farther along the road to Vilna, still playing at blindman's buff with the pursuing army. At the Berezina they again became disorganized, many were drowned and many surrendered, but those who got across the river fled farther. Their supreme chief donned a fur coat and, having seated himself in a sleigh, galloped on alone, abandoning his companions. The others who could do so drove away too, leaving those who could not to surrender or die.

CHAPTER XVIII

This campaign consisted in a flight of the French during which they did all they could to destroy themselves. From the time they turned onto the Kaluga road to the day their leader fled from the army, none of the movements of the crowd had any sense. So one might have thought that regarding this period of the campaign the historians, who attributed the actions of the mass to the will of one man, would have found it impossible to make the story of the retreat fit their theory. But no! Mountains of books have been written by the historians about this campaign, and everywhere are described Napoleon's arrangements, the maneuvers, and his profound plans which guided the army, as well as the military genius shown by his marshals.

The retreat from Malo-Yaroslavets when he had a free road into a well-supplied district and the parallel road was open to him along which Kutuzov afterwards pursued him--this unnecessary retreat along a devastated road--is explained to us as being due to profound considerations. Similarly profound considerations are given for his retreat from Smolensk to Orsha. Then his heroism at Krasnoe is described, where he is reported to have been prepared to accept battle and take personal command, and to have walked about with a birch stick and said:

"J'ai assez fait l'empereur; il est temps de faire le general,"* but nevertheless immediately ran away again, abandoning to its fate the

scattered fragments of the army he left behind.

*"I have acted the Emperor long enough; it is time to act the general."

Then we are told of the greatness of soul of the marshals, especially of Ney--a greatness of soul consisting in this: that he made his way by night around through the forest and across the Dnieper and escaped to Orsha, abandoning standards, artillery, and nine tenths of his men.

And lastly, the final departure of the great Emperor from his heroic army is presented to us by the historians as something great and characteristic of genius. Even that final running away, described in ordinary language as the lowest depth of baseness which every child is taught to be ashamed of--even that act finds justification in the historians' language.

When it is impossible to stretch the very elastic threads of historical ratiocination any farther, when actions are clearly contrary to all that humanity calls right or even just, the historians produce a saving conception of "greatness." "Greatness," it seems, excludes the standards of right and wrong. For the "great" man nothing is wrong, there is no atrocity for which a "great" man can be blamed.

"C'est grand!"* say the historians, and there no longer exists either good or evil but only "grand" and "not grand." Grand is good, not grand is bad. Grand is the characteristic, in their conception, of some special animals called "heroes." And Napoleon, escaping home in a warm fur coat and leaving to perish those who were not merely his comrades but were (in his opinion) men he had brought there, feels que c'est grand,*[2] and his soul is tranquil.

*"It is great."

*[2] That it is great.

"Du sublime (he saw something sublime in himself) au ridicule il n'y a qu'un pas,"* said he. And the whole world for fifty years has been repeating: "Sublime! Grand! Napoleon le Grand!" Du sublime au ridicule il n'y a qu'un pas.

*"From the sublime to the ridiculous is but a step."

And it occurs to no one that to admit a greatness not commensurable with the standard of right and wrong is merely to admit one's own nothingness and immeasurable meanness.

For us with the standard of good and evil given us by Christ, no human actions are incommensurable. And there is no greatness where simplicity, goodness, and truth are absent.

CHAPTER XIX

What Russian, reading the account of the last part of the campaign of 1812, has not experienced an uncomfortable feeling of regret, dissatisfaction, and perplexity? Who has not asked himself how it is that the French were not all captured or destroyed when our three armies surrounded them in superior numbers, when the disordered French, hungry and freezing, surrendered in crowds, and when (as the historians relate) the aim of the Russians was to stop the French, to cut them off, and capture them all?

How was it that the Russian army, which when numerically weaker than the French had given battle at Borodino, did not achieve its purpose when it had surrounded the French on three sides and when its aim was to capture them? Can the French be so enormously superior to us that when we had surrounded them with superior forces we could not beat them? How could that happen?

History (or what is called by that name) replying to these questions says that this occurred because Kutuzov and Tormasov and Chichagov, and this man and that man, did not execute such and such maneuvers...

But why did they not execute those maneuvers? And why if they were guilty of not carrying out a prearranged plan were they not tried and punished? But even if we admitted that Kutuzov, Chichagov, and others were the cause of the Russian failures, it is still incomprehensible why, the position of the Russian army being what it was at Krasnoe and at the Berezina (in both cases we had superior forces), the French army with its marshals, kings, and Emperor was not captured, if that was what the Russians aimed at.

The explanation of this strange fact given by Russian military historians (to the effect that Kutuzov hindered an attack) is

unfounded, for we know that he could not restrain the troops from attacking at Vyazma and Tarutino.

Why was the Russian army--which with inferior forces had withstood the enemy in full strength at Borodino--defeated at Krasnoe and the Berezina by the disorganized crowds of the French when it was numerically superior?

If the aim of the Russians consisted in cutting off and capturing Napoleon and his marshals--and that aim was not merely frustrated but all attempts to attain it were most shamefully baffled--then this last period of the campaign is quite rightly considered by the French to be a series of victories, and quite wrongly considered victorious by Russian historians.

The Russian military historians in so far as they submit to claims of logic must admit that conclusion, and in spite of their lyrical rhapsodies about valor, devotion, and so forth, must reluctantly admit that the French retreat from Moscow was a series of victories for Napoleon and defeats for Kutuzov.

But putting national vanity entirely aside one feels that such a conclusion involves a contradiction, since the series of French victories brought the French complete destruction, while the series of Russian defeats led to the total destruction of their enemy and the liberation of their country.

The source of this contradiction lies in the fact that the historians studying the events from the letters of the sovereigns and the generals, from memoirs, reports, projects, and so forth, have attributed to this last period of the war of 1812 an aim that never existed, namely that of cutting off and capturing Napoleon with his marshals and his army.

There never was or could have been such an aim, for it would have been senseless and its attainment quite impossible.

It would have been senseless, first because Napoleon's disorganized army was flying from Russia with all possible speed, that is to say, was doing just what every Russian desired. So what was the use of performing various operations on the French who were running away as fast as they possibly could?

Secondly, it would have been senseless to block the passage of men whose whole energy was directed to flight.

Thirdly, it would have been senseless to sacrifice one's own troops in order to destroy the French army, which without external

interference was destroying itself at such a rate that, though its path was not blocked, it could not carry across the frontier more than it actually did in December, namely a hundredth part of the original army.

Fourthly, it would have been senseless to wish to take captive the Emperor, kings, and dukes--whose capture would have been in the highest degree embarrassing for the Russians, as the most adroit diplomatists of the time (Joseph de Maistre and others) recognized. Still more senseless would have been the wish to capture army corps of the French, when our own army had melted away to half before reaching Krasnoe and a whole division would have been needed to convoy the corps of prisoners, and when our men were not always getting full rations and the prisoners already taken were perishing of hunger.

All the profound plans about cutting off and capturing Napoleon and his army were like the plan of a market gardener who, when driving out of his garden a cow that had trampled down the beds he had planted, should run to the gate and hit the cow on the head. The only thing to be said in excuse of that gardener would be that he was very angry. But not even that could be said for those who drew up this project, for it was not they who had suffered from the trampled beds.

But besides the fact that cutting off Napoleon with his army would have been senseless, it was impossible.

It was impossible first because--as experience shows that a three-mile movement of columns on a battlefield never coincides with the plans--the probability of Chichagov, Kutuzov, and Wittgenstein effecting a junction on time at an appointed place was so remote as to be tantamount to impossibility, as in fact thought Kutuzov, who when he received the plan remarked that diversions planned over great distances do not yield the desired results.

Secondly it was impossible, because to paralyze the momentum with which Napoleon's army was retiring, incomparably greater forces than the Russians possessed would have been required.

Thirdly it was impossible, because the military term "to cut off" has no meaning. One can cut off a slice of bread, but not an army. To cut off an army--to bar its road--is quite impossible, for there is always plenty of room to avoid capture and there is the night when nothing can be seen, as the military scientists might convince themselves by the example of Krasnoe and of the Berezina. It is only possible to capture prisoners if they agree to be captured, just as it is only possible to catch a swallow if it settles on one's hand. Men can only be taken prisoners if they surrender according to the rules

of strategy and tactics, as the Germans did. But the French troops quite rightly did not consider that this suited them, since death by hunger and cold awaited them in flight or captivity alike.

Fourthly and chiefly it was impossible, because never since the world began has a war been fought under such conditions as those that obtained in 1812, and the Russian army in its pursuit of the French strained its strength to the utmost and could not have done more without destroying itself.

During the movement of the Russian army from Tarutino to Krasnoe it lost fifty thousand sick or stragglers, that is a number equal to the population of a large provincial town. Half the men fell out of the army without a battle.

And it is of this period of the campaign--when the army lacked boots and sheepskin coats, was short of provisions and without vodka, and was camping out at night for months in the snow with fifteen degrees of frost, when there were only seven or eight hours of daylight and the rest was night in which the influence of discipline cannot be maintained, when men were taken into that region of death where discipline fails, not for a few hours only as in a battle, but for months, where they were every moment fighting death from hunger and cold, when half the army perished in a single month--it is of this period of the campaign that the historians tell us how Miloradovich should have made a flank march to such and such a place, Tormasov to another place, and Chichagov should have crossed (more than knee-deep in snow) to somewhere else, and how so-and-so "routed" and "cut off" the French and so on and so on.

The Russians, half of whom died, did all that could and should have been done to attain an end worthy of the nation, and they are not to blame because other Russians, sitting in warm rooms, proposed that they should do what was impossible.

All that strange contradiction now difficult to understand between the facts and the historical accounts only arises because the historians dealing with the matter have written the history of the beautiful words and sentiments of various generals, and not the history of the events.

To them the words of Miloradovich seem very interesting, and so do their surmises and the rewards this or that general received; but the question of those fifty thousand men who were left in hospitals and in graves does not even interest them, for it does not come within the range of their investigation.

Yet one need only discard the study of the reports and general plans

and consider the movement of those hundreds of thousands of men who took a direct part in the events, and all the questions that seemed insoluble easily and simply receive an immediate and certain solution.

The aim of cutting off Napoleon and his army never existed except in the imaginations of a dozen people. It could not exist because it was senseless and unattainable.

The people had a single aim: to free their land from invasion. That aim was attained in the first place of itself, as the French ran away, and so it was only necessary not to stop their flight. Secondly it was attained by the guerrilla warfare which was destroying the French, and thirdly by the fact that a large Russian army was following the French, ready to use its strength in case their movement stopped.

The Russian army had to act like a whip to a running animal. And the experienced driver knew it was better to hold the whip raised as a menace than to strike the running animal on the head.

BOOK FIFTEEN: 1812 --13

CHAPTER I

When seeing a dying animal a man feels a sense of horror: substance similar to his own is perishing before his eyes. But when it is a beloved and intimate human being that is dying, besides this horror at the extinction of life there is a severance, a spiritual wound, which like a physical wound is sometimes fatal and sometimes heals, but always aches and shrinks at any external irritating touch.

After Prince Andrew's death Natasha and Princess Mary alike felt this. Drooping in spirit and closing their eyes before the menacing cloud of death that overhung them, they dared not look life in the face. They carefully guarded their open wounds from any rough and painful contact. Everything: a carriage passing rapidly in the street, a summons to dinner, the maid's inquiry what dress to prepare, or worse still any word of insincere or feeble sympathy, seemed an insult, painfully irritated the wound, interrupting that necessary

quiet in which they both tried to listen to the stern and dreadful choir that still resounded in their imagination, and hindered their gazing into those mysterious limitless vistas that for an instant had opened out before them.

Only when alone together were they free from such outrage and pain. They spoke little even to one another, and when they did it was of very unimportant matters.

Both avoided any allusion to the future. To admit the possibility of a future seemed to them to insult his memory. Still more carefully did they avoid anything relating to him who was dead. It seemed to them that what they had lived through and experienced could not be expressed in words, and that any reference to the details of his life infringed the majesty and sacredness of the mystery that had been accomplished before their eyes.

Continued abstention from speech, and constant avoidance of everything that might lead up to the subject--this halting on all sides at the boundary of what they might not mention--brought before their minds with still greater purity and clearness what they were both feeling.

But pure and complete sorrow is as impossible as pure and complete joy. Princess Mary, in her position as absolute and independent arbiter of her own fate and guardian and instructor of her nephew, was the first to be called back to life from that realm of sorrow in which she had dwelt for the first fortnight. She received letters from her relations to which she had to reply; the room in which little Nicholas had been put was damp and he began to cough; Alpatych came to Yaroslavl with reports on the state of their affairs and with advice and suggestions that they should return to Moscow to the house on the Vozdvizhenka Street, which had remained uninjured and needed only slight repairs. Life did not stand still and it was necessary to live. Hard as it was for Princess Mary to emerge from the realm of secluded contemplation in which she had lived till then, and sorry and almost ashamed as she felt to leave Natasha alone, yet the cares of life demanded her attention and she involuntarily yielded to them. She went through the accounts with Alpatych, conferred with Dessalles about her nephew, and gave orders and made preparations for the journey to Moscow.

Natasha remained alone and, from the time Princess Mary began making preparations for departure, held aloof from her too.

Princess Mary asked the countess to let Natasha go with her to Moscow, and both parents gladly accepted this offer, for they saw their daughter losing strength every day and thought that a change

of scene and the advice of Moscow doctors would be good for her.

"I am not going anywhere," Natasha replied when this was proposed to her. "Do please just leave me alone!" And she ran out of the room, with difficulty refraining from tears of vexation and irritation rather than of sorrow.

After she felt herself deserted by Princes Mary and alone in her grief, Natasha spent most of the time in her room by herself, sitting huddled up feet and all in the corner of the sofa, tearing and twisting something with her slender nervous fingers and gazing intently and fixedly at whatever her eyes chanced to fall on. This solitude exhausted and tormented her but she was in absolute need of it. As soon as anyone entered she got up quickly, changed her position and expression, and picked up a book or some sewing, evidently waiting impatiently for the intruder to go.

She felt all the time as if she might at any moment penetrate that on which--with a terrible questioning too great for her strength--her spiritual gaze was fixed.

One day toward the end of December Natasha, pale and thin, dressed in a black woolen gown, her plaited hair negligently twisted into a knot, was crouched feet and all in the corner of her sofa, nervously crumpling and smoothing out the end of her sash while she looked at a corner of the door.

She was gazing in the direction in which he had gone--to the other side of life. And that other side of life, of which she had never before thought and which had formerly seemed to her so far away and improbable, was now nearer and more akin and more comprehensible than this side of life, where everything was either emptiness and desolation or suffering and indignity.

She was gazing where she knew him to be; but she could not imagine him otherwise than as he had been here. She now saw him again as he had been at Mytishchi, at Troitsa, and at Yaroslavl.

She saw his face, heard his voice, repeated his words and her own, and sometimes devised other words they might have spoken.

There he is lying back in an armchair in his velvet cloak, leaning his head on his thin pale hand. His chest is dreadfully hollow and his shoulders raised. His lips are firmly closed, his eyes glitter, and a wrinkle comes and goes on his pale forehead. One of his legs twitches just perceptibly, but rapidly. Natasha knows that he is struggling with terrible pain. "What is that pain like? Why does he have that pain? What does he feel? How does it hurt him?" thought

Natasha. He noticed her watching him, raised his eyes, and began to speak seriously:

"One thing would be terrible," said he: "to bind oneself forever to a suffering man. It would be continual torture." And he looked searchingly at her. Natasha as usual answered before she had time to think what she would say. She said: "This can't go on--it won't. You will get well--quite well."

She now saw him from the commencement of that scene and relived what she had then felt. She recalled his long sad and severe look at those words and understood the meaning of the rebuke and despair in that protracted gaze.

"I agreed," Natasha now said to herself, "that it would be dreadful if he always continued to suffer. I said it then only because it would have been dreadful for him, but he understood it differently. He thought it would be dreadful for me. He then still wished to live and feared death. And I said it so awkwardly and stupidly! I did not say what I meant. I thought quite differently. Had I said what I thought, I should have said: even if he had to go on dying, to die continually before my eyes, I should have been happy compared with what I am now. Now there is nothing... nobody. Did he know that? No, he did not and never will know it. And now it will never, never be possible to put it right." And now he again seemed to be saying the same words to her, only in her imagination Natasha this time gave him a different answer. She stopped him and said: "Terrible for you, but not for me! You know that for me there is nothing in life but you, and to suffer with you is the greatest happiness for me," and he took her hand and pressed it as he had pressed it that terrible evening four days before his death. And in her imagination she said other tender and loving words which she might have said then but only spoke now: "I love thee!... thee! I love, love..." she said, convulsively pressing her hands and setting her teeth with a desperate effort...

She was overcome by sweet sorrow and tears were already rising in her eyes; then she suddenly asked herself to whom she was saying this. Again everything was shrouded in hard, dry perplexity, and again with a strained frown she peered toward the world where he was. And now, now it seemed to her she was penetrating the mystery.... But at the instant when it seemed that the incomprehensible was revealing itself to her a loud rattle of the door handle struck painfully on her ears. Dunyasha, her maid, entered the room quickly and abruptly with a frightened look on her face and showing no concern for her mistress.

"Come to your Papa at once, please!" said she with a strange, excited look. "A misfortune... about Peter Ilynich... a letter," she

finished with a sob.

CHAPTER II

Besides a feeling of aloofness from everybody Natasha was feeling a special estrangement from the members of her own family. All of them--her father, mother, and Sonya--were so near to her, so familiar, so commonplace, that all their words and feelings seemed an insult to the world in which she had been living of late, and she felt not merely indifferent to them but regarded them with hostility. She heard Dunyasha's words about Peter Ilynich and a misfortune, but did not grasp them.

"What misfortune? What misfortune can happen to them? They just live their own old, quiet, and commonplace life," thought Natasha.

As she entered the ballroom her father was hurriedly coming out of her mother's room. His face was puckered up and wet with tears. He had evidently run out of that room to give vent to the sobs that were choking him. When he saw Natasha he waved his arms despairingly and burst into convulsively painful sobs that distorted his soft round face.

"Pe... Petya... Go, go, she... is calling..." and weeping like a child and quickly shuffling on his feeble legs to a chair, he almost fell into it, covering his face with his hands.

Suddenly an electric shock seemed to run through Natasha's whole being. Terrible anguish struck her heart, she felt a dreadful ache as if something was being torn inside her and she were dying. But the pain was immediately followed by a feeling of release from the oppressive constraint that had prevented her taking part in life. The sight of her father, the terribly wild cries of her mother that she heard through the door, made her immediately forget herself and her own grief.

She ran to her father, but he feebly waved his arm, pointing to her mother's door. Princess Mary, pale and with quivering chin, came out from that room and taking Natasha by the arm said something to her. Natasha neither saw nor heard her. She went in with rapid steps, pausing at the door for an instant as if struggling with herself, and then ran to her mother.

The countess was lying in an armchair in a strange and awkward position, stretching out and beating her head against the wall. Sonya and the maids were holding her arms.

"Natasha! Natasha!..." cried the countess. "It's not true... it's not true... He's lying... Natasha!" she shrieked, pushing those around her away. "Go away, all of you; it's not true! Killed!... ha, ha, ha!... It's not true!"

Natasha put one knee on the armchair, stooped over her mother, embraced her, and with unexpected strength raised her, turned her face toward herself, and clung to her.

"Mummy!... darling!... I am here, my dearest Mummy," she kept on whispering, not pausing an instant.

She did not let go of her mother but struggled tenderly with her, demanded a pillow and hot water, and unfastened and tore open her mother's dress.

"My dearest darling... Mummy, my precious!..." she whispered incessantly, kissing her head, her hands, her face, and feeling her own irrepressible and streaming tears tickling her nose and cheeks.

The countess pressed her daughter's hand, closed her eyes, and became quiet for a moment. Suddenly she sat up with unaccustomed swiftness, glanced vacantly around her, and seeing Natasha began to press her daughter's head with all her strength. Then she turned toward her daughter's face which was wincing with pain and gazed long at it.

"Natasha, you love me?" she said in a soft trustful whisper.
"Natasha, you would not deceive me? You'll tell me the whole truth?"

Natasha looked at her with eyes full of tears and in her look there was nothing but love and an entreaty for forgiveness.

"My darling Mummy!" she repeated, straining all the power of her love to find some way of taking on herself the excess of grief that crushed her mother.

And again in a futile struggle with reality her mother, refusing to believe that she could live when her beloved boy was killed in the bloom of life, escaped from reality into a world of delirium.

Natasha did not remember how that day passed nor that night, nor the next day and night. She did not sleep and did not leave her mother. Her persevering and patient love seemed completely to surround the

countess every moment, not explaining or consoling, but recalling her to life.

During the third night the countess kept very quiet for a few minutes, and Natasha rested her head on the arm of her chair and closed her eyes, but opened them again on hearing the bedstead creak. The countess was sitting up in bed and speaking softly.

"How glad I am you have come. You are tired. Won't you have some tea?" Natasha went up to her. "You have improved in looks and grown more manly," continued the countess, taking her daughter's hand.

"Mamma! What are you saying..."

"Natasha, he is no more, no more!"

And embracing her daughter, the countess began to weep for the first time.

CHAPTER III

Princess Mary postponed her departure. Sonya and the count tried to replace Natasha but could not. They saw that she alone was able to restrain her mother from unreasoning despair. For three weeks Natasha remained constantly at her mother's side, sleeping on a lounge chair in her room, making her eat and drink, and talking to her incessantly because the mere sound of her tender, caressing tones soothed her mother.

The mother's wounded spirit could not heal. Petya's death had torn from her half her life. When the news of Petya's death had come she had been a fresh and vigorous woman of fifty, but a month later she left her room a listless old woman taking no interest in life. But the same blow that almost killed the countess, this second blow, restored Natasha to life.

A spiritual wound produced by a rending of the spiritual body is like a physical wound and, strange as it may seem, just as a deep wound may heal and its edges join, physical and spiritual wounds alike can yet heal completely only as the result of a vital force from within.

Natasha's wound healed in that way. She thought her life was

ended, but her love for her mother unexpectedly showed her that the essence of life--love--was still active within her. Love awoke and so did life.

Prince Andrew's last days had bound Princess Mary and Natasha together; this new sorrow brought them still closer to one another. Princess Mary put off her departure, and for three weeks looked after Natasha as if she had been a sick child. The last weeks passed in her mother's bedroom had strained Natasha's physical strength.

One afternoon noticing Natasha shivering with fever, Princess Mary took her to her own room and made her lie down on the bed. Natasha lay down, but when Princess Mary had drawn the blinds and was going away she called her back.

"I don't want to sleep, Mary, sit by me a little."

"You are tired--try to sleep."

"No, no. Why did you bring me away? She will be asking for me."

"She is much better. She spoke so well today," said Princess Mary.

Natasha lay on the bed and in the semidarkness of the room scanned Princess Mary's face.

"Is she like him?" thought Natasha. "Yes, like and yet not like. But she is quite original, strange, new, and unknown. And she loves me. What is in her heart? All that is good. But how? What is her mind like? What does she think about me? Yes, she is splendid!"

"Mary," she said timidly, drawing Princess Mary's hand to herself, "Mary, you mustn't think me wicked. No? Mary darling, how I love you! Let us be quite, quite friends."

And Natasha, embracing her, began kissing her face and hands, making Princess Mary feel shy but happy by this demonstration of her feelings.

From that day a tender and passionate friendship such as exists only between women was established between Princess Mary and Natasha. They were continually kissing and saying tender things to one another and spent most of their time together. When one went out the other became restless and hastened to rejoin her. Together they felt more in harmony with one another than either of them felt with herself when alone. A feeling stronger than friendship sprang up between them; an exclusive feeling of life being possible only in each other's presence.

Sometimes they were silent for hours; sometimes after they were already in bed they would begin talking and go on till morning. They spoke most of what was long past. Princess Mary spoke of her childhood, of her mother, her father, and her daydreams; and Natasha, who with a passive lack of understanding had formerly turned away from that life of devotion, submission, and the poetry of Christian self-sacrifice, now feeling herself bound to Princess Mary by affection, learned to love her past too and to understand a side of life previously incomprehensible to her. She did not think of applying submission and self-abnegation to her own life, for she was accustomed to seek other joys, but she understood and loved in another those previously incomprehensible virtues. For Princess Mary, listening to Natasha's tales of childhood and early youth, there also opened out a new and hitherto uncomprehended side of life: belief in life and its enjoyment.

Just as before, they never mentioned him so as not to lower (as they thought) their exalted feelings by words; but this silence about him had the effect of making them gradually begin to forget him without being conscious of it.

Natasha had grown thin and pale and physically so weak that they all talked about her health, and this pleased her. But sometimes she was suddenly overcome by fear not only of death but of sickness, weakness, and loss of good looks, and involuntarily she examined her bare arm carefully, surprised at its thinness, and in the morning noticed her drawn and, as it seemed to her, piteous face in her glass. It seemed to her that things must be so, and yet it was dreadfully sad.

One day she went quickly upstairs and found herself out of breath. Unconsciously she immediately invented a reason for going down, and then, testing her strength, ran upstairs again, observing the result.

Another time when she called Dunyasha her voice trembled, so she called again--though she could hear Dunyasha coming--called her in the deep chest tones in which she had been wont to sing, sing, and listened attentively to herself.

She did not know and would not have believed it, but beneath the layer of slime that covered her soul and seemed to her impenetrable, delicate young shoots of grass were already sprouting, which taking root would so cover with their living verdure the grief that weighed her down that it would soon no longer be seen or noticed. The wound had begun to heal from within.

At the end of January Princess Mary left for Moscow, and the count insisted on Natasha's going with her to consult the doctors.

CHAPTER IV

After the encounter at Vyazma, where Kutuzov had been unable to hold back his troops in their anxiety to overwhelm and cut off the enemy and so on, the farther movement of the fleeing French, and of the Russians who pursued them, continued as far as Krasnoe without a battle. The flight was so rapid that the Russian army pursuing the French could not keep up with them; cavalry and artillery horses broke down, and the information received of the movements of the French was never reliable.

The men in the Russian army were so worn out by this continuous marching at the rate of twenty-seven miles a day that they could not go any faster.

To realize the degree of exhaustion of the Russian army it is only necessary to grasp clearly the meaning of the fact that, while not losing more than five thousand killed and wounded after Tarutino and less than a hundred prisoners, the Russian army which left that place a hundred thousand strong reached Krasnoe with only fifty thousand.

The rapidity of the Russian pursuit was just as destructive to our army as the flight of the French was to theirs. The only difference was that the Russian army moved voluntarily, with no such threat of destruction as hung over the French, and that the sick Frenchmen were left behind in enemy hands while the sick Russians left behind were among their own people. The chief cause of the wastage of Napoleon's army was the rapidity of its movement, and a convincing proof of this is the corresponding decrease of the Russian army.

Kutuzov as far as was in his power, instead of trying to check the movement of the French as was desired in Petersburg and by the Russian army generals, directed his whole activity here, as he had done at Tarutino and Vyazma, to hastening it on while easing the movement of our army.

But besides this, since the exhaustion and enormous diminution of the army caused by the rapidity of the advance had become evident, another reason for slackening the pace and delaying presented itself to Kutuzov. The aim of the Russian army was to pursue the French. The road the French would take was unknown, and so the closer our

troops trod on their heels the greater distance they had to cover. Only by following at some distance could one cut across the zigzag path of the French. All the artful maneuvers suggested by our generals meant fresh movements of the army and a lengthening of its marches, whereas the only reasonable aim was to shorten those marches. To that end Kutuzov's activity was directed during the whole campaign from Moscow to Vilna--not casually or intermittently but so consistently that he never once deviated from it.

Kutuzov felt and knew--not by reasoning or science but with the whole of his Russian being--what every Russian soldier felt: that the French were beaten, that the enemy was flying and must be driven out; but at the same time he like the soldiers realized all the hardship of this march, the rapidity of which was unparalleled for such a time of the year.

But to the generals, especially the foreign ones in the Russian army, who wished to distinguish themselves, to astonish somebody, and for some reason to capture a king or a duke--it seemed that now--when any battle must be horrible and senseless--was the very time to fight and conquer somebody. Kutuzov merely shrugged his shoulders when one after another they presented projects of maneuvers to be made with those soldiers--ill-shod, insufficiently clad, and half starved--who within a month and without fighting a battle had dwindled to half their number, and who at the best if the flight continued would have to go a greater distance than they had already traversed, before they reached the frontier.

This longing to distinguish themselves, to maneuver, to overthrow, and to cut off showed itself particularly whenever the Russians stumbled on the French army.

So it was at Krasnoe, where they expected to find one of the three French columns and stumbled instead on Napoleon himself with sixteen thousand men. Despite all Kutuzov's efforts to avoid that ruinous encounter and to preserve his troops, the massacre of the broken mob of French soldiers by worn-out Russians continued at Krasnoe for three days.

Toll wrote a disposition: "The first column will march to so and so," etc. And as usual nothing happened in accord with the disposition. Prince Eugene of Wurttemberg fired from a hill over the French crowds that were running past, and demanded reinforcements which did not arrive. The French, avoiding the Russians, dispersed and hid themselves in the forest by night, making their way round as best they could, and continued their flight.

Miloradovich, who said he did not want to know anything about the

commissariat affairs of his detachment, and could never be found when he was wanted--that chevalier sans peur et sans reproche* as he styled himself--who was fond of parleys with the French, sent envoys demanding their surrender, wasted time, and did not do what he was ordered to do.

*Knight without fear and without reproach.

"I give you that column, lads," he said, riding up to the troops and pointing out the French to the cavalry.

And the cavalry, with spurs and sabers urging on horses that could scarcely move, trotted with much effort to the column presented to them--that is to say, to a crowd of Frenchmen stark with cold, frost-bitten, and starving--and the column that had been presented to them threw down its arms and surrendered as it had long been anxious to do.

At Krasnoe they took twenty-six thousand prisoners, several hundred cannon, and a stick called a "marshal's staff," and disputed as to who had distinguished himself and were pleased with their achievement--though they much regretted not having taken Napoleon, or at least a marshal or a hero of some sort, and reproached one another and especially Kutuzov for having failed to do so.

These men, carried away by their passions, were but blind tools of the most melancholy law of necessity, but considered themselves heroes and imagined that they were accomplishing a most noble and honorable deed. They blamed Kutuzov and said that from the very beginning of the campaign he had prevented their vanquishing Napoleon, that he thought nothing but satisfying his passions and would not advance from the Linen Factories because he was comfortable there, that at Krasnoe he checked the advance because on learning that Napoleon was there he had quite lost his head, and that it was probable that he had an understanding with Napoleon and had been bribed by him, and so on, and so on.

Not only did his contemporaries, carried away by their passions, talk in this way, but posterity and history have acclaimed Napoleon as grand, while Kutuzov is described by foreigners as a crafty, dissolute, weak old courtier, and by Russians as something indefinite--a sort of puppet useful only because he had a Russian name.

CHAPTER V

In 1812 and 1813 Kutuzov was openly accused of blundering. The Emperor was dissatisfied with him. And in a history recently written by order of the Highest Authorities it is said that Kutuzov was a cunning court liar, frightened of the name of Napoleon, and that by his blunders at Krasnoe and the Berezina he deprived the Russian army of the glory of complete victory over the French.*

*History of the year 1812. The character of Kutuzov and reflections on the unsatisfactory results of the battles at Krasnoe, by Bogdanovich.

Such is the fate not of great men (*grands hommes*) whom the Russian mind does not acknowledge, but of those rare and always solitary individuals who, discerning the will of Providence, submit their personal will to it. The hatred and contempt of the crowd punish such men for discerning the higher laws.

For Russian historians, strange and terrible to say, Napoleon--that most insignificant tool of history who never anywhere, even in exile, showed human dignity--Napoleon is the object of adulation and enthusiasm; he is grand. But Kutuzov--the man who from the beginning to the end of his activity in 1812, never once swerving by word or deed from Borodino to Vilna, presented an example exceptional in history of self-sacrifice and a present consciousness of the future importance of what was happening--Kutuzov seems to them something indefinite and pitiful, and when speaking of him and of the year 1812 they always seem a little ashamed.

And yet it is difficult to imagine an historical character whose activity was so unswervingly directed to a single aim; and it would be difficult to imagine any aim more worthy or more consonant with the will of the whole people. Still more difficult would it be to find an instance in history of the aim of an historical personage being so completely accomplished as that to which all Kutuzov's efforts were directed in 1812.

Kutuzov never talked of "forty centuries looking down from the Pyramids," of the sacrifices he offered for the fatherland, or of what he intended to accomplish or had accomplished; in general he said nothing about himself, adopted no pose, always appeared to be the simplest and most ordinary of men, and said the simplest and most ordinary things. He wrote letters to his daughters and to Madame de

Stael, read novels, liked the society of pretty women, jested with generals, officers, and soldiers, and never contradicted those who tried to prove anything to him. When Count Rostopchin at the Yauza bridge galloped up to Kutuzov with personal reproaches for having caused the destruction of Moscow, and said: "How was it you promised not to abandon Moscow without a battle?" Kutuzov replied: "And I shall not abandon Moscow without a battle," though Moscow was then already abandoned. When Arakcheev, coming to him from the Emperor, said that Ermolov ought to be appointed chief of the artillery, Kutuzov replied: "Yes, I was just saying so myself," though a moment before he had said quite the contrary. What did it matter to him--who then alone amid a senseless crowd understood the whole tremendous significance of what was happening--what did it matter to him whether Rostopchin attributed the calamities of Moscow to him or to himself? Still less could it matter to him who was appointed chief of the artillery.

Not merely in these cases but continually did that old man--who by experience of life had reached the conviction that thoughts and the words serving as their expression are not what move people--use quite meaningless words that happened to enter his head.

But that man, so heedless of his words, did not once during the whole time of his activity utter one word inconsistent with the single aim toward which he moved throughout the whole war. Obviously in spite of himself, in very diverse circumstances, he repeatedly expressed his real thoughts with the bitter conviction that he would not be understood. Beginning with the battle of Borodino, from which time his disagreement with those about him began, he alone said that the battle of Borodino was a victory, and repeated this both verbally and in his dispatches and reports up to the time of his death. He alone said that the loss of Moscow is not the loss of Russia. In reply to Lauriston's proposal of peace, he said: There can be no peace, for such is the people's will. He alone during the retreat of the French said that all our maneuvers are useless, everything is being accomplished of itself better than we could desire; that the enemy must be offered "a golden bridge"; that neither the Tarutino, the Vyazma, nor the Krasnoe battles were necessary; that we must keep some force to reach the frontier with, and that he would not sacrifice a single Russian for ten Frenchmen.

And this courtier, as he is described to us, who lies to Arakcheev to please the Emperor, he alone--incurring thereby the Emperor's displeasure--said in Vilna that to carry the war beyond the frontier is useless and harmful.

Nor do words alone prove that only he understood the meaning of the events. His actions--without the smallest deviation--were all directed to one and the same threefold end: (1) to brace all his

strength for conflict with the French, (2) to defeat them, and (3) to drive them out of Russia, minimizing as far as possible the sufferings of our people and of our army.

This procrastinator Kutuzov, whose motto was "Patience and Time," this enemy of decisive action, gave battle at Borodino, investing the preparations for it with unparalleled solemnity. This Kutuzov who before the battle of Austerlitz began said that it would be lost, he alone, in contradiction to everyone else, declared till his death that Borodino was a victory, despite the assurance of generals that the battle was lost and despite the fact that for an army to have to retire after winning a battle was unprecedented. He alone during the whole retreat insisted that battles, which were useless then, should not be fought, and that a new war should not be begun nor the frontiers of Russia crossed.

It is easy now to understand the significance of these events--if only we abstain from attributing to the activity of the mass aims that existed only in the heads of a dozen individuals--for the events and results now lie before us.

But how did that old man, alone, in opposition to the general opinion, so truly discern the importance of the people's view of the events that in all his activity he was never once untrue to it?

The source of that extraordinary power of penetrating the meaning of the events then occurring lay in the national feeling which he possessed in full purity and strength.

Only the recognition of the fact that he possessed this feeling caused the people in so strange a manner, contrary to the Tsar's wish, to select him--an old man in disfavor--to be their representative in the national war. And only that feeling placed him on that highest human pedestal from which he, the commander in chief, devoted all his powers not to slaying and destroying men but to saving and showing pity on them.

That simple, modest, and therefore truly great, figure could not be cast in the false mold of a European hero--the supposed ruler of men--that history has invented.

To a lackey no man can be great, for a lackey has his own conception of greatness.

CHAPTER VI

The fifth of November was the first day of what is called the battle of Krasnoe. Toward evening--after much disputing and many mistakes made by generals who did not go to their proper places, and after adjutants had been sent about with counterorders--when it had become plain that the enemy was everywhere in flight and that there could and would be no battle, Kutuzov left Krasnoe and went to Dobroe whither his headquarters had that day been transferred.

The day was clear and frosty. Kutuzov rode to Dobroe on his plump little white horse, followed by an enormous suite of discontented generals who whispered among themselves behind his back. All along the road groups of French prisoners captured that day (there were seven thousand of them) were crowding to warm themselves at campfires. Near Dobroe an immense crowd of tattered prisoners, buzzing with talk and wrapped and bandaged in anything they had been able to get hold of, were standing in the road beside a long row of unharnessed French guns. At the approach of the commander in chief the buzz of talk ceased and all eyes were fixed on Kutuzov who, wearing a white cap with a red band and a padded overcoat that bulged on his round shoulders, moved slowly along the road on his white horse. One of the generals was reporting to him where the guns and prisoners had been captured.

Kutuzov seemed preoccupied and did not listen to what the general was saying. He screwed up his eyes with a dissatisfied look as he gazed attentively and fixedly at these prisoners, who presented a specially wretched appearance. Most of them were disfigured by frost-bitten noses and cheeks, and nearly all had red, swollen and festering eyes.

One group of the French stood close to the road, and two of them, one of whom had his face covered with sores, were tearing a piece of raw flesh with their hands. There was something horrible and bestial in the fleeting glance they threw at the riders and in the malevolent expression with which, after a glance at Kutuzov, the soldier with the sores immediately turned away and went on with what he was doing.

Kutuzov looked long and intently at these two soldiers. He puckered his face, screwed up his eyes, and pensively swayed his head. At another spot he noticed a Russian soldier laughingly patting a Frenchman on the shoulder, saying something to him in a friendly manner, and Kutuzov with the same expression on his face again swayed his head.

"What were you saying?" he asked the general, who continuing his report directed the commander in chief's attention to some standards captured from the French and standing in front of the Preobrazhensk regiment.

"Ah, the standards!" said Kutuzov, evidently detaching himself with difficulty from the thoughts that preoccupied him.

He looked about him absently. Thousands of eyes were looking at him from all sides awaiting a word from him.

He stopped in front of the Preobrazhensk regiment, sighed deeply, and closed his eyes. One of his suite beckoned to the soldiers carrying the standards to advance and surround the commander in chief with them. Kutuzov was silent for a few seconds and then, submitting with evident reluctance to the duty imposed by his position, raised his head and began to speak. A throng of officers surrounded him. He looked attentively around at the circle of officers, recognizing several of them.

"I thank you all!" he said, addressing the soldiers and then again the officers. In the stillness around him his slowly uttered words were distinctly heard. "I thank you all for your hard and faithful service. The victory is complete and Russia will not forget you! Honor to you forever."

He paused and looked around.

"Lower its head, lower it!" he said to a soldier who had accidentally lowered the French eagle he was holding before the Preobrazhensk standards. "Lower, lower, that's it. Hurrah lads!" he added, addressing the men with a rapid movement of his chin.

"Hur-r-rah!" roared thousands of voices.

While the soldiers were shouting Kutuzov leaned forward in his saddle and bowed his head, and his eye lit up with a mild and apparently ironic gleam.

"You see, brothers..." said he when the shouts had ceased... and all at once his voice and the expression of his face changed. It was no longer the commander in chief speaking but an ordinary old man who wanted to tell his comrades something very important.

There was a stir among the throng of officers and in the ranks of the soldiers, who moved that they might hear better what he was going to say.

"You see, brothers, I know it's hard for you, but it can't be helped! Bear up; it won't be for long now! We'll see our visitors off and then we'll rest. The Tsar won't forget your service. It is hard for you, but still you are at home while they--you see what they have come to," said he, pointing to the prisoners. "Worse off than our poorest beggars. While they were strong we didn't spare ourselves, but now we may even pity them. They are human beings too. Isn't it so, lads?"

He looked around, and in the direct, respectful, wondering gaze fixed upon him he read sympathy with what he had said. His face grew brighter and brighter with an old man's mild smile, which drew the corners of his lips and eyes into a cluster of wrinkles. He ceased speaking and bowed his head as if in perplexity.

"But after all who asked them here? Serves them right, the bloody bastards!" he cried, suddenly lifting his head.

And flourishing his whip he rode off at a gallop for the first time during the whole campaign, and left the broken ranks of the soldiers laughing joyfully and shouting "Hurrah!"

Kutuzov's words were hardly understood by the troops. No one could have repeated the field marshal's address, begun solemnly and then changing into an old man's simplehearted talk; but the hearty sincerity of that speech, the feeling of majestic triumph combined with pity for the foe and consciousness of the justice of our cause, exactly expressed by that old man's good-natured expletives, was not merely understood but lay in the soul of every soldier and found expression in their joyous and long-sustained shouts. Afterwards when one of the generals addressed Kutuzov asking whether he wished his caleche to be sent for, Kutuzov in answering unexpectedly gave a sob, being evidently greatly moved.

CHAPTER VII

When the troops reached their night's halting place on the eighth of November, the last day of the Krasnoe battles, it was already growing dusk. All day it had been calm and frosty with occasional lightly falling snow and toward evening it began to clear. Through the falling snow a purple-black and starry sky showed itself and the frost grew keener.

An infantry regiment which had left Tarutino three thousand strong but now numbered only nine hundred was one of the first to arrive that night at its halting place--a village on the highroad. The quartermasters who met the regiment announced that all the huts were full of sick and dead Frenchmen, cavalrymen, and members of the staff. There was only one hut available for the regimental commander.

The commander rode up to his hut. The regiment passed through the village and stacked its arms in front of the last huts.

Like some huge many-limbed animal, the regiment began to prepare its lair and its food. One part of it dispersed and waded knee-deep through the snow into a birch forest to the right of the village, and immediately the sound of axes and swords, the crashing of branches, and merry voices could be heard from there. Another section amid the regimental wagons and horses which were standing in a group was busy getting out caldrons and rye biscuit, and feeding the horses. A third section scattered through the village arranging quarters for the staff officers, carrying out the French corpses that were in the huts, and dragging away boards, dry wood, and thatch from the roofs, for the campfires, or wattle fences to serve for shelter.

Some fifteen men with merry shouts were shaking down the high wattle wall of a shed, the roof of which had already been removed.

"Now then, all together--shove!" cried the voices, and the huge surface of the wall, sprinkled with snow and creaking with frost, was seen swaying in the gloom of the night. The lower stakes cracked more and more and at last the wall fell, and with it the men who had been pushing it. Loud, coarse laughter and joyous shouts ensued.

"Now then, catch hold in twos! Hand up the lever! That's it... Where are you shoving to?"

"Now, all together! But wait a moment, boys... With a song!"

All stood silent, and a soft, pleasant velvety voice began to sing. At the end of the third verse as the last note died away, twenty voices roared out at once: "Oo-oo-oo-oo! That's it. All together! Heave away, boys!..." but despite their united efforts the wattle hardly moved, and in the silence that followed the heavy breathing of the men was audible.

"Here, you of the Sixth Company! Devils that you are! Lend a hand... will you? You may want us one of these days."

Some twenty men of the Sixth Company who were on their way into

the village joined the haulers, and the wattle wall, which was about thirty-five feet long and seven feet high, moved forward along the village street, swaying, pressing upon and cutting the shoulders of the gasping men.

"Get along... Falling? What are you stopping for? There now..."

Merry senseless words of abuse flowed freely.

"What are you up to?" suddenly came the authoritative voice of a sergeant major who came upon the men who were hauling their burden. "There are gentry here; the general himself is in that hut, and you foul-mouthed devils, you brutes, I'll give it to you!" shouted he, hitting the first man who came in his way a swinging blow on the back. "Can't you make less noise?"

The men became silent. The soldier who had been struck groaned and wiped his face, which had been scratched till it bled by his falling against the wattle.

"There, how that devil hits out! He's made my face all bloody," said he in a frightened whisper when the sergeant major had passed on.

"Don't you like it?" said a laughing voice, and moderating their tones the men moved forward.

When they were out of the village they began talking again as loud as before, interlarding their talk with the same aimless expletives.

In the hut which the men had passed, the chief officers had gathered and were in animated talk over their tea about the events of the day and the maneuvers suggested for tomorrow. It was proposed to make a flank march to the left, cut off the Vice-King (Murat) and capture him.

By the time the soldiers had dragged the wattle fence to its place the campfires were blazing on all sides ready for cooking, the wood crackled, the snow was melting, and black shadows of soldiers flitted to and fro all over the occupied space where the snow had been trodden down.

Axes and choppers were plied all around. Everything was done without any orders being given. Stores of wood were brought for the night, shelters were rigged up for the officers, caldrons were being boiled, and muskets and accouterments put in order.

The wattle wall the men had brought was set up in a semicircle by the Eighth Company as a shelter from the north, propped up by musket

rests, and a campfire was built before it. They beat the tattoo, called the roll, had supper, and settled down round the fires for the night--some repairing their footgear, some smoking pipes, and some stripping themselves naked to steam the lice out of their shirts.

CHAPTER VIII

One would have thought that under the almost incredibly wretched conditions the Russian soldiers were in at that time--lacking warm boots and sheepskin coats, without a roof over their heads, in the snow with eighteen degrees of frost, and without even full rations (the commissariat did not always keep up with the troops)--they would have presented a very sad and depressing spectacle.

On the contrary, the army had never under the best material conditions presented a more cheerful and animated aspect. This was because all who began to grow depressed or who lost strength were sifted out of the army day by day. All the physically or morally weak had long since been left behind and only the flower of the army--physically and mentally--remained.

More men collected behind the wattle fence of the Eighth Company than anywhere else. Two sergeants major were sitting with them and their campfire blazed brighter than others. For leave to sit by their wattle they demanded contributions of fuel.

"Eh, Makeev! What has become of you, you son of a bitch? Are you lost or have the wolves eaten you? Fetch some more wood!" shouted a red-haired and red-faced man, screwing up his eyes and blinking because of the smoke but not moving back from the fire. "And you, Jackdaw, go and fetch some wood!" said he to another soldier.

This red-haired man was neither a sergeant nor a corporal, but being robust he ordered about those weaker than himself. The soldier they called "Jackdaw," a thin little fellow with a sharp nose, rose obediently and was about to go but at that instant there came into the light of the fire the slender, handsome figure of a young soldier carrying a load of wood.

"Bring it here--that's fine!"

They split up the wood, pressed it down on the fire, blew at it with their mouths, and fanned it with the skirts of their greatcoats,

making the flames hiss and crackle. The men drew nearer and lit their pipes. The handsome young soldier who had brought the wood, setting his arms akimbo, began stamping his cold feet rapidly and deftly on the spot where he stood.

"Mother! The dew is cold but clear.... It's well that I'm a musketeer..." he sang, pretending to hiccough after each syllable.

"Look out, your soles will fly off!" shouted the red-haired man, noticing that the sole of the dancer's boot was hanging loose. "What a fellow you are for dancing!"

The dancer stopped, pulled off the loose piece of leather, and threw it on the fire.

"Right enough, friend," said he, and, having sat down, took out of his knapsack a scrap of blue French cloth, and wrapped it round his foot. "It's the steam that spoils them," he added, stretching out his feet toward the fire.

"They'll soon be issuing us new ones. They say that when we've finished hammering them, we're to receive double kits!"

"And that son of a bitch Petrov has lagged behind after all, it seems," said one sergeant major.

"I've had an eye on him this long while," said the other.

"Well, he's a poor sort of soldier..."

"But in the Third Company they say nine men were missing yesterday."

"Yes, it's all very well, but when a man's feet are frozen how can he walk?"

"Eh? Don't talk nonsense!" said a sergeant major.

"Do you want to be doing the same?" said an old soldier, turning reproachfully to the man who had spoken of frozen feet.

"Well, you know," said the sharp-nosed man they called Jackdaw in a squeaky and unsteady voice, raising himself at the other side of the fire, "a plump man gets thin, but for a thin one it's death. Take me, now! I've got no strength left," he added, with sudden resolution turning to the sergeant major. "Tell them to send me to

hospital; I'm aching all over; anyway I shan't be able to keep up."

"That'll do, that'll do!" replied the sergeant major quietly.

The soldier said no more and the talk went on.

"What a lot of those Frenchies were taken today, and the fact is that not one of them had what you might call real boots on," said a soldier, starting a new theme. "They were no more than make-believes."

"The Cossacks have taken their boots. They were clearing the hut for the colonel and carried them out. It was pitiful to see them, boys," put in the dancer. "As they turned them over one seemed still alive and, would you believe it, he jabbered something in their lingo."

"But they're a clean folk, lads," the first man went on; "he was white--as white as birchbark--and some of them are such fine fellows, you might think they were nobles."

"Well, what do you think? They make soldiers of all classes there."

"But they don't understand our talk at all," said the dancer with a puzzled smile. "I asked him whose subject he was, and he jabbered in his own way. A queer lot!"

"But it's strange, friends," continued the man who had wondered at their whiteness, "the peasants at Mozhaysk were saying that when they began burying the dead--where the battle was you know--well, those dead had been lying there for nearly a month, and says the peasant, 'they lie as white as paper, clean, and not as much smell as a puff of powder smoke.'"

"Was it from the cold?" asked someone.

"You're a clever fellow! From the cold indeed! Why, it was hot. If it had been from the cold, ours would not have rotted either. 'But,' he says, 'go up to ours and they are all rotten and maggoty. So,' he says, 'we tie our faces up with kerchiefs and turn our heads away as we drag them off: we can hardly do it. But theirs,' he says, 'are white as paper and not so much smell as a whiff of gunpowder.'"

All were silent.

"It must be from their food," said the sergeant major. "They used to gobble the same food as the gentry."

No one contradicted him.

"That peasant near Mozhaysk where the battle was said the men were all called up from ten villages around and they carted for twenty days

and still didn't finish carting the dead away. And as for the wolves, he says..."

"That was a real battle," said an old soldier. "It's the only one worth remembering; but since that... it's only been tormenting folk."

"And do you know, Daddy, the day before yesterday we ran at them and, my word, they didn't let us get near before they just threw down their muskets and went on their knees. 'Pardon!' they say. That's only one case. They say Platov took 'Poleon himself twice. But he didn't know the right charm. He catches him and catches him--no good! He turns into a bird in his hands and flies away. And there's no way of killing him either."

"You're a first-class liar, Kiselev, when I come to look at you!"

"Liar, indeed! It's the real truth."

"If he fell into my hands, when I'd caught him I'd bury him in the ground with an aspen stake to fix him down. What a lot of men he's ruined!"

"Well, anyhow we're going to end it. He won't come here again," remarked the old soldier, yawning.

The conversation flagged, and the soldiers began settling down to sleep.

"Look at the stars. It's wonderful how they shine! You would think the women had spread out their linen," said one of the men, gazing with admiration at the Milky Way.

"That's a sign of a good harvest next year."

"We shall want some more wood."

"You warm your back and your belly gets frozen. That's queer."

"O Lord!"

"What are you pushing for? Is the fire only for you? Look how he's sprawling!"

In the silence that ensued, the snoring of those who had fallen asleep could be heard. Others turned over and warmed themselves, now and again exchanging a few words. From a campfire a hundred paces off came a sound of general, merry laughter.

"Hark at them roaring there in the Fifth Company!" said one of the soldiers, "and what a lot of them there are!"

One of the men got up and went over to the Fifth Company.

"They're having such fun," said he, coming back. "Two Frenchies have turned up. One's quite frozen and the other's an awful swaggerer. He's singing songs...."

"Oh, I'll go across and have a look...."

And several of the men went over to the Fifth Company.

CHAPTER IX

The fifth company was bivouacking at the very edge of the forest. A huge campfire was blazing brightly in the midst of the snow, lighting up the branches of trees heavy with hoarfrost.

About midnight they heard the sound of steps in the snow of the forest, and the crackling of dry branches.

"A bear, lads," said one of the men.

They all raised their heads to listen, and out of the forest into the bright firelight stepped two strangely clad human figures clinging to one another.

These were two Frenchmen who had been hiding in the forest. They came up to the fire, hoarsely uttering something in a language our soldiers did not understand. One was taller than the other; he wore an officer's hat and seemed quite exhausted. On approaching the fire he had been going to sit down, but fell. The other, a short sturdy soldier with a shawl tied round his head, was stronger. He raised his companion and said something, pointing to his mouth. The soldiers surrounded the Frenchmen, spread a greatcoat on the ground for the sick man, and brought some buckwheat porridge and vodka for both of them.

The exhausted French officer was Ramballe and the man with his head wrapped in the shawl was Morel, his orderly.

When Morel had drunk some vodka and finished his bowl of porridge he

suddenly became unnaturally merry and chattered incessantly to the soldiers, who could not understand him. Ramballe refused food and resting his head on his elbow lay silent beside the campfire, looking at the Russian soldiers with red and vacant eyes. Occasionally he emitted a long-drawn groan and then again became silent. Morel, pointing to his shoulders, tried to impress on the soldiers the fact that Ramballe was an officer and ought to be warmed. A Russian officer who had come up to the fire sent to ask his colonel whether he would not take a French officer into his hut to warm him, and when the messenger returned and said that the colonel wished the officer to be brought to him, Ramballe was told to go. He rose and tried to walk, but staggered and would have fallen had not a soldier standing by held him up.

"You won't do it again, eh?" said one of the soldiers, winking and turning mockingly to Ramballe.

"Oh, you fool! Why talk rubbish, lout that you are--a real peasant!" came rebukes from all sides addressed to the jesting soldier.

They surrounded Ramballe, lifted him on the crossed arms of two soldiers, and carried him to the hut. Ramballe put his arms around their necks while they carried him and began wailing plaintively:

"Oh, you fine fellows, my kind, kind friends! These are men! Oh, my brave, kind friends," and he leaned his head against the shoulder of one of the men like a child.

Meanwhile Morel was sitting in the best place by the fire, surrounded by the soldiers.

Morel, a short sturdy Frenchman with inflamed and streaming eyes, was wearing a woman's cloak and had a shawl tied woman fashion round his head over his cap. He was evidently tipsy, and was singing a French song in a hoarse broken voice, with an arm thrown round the nearest soldier. The soldiers simply held their sides as they watched him.

"Now then, now then, teach us how it goes! I'll soon pick it up. How is it?" said the man--a singer and a wag--whom Morel was embracing.

"Vive Henri Quatre! Vive ce roi valiant!" sang Morel, winking. "Ce diable a quatre..."*

*"Long live Henry the Fourth, that valiant king! That rowdy devil."

"Vivarika! Vif-seruvaru! Sedyablyaka!" repeated the soldier, flourishing his arm and really catching the tune.

"Bravo! Ha, ha, ha!" rose their rough, joyous laughter from all sides.

Morel, wrinkling up his face, laughed too.

"Well, go on, go on!"

"Qui eut le triple talent,
De boire, de battre,
Et d'être un vert galant."*

*Who had a triple talent

For drinking, for fighting,

And for being a gallant old boy...

"It goes smoothly, too. Well, now, Zaletaev!"

"Ke..." Zaletaev, brought out with effort: "ke-e-e-e," he drawled, laboriously pursing his lips, "le-trip-ta-la-de-bu-de-ba, e de-tra-va-ga-la" he sang.

"Fine! Just like the Frenchie! Oh, ho ho! Do you want some more to eat?"

"Give him some porridge: it takes a long time to get filled up after starving."

They gave him some more porridge and Morel with a laugh set to work on his third bowl. All the young soldiers smiled gaily as they watched him. The older men, who thought it undignified to amuse themselves with such nonsense, continued to lie at the opposite side of the fire, but one would occasionally raise himself on an elbow and glance at Morel with a smile.

"They are men too," said one of them as he wrapped himself up in his coat. "Even wormwood grows on its own root."

"O Lord, O Lord! How starry it is! Tremendous! That means a hard frost...."

They all grew silent. The stars, as if knowing that no one was

looking at them, began to disport themselves in the dark sky: now flaring up, now vanishing, now trembling, they were busy whispering something gladsome and mysterious to one another.

CHAPTER X

The French army melted away at the uniform rate of a mathematical progression; and that crossing of the Berezina about which so much has been written was only one intermediate stage in its destruction, and not at all the decisive episode of the campaign. If so much has been and still is written about the Berezina, on the French side this is only because at the broken bridge across that river the calamities their army had been previously enduring were suddenly concentrated at one moment into a tragic spectacle that remained in every memory, and on the Russian side merely because in Petersburg--far from the seat of war--a plan (again one of Pfuels) had been devised to catch Napoleon in a strategic trap at the Berezina River. Everyone assured himself that all would happen according to plan, and therefore insisted that it was just the crossing of the Berezina that destroyed the French army. In reality the results of the crossing were much less disastrous to the French--in guns and men lost--than Krasnoe had been, as the figures show.

The sole importance of the crossing of the Berezina lies in the fact that it plainly and indubitably proved the fallacy of all the plans for cutting off the enemy's retreat and the soundness of the only possible line of action--the one Kutuzov and the general mass of the army demanded--namely, simply to follow the enemy up. The French crowd fled at a continually increasing speed and all its energy was directed to reaching its goal. It fled like a wounded animal and it was impossible to block its path. This was shown not so much by the arrangements it made for crossing as by what took place at the bridges. When the bridges broke down, unarmed soldiers, people from Moscow and women with children who were with the French transport, all--carried on by vis inertiae--pressed forward into boats and into the ice-covered water and did not, surrender.

That impulse was reasonable. The condition of fugitives and of pursuers was equally bad. As long as they remained with their own people each might hope for help from his fellows and the definite place he held among them. But those who surrendered, while remaining in the same pitiful plight, would be on a lower level to claim a share in the necessities of life. The French did not need to be informed

of the fact that half the prisoners--with whom the Russians did not know what to do--perished of cold and hunger despite their captors' desire to save them; they felt that it could not be otherwise. The most compassionate Russian commanders, those favorable to the French--and even the Frenchmen in the Russian service--could do nothing for the prisoners. The French perished from the conditions to which the Russian army was itself exposed. It was impossible to take bread and clothes from our hungry and indispensable soldiers to give to the French who, though not harmful, or hated, or guilty, were simply unnecessary. Some Russians even did that, but they were exceptions.

Certain destruction lay behind the French but in front there was hope. Their ships had been burned, there was no salvation save in collective flight, and on that the whole strength of the French was concentrated.

The farther they fled the more wretched became the plight of the remnant, especially after the Berezina, on which (in consequence of the Petersburg plan) special hopes had been placed by the Russians, and the keener grew the passions of the Russian commanders, blamed one another and Kutuzov most of all. Anticipation that the failure of the Petersburg Berezina plan would be attributed to Kutuzov led to dissatisfaction, contempt, and ridicule, more and more strongly expressed. The ridicule and contempt were of course expressed in a respectful form, making it impossible for him to ask wherein he was to blame. They did not talk seriously to him; when reporting to him or asking for his sanction they appeared to be fulfilling a regrettable formality, but they winked behind his back and tried to mislead him at every turn.

Because they could not understand him all these people assumed that it was useless to talk to the old man; that he would never grasp the profundity of their plans, that he would answer with his phrases (which they thought were mere phrases) about a "golden bridge," about the impossibility of crossing the frontier with a crowd of tatterdemalions, and so forth. They had heard all that before. And all he said--that it was necessary to await provisions, or that the men had no boots--was so simple, while what they proposed was so complicated and clever, that it was evident that he was old and stupid and that they, though not in power, were commanders of genius.

After the junction with the army of the brilliant admiral and Petersburg hero Wittgenstein, this mood and the gossip of the staff reached their maximum. Kutuzov saw this and merely sighed and shrugged his shoulders. Only once, after the affair of the Berezina, did he get angry and write to Bennigsen (who reported separately to the Emperor) the following letter:

"On account of your spells of ill health, will your excellency please be so good as to set off for Kaluga on receipt of this, and there await further commands and appointments from His Imperial Majesty."

But after Bennigsen's departure, the Grand Duke Tsarevich Constantine Pavlovich joined the army. He had taken part in the beginning of the campaign but had subsequently been removed from the army by Kutuzov. Now having come to the army, he informed Kutuzov of the Emperor's displeasure at the poor success of our forces and the slowness of their advance. The Emperor intended to join the army personally in a few days' time.

The old man, experienced in court as well as in military affairs--this same Kutuzov who in August had been chosen commander in chief against the sovereign's wishes and who had removed the Grand Duke and heir--apparent from the army--who on his own authority and contrary to the Emperor's will had decided on the abandonment of Moscow, now realized at once that his day was over, that his part was played, and that the power he was supposed to hold was no longer his. And he understood this not merely from the attitude of the court. He saw on the one hand that the military business in which he had played his part was ended and felt that his mission was accomplished; and at the same time he began to be conscious of the physical weariness of his aged body and of the necessity of physical rest.

On the twenty-ninth of November Kutuzov entered Vilna--his "dear Vilna" as he called it. Twice during his career Kutuzov had been governor of Vilna. In that wealthy town, which had not been injured, he found old friends and associations, besides the comforts of life of which he had so long been deprived. And he suddenly turned from the cares of army and state and, as far as the passions that seethed around him allowed, immersed himself in the quiet life to which he had formerly been accustomed, as if all that was taking place and all that had still to be done in the realm of history did not concern him at all.

Chichagov, one of the most zealous "cutters-off" and "breakers-up," who had first wanted to effect a diversion in Greece and then in Warsaw but never wished to go where he was sent: Chichagov, noted for the boldness with which he spoke to the Emperor, and who considered Kutuzov to be under an obligation to him because when he was sent to make peace with Turkey in 1811 independently of Kutuzov, and found that peace had already been concluded, he admitted to the Emperor that the merit of securing that peace was really Kutuzov's; this Chichagov was the first to

meet Kutuzov at the castle where the latter was to stay. In undress naval uniform, with a dirk, and holding his cap under his arm, he handed Kutuzov a garrison report and the keys of the town. The contemptuously respectful attitude of the younger men to the old man in his dotage was expressed in the highest degree by the behavior of Chichagov, who knew of the accusations that were being directed against Kutuzov.

When speaking to Chichagov, Kutuzov incidentally mentioned that the vehicles packed with china that had been captured from him at Borisov had been recovered and would be restored to him.

"You mean to imply that I have nothing to eat out of.... On the contrary, I can supply you with everything even if you want to give dinner parties," warmly replied Chichagov, who tried by every word he spoke to prove his own rectitude and therefore imagined Kutuzov to be animated by the same desire.

Kutuzov, shrugging his shoulders, replied with his subtle penetrating smile: "I meant merely to say what I said."

Contrary to the Emperor's wish Kutuzov detained the greater part of the army at Vilna. Those about him said that he became extraordinarily slack and physically feeble during his stay in that town. He attended to army affairs reluctantly, left everything to his generals, and while awaiting the Emperor's arrival led a dissipated life.

Having left Petersburg on the seventh of December with his suite--Count Tolstoy, Prince Volkonski, Arakcheev, and others--the Emperor reached Vilna on the eleventh, and in his traveling sleigh drove straight to the castle. In spite of the severe frost some hundred generals and staff officers in full parade uniform stood in front of the castle, as well as a guard of honor of the Semenov regiment.

A courier who galloped to the castle in advance, in a troyka with three foam-flecked horses, shouted "Coming!" and Konovnitsyn rushed into the vestibule to inform Kutuzov, who was waiting in the hall porter's little lodge.

A minute later the old man's large stout figure in full-dress uniform, his chest covered with orders and a scarf drawn round his stomach, waddled out into the porch. He put on his hat with its peaks to the sides and, holding his gloves in his hand and walking with an effort sideways down the steps to the level of the street, took in his hand the report he had prepared for the Emperor.

There was running to and fro and whispering; another troyka

furiously up, and then all eyes were turned on an approaching sleigh in which the figures of the Emperor and Volkonski could already be descried.

From the habit of fifty years all this had a physically agitating effect on the old general. He carefully and hastily felt himself all over, readjusted his hat, and pulling himself together drew himself up and, at the very moment when the Emperor, having alighted from the sleigh, lifted his eyes to him, handed him the report and began speaking in his smooth, ingratiating voice.

The Emperor with a rapid glance scanned Kutuzov from head to foot, frowned for an instant, but immediately mastering himself went up to the old man, extended his arms and embraced him. And this embrace too, owing to a long-standing impression related to his innermost feelings, had its usual effect on Kutuzov and he gave a sob.

The Emperor greeted the officers and the Semenov guard, and again pressing the old man's hand went with him into the castle.

When alone with the field marshal the Emperor expressed his dissatisfaction at the slowness of the pursuit and at the mistakes made at Krasnoe and the Berezina, and informed him of his intentions for a future campaign abroad. Kutuzov made no rejoinder or remark. The same submissive, expressionless look with which he had listened to the Emperor's commands on the field of Austerlitz seven years before settled on his face now.

When Kutuzov came out of the study and with lowered head was crossing the ballroom with his heavy waddling gait, he was arrested by someone's voice saying:

"Your Serene Highness!"

Kutuzov raised his head and looked for a long while into the eyes of Count Tolstoy, who stood before him holding a silver salver on which lay a small object. Kutuzov seemed not to understand what was expected of him.

Suddenly he seemed to remember; a scarcely perceptible smile flashed across his puffy face, and bowing low and respectfully he took the object that lay on the salver. It was the Order of St. George of the First Class.

CHAPTER XI

Next day the field marshal gave a dinner and ball which the Emperor honored by his presence. Kutuzov had received the Order of St. George of the First Class and the Emperor showed him the highest honors, but everyone knew of the imperial dissatisfaction with him. The proprieties were observed and the Emperor was the first to set that example, but everybody understood that the old man was blameworthy and good-for-nothing. When Kutuzov, conforming to a custom of Catherine's day, ordered the standards that had been captured to be lowered at the Emperor's feet on his entering the ballroom, the Emperor made a wry face and muttered something in which some people caught the words, "the old comedian."

The Emperor's displeasure with Kutuzov was specially increased at Vilna by the fact that Kutuzov evidently could not or would not understand the importance of the coming campaign.

When on the following morning the Emperor said to the officers assembled about him: "You have not only saved Russia, you have saved Europe!" they all understood that the war was not ended.

Kutuzov alone would not see this and openly expressed his opinion that no fresh war could improve the position or add to the glory of Russia, but could only spoil and lower the glorious position that Russia had gained. He tried to prove to the Emperor the impossibility of levying fresh troops, spoke of the hardships already endured by the people, of the possibility of failure and so forth.

This being the field marshal's frame of mind he was naturally regarded as merely a hindrance and obstacle to the impending war.

To avoid unpleasant encounters with the old man, the natural method was to do what had been done with him at Austerlitz and with Barclay at the beginning of the Russian campaign--to transfer the authority to the Emperor himself, thus cutting the ground from under the commander in chief's feet without upsetting the old man by informing him of the change.

With this object his staff was gradually reconstructed and its real strength removed and transferred to the Emperor. Toll, Konovnitsyn, and Ermolov received fresh appointments. Everyone spoke loudly of the field marshal's great weakness and failing health.

His health had to be bad for his place to be taken away and given to another. And in fact his health was poor.

So naturally, simply, and gradually--just as he had come from Turkey to the Treasury in Petersburg to recruit the militia, and then to the army when he was needed there--now when his part was played out, Kutuzov's place was taken by a new and necessary performer.

The war 1812, besides its national significance dear to every Russian heart, was now to assume another, a European, significance.

The movement of peoples from west to east was to be succeeded by a movement of peoples from east to west, and for this fresh war another leader was necessary, having qualities and views differing from Kutuzov's and animated by different motives.

Alexander I was as necessary for the movement of the peoples from east to west and for the refixing of national frontiers as Kutuzov had been for the salvation and glory of Russia.

Kutuzov did not understand what Europe, the balance of power, or Napoleon meant. He could not understand it. For the representative of the Russian people, after the enemy had been destroyed and Russia had been liberated and raised to the summit of her glory, there was nothing left to do as a Russian. Nothing remained for the representative of the national war but to die, and Kutuzov died.

CHAPTER XII

As generally happens, Pierre did not feel the full effects of the physical privation and strain he had suffered as prisoner until after they were over. After his liberation he reached Orel, and on the third day there, when preparing to go to Kiev, he fell ill and was laid up for three months. He had what the doctors termed "bilious fever." But despite the fact that the doctors treated him, bled him, and gave him medicines to drink, he recovered.

Scarcely any impression was left on Pierre's mind by all that happened to him from the time of his rescue till his illness. He remembered only the dull gray weather now rainy and now snowy, internal physical distress, and pains in his feet and side. He remembered a general impression of the misfortunes and sufferings of people and of being worried by the curiosity of officers and generals who questioned him, he also remembered his difficulty in procuring a conveyance and horses, and above all he remembered his

incapacity to think and feel all that time. On the day of his rescue he had seen the body of Petya Rostov. That same day he had learned that Prince Andrew, after surviving the battle of Borodino for more than a month had recently died in the Rostovs' house at Yaroslavl, and Denisov who told him this news also mentioned Helene's death, supposing that Pierre had heard of it long before. All this at the time seemed merely strange to Pierre: he felt he could not grasp its significance. Just then he was only anxious to get away as quickly as possible from places where people were killing one another, to some peaceful refuge where he could recover himself, rest, and think over all the strange new facts he had learned; but on reaching Orel he immediately fell ill. When he came to himself after his illness he saw in attendance on him two of his servants, Terenty and Vaska, who had come from Moscow; and also his cousin the eldest princess, who had been living on his estate at Elets and hearing of his rescue and illness had come to look after him.

It was only gradually during his convalescence that Pierre lost the impressions he had become accustomed to during the last few months and got used to the idea that no one would oblige him to go anywhere tomorrow, that no one would deprive him of his warm bed, and that he would be sure to get his dinner, tea, and supper. But for a long time in his dreams he still saw himself in the conditions of captivity. In the same way little by little he came to understand the news he had been told after his rescue, about the death of Prince Andrew, the death of his wife, and the destruction of the French.

A joyous feeling of freedom--that complete inalienable freedom natural to man which he had first experienced at the first halt outside Moscow--filled Pierre's soul during his convalescence. He was surprised to find that this inner freedom, which was independent of external conditions, now had as it were an additional setting of external liberty. He was alone in a strange town, without acquaintances. No one demanded anything of him or sent him anywhere. He had all he wanted: the thought of his wife which had been a continual torment to him was no longer there, since she was no more.

"Oh, how good! How splendid!" said he to himself when a cleanly laid table was moved up to him with savory beef tea, or when he lay down for the night on a soft clean bed, or when he remembered that the French had gone and that his wife was no more. "Oh, how good, how splendid!"

And by old habit he asked himself the question: "Well, and what then? What am I going to do?" And he immediately gave himself the answer: "Well, I shall live. Ah, how splendid!"

The very question that had formerly tormented him, the thing he had continually sought to find--the aim of life--no longer existed for him now. That search for the aim of life had not merely disappeared temporarily--he felt that it no longer existed for him and could not present itself again. And this very absence of an aim gave him the complete, joyous sense of freedom which constituted his happiness at this time.

He could not see an aim, for he now had faith--not faith in any kind of rule, or words, or ideas, but faith in an ever-living, ever-manifest God. Formerly he had sought Him in aims he set himself. That search for an aim had been simply a search for God, and suddenly in his captivity he had learned not by words or reasoning but by direct feeling what his nurse had told him long ago: that God is here and everywhere. In his captivity he had learned that in Karataev God was greater, more infinite and unfathomable than in the Architect of the Universe recognized by the Freemasons. He felt like a man who after straining his eyes to see into the far distance finds what he sought at his very feet. All his life he had looked over the heads of the men around him, when he should have merely looked in front of him without straining his eyes.

In the past he had never been able to find that great inscrutable infinite something. He had only felt that it must exist somewhere and had looked for it. In everything near and comprehensible he had only what was limited, petty, commonplace, and senseless. He had equipped himself with a mental telescope and looked into remote space, where petty worldliness hiding itself in misty distance had seemed to him great and infinite merely because it was not clearly seen. And such had European life, politics, Freemasonry, philosophy, and philanthropy seemed to him. But even then, at moments of weakness as he had accounted them, his mind had penetrated to those distances and he had there seen the same pettiness, worldliness, and senselessness. Now, however, he had learned to see the great, eternal, and infinite in everything, and therefore--to see it and enjoy its contemplation--he naturally threw away the telescope through which he had till now gazed over men's heads, and gladly regarded the ever-changing, eternally great, unfathomable, and infinite life around him. And the closer he looked the more tranquil and happy he became. That dreadful question, "What for?" which had formerly destroyed all his mental edifices, no longer existed for him. To that question, "What for?" a simple answer was now always ready in his soul: "Because there is a God, that God without whose will not one hair falls from a man's head."

CHAPTER XIII

In external ways Pierre had hardly changed at all. In appearance he was just what he used to be. As before he was absent-minded and seemed occupied not with what was before his eyes but with something special of his own. The difference between his former and present self was that formerly when he did not grasp what lay before him or was said to him, he had puckered his forehead painfully as if vainly seeking to distinguish something at a distance. At present he still forgot what was said to him and still did not see what was before his eyes, but he now looked with a scarcely perceptible and seemingly ironic smile at what was before him and listened to what was said, though evidently seeing and hearing something quite different. Formerly he had appeared to be a kindhearted but unhappy man, and so people had been inclined to avoid him. Now a smile at the joy of life always played round his lips, and sympathy for others, shone in his eyes with a questioning look as to whether they were as contented as he was, and people felt pleased by his presence.

Previously he had talked a great deal, grew excited when he talked, and seldom listened; now he was seldom carried away in conversation and knew how to listen so that people readily told him their most intimate secrets.

The princess, who had never liked Pierre and had been particularly hostile to him since she had felt herself under obligations to him after the old count's death, now after staying a short time in Orel--where she had come intending to show Pierre that in spite of his ingratitude she considered it her duty to nurse him--felt to her surprise and vexation that she had become fond of him. Pierre did not in any way seek her approval, he merely studied her with interest. Formerly she had felt that he regarded her with indifference and irony, and so had shrunk into herself as she did with others and had shown him only the combative side of her nature; but now he seemed to be trying to understand the most intimate places of her heart, and, mistrustfully at first but afterwards gratefully, she let him see the hidden, kindly sides of her character.

The most cunning man could not have crept into her confidence more successfully, evoking memories of the best times of her youth and showing sympathy with them. Yet Pierre's cunning consisted simply in finding pleasure in drawing out the human qualities of the embittered, hard, and (in her own way) proud princess.

"Yes, he is a very, very kind man when he is not under the influence of bad people but of people such as myself," thought she.

His servants too--Terenty and Vaska--in their own way noticed the change that had taken place in Pierre. They considered that he had become much "simpler." Terenty, when he had helped him undress and wished him good night, often lingered with his master's boots in his hands and clothes over his arm, to see whether he would not start a talk. And Pierre, noticing that Terenty wanted a chat, generally kept him there.

"Well, tell me... now, how did you get food?" he would ask.

And Terenty would begin talking of the destruction of Moscow, and of the old count, and would stand for a long time holding the clothes and talking, or sometimes listening to Pierre's stories, and then would go out into the hall with a pleasant sense of intimacy with his master and affection for him.

The doctor who attended Pierre and visited him every day, though he considered it his duty as a doctor to pose as a man whose every moment was of value to suffering humanity, would sit for hours with Pierre telling him his favorite anecdotes and his observations on the characters of his patients in general, and especially of the ladies.

"It's a pleasure to talk to a man like that; he is not like our provincials," he would say.

There were several prisoners from the French army in Orel, and the doctor brought one of them, a young Italian, to see Pierre.

This officer began visiting Pierre, and the princess used to make fun of the tenderness the Italian expressed for him.

The Italian seemed happy only when he could come to see Pierre, talk with him, tell him about his past, his life at home, and his love, and pour out to him his indignation against the French and especially against Napoleon.

"If all Russians are in the least like you, it is sacrilege to fight such a nation," he said to Pierre. "You, who have suffered so from the French, do not even feel animosity toward them."

Pierre had evoked the passionate affection of the Italian merely by evoking the best side of his nature and taking a pleasure in so doing.

During the last days of Pierre's stay in Orel his old Masonic acquaintance Count Willarski, who had introduced him to the lodge in

1807, came to see him. Willarski was married to a Russian heiress who had a large estate in Orel province, and he occupied a temporary post in the commissariat department in that town.

Hearing that Bezukhov was in Orel, Willarski, though they had never been intimate, came to him with the professions of friendship and intimacy that people who meet in a desert generally express for one another. Willarski felt dull in Orel and was pleased to meet a man of his own circle and, as he supposed, of similar interests.

But to his surprise Willarski soon noticed that Pierre had lagged much behind the times, and had sunk, as he expressed it to himself, into apathy and egotism.

"You are letting yourself go, my dear fellow," he said.

But for all that Willarski found it pleasanter now than it had been formerly to be with Pierre, and came to see him every day. To Pierre as he looked at and listened to Willarski, it seemed strange to think that he had been like that himself but a short time before.

Willarski was a married man with a family, busy with his family affairs, his wife's affairs, and his official duties. He regarded all these occupations as hindrances to life, and considered that they were all contemptible because their aim was the welfare of himself and his family. Military, administrative, political, and Masonic interests continually absorbed his attention. And Pierre, without trying to change the other's views and without condemning him, but with the quiet, joyful, and amused smile now habitual to him, was interested in this strange though very familiar phenomenon.

There was a new feature in Pierre's relations with Willarski, with the princess, with the doctor, and with all the people he now met, which gained for him the general good will. This was his acknowledgment of the impossibility of changing a man's convictions by words, and his recognition of the possibility of everyone thinking, feeling, and seeing things each from his own point of view. This legitimate peculiarity of each individual which used to excite and irritate Pierre now became a basis of the sympathy he felt for, and the interest he took in, other people. The difference, and sometimes complete contradiction, between men's opinions and their lives, and between one man and another, pleased him and drew from him an amused and gentle smile.

In practical matters Pierre unexpectedly felt within himself a center of gravity he had previously lacked. Formerly all pecuniary questions, especially requests for money to which, as an extremely wealthy man, he was very exposed, produced in him a state of

hopeless agitation and perplexity. "To give or not to give?" he had asked himself. "I have it and he needs it. But someone else needs it still more. Who needs it most? And perhaps they are both impostors?" In the old days he had been unable to find a way out of all these surmises and had given to all who asked as long as he had anything to give. Formerly he had been in a similar state of perplexity with regard to every question concerning his property, when one person advised one thing and another something else.

Now to his surprise he found that he no longer felt either doubt or perplexity about these questions. There was now within him a judge who by some rule unknown to him decided what should or should not be done.

He was as indifferent as heretofore to money matters, but now he felt certain of what ought and what ought not to be done. The first time he had recourse to his new judge was when a French prisoner, a colonel, came to him and, after talking a great deal about his exploits, concluded by making what amounted to a demand that Pierre should give him four thousand francs to send to his wife and children. Pierre refused without the least difficulty or effort, and was afterwards surprised how simple and easy had been what used to appear so insurmountably difficult. At the same time that he refused the colonel's demand he made up his mind that he must have recourse to artifice when leaving Orel, to induce the Italian officer to accept some money of which he was evidently in need. A further proof to Pierre of his own more settled outlook on practical matters was furnished by his decision with regard to his wife's debts and to the rebuilding of his houses in and near Moscow.

His head steward came to him at Orel and Pierre reckoned up with him his diminished income. The burning of Moscow had cost him, according to the head steward's calculation, about two million rubles.

To console Pierre for these losses the head steward gave him an estimate showing that despite these losses his income would not be diminished but would even be increased if he refused to pay his wife's debts which he was under no obligation to meet, and did not rebuild his Moscow house and the country house on his Moscow estate, which had cost him eighty thousand rubles a year and brought in nothing.

"Yes, of course that's true," said Pierre with a cheerful smile. "I don't need all that at all. By being ruined I have become much richer."

But in January Savelich came from Moscow and gave him an account of the state of things there, and spoke of the estimate an architect had made of the cost of rebuilding the town and country houses,

speaking of this as of a settled matter. About the same time he received letters from Prince Vasili and other Petersburg acquaintances speaking of his wife's debts. And Pierre decided that the steward's proposals which had so pleased him were wrong and that he must go to Petersburg and settle his wife's affairs and must rebuild in Moscow. Why this was necessary he did not know, but he knew for certain that it was necessary. His income would be reduced by three fourths, but he felt it must be done.

Willarski was going to Moscow and they agreed to travel together.

During the whole time of his convalescence in Orel Pierre had experienced a feeling of joy, freedom, and life; but when during his journey he found himself in the open world and saw hundreds of new faces, that feeling was intensified. Throughout his journey he felt like a schoolboy on holiday. Everyone--the stagecoach driver, the post-house overseers, the peasants on the roads and in the villages--had a new significance for him. The presence and remarks of Willarski who continually deplored the ignorance and poverty of Russia and its backwardness compared with Europe only heightened Pierre's pleasure. Where Willarski saw deadness Pierre saw an extraordinary strength and vitality--the strength which in that vast space amid the snows maintained the life of this original, peculiar, and unique people. He did not contradict Willarski and even seemed to agree with him--an apparent agreement being the simplest way to avoid discussions that could lead to nothing--and he smiled joyfully as he listened to him.

CHAPTER XIV

It would be difficult to explain why and whither ants whose heap has been destroyed are hurrying: some from the heap dragging bits of rubbish, larvae, and corpses, others back to the heap, or why they jostle, overtake one another, and fight, and it would be equally difficult to explain what caused the Russians after the departure of the French to throng to the place that had formerly been Moscow. But when we watch the ants round their ruined heap, the tenacity, energy, and immense number of the delving insects prove that despite the destruction of the heap, something indestructible, which though intangible is the real strength of the colony, still exists; and similarly, though in Moscow in the month of October there was no government no churches, shrines, riches, or houses--it was still the Moscow it had been in August. All was destroyed, except something

intangible yet powerful and indestructible.

The motives of those who thronged from all sides to Moscow after it had been cleared of the enemy were most diverse and personal, and at first for the most part savage and brutal. One motive only they all had in common: a desire to get to the place that had been called Moscow, to apply their activities there.

Within a week Moscow already had fifteen thousand inhabitants, in a fortnight twenty-five thousand, and so on. By the autumn of 1813 the number, ever increasing and increasing, exceeded what it had been in 1812.

The first Russians to enter Moscow were the Cossacks of Wintzingerode's detachment, peasants from the adjacent villages, and residents who had fled from Moscow and had been hiding in its vicinity. The Russians who entered Moscow, finding it plundered, plundered it in their turn. They continued what the French had begun. Trains of peasant carts came to Moscow to carry off to the villages what had been abandoned in the ruined houses and the streets. The Cossacks carried off what they could to their camps, and the householders seized all they could find in other houses and moved it to their own, pretending that it was their property.

But the first plunderers were followed by a second and a third contingent, and with increasing numbers plundering became more and more difficult and assumed more definite forms.

The French found Moscow abandoned but with all the organizations of regular life, with diverse branches of commerce and craftsmanship, with luxury, and governmental and religious institutions. These forms were lifeless but still existed. There were bazaars, shops, warehouses, market stalls, granaries--for the most part still stocked with goods--and there were factories and workshops, palaces and wealthy houses filled with luxuries, hospitals, prisons, government offices, churches, and cathedrals. The longer the French remained the more these forms of town life perished, until finally all was merged into one confused, lifeless scene of plunder.

The more the plundering by the French continued, the more both the wealth of Moscow and the strength of its plunderers was destroyed. But plundering by the Russians, with which the reoccupation of the city began, had an opposite effect: the longer it continued and the greater the number of people taking part in it the more rapidly was the wealth of the city and its regular life restored.

Besides the plunderers, very various people, some drawn by

curiosity, some by official duties, some by self-interest--house owners, clergy, officials of all kinds, tradesmen, artisans, and peasants--streamed into Moscow as blood flows to the heart.

Within a week the peasants who came with empty carts to carry off plunder were stopped by the authorities and made to cart the corpses out of the town. Other peasants, having heard of their comrades' discomfiture, came to town bringing rye, oats, and hay, and beat down one another's prices to below what they had been in former days. Gangs of carpenters hoping for high pay arrived in Moscow every day, and on all sides logs were being hewn, new houses built, and old, charred ones repaired. Tradesmen began trading in booths. Cookshops and taverns were opened in partially burned houses. The clergy resumed the services in many churches that had not been burned. Donors contributed Church property that had been stolen. Government clerks set up their baize-covered tables and their pigeonholes of documents in small rooms. The higher authorities and the police organized the distribution of goods left behind by the French. The owners of houses in which much property had been left, brought there from other houses, complained of the injustice of taking everything to the Faceted Palace in the Kremlin; others insisted that as the French had gathered things from different houses into this or that house, it would be unfair to allow its owner to keep all that was found there. They abused the police and bribed them, made out estimates at ten times their value for government stores that had perished in the fire, and demanded relief. And Count Rostopchin wrote proclamations.

CHAPTER XV

At the end of January Pierre went to Moscow and stayed in an annex of his house which had not been burned. He called on Count Rostopchin and on some acquaintances who were back in Moscow, and he intended to leave for Petersburg two days later. Everybody was celebrating the victory, everything was bubbling with life in the ruined but reviving city. Everyone was pleased to see Pierre, everyone wished to meet him, and everyone questioned him about what he had seen. Pierre felt particularly well disposed toward them all, but was now instinctively on his guard for fear of binding himself in any way. To all questions put to him--whether important or quite trifling--such as: Where would he live? Was he going to rebuild? When was he going to Petersburg and would he mind taking a parcel for someone?--he replied: "Yes, perhaps," or, "I think so," and so on.

He had heard that the Rostovs were at Kostroma but the thought of Natasha seldom occurred to him. If it did it was only as a pleasant memory of the distant past. He felt himself not only free from social obligations but also from that feeling which, it seemed to him, he had aroused in himself.

On the third day after his arrival he heard from the Drubetskoys that Princess Mary was in Moscow. The death, sufferings, and last days of Prince Andrew had often occupied Pierre's thoughts and now recurred to him with fresh vividness. Having heard at dinner that Princess Mary was in Moscow and living in her house--which had not been burned--in Vozdvizhenka Street, he drove that same evening to see her.

On his way to the house Pierre kept thinking of Prince Andrew, of their friendship, of his various meetings with him, and especially of the last one at Borodino.

"Is it possible that he died in the bitter frame of mind he was then in? Is it possible that the meaning of life was not disclosed to him before he died?" thought Pierre. He recalled Karataev and his death and involuntarily began to compare these two men, so different, and yet so similar in that they had both lived and both died and in the love he felt for both of them.

Pierre drove up to the house of the old prince in a most serious mood. The house had escaped the fire; it showed signs of damage but its general aspect was unchanged. The old footman, who met Pierre with a stern face as if wishing to make the visitor feel that the absence of the old prince had not disturbed the order of things in the house, informed him that the princess had gone to her own apartments, and that she received on Sundays.

"Announce me. Perhaps she will see me," said Pierre.

"Yes, sir," said the man. "Please step into the portrait gallery."

A few minutes later the footman returned with Dessalles, who brought word from the princess that she would be very glad to see Pierre if he would excuse her want of ceremony and come upstairs to her apartment.

In a rather low room lit by one candle sat the princess and with her another person dressed in black. Pierre remembered that the princess always had lady companions, but who they were and what they were like he never knew or remembered. "This must be one of her companions," he thought, glancing at the lady in the black dress.

The princess rose quickly to meet him and held out her hand.

"Yes," she said, looking at his altered face after he had kissed her hand, "so this is how we meet again. He spoke of you even at the very last," she went on, turning her eyes from Pierre to her companion with a shyness that surprised him for an instant.

"I was so glad to hear of your safety. It was the first piece of good news we had received for a long time."

Again the princess glanced round at her companion with even more uneasiness in her manner and was about to add something, but Pierre interrupted her.

"Just imagine--I knew nothing about him!" said he. "I thought he had been killed. All I know I heard at second hand from others. I only know that he fell in with the Rostovs.... What a strange coincidence!"

Pierre spoke rapidly and with animation. He glanced once at the companion's face, saw her attentive and kindly gaze fixed on him, and, as often happens when one is talking, felt somehow that this companion in the black dress was a good, kind, excellent creature who would not hinder his conversing freely with Princess Mary.

But when he mentioned the Rostovs, Princess Mary's face expressed still greater embarrassment. She again glanced rapidly from Pierre's face to that of the lady in the black dress and said:

"Do you really not recognize her?"

Pierre looked again at the companion's pale, delicate face with its black eyes and peculiar mouth, and something near to him, long forgotten and more than sweet, looked at him from those attentive eyes.

"But no, it can't be!" he thought. "This stern, thin, pale face that looks so much older! It cannot be she. It merely reminds me of her." But at that moment Princess Mary said, "Natasha!" And with difficulty, effort, and stress, like the opening of a door grown rusty on its hinges, a smile appeared on the face with the attentive eyes, and from that opening door came a breath of fragrance which suffused Pierre with a happiness he had long forgotten and of which he had not even been thinking--especially at that moment. It suffused him, seized him, and enveloped him completely. When she smiled doubt was no longer possible, it was Natasha and he loved her.

At that moment Pierre involuntarily betrayed to her, to Princess Mary, and above all to himself, a secret of which he himself had been unaware. He flushed joyfully yet with painful distress. He

tried to hide his agitation. But the more he tried to hide it the more clearly--clearer than any words could have done--did he betray to himself, to her, and to Princess Mary that he loved her.

"No, it's only the unexpectedness of it," thought Pierre. But as soon as he tried to continue the conversation he had begun with Princess Mary he again glanced at Natasha, and a still-deeper flush suffused his face and a still-stronger agitation of mingled joy and fear seized his soul. He became confused in his speech and stopped in the middle of what he was saying.

Pierre had failed to notice Natasha because he did not at all expect to see her there, but he had failed to recognize her because the change in her since he last saw her was immense. She had grown thin and pale, but that was not what made her unrecognizable; she was unrecognizable at the moment he entered because on that face whose eyes had always shone with a suppressed smile of the joy of life, now when he first entered and glanced at her there was not the least shadow of a smile: only her eyes were kindly attentive and sadly interrogative.

Pierre's confusion was not reflected by any confusion on Natasha's part, but only by the pleasure that just perceptibly lit up her whole face.

CHAPTER XVI

"She has come to stay with me," said Princess Mary. "The count and countess will be here in a few days. The countess is in a dreadful state; but it was necessary for Natasha herself to see a doctor. They insisted on her coming with me."

"Yes, is there a family free from sorrow now?" said Pierre, addressing Natasha. "You know it happened the very day we were rescued. I saw him. What a delightful boy he was!"

Natasha looked at him, and by way of answer to his words her eyes widened and lit up.

"What can one say or think of as a consolation?" said Pierre.

"Nothing! Why had such a splendid boy, so full of life, to die?"

"Yes, in these days it would be hard to live without faith..."

remarked Princess Mary.

"Yes, yes, that is really true," Pierre hastily interrupted her.

"Why is it true?" Natasha asked, looking attentively into Pierre's eyes.

"How can you ask why?" said Princess Mary. "The thought alone of what awaits..."

Natasha without waiting for Princess Mary to finish again looked inquiringly at Pierre.

"And because," Pierre continued, "only one who believes that there is a God ruling us can bear a loss such as hers and... yours."

Natasha had already opened her mouth to speak but suddenly stopped. Pierre hurriedly turned away from her and again addressed Princess Mary, asking about his friend's last days.

Pierre's confusion had now almost vanished, but at the same time he felt that his freedom had also completely gone. He felt that there was now a judge of his every word and action whose judgment mattered more to him than that of all the rest of the world. As he spoke now he was considering what impression his words would make on Natasha. He did not purposely say things to please her, but whatever he was saying he regarded from her standpoint.

Princess Mary--reluctantly as is usual in such cases--began telling of the condition in which she had found Prince Andrew. But Pierre's face quivering with emotion, his questions and his eager restless expression, gradually compelled her to go into details which she feared to recall for her own sake.

"Yes, yes, and so...?" Pierre kept saying as he leaned toward her with his whole body and eagerly listened to her story. "Yes, yes... so he grew tranquil and softened? With all his soul he had always sought one thing--to be perfectly good--so he could not be afraid of death. The faults he had--if he had any--were not of his making. So he did soften?... What a happy thing that he saw you again," he added, suddenly turning to Natasha and looking at her with eyes full of tears.

Natasha's face twitched. She frowned and lowered her eyes for a moment. She hesitated for an instant whether to speak or not.

"Yes, that was happiness," she then said in her quiet voice with its deep chest notes. "For me it certainly was happiness." She paused.

"And he... he... he said he was wishing for it at the very moment I entered the room...."

Natasha's voice broke. She blushed, pressed her clasped hands on her knees, and then controlling herself with an evident effort lifted her head and began to speak rapidly.

"We knew nothing of it when we started from Moscow. I did not dare to ask about him. Then suddenly Sonya told me he was traveling with us. I had no idea and could not imagine what state he was in, all I wanted was to see him and be with him," she said, trembling, and breathing quickly.

And not letting them interrupt her she went on to tell what she had never yet mentioned to anyone--all she had lived through during those three weeks of their journey and life at Yaroslavl.

Pierre listened to her with lips parted and eyes fixed upon her full of tears. As he listened he did not think of Prince Andrew, nor of death, nor of what she was telling. He listened to her and felt only pity for her, for what she was suffering now while she was speaking.

Princess Mary, frowning in her effort to hold back her tears, sat beside Natasha, and heard for the first time the story of those last days of her brother's and Natasha's love.

Evidently Natasha needed to tell that painful yet joyful tale.

She spoke, mingling most trifling details with the intimate secrets of her soul, and it seemed as if she could never finish. Several times she repeated the same thing twice.

Dessalles' voice was heard outside the door asking whether little Nicholas might come in to say good night.

"Well, that's all--everything," said Natasha.

She got up quickly just as Nicholas entered, almost ran to the door which was hidden by curtains, struck her head against it, and rushed from the room with a moan either of pain or sorrow.

Pierre gazed at the door through which she had disappeared and did not understand why he suddenly felt all alone in the world.

Princess Mary roused him from his abstraction by drawing his attention to her nephew who had entered the room.

At that moment of emotional tenderness young Nicholas' face, which

resembled his father's, affected Pierre so much that when he had kissed the boy he got up quickly, took out his handkerchief, and went to the window. He wished to take leave of Princess Mary, but she would not let him go.

"No, Natasha and I sometimes don't go to sleep till after two, so please don't go. I will order supper. Go downstairs, we will come immediately."

Before Pierre left the room Princess Mary told him: "This is the first time she has talked of him like that."

CHAPTER XVII

Pierre was shown into the large, brightly lit dining room; a few minutes later he heard footsteps and Princess Mary entered with Natasha. Natasha was calm, though a severe and grave expression had again settled on her face. They all three of them now experienced that feeling of awkwardness which usually follows after a serious and heartfelt talk. It is impossible to go back to the same conversation, to talk of trifles is awkward, and yet the desire to speak is there and silence seems like affectation. They went silently to table. The footmen drew back the chairs and pushed them up again. Pierre unfolded his cold table napkin and, resolving to break the silence, looked at Natasha and at Princess Mary. They had evidently both formed the same resolution; the eyes of both shone with satisfaction and a confession that besides sorrow life also has joy.

"Do you take vodka, Count?" asked Princess Mary, and those words suddenly banished the shadows of the past. "Now tell us about yourself," said she. "One hears such improbable wonders about you."

"Yes," replied Pierre with the smile of mild irony now habitual to him. "They even tell me wonders I myself never dreamed of! Mary Abramovna invited me to her house and kept telling me what had happened, or ought to have happened, to me. Stepan Stepanych also instructed me how I ought to tell of my experiences. In general I have noticed that it is very easy to be an interesting man (I am an interesting man now); people invite me out and tell me all about myself."

Natasha smiled and was on the point of speaking.

"We have been told," Princess Mary interrupted her, "that you lost two millions in Moscow. Is that true?"

"But I am three times as rich as before," returned Pierre.

Though the position was now altered by his decision to pay his wife's debts and to rebuild his houses, Pierre still maintained that he had become three times as rich as before.

"What I have certainly gained is freedom," he began seriously, but did not continue, noticing that this theme was too egotistic.

"And are you building?"

"Yes. Savelich says I must!"

"Tell me, you did not know of the countess' death when you decided to remain in Moscow?" asked Princess Mary and immediately blushed, noticing that her question, following his mention of freedom, ascribed to his words a meaning he had perhaps not intended.

"No," answered Pierre, evidently not considering awkward the meaning Princess Mary had given to his words. "I heard of it in Orel and you cannot imagine how it shocked me. We were not an exemplary couple," he added quickly, glancing at Natasha and noticing on her face curiosity as to how he would speak of his wife, "but her death shocked me terribly. When two people quarrel they are always both in fault, and one's own guilt suddenly becomes terribly serious when the other is no longer alive. And then such a death... without friends and without consolation! I am very, very sorry for her," he concluded, and was pleased to notice a look of glad approval on Natasha's face.

"Yes, and so you are once more an eligible bachelor," said Princess Mary.

Pierre suddenly flushed crimson and for a long time tried not to look at Natasha. When he ventured to glance her way again her face was cold, stern, and he fancied even contemptuous.

"And did you really see and speak to Napoleon, as we have been told?" said Princess Mary.

Pierre laughed.

"No, not once! Everybody seems to imagine that being taken prisoner means being Napoleon's guest. Not only did I never see him but I heard nothing about him--I was in much lower company!"

Supper was over, and Pierre who at first declined to speak about his captivity was gradually led on to do so.

"But it's true that you remained in Moscow to kill Napoleon?"
Natasha asked with a slight smile. "I guessed it then when we met at the Sukharev tower, do you remember?"

Pierre admitted that it was true, and from that was gradually led by Princess Mary's questions and especially by Natasha's into giving a detailed account of his adventures.

At first he spoke with the amused and mild irony now customary with him toward everybody and especially toward himself, but when he came to describe the horrors and sufferings he had witnessed he was unconsciously carried away and began speaking with the suppressed emotion of a man re-experiencing in recollection strong impressions he has lived through.

Princess Mary with a gentle smile looked now at Pierre and now at Natasha. In the whole narrative she saw only Pierre and his goodness. Natasha, leaning on her elbow, the expression of her face constantly changing with the narrative, watched Pierre with an attention that never wandered--evidently herself experiencing all that he described. Not only her look, but her exclamations and the brief questions she put, showed Pierre that she understood just what he wished to convey. It was clear that she understood not only what he said but also what he wished to, but could not, express in words. The account Pierre gave of the incident with the child and the woman for protecting whom he was arrested was this: "It was an awful sight--children abandoned, some in the flames... One was snatched out before my eyes... and there were women who had their things snatched off and their earrings torn out..." he flushed and grew confused. "Then a patrol arrived and all the men--all those who were not looting, that is--were arrested, and I among them."

"I am sure you're not telling us everything; I am sure you did something..." said Natasha and pausing added, "something fine?"

Pierre continued. When he spoke of the execution he wanted to pass over the horrible details, but Natasha insisted that he should not omit anything.

Pierre began to tell about Karataev, but paused. By this time he had risen from the table and was pacing the room, Natasha following him with her eyes. Then he added:

"No, you can't understand what I learned from that illiterate man-

that simple fellow."

"Yes, yes, go on!" said Natasha. "Where is he?"

"They killed him almost before my eyes."

And Pierre, his voice trembling continually, went on to tell of the last days of their retreat, of Karataev's illness and his death.

He told of his adventures as he had never yet recalled them. He now, as it were, saw a new meaning in all he had gone through. Now that he was telling it all to Natasha he experienced that pleasure which a man has when women listen to him--not clever women who when listening either try to remember what they hear to enrich their minds and when opportunity offers to retell it, or who wish to adopt it to some thought of their own and promptly contribute their own clever comments prepared in their little mental workshop--but the pleasure given by real women gifted with a capacity to select and absorb the very best a man shows of himself. Natasha without knowing it was all attention: she did not lose a word, no single quiver in Pierre's voice, no look, no twitch of a muscle in his face, nor a single gesture. She caught the unfinished word in its flight and took it straight into her open heart, divining the secret meaning of all Pierre's mental travail.

Princess Mary understood his story and sympathized with him, but she now saw something else that absorbed all her attention. She saw the possibility of love and happiness between Natasha and Pierre, and the first thought of this filled her heart with gladness.

It was three o'clock in the morning. The footmen came in with sad and stern faces to change the candles, but no one noticed them.

Pierre finished his story. Natasha continued to look at him intently with bright, attentive, and animated eyes, as if trying to understand something more which he had perhaps left untold. Pierre in shamefaced and happy confusion glanced occasionally at her, and tried to think what to say next to introduce a fresh subject. Princess Mary was silent. It occurred to none of them that it was three o'clock and time to go to bed.

"People speak of misfortunes and sufferings," remarked Pierre, "but if at this moment I were asked: 'Would you rather be what you were before you were taken prisoner, or go through all this again?' then for heaven's sake let me again have captivity and horseflesh! We imagine that when we are thrown out of our usual ruts all is lost, but it is only then that what is new and good begins. While there is life there is happiness. There is much, much before us. I say

this to you," he added, turning to Natasha.

"Yes, yes," she said, answering something quite different. "I too should wish nothing but to relive it all from the beginning."

Pierre looked intently at her.

"Yes, and nothing more." said Natasha.

"It's not true, not true!" cried Pierre. "I am not to blame for being alive and wishing to live--nor you either."

Suddenly Natasha bent her head, covered her face with her hands, and began to cry.

"What is it, Natasha?" said Princess Mary.

"Nothing, nothing." She smiled at Pierre through her tears. "Good night! It is time for bed."

Pierre rose and took his leave.

Princess Mary and Natasha met as usual in the bedroom. They talked of what Pierre had told them. Princess Mary did not express her opinion of Pierre nor did Natasha speak of him.

"Well, good night, Mary!" said Natasha. "Do you know, I am often afraid that by not speaking of him" (she meant Prince Andrew) "for fear of not doing justice to our feelings, we forget him."

Princess Mary sighed deeply and thereby acknowledged the justice of Natasha's remark, but she did not express agreement in words.

"Is it possible to forget?" said she.

"It did me so much good to tell all about it today. It was hard and painful, but good, very good!" said Natasha. "I am sure he really loved him. That is why I told him... Was it all right?" she added, suddenly blushing.

"To tell Pierre? Oh, yes. What a splendid man he is!" said Princess Mary.

"Do you know, Mary..." Natasha suddenly said with a mischievous smile such as Princess Mary had not seen on her face for a long time, "he has somehow grown so clean, smooth, and fresh--as if he had just come out of a Russian bath; do you understand? Out of a moral

bath. Isn't it true?"

"Yes," replied Princess Mary. "He has greatly improved."

"With a short coat and his hair cropped; just as if, well, just as if he had come straight from the bath... Papa used to..."

"I understand why he" (Prince Andrew) "liked no one so much as him," said Princess Mary.

"Yes, and yet he is quite different. They say men are friends when they are quite different. That must be true. Really he is quite unlike him--in everything."

"Yes, but he's wonderful."

"Well, good night," said Natasha.

And the same mischievous smile lingered for a long time on her face as if it had been forgotten there.

CHAPTER XVIII

It was a long time before Pierre could fall asleep that night. He paced up and down his room, now turning his thoughts on a difficult problem and frowning, now suddenly shrugging his shoulders and wincing, and now smiling happily.

He was thinking of Prince Andrew, of Natasha, and of their love, at one moment jealous of her past, then reproaching himself for that feeling. It was already six in the morning and he still paced up and down the room.

"Well, what's to be done if it cannot be avoided? What's to be done? Evidently it has to be so," said he to himself, and hastily undressing he got into bed, happy and agitated but free from hesitation or indecision.

"Strange and impossible as such happiness seems, I must do everything that she and I may be man and wife," he told himself.

A few days previously Pierre had decided to go to Petersburg on the Friday. When he awoke on the Thursday, Savelich came to ask him about packing for the journey.

"What, to Petersburg? What is Petersburg? Who is there in Petersburg?" he asked involuntarily, though only to himself. "Oh, yes, long ago before this happened I did for some reason mean to go to Petersburg," he reflected. "Why? But perhaps I shall go. What a good fellow he is and how attentive, and how he remembers everything," he thought, looking at Savelich's old face, "and what a pleasant smile he has!"

"Well, Savelich, do you still not wish to accept your freedom?" Pierre asked him.

"What's the good of freedom to me, your excellency? We lived under the late count--the kingdom of heaven be his!--and we have lived under you too, without ever being wronged."

"And your children?"

"The children will live just the same. With such masters one can live."

"But what about my heirs?" said Pierre. "Supposing I suddenly marry... it might happen," he added with an involuntary smile.

"If I may take the liberty, your excellency, it would be a good thing."

"How easy he thinks it," thought Pierre. "He doesn't know how terrible it is and how dangerous. Too soon or too late... it is terrible!"

"So what are your orders? Are you starting tomorrow?" asked Savelich.

"No, I'll put it off for a bit. I'll tell you later. You must forgive the trouble I have put you to," said Pierre, and seeing Savelich smile, he thought: "But how strange it is that he should not know that now there is no Petersburg for me, and that that must be settled first of all! But probably he knows it well enough and is only pretending. Shall I have a talk with him and see what he thinks?" Pierre reflected. "No, another time."

At breakfast Pierre told the princess, his cousin, that he had been to see Princess Mary the day before and had there met--"Whom do you think? Natasha Rostova!"

The princess seemed to see nothing more extraordinary in that than if he had seen Anna Semenovna.

"Do you know her?" asked Pierre.

"I have seen the princess," she replied. "I heard that they were arranging a match for her with young Rostov. It would be a very good thing for the Rostovs, they are said to be utterly ruined."

"No; I mean do you know Natasha Rostova?"

"I heard about that affair of hers at the time. It was a great pity."

"No, she either doesn't understand or is pretending," thought Pierre. "Better not say anything to her either."

The princess too had prepared provisions for Pierre's journey.

"How kind they all are," thought Pierre. "What is surprising is that they should trouble about these things now when it can no longer be of interest to them. And all for me!"

On the same day the Chief of Police came to Pierre, inviting him to send a representative to the Faceted Palace to recover things that were to be returned to their owners that day.

"And this man too," thought Pierre, looking into the face of the Chief of Police. "What a fine, good-looking officer and how kind. Fancy bothering about such trifles now! And they actually say he is not honest and takes bribes. What nonsense! Besides, why shouldn't he take bribes? That's the way he was brought up, and everybody does it. But what a kind, pleasant face and how he smiles as he looks at me."

Pierre went to Princess Mary's to dinner.

As he drove through the streets past the houses that had been burned down, he was surprised by the beauty of those ruins. The picturesqueness of the chimney stacks and tumble-down walls of the burned-out quarters of the town, stretching out and concealing one another, reminded him of the Rhine and the Colosseum. The cabmen he met and their passengers, the carpenters cutting the timber for new houses with axes, the women hawkers, and the shopkeepers, all looked at him with cheerful beaming eyes that seemed to say: "Ah, there he is! Let's see what will come of it!"

At the entrance to Princess Mary's house Pierre felt doubtful whether he had really been there the night before and really seen Natasha and talked to her. "Perhaps I imagined it; perhaps I shall

go in and find no one there." But he had hardly entered the room before he felt her presence with his whole being by the loss of his sense of freedom. She was in the same black dress with soft folds and her hair was done the same way as the day before, yet she was quite different. Had she been like this when he entered the day before he could not for a moment have failed to recognize her.

She was as he had known her almost as a child and later on as Prince Andrew's fiancée. A bright questioning light shone in her eyes, and on her face was a friendly and strangely roguish expression.

Pierre dined with them and would have spent the whole evening there, but Princess Mary was going to vespers and Pierre left the house with her.

Next day he came early, dined, and stayed the whole evening. Though Princess Mary and Natasha were evidently glad to see their visitor and though all Pierre's interest was now centered in that house, by the evening they had talked over everything and the conversation passed from one trivial topic to another and repeatedly broke off. He stayed so long that Princess Mary and Natasha exchanged glances, evidently wondering when he would go. Pierre noticed this but could not go. He felt uneasy and embarrassed, but sat on because he simply could not get up and take his leave.

Princess Mary, foreseeing no end to this, rose first, and complaining of a headache began to say good night.

"So you are going to Petersburg tomorrow?" she asked.

"No, I am not going," Pierre replied hastily, in a surprised tone and as though offended. "Yes... no... to Petersburg? Tomorrow--but I won't say good-by yet. I will call round in case you have any commissions for me," said he, standing before Princess Mary and turning red, but not taking his departure.

Natasha gave him her hand and went out. Princess Mary on the other hand instead of going away sank into an armchair, and looked sternly and intently at him with her deep, radiant eyes. The weariness she had plainly shown before had now quite passed off. With a deep and long-drawn sigh she seemed to be prepared for a lengthy talk.

When Natasha left the room Pierre's confusion and awkwardness immediately vanished and were replaced by eager excitement. He quickly moved an armchair toward Princess Mary.

"Yes, I wanted to tell you," said he, answering her look as if she had spoken. "Princess, help me! What am I to do? Can I hope? Princess,

my dear friend, listen! I know it all. I know I am not worthy of her, I know it's impossible to speak of it now. But I want to be a brother to her. No, not that, I don't, I can't..."

He paused and rubbed his face and eyes with his hands.

"Well," he went on with an evident effort at self-control and coherence. "I don't know when I began to love her, but I have loved her and her alone all my life, and I love her so that I cannot imagine life without her. I cannot propose to her at present, but the thought that perhaps she might someday be my wife and that I may be missing that possibility... that possibility... is terrible. Tell me, can I hope? Tell me what I am to do, dear princess!" he added after a pause, and touched her hand as she did not reply.

"I am thinking of what you have told me," answered Princess Mary. "This is what I will say. You are right that to speak to her of love at present..."

Princess Mary stopped. She was going to say that to speak of love was impossible, but she stopped because she had seen by the sudden change in Natasha two days before that she would not only not be hurt if Pierre spoke of his love, but that it was the very thing she wished for.

"To speak to her now wouldn't do," said the princess all the same.

"But what am I to do?"

"Leave it to me," said Princess Mary. "I know..."

Pierre was looking into Princess Mary's eyes.

"Well?... Well?..." he said.

"I know that she loves... will love you," Princess Mary corrected herself.

Before her words were out, Pierre had sprung up and with a frightened expression seized Princess Mary's hand.

"What makes you think so? You think I may hope? You think...?"

"Yes, I think so," said Princess Mary with a smile. "Write to her parents, and leave it to me. I will tell her when I can. I wish it to happen and my heart tells me it will."

"No, it cannot be! How happy I am! But it can't be.... How happy I

am! No, it can't be!" Pierre kept saying as he kissed Princess Mary's hands.

"Go to Petersburg, that will be best. And I will write to you," she said.

"To Petersburg? Go there? Very well, I'll go. But I may come again tomorrow?"

Next day Pierre came to say good-by. Natasha was less animated than she had been the day before; but that day as he looked at her Pierre sometimes felt as if he was vanishing and that neither he nor she existed any longer, that nothing existed but happiness. "Is it possible? No, it can't be," he told himself at every look, gesture, and word that filled his soul with joy.

When on saying good-by he took her thin, slender hand, he could not help holding it a little longer in his own.

"Is it possible that this hand, that face, those eyes, all this treasure of feminine charm so strange to me now, is it possible that it will one day be mine forever, as familiar to me as I am to myself?... No, that's impossible!..."

"Good-by, Count," she said aloud. "I shall look forward very much to your return," she added in a whisper.

And these simple words, her look, and the expression on her face which accompanied them, formed for two months the subject of inexhaustible memories, interpretations, and happy meditations for Pierre. "'I shall look forward very much to your return....' Yes, yes, how did she say it? Yes, 'I shall look forward very much to your return.' Oh, how happy I am! What is happening to me? How happy I am!" said Pierre to himself.

CHAPTER XIX

There was nothing in Pierre's soul now at all like what had troubled it during his courtship of Helene.

He did not repeat to himself with a sickening feeling of shame the words he had spoken, or say: "Oh, why did I not say that?" and, "Whatever made me say 'Je vous aime'?" On the contrary, he now

repeated in imagination every word that he or Natasha had spoken and pictured every detail of her face and smile, and did not wish to diminish or add anything, but only to repeat it again and again. There was now not a shadow of doubt in his mind as to whether what he had undertaken was right or wrong. Only one terrible doubt sometimes crossed his mind: "Wasn't it all a dream? Isn't Princess Mary mistaken? Am I not too conceited and self-confident? I believe all this--and suddenly Princess Mary will tell her, and she will be sure to smile and say: 'How strange! He must be deluding himself. Doesn't he know that he is a man, just a man, while I...? I am something altogether different and higher.'"

That was the only doubt often troubling Pierre. He did not now make any plans. The happiness before him appeared so inconceivable that if only he could attain it, it would be the end of all things. Everything ended with that.

A joyful, unexpected frenzy, of which he had thought himself incapable, possessed him. The whole meaning of life--not for him alone but for the whole world--seemed to him centered in his love and the possibility of being loved by her. At times everybody seemed to him to be occupied with one thing only--his future happiness. Sometimes it seemed to him that other people were all as pleased as he was himself and merely tried to hide that pleasure by pretending to be busy with other interests. In every word and gesture he saw allusions to his happiness. He often surprised those he met by his significantly happy looks and smiles which seemed to express a secret understanding between him and them. And when he realized that people might not be aware of his happiness, he pitied them with his whole heart and felt a desire somehow to explain to them that all that occupied them was a mere frivolous trifle unworthy of attention.

When it was suggested to him that he should enter the civil service, or when the war or any general political affairs were discussed on the assumption that everybody's welfare depended on this or that issue of events, he would listen with a mild and pitying smile and surprise people by his strange comments. But at this time he saw everybody--both those who, as he imagined, understood the real meaning of life (that is, what he was feeling) and those unfortunates who evidently did not understand it--in the bright light of the emotion that shone within himself, and at once without any effort saw in everyone he met everything that was good and worthy of being loved.

When dealing with the affairs and papers of his dead wife, her memory aroused in him no feeling but pity that she had not known the bliss he now knew. Prince Vasili, who having obtained a new post and some fresh decorations was particularly proud at this time, seemed to him a pathetic, kindly old man much to be pitied.

Often in afterlife Pierre recalled this period of blissful insanity. All the views he formed of men and circumstances at this time remained true for him always. He not only did not renounce them subsequently, but when he was in doubt or inwardly at variance, he referred to the views he had held at this time of his madness and they always proved correct.

"I may have appeared strange and queer then," he thought, "but I was not so mad as I seemed. On the contrary I was then wiser and had more insight than at any other time, and understood all that is worth understanding in life, because... because I was happy."

Pierre's insanity consisted in not waiting, as he used to do, to discover personal attributes which he termed "good qualities" in people before loving them; his heart was now overflowing with love, and by loving people without cause he discovered indubitable causes for loving them.

CHAPTER XX

After Pierre's departure that first evening, when Natasha had said to Princess Mary with a gaily mocking smile: "He looks just, yes, just as if he had come out of a Russian bath--in a short coat and with his hair cropped," something hidden and unknown to herself, but irrepressible, awoke in Natasha's soul.

Everything: her face, walk, look, and voice, was suddenly altered. To her own surprise a power of life and hope of happiness rose to the surface and demanded satisfaction. From that evening she seemed to have forgotten all that had happened to her. She no longer complained of her position, did not say a word about the past, and no longer feared to make happy plans for the future. She spoke little of Pierre, but when Princess Mary mentioned him a long-extinguished light once more kindled in her eyes and her lips curved with a strange smile.

The change that took place in Natasha at first surprised Princess Mary; but when she understood its meaning it grieved her. "Can she have loved my brother so little as to be able to forget him so soon?" she thought when she reflected on the change. But when she was with Natasha she was not vexed with her and did not reproach her. The reawakened power of life that had seized Natasha was so

evidently irrepressible and unexpected by her that in her presence Princess Mary felt that she had no right to reproach her even in her heart.

Natasha gave herself up so fully and frankly to this new feeling that she did not try to hide the fact that she was no longer sad, but bright and cheerful.

When Princess Mary returned to her room after her nocturnal talk with Pierre, Natasha met her on the threshold.

"He has spoken? Yes? He has spoken?" she repeated.

And a joyful yet pathetic expression which seemed to beg forgiveness for her joy settled on Natasha's face.

"I wanted to listen at the door, but I knew you would tell me."

Understandable and touching as the look with which Natasha gazed at her seemed to Princess Mary, and sorry as she was to see her agitation, these words pained her for a moment. She remembered her brother and his love.

"But what's to be done? She can't help it," thought the princess.

And with a sad and rather stern look she told Natasha all that Pierre had said. On hearing that he was going to Petersburg Natasha was astounded.

"To Petersburg!" she repeated as if unable to understand.

But noticing the grieved expression on Princess Mary's face she guessed the reason of that sadness and suddenly began to cry.

"Mary," said she, "tell me what I should do! I am afraid of being bad. Whatever you tell me, I will do. Tell me...."

"You love him?"

"Yes," whispered Natasha.

"Then why are you crying? I am happy for your sake," said Princess Mary, who because of those tears quite forgave Natasha's joy.

"It won't be just yet--someday. Think what fun it will be when I am his wife and you marry Nicholas!"

"Natasha, I have asked you not to speak of that. Let us talk about

you."

They were silent awhile.

"But why go to Petersburg?" Natasha suddenly asked, and hastily replied to her own question. "But no, no, he must... Yes, Mary, He must...."

FIRST EPILOGUE: 1813 --20

CHAPTER I

Seven years had passed. The storm-tossed sea of European history had subsided within its shores and seemed to have become calm. But the mysterious forces that move humanity (mysterious because the laws of their motion are unknown to us) continued to operate.

Though the surface of the sea of history seemed motionless, the movement of humanity went on as unceasingly as the flow of time. Various groups of people formed and dissolved, the coming formation and dissolution of kingdoms and displacement of peoples was in course of preparation.

The sea of history was not driven spasmodically from shore to shore as previously. It was seething in its depths. Historic figures were not borne by the waves from one shore to another as before. They now seemed to rotate on one spot. The historical figures at the head of armies, who formerly reflected the movement of the masses by ordering wars, campaigns, and battles, now reflected the restless movement by political and diplomatic combinations, laws, and treaties.

The historians call this activity of the historical figures "the reaction."

In dealing with this period they sternly condemn the historical personages who, in their opinion, caused what they describe as the reaction. All the well-known people of that period, from Alexander and Napoleon to Madame de Stael, Photius, Schelling, Fichte,

Chateaubriand, and the rest, pass before their stern judgment seat and are acquitted or condemned according to whether they conduced to progress or to reaction.

According to their accounts a reaction took place at that time in Russia also, and the chief culprit was Alexander I, the same man who according to them was the chief cause of the liberal movement at the commencement of his reign, being the savior of Russia.

There is no one in Russian literature now, from schoolboy essayist to learned historian, who does not throw his little stone at Alexander for things he did wrong at this period of his reign.

"He ought to have acted in this way and in that way. In this case he did well and in that case badly. He behaved admirably at the beginning of his reign and during 1812, but acted badly by giving a constitution to Poland, forming the Holy Alliance, entrusting power to Arakcheev, favoring Golitsyn and mysticism, and afterwards Shishkov and Photius. He also acted badly by concerning himself with the active army and disbanding the Semenov regiment."

It would take a dozen pages to enumerate all the reproaches the historians address to him, based on their knowledge of what is good for humanity.

What do these reproaches mean?

Do not the very actions for which the historians praise Alexander I (the liberal attempts at the beginning of his reign, his struggle with Napoleon, the firmness he displayed in 1812 and the campaign of 1813) flow from the same sources--the circumstances of his birth, education, and life--that made his personality what it was and from which the actions for which

=====
Creative Commons Corporation ("Creative Commons") is not a law firm and does not provide legal services or legal advice. Distribution of Creative Commons public licenses does not create a lawyer-client or other relationship. Creative Commons makes its licenses and related information available on an "as-is" basis. Creative Commons gives no warranties regarding its licenses, any material licensed under their terms and conditions, or any related information. Creative Commons disclaims all liability for damages resulting from their use to the fullest extent possible.

Using Creative Commons Public Licenses

Creative Commons public licenses provide a standard set of terms and conditions that creators and other rights holders may use to share original works of authorship and other material subject to copyright and certain other rights specified in the public license below. The following considerations are for informational purposes only, are not

exhaustive, and do not form part of our licenses.

Considerations for licensors: Our public licenses are intended for use by those authorized to give the public permission to use material in ways otherwise restricted by copyright and certain other rights. Our licenses are irrevocable. Licensors should read and understand the terms and conditions of the license they choose before applying it. Licensors should also secure all rights necessary before applying our licenses so that the public can reuse the material as expected. Licensors should clearly mark any material not subject to the license. This includes other CC-licensed material, or material used under an exception or limitation to copyright. More considerations for licensors: wiki.creativecommons.org/Considerations_for_licensors

Considerations for the public: By using one of our public licenses, a licensor grants the public permission to use the licensed material under specified terms and conditions. If the licensor's permission is not necessary for any reason--for example, because of any applicable exception or limitation to copyright--then that use is not regulated by the license. Our licenses grant only permissions under copyright and certain other rights that a licensor has authority to grant. Use of the licensed material may still be restricted for other reasons, including because others have copyright or other rights in the material. A licensor may make special requests, such as asking that all changes be marked or described. Although not required by our licenses, you are encouraged to respect those requests where reasonable. More considerations for the public: wiki.creativecommons.org/Considerations_for_licensees

Creative Commons Attribution 4.0 International Public License

By exercising the Licensed Rights (defined below), You accept and agree to be bound by the terms and conditions of this Creative Commons Attribution 4.0 International Public License ("Public License"). To the extent this Public License may be interpreted as a contract, You are granted the Licensed Rights in consideration of Your acceptance of these terms and conditions, and the Licensor grants You such rights in consideration of benefits the Licensor receives from making the Licensed Material available under these terms and conditions.

Section 1 -- Definitions.

- a. Adapted Material means material subject to Copyright and Similar Rights that is derived from or based upon the Licensed Material and in which the Licensed Material is translated, altered, arranged, transformed, or otherwise modified in a manner requiring permission under the Copyright and Similar Rights held by the Licensor. For purposes of this Public License, where the Licensed Material is a musical work, performance, or sound recording, Adapted Material is always produced where the Licensed Material is synched in timed relation with a moving image.
- b. Adapter's License means the license You apply to Your Copyright and Similar Rights in Your contributions to Adapted Material in accordance with the terms and conditions of this Public License.
- c. Copyright and Similar Rights means copyright and/or similar rights closely related to copyright including, without limitation, performance, broadcast, sound recording, and Sui Generis Database Rights, without regard to how the rights are labeled or categorized. For purposes of this Public License, the rights specified in Section 2(b)(1)-(2) are not Copyright and Similar Rights.
- d. Effective Technological Measures means those measures that, in the absence of proper authority, may not be circumvented under laws fulfilling obligations under Article 11 of the WIPO Copyright Treaty adopted on December 20, 1996, and/or similar international agreements.
- e. Exceptions and Limitations means fair use, fair dealing, and/or any other exception or limitation to Copyright and Similar Rights that applies to Your use of the Licensed Material.
- f. Licensed Material means the artistic or literary work, database, or other material to which the Licensor applied this Public License.
- g. Licensed Rights means the rights granted to You subject to the terms and conditions of this Public License, which are limited to all Copyright and Similar Rights that apply to Your use of the Licensed Material and that the Licensor has authority to license.
- h. Licensor means the individual(s) or entity(ies) granting rights under this Public License.
- i. Share means to provide material to the public by any means or process that requires permission under the Licensed Rights, such as reproduction, public display, public performance, distribution,

dissemination, communication, or importation, and to make material available to the public including in ways that members of the public may access the material from a place and at a time individually chosen by them.

j. Sui Generis Database Rights means rights other than copyright resulting from Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, as amended and/or succeeded, as well as other essentially equivalent rights anywhere in the world.

k. You means the individual or entity exercising the Licensed Rights under this Public License. Your has a corresponding meaning.

Section 2 -- Scope.

a. License grant.

1. Subject to the terms and conditions of this Public License, the Licensor hereby grants You a worldwide, royalty-free, non-sublicensable, non-exclusive, irrevocable license to exercise the Licensed Rights in the Licensed Material to:

a. reproduce and Share the Licensed Material, in whole or in part; and

b. produce, reproduce, and Share Adapted Material.

2. Exceptions and Limitations. For the avoidance of doubt, where Exceptions and Limitations apply to Your use, this Public License does not apply, and You do not need to comply with its terms and conditions.

3. Term. The term of this Public License is specified in Section 6(a).

4. Media and formats; technical modifications allowed. The Licensor authorizes You to exercise the Licensed Rights in all media and formats whether now known or hereafter created, and to make technical modifications necessary to do so. The Licensor waives and/or agrees not to assert any right or authority to forbid You from making technical modifications necessary to exercise the Licensed Rights, including technical modifications necessary to circumvent Effective Technological Measures. For purposes of this Public License, simply making modifications authorized by this Section 2(a) (4) never produces Adapted Material.

5. Downstream recipients.

- a. Offer from the Licensor -- Licensed Material. Every recipient of the Licensed Material automatically receives an offer from the Licensor to exercise the Licensed Rights under the terms and conditions of this Public License.
- b. No downstream restrictions. You may not offer or impose any additional or different terms or conditions on, or apply any Effective Technological Measures to, the Licensed Material if doing so restricts exercise of the Licensed Rights by any recipient of the Licensed Material.

6. No endorsement. Nothing in this Public License constitutes or may be construed as permission to assert or imply that You are, or that Your use of the Licensed Material is, connected with, or sponsored, endorsed, or granted official status by, the Licensor or others designated to receive attribution as provided in Section 3(a)(1)(A)(i).

b. Other rights.

1. Moral rights, such as the right of integrity, are not licensed under this Public License, nor are publicity, privacy, and/or other similar personality rights; however, to the extent possible, the Licensor waives and/or agrees not to assert any such rights held by the Licensor to the limited extent necessary to allow You to exercise the Licensed Rights, but not otherwise.
2. Patent and trademark rights are not licensed under this Public License.
3. To the extent possible, the Licensor waives any right to collect royalties from You for the exercise of the Licensed Rights, whether directly or through a collecting society under any voluntary or waivable statutory or compulsory licensing scheme. In all other cases the Licensor expressly reserves any right to collect such royalties.

Section 3 -- License Conditions.

Your exercise of the Licensed Rights is expressly made subject to the following conditions.

a. Attribution.

1. If You Share the Licensed Material (including in modified form), You must:

a. retain the following if it is supplied by the Licensor with the Licensed Material:

i. identification of the creator(s) of the Licensed Material and any others designated to receive attribution, in any reasonable manner requested by the Licensor (including by pseudonym if designated);

ii. a copyright notice;

iii. a notice that refers to this Public License;

iv. a notice that refers to the disclaimer of warranties;

v. a URI or hyperlink to the Licensed Material to the extent reasonably practicable;

b. indicate if You modified the Licensed Material and retain an indication of any previous modifications; and

c. indicate the Licensed Material is licensed under this Public License, and include the text of, or the URI or hyperlink to, this Public License.

2. You may satisfy the conditions in Section 3(a)(1) in any reasonable manner based on the medium, means, and context in which You Share the Licensed Material. For example, it may be reasonable to satisfy the conditions by providing a URI or hyperlink to a resource that includes the required information.

3. If requested by the Licensor, You must remove any of the information required by Section 3(a)(1)(A) to the extent reasonably practicable.

4. If You Share Adapted Material You produce, the Adapter's License You apply must not prevent recipients of the Adapted Material from complying with this Public License.

Section 4 -- Sui Generis Database Rights.

Where the Licensed Rights include Sui Generis Database Rights that apply to Your use of the Licensed Material:

- a. for the avoidance of doubt, Section 2(a)(1) grants You the right to extract, reuse, reproduce, and Share all or a substantial portion of the contents of the database;
- b. if You include all or a substantial portion of the database contents in a database in which You have Sui Generis Database Rights, then the database in which You have Sui Generis Database Rights (but not its individual contents) is Adapted Material; and
- c. You must comply with the conditions in Section 3(a) if You Share all or a substantial portion of the contents of the database.

For the avoidance of doubt, this Section 4 supplements and does not replace Your obligations under this Public License where the Licensed Rights include other Copyright and Similar Rights.

Section 5 -- Disclaimer of Warranties and Limitation of Liability.

- a. UNLESS OTHERWISE SEPARATELY UNDERTAKEN BY THE LICENSOR, TO THE EXTENT POSSIBLE, THE LICENSOR OFFERS THE LICENSED MATERIAL AS-IS AND AS-AVAILABLE, AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE LICENSED MATERIAL, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHER. THIS INCLUDES, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OR ABSENCE OF ERRORS, WHETHER OR NOT KNOWN OR DISCOVERABLE. WHERE DISCLAIMERS OF WARRANTIES ARE NOT ALLOWED IN FULL OR IN PART, THIS DISCLAIMER MAY NOT APPLY TO YOU.
- b. TO THE EXTENT POSSIBLE, IN NO EVENT WILL THE LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE) OR OTHERWISE FOR ANY DIRECT, SPECIAL, INDIRECT, INCIDENTAL, CONSEQUENTIAL, PUNITIVE, EXEMPLARY, OR OTHER LOSSES, COSTS, EXPENSES, OR DAMAGES ARISING OUT OF THIS PUBLIC LICENSE OR USE OF THE LICENSED MATERIAL, EVEN IF THE LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSSES, COSTS, EXPENSES, OR DAMAGES. WHERE A LIMITATION OF LIABILITY IS NOT ALLOWED IN FULL OR IN PART, THIS LIMITATION MAY NOT APPLY TO YOU.
- c. The disclaimer of warranties and limitation of liability provided above shall be interpreted in a manner that, to the extent possible, most closely approximates an absolute disclaimer and

waiver of all liability.

Section 6 -- Term and Termination.

- a. This Public License applies for the term of the Copyright and Similar Rights licensed here. However, if You fail to comply with this Public License, then Your rights under this Public License terminate automatically.
- b. Where Your right to use the Licensed Material has terminated under Section 6(a), it reinstates:
 1. automatically as of the date the violation is cured, provided it is cured within 30 days of Your discovery of the violation; or
 2. upon express reinstatement by the Licensor.

For the avoidance of doubt, this Section 6(b) does not affect any right the Licensor may have to seek remedies for Your violations of this Public License.

- c. For the avoidance of doubt, the Licensor may also offer the Licensed Material under separate terms or conditions or stop distributing the Licensed Material at any time; however, doing so will not terminate this Public License.
- d. Sections 1, 5, 6, 7, and 8 survive termination of this Public License.

Section 7 -- Other Terms and Conditions.

- a. The Licensor shall not be bound by any additional or different terms or conditions communicated by You unless expressly agreed.
- b. Any arrangements, understandings, or agreements regarding the Licensed Material not stated herein are separate from and independent of the terms and conditions of this Public License.

Section 8 -- Interpretation.

- a. For the avoidance of doubt, this Public License does not, and shall not be interpreted to, reduce, limit, restrict, or impose conditions on any use of the Licensed Material that could lawfully be made without permission under this Public License.

- b. To the extent possible, if any provision of this Public License is deemed unenforceable, it shall be automatically reformed to the minimum extent necessary to make it enforceable. If the provision cannot be reformed, it shall be severed from this Public License without affecting the enforceability of the remaining terms and conditions.
- c. No term or condition of this Public License will be waived and no failure to comply consented to unless expressly agreed to by the Licensor.
- d. Nothing in this Public License constitutes or may be interpreted as a limitation upon, or waiver of, any privileges and immunities that apply to the Licensor or You, including from the legal processes of any jurisdiction or authority.

=====

Creative Commons is not a party to its public licenses. Notwithstanding, Creative Commons may elect to apply one of its public licenses to material it publishes and in those instances will be considered the Licensor. The text of the Creative Commons public licenses is dedicated to the public domain under the CC0 Public Domain Dedication. Except for the limited purpose of indicating that material is shared under a Creative Commons public license or as otherwise permitted by the Creative Commons policies published at creativecommons.org/policies, Creative Commons does not authorize the use of the trademark "Creative Commons" or any other trademark or logo of Creative Commons without its prior written consent including, without limitation, in connection with any unauthorized modifications to any of its public licenses or any other arrangements, understandings, or agreements concerning use of licensed material. For the avoidance of doubt, this paragraph does not form part of the public licenses.

Creative Commons may be contacted at creativecommons.org.

You can find its legal text below.

Creative Commons Zero v1.0 Universal

CC0 1.0 Universal

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and

vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.

b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness

for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.

c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.

d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

isomorphic-fetch [![Build Status](https://travis-ci.org/matthew-andrews/isomorphic-fetch.svg?branch=master)](https://travis-ci.org/matthew-andrews/isomorphic-fetch)

=====

Fetch for node and Browserify. Built on top of [GitHub's WHATWG Fetch polyfill](https://github.com/github/fetch).

Warnings

- This adds `fetch` as a global so that its API is consistent between client and server.
- You must bring your own ES6 Promise compatible polyfill, I suggest [es6-promise](https://github.com/jakearchibald/es6-promise).

For [ease-of-maintenance and backward-compatibility reasons][why polyfill], this library will always be a polyfill. As a "safe" alternative, which does not modify the global, consider [fetch-ponyfill][].

[why polyfill]: <https://github.com/matthew-andrews/isomorphic-fetch/issues/31#issuecomment-149668361>

[fetch-ponyfill]: <https://github.com/qubyte/fetch-ponyfill>

Installation

NPM

```
```sh
npm install --save isomorphic-fetch es6-promise
```
```

Bower

```
```sh
bower install --save isomorphic-fetch es6-promise
```
```

Usage

```
```js
require('es6-promise').polyfill();
require('isomorphic-fetch');

fetch('//offline-news-api.herokuapp.com/stories')
 .then(function(response) {
 if (response.status >= 400) {

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1

through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their

Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License. You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or

otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

```
# options.js #
```

A very light-weight in-code option parsers for node.js.

Usage

```
``` js
var Options = require("options");

// Create an Options object
function foo(options) {
 var default_options = {
 foo : "bar"
 };

 // Create an option object with default value
 var opts = new Options(default_options);

 // Merge options
 opts = opts.merge(options);

 // Reset to default value
 opts.reset();

 // Copy selected attributes out
 var seled_att = opts.copy("foo");

 // Read json options from a file.
 opts.read("options.file"); // Sync
 opts.read("options.file", function(err){ // Async
 if(err){ // If error occurs
 console.log("File error.");
 }else{
 // No error
 }
 });

 // Attributes defined or not
 opts.isDefinedAndNonNull("foobar");
 opts.isDefined("foobar");
}
```

```

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of,

publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution

notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing

the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright {yyyy} {name of copyright owner}

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

```
/**
 * Adapts focus styles based on the user's active input modality (i.e., how
 * they are interacting with the UI right now).
 *
 * Focus styles are only relevant when using the keyboard to interact with the
 * page. If we only show the focus ring when relevant, we can avoid user
 * confusion without compromising accessibility.
 *
 * The script uses two heuristics to determine whether the keyboard is being used:
 *
 * 1. a keydown event occurred immediately before a focus event;
 * 2. a focus event happened on an element which requires keyboard interaction (e.g., a text field);
 *

```
/**
* RESPONDER EVENT SYSTEM
```

*
 * A single, global "interaction lock" on views. For a view to be the "responder" means
 * that pointer interactions are exclusive to that view and none other. The "interaction
 * lock" can be transferred (only) to ancestors of the current "responder" as long as
 * pointers continue to be active.

*
 * Responder being granted:

*
 * A view can become the "responder" after the following events:
 * * "pointerdown" (implemented using "touchstart", "mousedown")
 * * "pointermove" (implemented using "touchmove", "mousemove")
 * * "scroll" (while a pointer is down)
 * * "selectionchange" (while a pointer is down)

*
 * If nothing is already the "responder", the event propagates to (capture) and from
 * (bubble) the event target until a view returns `true` for
 * `on*ShouldSetResponder(Capture)`.

*
 * If something is already the responder, the event propagates to (capture) and from
 * (bubble) the lowest common ancestor of the event target and the current "responder".
 * Then negotiation happens between the current "responder" and a view that wants to
 * become the "responder": see the timing diagram below.

*
 * (NOTE: Scrolled views either automatically become the "responder" or release the
 * "interaction lock". A native scroll view that isn't built on top of the responder
 * system must result in the current "responder" being notified that it no longer has
 * the "interaction lock" - the native system has taken over.

*
 * Responder being released:

*
 * As soon as there are no more active pointers that *started* inside descendants
 * of the *current* "responder", an `onResponderRelease` event is dispatched to the
 * current "responder", and the responder lock is released.

*
 * Typical sequence of events:

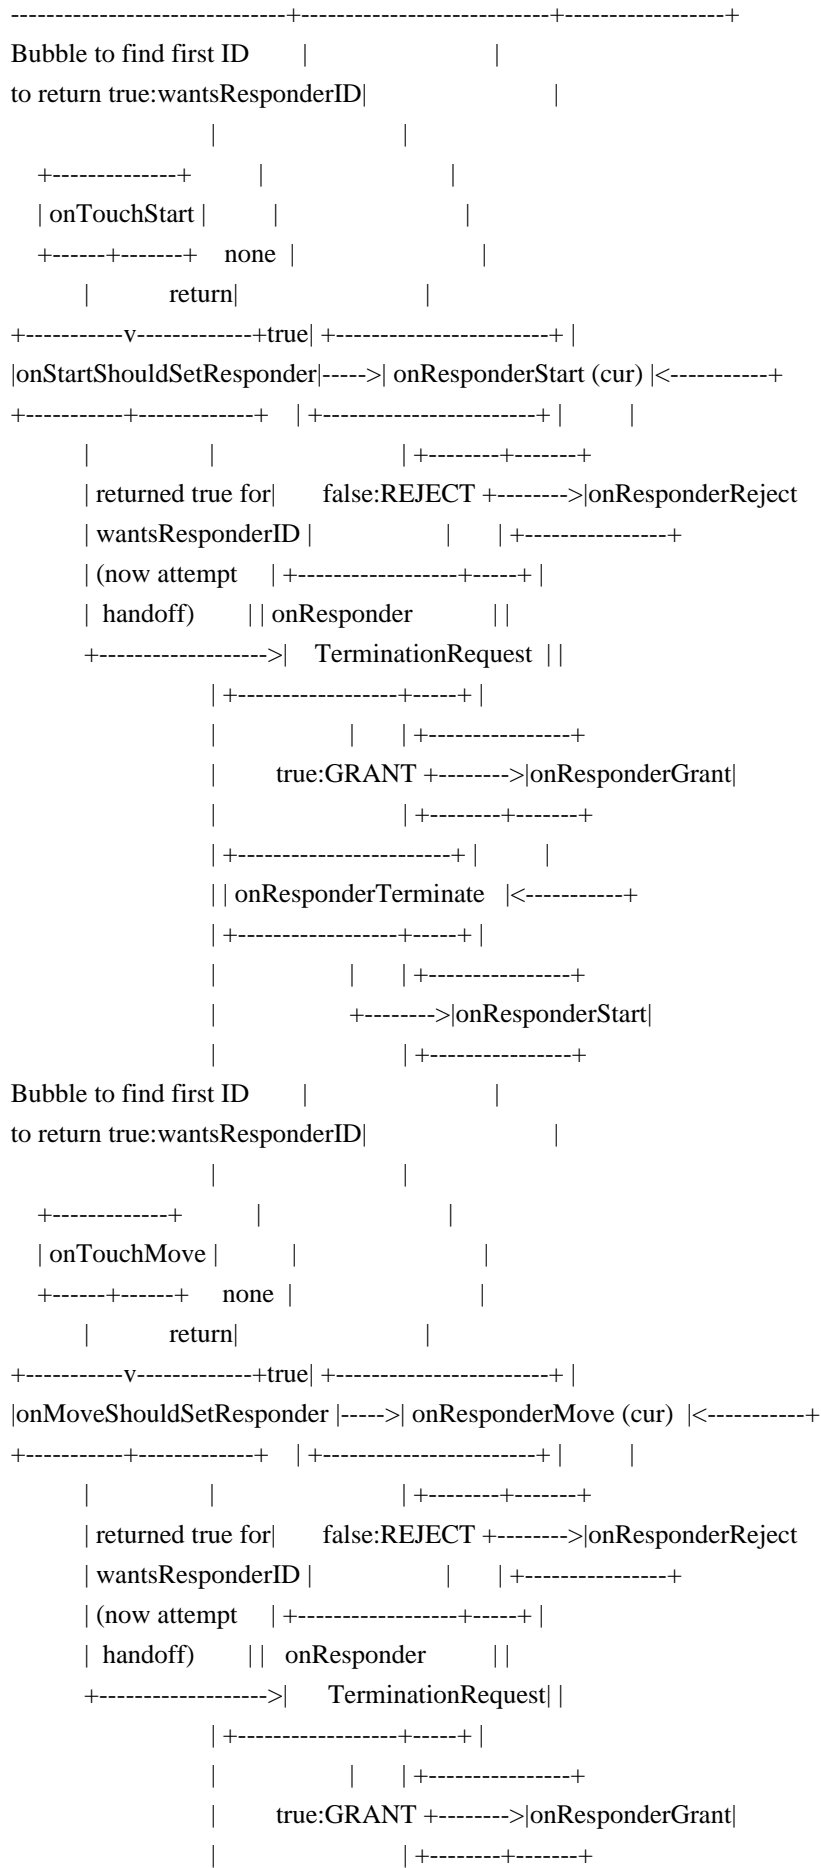

* * startShouldSetResponder
 * * responderGrant/Reject
 * * responderStart
 * * responderMove
 * * responderEnd
 * * responderRelease

*/

/**
 * PAN RESPONDER
 *
 * `PanResponder` uses the Responder System to reconcile several touches into
 * a single gesture. It makes single-touch gestures resilient to extra touches,
 * and can be used to recognize simple multi-touch gestures. For each handler,
 * it provides a `gestureState` object alongside the ResponderEvent object.
 *
 * By default, `PanResponder` holds an `InteractionManager` handle to block
 * long-running JS events from interrupting active gestures.
 *
 * A graphical explanation of the touch data flow:

    gestureState._accountsForMovesUpTo = 0;
  },

  /**
   * Take all recently moved touches, calculate how the centroid has changed just for those
   * recently moved touches, and append that change to an accumulator. This is
   * to (at least) handle the case where the user is moving three fingers, and
   * then one of the fingers stops but the other two continue.
   *
   * This is very different than taking all of the recently moved touches and
   * storing their centroid as `dx/dy`. For correctness, we must *accumulate
   * changes* in the centroid of recently moved touches.
   *
   * There is also some nuance with how we handle multiple moved touches in a
   * single event. Multiple touches generate two 'move' events, each of
   * them triggering `onResponderMove`. But with the way `PanResponder` works,
   * all of the gesture inference is performed on the first dispatch, since it
   * looks at all of the touches. Therefore, `PanResponder` does not call
   * `onResponderMove` passed the first dispatch. This diverges from the
   * typical responder callback pattern (without using `PanResponder`), but
   * avoids more dispatches than necessary.
   *
   * When moving two touches in opposite directions, the cumulative
   * distance is zero in each dimension. When two touches move in parallel five
   * pixels in the same direction, the cumulative distance is five, not ten. If
   * two touches start, one moves five in a direction, then stops and the other
   * touch moves fives in the same direction, the cumulative distance is ten.
   *
   * This logic requires a kind of processing of time "clusters" of touch events
   * so that two touch moves that essentially occur in parallel but move every

```

```

* other frame respectively, are considered part of the same movement.
*
* x/y: If a move event has been observed, `(x, y)` is the centroid of the most
* recently moved "cluster" of active touches.
* deltaX/deltaY: Cumulative touch distance. Accounts for touch moves that are
* clustered together in time, moving the same direction. Only valid when
* currently responder (otherwise, it only represents the drag distance below
* the threshold).

/**
 * ===== PressResponder Tutorial =====
 *
 * The `PressResponder` class helps you create press interactions by analyzing the
 * geometry of elements and observing when another responder (e.g. ScrollView)
 * has stolen the touch lock. It offers hooks for your component to provide

```

```

* interaction feedback to the user:
*
* - When a press has activated (e.g. highlight an element)
* - When a press has deactivated (e.g. un-highlight an element)
* - When a press should trigger an action, meaning it activated and deactivated
*   while within the geometry of the element without the lock being stolen.
*
* A high quality interaction isn't as simple as you might think. There should
* be a slight delay before activation. Moving your finger beyond an element's
* bounds should trigger deactivation, but moving the same finger back within an
* element's bounds should trigger reactivation.
*
* In order to use `PressResponder`, do the following:
*
*   const pressResponder = new PressResponder(config);
*
* 2. Choose the rendered component who should collect the press events. On that
*   element, spread `pressability.getEventHandlers()` into its props.
*
*   return (
*     <View {...this.state.pressResponder.getEventHandlers()} />
*   );
*
* 3. Reset `PressResponder` when your component unmounts.
*
*   componentWillUnmount() {
*     this.state.pressResponder.reset();
*   }
*
* ===== Implementation Details =====
*
* `PressResponder` only assumes that there exists a `HitRect` node. The `PressRect`
* is an abstract box that is extended beyond the `HitRect`.
*
* # Geometry
*
* - Presses start anywhere within `HitRect`.
*
* VisualRect
*   - When pressed down for sufficient amount of time
*   HitRect      before letting up, `VisualRect` activates.
*
* Out Region  o
*
*           When the press is released outside the `HitRect`,
*           the responder is NOT eligible for a "press".
*

```

```

* # State Machine
*
* RESPONDER_RELEASE
* NOT_RESPONDER
* RESPONDER_TERMINATED
*
* RESPONDER_GRANT (HitRect)
*
*
*
* RESPONDER_INACTIVE_ DELAY RESPONDER_ACTIVE_ T + DELAY RESPONDER_ACTIVE_
* PRESS_START PRESS_START LONG_PRESS_START
*
*
* T + DELAY => LONG_PRESS_DELAY + DELAY
*
* Not drawn are the side effects of each transition. The most important side
* effect is the invocation of `onLongPress`. Only when the browser produces a
* `click` event is `onPress` invoked.
*/

```

```

/**

* Adapts focus styles based on the user's active input modality (i.e., how they are interacting with the UI right now).

*

* Focus styles are only relevant when using the keyboard to interact with the page. If we only show the focus ring when relevant, we can avoid user confusion without compromising accessibility.

*

* The script uses two heuristics to determine whether the keyboard is being used:

*

* 1. a keydown event occurred immediately before a focus event;

* 2. a focus event happened on an element which requires keyboard interaction (e.g., a text field);

*

/**
```

```
* NOTE: This is React Native specific export type.
```

```
*
```

```
* RCTExport is an interface type that allows native code generation for React
```

```
* Native native modules. It exists as a hint to the codegen tool that any
```

```
* interface that extends it needs to be codegen'ed. Example usage:
```

```
*
```

```
* export interface RCTFoobar extends RCTExport<void> {}
```

```
*
```

```
* Native definition for RCTFoobar will then be generated.
```

```
*
```

```
* The type param T is a placeholder for future codegen hinting, like versioning
```

```
* information, native base classes, etc. For now, simply use `void` type as
```

```
* there's nothing to give hint about.
```

```
*/
```

```
// eslint-disable-next-line no-unused-vars
```

```
export interface RCTExport<T: void = void> {
```

```
+getConstants?: () => {}  
} // eslint-disable-next-line lint/react-native-modules
```

```
export interface TurboModule extends RCTExport<void> {}
```

Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer

exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
- vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently,

irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.

- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the

Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the

same "printed page" as the copyright notice for easier identification within third-party archives.

CC0 1.0 Universal

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the

further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
 - ii. moral rights retained by the original author(s) and/or performer(s);
 - iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
 - iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
 - v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
 - vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
 - vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.
2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation

commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this

CC0 or use of the Work.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but

excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise,

unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

The GNU General Public License (GPL)

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2)

offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications

or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may

choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL

Certain source files distributed by Oracle America and/or its affiliates are subject to the following clarification and special exception to the GPL, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

GNU LIBRARY GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is
numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a

program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary General Public License treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

.

GNU LIBRARY GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a

portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or

table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or

derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse

engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this

License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these,

write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Some files use code from different Apache projects.

The source code of these files contains the appropriate copyright notices as described in the Appendix of <http://www.apache.org/licenses/LICENSE-2.0>

This is a copy of the text that can be found at that specific URL:

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by

the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License.

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution.

You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- * You must give any other recipients of the Work or Derivative Works a copy of this License; and
- * You must cause any modified files to carry prominent notices stating that You changed the files; and
- * You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

* If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions.

Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks.

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty.

Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability.

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability.

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");

you may not use this file except in compliance with the License.

You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.

See the License for the specific language governing permissions and limitations under the License.

The software in this package is published under the terms of the MPL license a copy of which has been included below:

Mozilla Public License 1.1 (MPL 1.1)

1. Definitions.

- 1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.
- 1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.
- 1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.
- 1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.
- 1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
- 1.5. "Executable" means Covered Code in any form other than Source Code.
- 1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
- 1.7. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
- 1.8. "License" means this document.
- 1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.
- 1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
- A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
 - B. Any new file that contains any part of the Original Code or previous Modifications.
- 1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
- 1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.
- 1.11. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.
- 1.12. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this

definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

(c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes Commercial Use of the Covered Code.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or 4) under Patent Claims infringed by Covered Code in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modification is made available as described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor makes available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the LEGAL file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to Section 3.4(a) above, Contributor believes that Contributor's Modifications are Contributor's original creation(s) and/or Contributor has sufficient rights to grant the rights conveyed by this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modification(s) You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Covered Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License.

6.1. New Versions.

Netscape Communications Corporation ("Netscape") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by Netscape. No one other than Netscape has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.

If You create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), You must (a) rename Your license so that the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape", "MPL", "NPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the Mozilla Public License and Netscape Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

(a) such Participant's Contributor Version directly or indirectly infringes any patent, then any and all rights granted by such Participant to You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to pay Participant a mutually agreeable reasonable royalty for Your past and future use of Modifications made by such Participant, or (ii) withdraw Your litigation claim with respect to the Contributor Version against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties or the litigation claim is not withdrawn, the rights granted by Participant to You under Sections 2.1

and/or 2.2 automatically terminate at the expiration of the 60 day notice period specified above.

(b) any software, hardware, or device, other than such Participant's Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

8.3. If You assert a patent infringement claim against Participant alleging that such Participant's Contributor Version directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

8.4. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations

Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the MPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your

freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be

consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The

former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a

fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of

a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be

linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is

interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or

distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot

impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN

WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Not-Going-To-Be-Commons-SSL is based off of and contains modified source files from Not-Yet-Commons-SSL, which is distributed under the terms of the Apache License, Version 2.0. The following files have been modified:

File: src/main/java/org/apache/commons/ssl/ASN1Util.java

Changes: Removing Bouncy Castle classes and linking to the JAR instead.

File: src/main/java/org/apache/commons/ssl/KeyStoreBuilder.java

Changes: Modifying the order in which keystore types are tested to more gracefully comply with the changes in JEP 229 present in Java 9+.
Replacing direct System.out calls with Logger calls.
Removing Bouncy Castle classes and linking to the JAR instead.

File: src/main/java/org/apache/commons/ssl/PKCS8Key.java

Changes: Removing Bouncy Castle classes and linking to the JAR instead.

File: src/main/java/org/apache/commons/ssl/TrustMaterial.java

Changes: Replacing direct printStackTrace calls with Logger calls.

Files: src/main/java/org/apache/commons/ssl/org/bouncycastle/*

Changes: Removing Bouncy Castle classes and linking to the JAR instead.

Not-Going-To-Be-Commons-SSL includes the following, which is distributed under the terms of the Apache License, Version 2.0.

Apache Commons HttpClient 3.0.1

Apache Commons Logging 1.2

Apache Log4j 1.2.16

Byte Buddy 1.8.8

Objenesis 2.5.1

The license below pertains to Bouncy Castle Crypto, which is included with Not-Going-To-Be-Commons-SSL.

All code under src/main/java/org/apache/commons/ssl/org/bouncycastle/ (and below) was copied directly from Bouncy Castle's crypto-152.tar.gz (released on March 1st, 2015).

The PKCS12 key derivation function was also developed by Bouncy Castle (Look for the "pkcs12()" method inside PKCS8.java).

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or .Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, .You. includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, .control. means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in

compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN .AS IS. BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as .Participant.) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a .commercial item., as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of .commercial computer software. (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and .commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you

also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special

exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this

License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Sun Microsystems, Inc. are subject to the following clarification and special exception to the GPL Version 2, but only where Sun has expressly included in the particular source file's header the words

"Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the License file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module.? An independent module is a module which is not derived from or based on this library.? If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so.? If you do not wish to do so, delete this exception statement from your version.

The Apache Software Foundation (<http://www.apache.org/>).
Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
 - i) changes to the Program, and
 - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and

b) its license agreement:

i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
- b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

MOZILLA PUBLIC LICENSE

Version 1.1

1. Definitions.

1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.

1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. "Executable" means Covered Code in any form other than Source Code.

1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.

1.7. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.8. "License" means this document.

1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.

B. Any new file that contains any part of the Original Code or previous Modifications.

1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as

Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.

1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.11. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.12. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

(c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes Commercial Use of the Covered Code.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or 4) under Patent Claims infringed by Covered Code in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version

of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modification is made available as described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor makes available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the LEGAL file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to Section 3.4(a) above, Contributor believes that Contributor's Modifications are Contributor's original creation(s) and/or Contributor has sufficient rights to grant the rights conveyed by this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modification(s) You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Covered Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different

license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License.

6.1. New Versions.

Netscape Communications Corporation ("Netscape") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by Netscape. No one other than Netscape has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.

If You create or use a modified version of this License (which you may

only do in order to apply it to code which is not already Covered Code governed by this License), You must (a) rename Your license so that the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape", "MPL", "NPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the Mozilla Public License and Netscape Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

(a) such Participant's Contributor Version directly or indirectly infringes any patent, then any and all rights granted by such Participant to You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to pay Participant a mutually agreeable reasonable royalty for Your past and future use of Modifications made by such Participant, or (ii) withdraw Your litigation claim with respect to

the Contributor Version against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties or the litigation claim is not withdrawn, the rights granted by Participant to You under Sections 2.1 and/or 2.2 automatically terminate at the expiration of the 60 day notice period specified above.

(b) any software, hardware, or device, other than such Participant's Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

8.3. If You assert a patent infringement claim against Participant alleging that such Participant's Contributor Version directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

8.4. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in

48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as "Multiple-Licensed". "Multiple-Licensed" means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the NPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A -Mozilla Public License.

ExceptionConverter:

The original version of this class was published in an article by Heinz Kabutz.

Read http://www.javaspecialists.co.za/archive/newsletter.do?issue=033&print=yes&locale=en_US

"This material from The Java(tm) Specialists' Newsletter by Maximum Solutions

(South Africa). Please contact Maximum Solutions for more information.

(2)

SimpleXMLParser:

The original version of this class was published in a JavaWorld article by Steven Brandt:

<http://www.javaworld.com/javaworld/javatips/jw-javatip128.html>

Jennifer Orr (JavaWorld) wrote: "You have permission to use the code appearing in

Steven Brandt's JavaWorld article, 'Java Tip 128: Create a quick-and-dirty XML parser.'

We ask that you reference the author as the creator and JavaWorld as the original publisher of the code." Steven Brandt also agreed with the use of this class.

(3)

The following files contain material that was copyrighted by SUN:

com/lowagie/text/pdf/LZWDecoder.java (first appearance in iText: 2002-02-08)

com/lowagie/text/pdf/codec/BmpImage.java (first appearance in iText: 2003-06-20)

com/lowagie/text/pdf/codec/PngImage.java (first appearance in iText: 2003-04-25)

com/lowagie/text/pdf/codec/TIFFDirectory.java (first appearance in iText: 2003-04-09)

com/lowagie/text/pdf/codec/TIFFFaxDecoder.java (first appearance in iText: 2003-04-09)

com/lowagie/text/pdf/codec/TIFFField.java (first appearance in iText: 2003-04-09)

com/lowagie/text/pdf/codec/TIFFLZWDecoder.java (first appearance in iText: 2003-04-09)

The original code was released under the BSD license, and contained the following extra restriction: "You acknowledge that Software is not designed, licensed or intended for use in the design, construction, operation or maintenance of any nuclear facility."

In a mail sent to Bruno Lowagie on January 23, 2008, Brian Burkhalter (@sun.com) writes: "This code is under a BSD license and supersedes the older codec packages on which your code is based. It also includes numerous fixes among them being the ability to handle a lot of 'broken' TIFFs."

Note that numerous fixes were applied to the code used in iText by Paulo Soares,

but apart from the fixes there were no essential changes between the code that was originally adapted and the code that is now available under the following license:

Copyright (c) 2005 Sun Microsystems, Inc. All Rights Reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

- Redistribution of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

- Redistribution in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

Neither the name of Sun Microsystems, Inc. or the names of contributors may be used to endorse or promote products derived from this software without specific prior written permission.

This software is provided "AS IS," without a warranty of any kind. ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE HEREBY EXCLUDED. SUN MIDROSYSTEMS, INC. ("SUN") AND ITS LICENSORS SHALL NOT BE LIABLE FOR ANY DAMAGES SUFFERED BY LICENSEE AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THIS SOFTWARE OR ITS DERIVATIVES. IN NO EVENT WILL SUN OR ITS LICENSORS BE LIABLE FOR ANY LOST REVENUE, PROFIT OR DATA, OR FOR DIRECT, INDIRECT, SPECIAL, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES, HOWEVER CAUSED AND REGARDLESS OF THE THEORY OF LIABILITY, ARISING OUT OF THE USE OF OR INABILITY TO USE THIS SOFTWARE, EVEN IF SUN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You acknowledge that this software is not designed or intended for use in the design, construction, operation or maintenance of any nuclear facility.

The main difference can be found in the final paragraph: the restriction that the source code is not "licensed" in this particular situation has been removed.

FYI: Brian also added: "A bit of history might be in order.

The codec classes that you used originally were based on some classes included with JAI but not strictly part of JAI.

As of Java SE 1.4 an official Image I/O framework was

added in javax.imageio.... This framework supports these formats:

Java 1.4: GIF (read only), JPEG, PNG

Java 1.5: Added support for BMP and WBMP

Java 1.6: Added support for writing GIF

The JAI Image I/O Tools packages (jai-imageio-core) were created to support formats handled by JAI but not included in Java SE as well as some new things like JPEG2000."

(4) the file com/lowagie/text/pdf/codec/TIFFConstants and some other TIFF related code is derived from LIBTIFF:

and <http://www.unicode.org/cldr/data/> .

Unicode Software includes any source code published in the Unicode Standard or under the directories <http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>, and <http://www.unicode.org/cldr/data/>.

NOTICE TO USER: Carefully read the following legal agreement. BY DOWNLOADING, INSTALLING, COPYING OR OTHERWISE USING UNICODE INC.'S DATA FILES ("DATA FILES"), AND/OR SOFTWARE ("SOFTWARE"), YOU UNEQUIVOCALLY ACCEPT, AND AGREE TO BE BOUND BY, ALL OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE, DO NOT DOWNLOAD, INSTALL, COPY, DISTRIBUTE OR USE THE DATA FILES OR SOFTWARE.

COPYRIGHT AND PERMISSION NOTICE

Copyright (C) 1991-2007 Unicode, Inc. All rights reserved. Distributed under the Terms of Use in <http://www.unicode.org/copyright.html>.

Permission is hereby granted, free of charge, to any person obtaining a copy of the Unicode data files and any associated documentation (the "Data Files") or Unicode software and any associated documentation (the "Software") to deal in the Data Files or Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, and/or sell copies of the Data Files or Software, and to permit persons to whom the Data Files or Software are furnished to do so, provided that (a) the above copyright notice(s) and this permission notice appear with all copies of the Data Files or Software, (b) both the above copyright notice(s) and this permission notice appear in associated documentation, and (c) there is clear notice in each modified Data File or in the Software as well as in the documentation associated with the Data File(s) or Software that the data or software has been modified.

THE DATA FILES AND SOFTWARE ARE PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE BE LIABLE FOR ANY CLAIM, OR ANY SPECIAL INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE DATA FILES OR SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or otherwise to promote the sale, use or other dealings in these Data Files or Software without prior written authorization of the copyright holder.

MySQL FOSS License Exception

We want free and open source software applications under certain licenses to be able to use the GPL-licensed MySQL Connector/J (specified GPL-licensed MySQL client libraries) despite the fact that not all such FOSS licenses are

compatible with version 2 of the GNU General Public License.
Therefore there are special exceptions to the terms and
conditions of the GPLv2 as applied to these client libraries,
which are identified and described in more detail in the
FOSS License Exception at
<<http://www.mysql.com/about/legal/licensing/foss-exception.html>>

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you
legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion

of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable

source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and

all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among

countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest

to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details
type 'show w'. This is free software, and you are welcome
to redistribute it under certain conditions; type 'show c'
for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

*/

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally

released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or .Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, .You. includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, .control. means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions

thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms

which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN .AS IS. BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as .Participant.) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY.S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a .commercial item., as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of .commercial computer software. (as that term is defined at 48 C.F.R. ? 252.227-7014(a)(1)) and .commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction.s conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the

jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the

software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of

any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time

to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
```

```
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
signature of Ty Coon, 1 April 1989
```

```
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Sun Microsystems, Inc. are subject to the following clarification and special exception to the GPL Version 2, but only where Sun has expressly included in the particular source file's header the words

```
"Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the License file that accompanied this code."
```

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses

granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]"

replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS ``AS IS'' AND

ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)Version 1.1

1. Definitions.

1.1. "Contributor" means each individual or entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. "Covered Software" means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. "Executable" means the Covered Software in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity that first makes Original Software available under this License.

1.6. "Larger Work" means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation,

method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or

alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Oracle is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. If You assert a patent infringement claim against Participant alleging that the Participant Software directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

6.4. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. ? 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and

supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU

General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium,

provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software

interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of

that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If

this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Oracle are subject to the following clarification and special exception to the GPL Version 2, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the License file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

- 1.1. Contributor means each individual or entity that creates or contributes to the creation of Modifications.
- 1.2. Contributor Version means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.
- 1.3. Covered Software means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.
- 1.4. Executable means the Covered Software in any form other than Source Code.
- 1.5. Initial Developer means the individual or entity that first makes Original Software available under this License.
- 1.6. Larger Work means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.
- 1.7. License means this document.
- 1.8. Licensable means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.
- 1.9. Modifications means the Source Code and Executable form of any of the following:
 - A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;
 - B. Any new file that contains any part of the Original Software or previous Modification; or
 - C. Any new file that is contributed or otherwise made available under the terms of this License.
- 1.10. Original Software means the Source Code and Executable form of computer software code that is originally released under this License.
- 1.11. Patent Claims means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.
- 1.12. Source Code means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.
- 1.13. You (or Your) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, You includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, control means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to

grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipients rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN AS IS BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as Participant) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION

OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTYS NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a commercial item, as that term is defined in 48C.F.R.2.101 (Oct. 1995), consisting of commercial computer software (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and commercial computer software documentation as such terms are used in 48C.F.R.12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdictions conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The GlassFish code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a

file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of

it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a

table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or

link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for

reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the

original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version,

but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that

everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.1

1. Definitions.

1.1. "Contributor" means each individual or entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Software, prior Modifications used by a Contributor (if any), and

the Modifications made by that particular Contributor.

1.3. "Covered Software" means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. "Executable" means the Covered Software in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity that first makes Original Software available under this License.

1.6. "Larger Work" means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity

exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications

created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Oracle is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. If You assert a patent infringement claim against Participant alleging that the Participant Software directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

6.4. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR

LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is

responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor
Boston, MA 02110-1335
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or

collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will

automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR

DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1335 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type
`show w'. This is free software, and you are welcome to redistribute
it under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the

appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w` and `show c`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#

Certain source files distributed by Oracle America, Inc. and/or its affiliates are subject to the following clarification and special exception to the GPLv2, based on the GNU Project exception for its Classpath libraries, known as the GNU Classpath Exception, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

You should also note that Oracle includes multiple, independent programs in this software package. Some of those programs are provided under licenses deemed incompatible with the GPLv2 by the Free Software Foundation and others. For example, the package includes programs licensed under the Apache License, Version 2.0. Such programs are licensed to you under their original licenses.

Oracle facilitates your further distribution of this package by adding the Classpath Exception to the necessary parts of its GPLv2 code, which permits you to use that code in combination with other independent modules not licensed under the GPLv2. However, note that this would not permit you to commingle code under an incompatible license with Oracle's GPLv2 licensed code by, for example, cutting and pasting such code into a file also containing Oracle's GPLv2 licensed code and then distributing the result. Additionally, if you were to remove the Classpath Exception from any of the files to which it applies and

distribute the result, you would likely be required to license some or all of the other code in that distribution under the GPLv2 as well, and since the GPLv2 is incompatible with the license terms of some items included in the distribution by Oracle, removing the Classpath Exception could therefore effectively compromise your ability to further distribute the package.

Proceed with caution and we recommend that you obtain the advice of a lawyer skilled in open source matters before removing the Classpath Exception or making modifications to this package which may subsequently be redistributed and/or involve the use of third party software.

CLASSPATH EXCEPTION

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

This distribution includes cryptographic software. The country in which you currently reside may have restrictions on the import, possession, use, and/or re-export to another country, of encryption software. BEFORE using any encryption software, please check your country's laws, regulations and policies concerning the import, possession, or use, and re-export of encryption software, to see if this is permitted. See <http://www.wassenaar.org/> for more information.

The U.S. Government Department of Commerce, Bureau of Industry and Security (BIS), has classified this software as Export Commodity Control Number (ECCN) 5D002.C.1, which includes information security software using or performing cryptographic functions with asymmetric algorithms. The form and manner of this distribution makes it eligible for export under the License Exception ENC Technology Software Unrestricted (TSU) exception (see the BIS Export Administration Regulations, Section 740.13) for both object code and source code.

The following provides more details on the cryptographic software used (note that this software is not included in the distribution):

* The PBE Encryption facilities require the Java Cryptography extensions: <http://java.sun.com/javase/technologies/security/>.

Distributions of this software may include software developed by The Apache Software Foundation (<http://www.apache.org/>).

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only

on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of

the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition,

"control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or

otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Mozilla Public License Version 2.0

=====

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to
the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used
by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached
the notice in Exhibit A, the Executable Form of such Source Code
Form, and Modifications of such Source Code Form, in each case
including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

(a) that the initial Contributor has attached the notice described
in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of
version 1.1 or earlier of the License, but not also under the

terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

(a) any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

(b) any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For

purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- (a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- (b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- (a) for any code that a Contributor has removed from Covered Software; or
- (b) for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- (c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- (a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of

the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and

(b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to

statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

```
*
*
* 6. Disclaimer of Warranty
* -----
*
* Covered Software is provided under this License on an "as is"
* basis, without warranty of any kind, either expressed, implied, or
* statutory, including, without limitation, warranties that the
* Covered Software is free of defects, merchantable, fit for a
* particular purpose or non-infringing. The entire risk as to the
* quality and performance of the Covered Software is with You.
```

* Should any Covered Software prove defective in any respect, You *
* (not any Contributor) assume the cost of any necessary servicing, *
* repair, or correction. This disclaimer of warranty constitutes an *
* essential part of this License. No use of any Covered Software is *
* authorized under this License except under this disclaimer. *

*

* 7. Limitation of Liability *

* ----- *

* Under no circumstances and under no legal theory, whether tort *
* (including negligence), contract, or otherwise, shall any *
* Contributor, or anyone who distributes Covered Software as *
* permitted above, be liable to You for any direct, indirect, *
* special, incidental, or consequential damages of any character *
* including, without limitation, damages for lost profits, loss of *
* goodwill, work stoppage, computer failure or malfunction, or any *
* and all other commercial damages or losses, even if such party *
* shall have been informed of the possibility of such damages. This *
* limitation of liability shall not apply to liability for death or *
* personal injury resulting from such party's negligence to the *
* extent applicable law prohibits such limitation. Some *
* jurisdictions do not allow the exclusion or limitation of *
* incidental or consequential damages, so this exclusion and *
* limitation may not apply to You. *

*

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides

that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.
Mozilla Public License 1.1 (MPL 1.1)

1. Definitions.

- 1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.
- 1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.
- 1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.
- 1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.
- 1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
- 1.5. "Executable" means Covered Code in any form other than Source Code.
- 1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
- 1.7. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
- 1.8. "License" means this document.
 - 1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.
- 1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
 - A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
 - B. Any new file that contains any part of the Original Code or previous Modifications.
- 1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
 - 1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.11. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.12. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

(c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes

Commercial Use of the Covered Code.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or 4) under Patent Claims infringed by Covered Code in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modification is made available as described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor makes available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming interface and Contributor has knowledge

of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the LEGAL file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to Section 3.4(a) above, Contributor believes that Contributor's Modifications are Contributor's original creation(s) and/or Contributor has sufficient rights to grant the rights conveyed by this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modification(s) You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Covered Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient

of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License.

6.1. New Versions.

Netscape Communications Corporation ("Netscape") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by Netscape. No one other than Netscape has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.

If You create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), You must (a) rename Your license so that the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape", "MPL", "NPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the Mozilla Public License and Netscape Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions)

against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

(a) such Participant's Contributor Version directly or indirectly infringes any patent, then any and all rights granted by such Participant to You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to pay Participant a mutually agreeable reasonable royalty for Your past and future use of Modifications made by such Participant, or (ii) withdraw Your litigation claim with respect to the Contributor Version against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties or the litigation claim is not withdrawn, the rights granted by Participant to You under Sections 2.1 and/or 2.2 automatically terminate at the expiration of the 60 day notice period specified above.

(b) any software, hardware, or device, other than such Participant's Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

8.3. If You assert a patent infringement claim against Participant alleging that such Participant's Contributor Version directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

8.4. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the MPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

=====

1. Definitions

1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used

by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

(a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

(a) any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

(b) any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method,

process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

1.13. "Source Code Form"

means the form of the work preferred for making modifications.

1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants and Conditions

2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- (a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- (b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License.

Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- (a) for any code that a Contributor has removed from Covered Software;
or
- (b) for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- (c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

3. Responsibilities

3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- (a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- (b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

4. Inability to Comply Due to Statute or Regulation

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Termination

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to

You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

* *
* 6. Disclaimer of Warranty *
* ----- *
* *
* Covered Software is provided under this License on an "as is" *
* basis, without warranty of any kind, either expressed, implied, or *
* statutory, including, without limitation, warranties that the *
* Covered Software is free of defects, merchantable, fit for a *
* particular purpose or non-infringing. The entire risk as to the *
* quality and performance of the Covered Software is with You. *
* Should any Covered Software prove defective in any respect, You *
* (not any Contributor) assume the cost of any necessary servicing, *
* repair, or correction. This disclaimer of warranty constitutes an *
* essential part of this License. No use of any Covered Software is *
* authorized under this License except under this disclaimer. *
* *

* *
* 7. Limitation of Liability *
* ----- *
* *
* Under no circumstances and under no legal theory, whether tort *
* (including negligence), contract, or otherwise, shall any *
* Contributor, or anyone who distributes Covered Software as *
* permitted above, be liable to You for any direct, indirect, *
* special, incidental, or consequential damages of any character *
* including, without limitation, damages for lost profits, loss of *
* goodwill, work stoppage, computer failure or malfunction, or any *
* and all other commercial damages or losses, even if such party *
* shall have been informed of the possibility of such damages. This *
* limitation of liability shall not apply to liability for death or *
* personal injury resulting from such party's negligence to the *
* extent applicable law prohibits such limitation. Some *
* jurisdictions do not allow the exclusion or limitation of *
* incidental or consequential damages, so this exclusion and *
* limitation may not apply to You. *
* *

8. Litigation

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions.

Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

9. Miscellaneous

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

10. Versions of the License

10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

10.4. Distributing Source Code Form that is Incompatible With Secondary

Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

Exhibit A - Source Code Form License Notice

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Exhibit B - "Incompatible With Secondary Licenses" Notice

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a

copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct

or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of

this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity

on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one

of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a

result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

The portion of the functionTests under 'nist' was originally developed by the National Institute of Standards and Technology (NIST), an agency of the United States Department of Commerce, and adapted by International Business Machines Corporation in accordance with the NIST Software Acknowledgment and Redistribution document at http://www.itl.nist.gov/div897/ctg/sql_form.htm

=====
The JDBC apis for small devices and JDBC3 (under java/stubs/jsr169 and java/stubs/jdbc3) were produced by trimming sources supplied by the Apache Harmony project. In addition, the Harmony SerialBlob and SerialClob implementations are used. The following notice covers the Harmony sources:

Portions of Harmony were originally developed by Intel Corporation and are licensed to the Apache Software Foundation under the "Software Grant and Corporate Contribution License Agreement", informally known as the "Intel Harmony CLA".

The Derby build relies on source files supplied by the Apache Felix project. The following notice covers the Felix files:

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,

"control" means (i) the power, direct or indirect, to cause the

direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and

wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor

has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

This product includes software developed by
The Apache Software Foundation (<http://www.apache.org/>).

The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.
2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.
3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

- a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.
- b) use the modified Package only within your corporation or organization.
- c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.
- d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

- a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.
- b) accompany the distribution with the machine-readable source of the Package with your modifications.
- c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.
- d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated

them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GPL version 3

=====

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <<http://fsf.org/>>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those

products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible

feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any

non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".
- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the

machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains

a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However,

nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to

make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting

any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different

permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The Academic Free License, v. 2.1:

This Academic Free License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Academic Free License version 2.1

1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public;
- d) to perform the Original Work publicly; and
- e) to display the Original Work publicly.

2) Grant of Patent License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor, to make, use, sell and offer for sale the Original Work and Derivative Works.

3) Grant of Source Code License. The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant. Neither the names of Licensor, nor the names of any contributors to the Original Work, nor any of their trademarks or service marks, may be used to endorse or promote products derived from this Original Work without express prior written permission of the Licensor. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein. No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the licensed claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) This section intentionally omitted.

6) Attribution Rights. You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty of Provenance and Disclaimer of Warranty. Licensor warrants that the copyright in and to the Original Work and the patent rights granted herein by Licensor are owned by the Licensor or are sublicensed to You under the terms of this License with the permission of the contributor(s) of those copyrights and patent rights. Except as expressly stated in the immediately preceding sentence, the Original Work is provided under this License on an "AS IS" BASIS

and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability. Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination. If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Section 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Section 1 herein, You indicate Your acceptance of this License and all of its terms and conditions.

10) Termination for Patent Action. This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License as of the date You commence an action, including a cross-claim or counterclaim, against Licensor or any licensee alleging that the Original Work infringes a patent. This termination provision shall not apply for an action alleging patent infringement by combinations of the Original Work with other software or hardware.

11) Jurisdiction, Venue and Governing Law. Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees. In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous. This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License. "You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use. You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

This license is Copyright (C) 2003-2004 Lawrence E. Rosen. All rights reserved. Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

Apache License
Version 2.0, January 2004
<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made,

use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability

incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
- v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
- vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
- vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the

"License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You

institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright {yyyy} {name of copyright owner}
