## 1.3 react-native-easy-grid 0.2.2

### 1.3.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but

not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their

Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with

the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright {yyyy} {name of copyright owner}

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

# 1.30 mdn-data 2.0.14

## 1.30.1 Available under license :

CC0 1.0 Universal

### Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works, reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and related or neighboring rights ("Copyright and Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

- i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
- ii. moral rights retained by the original author(s) and/or performer(s);
- iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
- iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;

v. rights protecting the extraction, dissemination, use and reuse of data in a Work;

vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and

vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

#### 4. Limitations and Disclaimers.

- a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
- b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the Work, express, implied, statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
- c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the Work.
- d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

## 1.33.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the

outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable

copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and

do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<http://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

```

`StyleSheetManager` expects a valid target or sheet prop!`  
 - Does this error occur on the client and is your target falsy?  
 - Does this error occur on the server and is the sheet falsy?  
 - Are you running in a client-like environment on the server?  
 - Are you trying to run SSR on the client?  
 - Are you using a custom target that isn't mounted?  
 - Does your document not have a valid head element?  
 - Have you accidentally removed a style tag manually?  
 - `ThemeProvider: Please return an object from your theme prop function, e.g. theme={() => ({})}`  
 - `ThemeProvider: Please make your theme prop an object.`  
 - `Missing document <head>`  
 - `Cannot find a StyleSheet instance. Usually this happens if there are multiple copies of styled-components loaded at once. Check out this issue for how to troubleshoot and fix the common cases where this situation can happen: https://github.com/styled-components/styled-components/issues/1941#issuecomment-417862021`  
 - `_This error was replaced with a dev-time warning, it will be deleted for v4 final. [createGlobalStyle] received children which will not be rendered. Please use the component without passing children elements.`  
 - `It seems you are interpolating a keyframe declaration (%s) into an untagged string. This was supported in styled-components v3, but is not longer supported in v4 as keyframes are now injected on-demand. Please wrap your string in the css` helper which ensures the styles are injected correctly. See https://www.styled-components.com/docs/api#css`  
 - `%s is not a styled component and cannot be referred to via component selector. See https://www.styled-components.com/docs/advanced#referring-to-other-components for more details.`  
 - `ThemeProvider: theme prop is required.`  
 - `A stylis plugin has been supplied that is not named. We need a name for each plugin to be able to prevent styling collisions between different stylis configurations within the same app. Before you pass your plugin to <StyleSheetManager stylisPlugins={[]}>, please make sure each plugin is uniquely-named, e.g. Object.defineProperty(importedPlugin, 'name', { value: 'some-unique-name' });`  
 - `Reached the limit of how many styled components may be created at group %s. You may only create up to 1,073,741,824 components. If you're creating components dynamically, for instance in your render method then you may be running into this limitation.`  
 - `CSSStyleSheet could not be found on HTMLStyleElement.`  
 - Has styled-components' style tag been unmounted or altered by another script?

once';\n\n/**\n * The CSS parser throws this error for broken CSS.\n *\n * Custom parsers can throw this error for
broken custom syntax using\n * the { @link Node#error } method.\n *\n * PostCSS will use the input source map to
detect the original error location.\n *\n * If you wrote a Sass file, compiled it to CSS and then parsed it with PostCSS,\n
* PostCSS will show the original position in the Sass file.\n *\n * If you need the position in the PostCSS input\n *

```

```

(e.g., to debug the previous compiler), use `error.input.file`.
 * @example // Catching and checking syntax
error try {
 * postcss.parse('a{')
} catch (error) {
 * if (error.name === 'CssSyntaxError') {
 * error
//=> CssSyntaxError
 * }
 * @example // Raising error from plugin
 * throw node.error('Unknown
variable', { plugin: 'postcss-vars' });
 * \n
 * @param {string} message - error
message
 * @param {number} [line] - source line of the error
 * @param {number} [column] - source column
of the error
 * @param {string} [source] - source code of the broken file
 * @param {string} [file] - absolute
path to the broken file
 * @param {string} [plugin] - PostCSS plugin name, if error came from plugin
 * \n
 * constructor(message, line, column, source, file, plugin)
 * \n
 * @member {string} - Always equal to
`CssSyntaxError`. You should
 * always check error type
 * by `error.name ===
'CssSyntaxError` instead of
 * `error instanceof CssSyntaxError`, because
 * npm
could have several PostCSS versions.
 * @example
 * if (error.name === 'CssSyntaxError') {
 * error
//=> CssSyntaxError
 * }
 * \n
 * this.name = 'CssSyntaxError';
 * \n
 * @member {string} - Error
message.
 * @example
 * error.message //=> 'Unclosed block'
 * \n
 * this.reason = message;
 * \n
 * if (file) {
 * \n
 * @member {string} - Absolute path to the broken file.
 * @example
 * error.file //=> 'a.sass'
 * error.input.file //=> 'a.css'
 * \n
 * this.file = file;
 * }

*\n *
*\n * @example\n * decl.source.input.from //=> '/home/ai/a.sass'\n *
decl.source.start //=> { line: 10,
column: 2 }\n *
decl.source.end //=> { line: 10, column: 12 }\n *
*\n *
*\n * @memberof Node#\n *
@member {object} raws - Information to generate byte-to-byte equal\n *
node string as it was in the
origin input.\n *
*\n * Every parser saves its own properties,\n *
but the default CSS parser uses:\n *
*\n *
*\n * `before`: the space symbols before the node. It also stores `*\n *
and `_\n *
symbols before the declaration (IE
hack).\n *
*\n *
*\n * `after`: the space symbols after the last child of the node\n *
to the end of the node.\n *
*\n *
*\n * `between`: the symbols between the property and value\n *
for declarations, selector and `{` for rules, or last
parameter\n *
and `{` for at-rules.\n *
*\n *
*\n * `semicolon`: contains true if the last child has\n *
an (optional)
semicolon.\n *
*\n *
*\n * `afterName`: the space between the at-rule name and its parameters.\n *
*\n *
*\n * `left`: the space
symbols between `/*` and the comment's text.\n *
*\n *
*\n * `right`: the space symbols between the comment's text\n *
and *&#47;</code>.\n *
*\n *
*\n * `important`: the content of the important statement,\n *
if it is not just
`!important`.\n *
*\n *
*\n * PostCSS cleans selectors, declaration values and at-rule parameters\n *
from comments and
extra spaces, but it stores origin content in raws\n *
properties. As such, if you don't change a declaration's
value,\n *
PostCSS will use the raw value with comments.\n *

```

the container's descendant nodes, use `{@link Container#walk}`. Unlike the `for`{}`-cycle` or `Array#forEach`` this iterator is safe if you are mutating the array of child nodes during iteration. PostCSS will adjust the current index to match the mutations.

`@param {childIterator} callback` - iterator receives each node and index

`@return {false|undefined}` returns ``false`` if iteration was broke

`@example`

```
const root = postcss.parse('a { color: black; z-index: 1 }');
const rule = root.first;
for (let decl of rule.nodes) {
  decl.cloneBefore({ prop: '-webkit-' + decl.prop });
  // Cycle will be infinite,
  // because cloneBefore moves the current node
  // to the next index
  rule.each(decl => {
    decl.cloneBefore({ prop: '-webkit-' + decl.prop });
    // Will be executed only for color and z-index
  });
  each(callback) {
    if (!this.lastEach) this.lastEach = 0;

  this.raws.selector = val;
}

```

memberof `Rule#`

```

@member {string} selector - the rule's full selector represented as a string
@example
const root = postcss.parse('a, b {}');
const rule = root.first;
rule.selector // => 'a, b'

```

memberof `Rule#`

```

@member {object} raws - Information to generate byte-to-byte equal node string as it was in the origin input.

```

Every parser saves its own properties, but the default CSS parser uses:

- `before`: the space symbols before the node. It also stores `and` and `_` symbols before the declaration (IE hack).
- `after`: the space symbols after the last child of the node to the end of the node.
- `between`: the symbols between the property and value for declarations, selector and ``` for rules, or last parameter and ``` for at-rules.
- `semicolon`: contains true if the last child has an (optional) semicolon.

PostCSS cleans selectors from comments and extra spaces, but it stores origin content in raws properties. As such, if you don't change a declaration's value, PostCSS will use the raw value with comments.

```

@example
const root = postcss.parse('a { color:black }');
root.first.first.raws // => { before: ' ', between: ' ', after: '\n' }

```

Exports default `Rule`.

```

property will only work with synchronous plugins. If the processor contains any asynchronous plugins it will throw an error. This is why this method is only for debug purpose, you should always use `{@link LazyResult#then}`.  
 This property will only work with synchronous plugins. If the processor contains any asynchronous plugins it will throw an error. This is why this method is only for debug purpose, you should always use `{@link LazyResult#then}`.  
 Processes input CSS through synchronous plugins and returns `{@link Result#messages}`.  
 Processes input CSS through synchronous plugins and calls `{@link Result#warnings}`.  
 Alias for the `{@link LazyResult#css}` property.  
 Example:  
`lazy + " === lazy.css;`  
 Returns `{string}` output CSS to `toString()`.  
 Processes input CSS through synchronous and asynchronous plugins and calls `onFulfilled` with a `Result` instance. If a plugin throws an error, the `onRejected` callback will be executed. It implements standard Promise API.  
 @param `{onFulfilled}` `onFulfilled` - callback will be executed

when all plugins will finish work @param `{onRejected}` `onRejected` - callback will be executed on any error @return `{Promise}` Promise API to make queue @example  
`postcss([cssnext]).process(css).then(result => { console.log(result.css); }); then(onFulfilled, onRejected) { return this.async().then(onFulfilled, onRejected); }`  
 Processes input CSS through synchronous and asynchronous plugins and calls `onRejected` for each error thrown in any plugin. It implements standard Promise API.  
 @param `{onRejected}` `onRejected` - callback will be executed on any error @return `{Promise}` Promise API to make queue @example  
`postcss([cssnext]).process(css).then(result => { console.log(result.css); }).catch(error => { console.error(error); }); catch(onRejected) { return this.async().catch(onRejected); } handleError(error, plugin) { try { this.error = error; if (error.name === 'CssSyntaxError' && !error.plugin) { error.plugin = plugin.postcssPlugin; error.setMessage(); } else if (plugin.postcssVersion) { const pluginName = plugin.postcssPlugin; const pluginVer = plugin.postcssVersion; const runtimeVer = this.result.processor.version; const a = pluginVer.split('.'); const b = runtimeVer.split('.'); if (a[0] !== b[0] || parseInt(a[1]) > parseInt(b[1])) { warnOnce(`Your current PostCSS version ' + 'is ' + runtimeVer, but ${pluginName} ` + uses ${pluginVer}. Perhaps this is ` the source of the error below.`); } } catch (err) { if (console && console.error) console.error(err); } } asyncTick(resolve, reject) { if (this.plugin >= this.processor.plugins.length) { this.processed = true; return resolve(); } try { const plugin = this.processor.plugins[this.plugin]; const promise = this.run(plugin); this.plugin += 1; if (isPromise(promise)) { promise.then(() => { this.asyncTick(resolve, reject); }).catch(error => { this.handleError(error, plugin); this.processed = true; reject(error); }); } else { this.asyncTick(resolve, reject); } } catch (error) { this.processed = true; reject(error); } } } async() { if (this.processed) { return new Promise((resolve, reject) => { if (this.error) { reject(this.error); } else { resolve(this.stringify()); } }); } if (this.processing) { return this.processing; } this.processing = new Promise((resolve, reject) => { if (this.error) return reject(this.error); this.plugin = 0; this.asyncTick(resolve, reject); }).then(() => { this.processed = true; return this.stringify(); }); return this.processing; } } sync() { if (this.processed) return this.result; this.processed = true; if (this.processing) { throw new Error('Use process(css).then(cb) to work with async plugins'); } if (this.error) throw this.error; this.result.processor.plugins.forEach(plugin => { const promise = this.run(plugin); if (isPromise(promise)) { throw new Error('Use process(css).then(cb) to work with async plugins'); } }); return this.result; } } run(plugin) { this.result.lastPlugin = plugin; try { return plugin(this.result.root, this.result); } catch (error) { this.handleError(error, plugin); throw error; } } stringify() { if (this.stringified) return this.result; this.stringified = true; this.sync(); const opts = this.result.opts; }`

```

following common methods.

```

@abstract
^nclass Node {
  /**
   * @param {object} [defaults] - value for node properties
   * ^nclass constructor(defaults = {}) {
   *   this.raws = {};
   *   for (const name in defaults) {
   *     this[name] = defaults[name];
   *   }
   * }
  /**
   * Returns a CssSyntaxError instance containing the original position
   * of the node in the source, showing line and column numbers and also
   * a small excerpt to facilitate debugging.
   * If present, an input source map will be used to get the original position
   * of the source, even from a previous compilation step
   * (e.g., from Sass compilation).
   * This method produces very useful error messages.
   * @param {string} message - error description
   * @param {object} [opts] - options
   * @param {string} opts.plugin - plugin name that created this error.
   * PostCSS will set it automatically.
   * @param {string} opts.word - a word inside a node's string that should
   * be highlighted as the source of the error
   * @param {number} opts.index - an index inside a node's string that should
   * be highlighted as the source of the error
   * @return {CssSyntaxError} error object to throw it
   * @example
   * if (!variables[name]) {
   *   throw decl.error('Unknown variable ' + name, { word: name });
   * } // CssSyntaxError: postcss-vars:a.sass:4:3: Unknown variable $black
   * // color: $black
   * // a
   * // background: white
   * }
  ^nclass error(message, opts = {}) {
   * if (this.source) {
   *   const pos = this.positionBy(opts);
   *   return this.source.input.error(message, pos.line, pos.column, opts);
   * } else {
   *   return new CssSyntaxError(message);
   * }
  }
  /**
   * This method is provided as a convenience wrapper for
   * @link Result#warn.
   * @param {Result} result - the @link Result instance
   * @param {string} text - warning message
   * @param {object} [opts] - options
   * @param {string} opts.plugin - plugin name that created this warning.
   * PostCSS will set it automatically.
   * @param {string} opts.word - a word inside a node's string that should
   * be highlighted as the source of the warning
   * @param {number} opts.index - an index inside a node's string that should
   * be highlighted as the source of the warning
   * @return {Warning} created warning object

childIterator\n  * @param {Node} node - container child\n  * @param {number} index - child index\n  * @return
{false|undefined} returning `false` will break iteration\n  * /\n\n  /**\n  * The {@link Root}, {@link AtRule}, and
{@link Rule} container nodes\n  * inherit some common methods to help work with their children.\n  * Note that
all containers can store any content. If you write a rule inside\n  * a rule, PostCSS will parse it.\n  * \n  * @extends
Node\n  * @abstract\n  * /\n\nclass Container extends Node {\n  push(child) {\n  child.parent = this;\n
this.nodes.push(child);\n  return this;\n  }\n\n  /**\n  * Iterates through the container's immediate children,\n  *

```

calling `callback` for each child.

- \* Returning `false` in the callback will break iteration.
- \* This method only iterates through the container's immediate children.
- \* If you need to recursively iterate through all the container's descendant nodes, use `{@link Container#walk}`.
- \* Unlike the `for`{}`-cycle` or `Array#forEach` this iterator is safe if you are mutating the array of child nodes during iteration.
- \* PostCSS will adjust the current index to match the mutations.
- \* @param {childIterator} callback - iterator receives each node and index
- \* @return {false|undefined} returns `false` if iteration was broke

@example

```
const root = postcss.parse('a { color: black; z-index: 1 }');
const rule = root.first;
for (let decl of rule.nodes) {
  decl.cloneBefore({ prop: '-webkit-' + decl.prop });
  // Cycle will be infinite, because cloneBefore moves the current node // to the next index
  rule.each(decl => {
    decl.cloneBefore({ prop: '-webkit-' + decl.prop });
    // Will be executed only for color and z-index
  });
  each(callback) {
    if (!this.lastEach) this.lastEach = 0;
    if (!this.indexes) this.indexes = {};
    this.lastEach += 1;
    const id = this.lastEach;
    this.indexes[id] = 0;
    if (!this.nodes) return undefined;
    let index, result;
    while (this.indexes[id] < this.nodes.length) {
      index = this.indexes[id];
      result = callback(this.nodes[index], index);
      if (result === false) break;
      this.indexes[id] += 1;
    }
    delete this.indexes[id];
    return result;
  }
}
/**
 * Traverses the container's descendant nodes, calling callback
 * for each node.
 * Like container.each(), this method is safe to use if you are mutating arrays during iteration.
 * If you only need to iterate through the container's immediate children, use {@link Container#each}.
 * @param {childIterator} callback - iterator receives each node and index
 * @return {false|undefined} returns `false` if iteration was broke
 * @example
 * root.walk(node => {

Information to generate byte-to-byte equal\n * \n * node string as it was in the origin input.\n * \n *
Every parser saves its own properties,\n * \n * but the default CSS parser uses:\n * \n * * `before`: the space symbols
before the node. It also stores `*\n * \n * and `_` symbols before the declaration (IE hack).\n * \n * * `after`: the space
symbols after the last child of the node\n * \n * to the end of the node.\n * \n * * `between`: the symbols between the
property and value\n * \n * for declarations, selector and `{` for rules, or last parameter\n * \n * and `{` for at-rules.\n *

```

```

* `semicolon`: contains true if the last child has
* an (optional) semicolon.
* * `afterName`: the space
between the at-rule name and its parameters.
* * PostCSS cleans at-rule parameters from comments and extra
spaces,
* but it stores origin content in raws properties.
* As such, if you don't change a declaration's value,
* PostCSS will use the raw value with comments.
* * @example
* const root = postcss.parse('@media\nprint {\n})
* root.first.first.raws //=> { before: '\n'
* // afterName: '\n',
* // after: '\n'
* }
* /nexport default AtRule;
* /n
* Contains helpers for safely splitting lists of CSS values,
* preserving parentheses and quotes.
* * @example
* const list = postcss.list;

* set _selector(val) {
* /n warnOnce('Rule#_selector is deprecated. Use Rule#raws.selector');
* /n this.raws.selector = val;
* /n }
* /n
* @memberof Rule#
* @member {string} selector - the rule's full selector represented
as a string
* @example
* const root = postcss.parse('a, b {}');
* const rule = root.first;
* rule.selector //=> 'a, b'
* /n
* @memberof Rule#
* @member {object} raws - Information to generate byte-to-byte equal
node string as it was in the origin input.
* Every parser saves its own properties,
* but the default CSS parser uses:
* * `before`: the space symbols before the node. It also stores ` `
and ` `
symbols before the declaration (IE hack).
* * `after`: the space symbols after the last child of the node
to the end of the node.
* * `between`: the symbols between the property and value
for declarations, selector and `{` for rules, or last parameter
and `{` for at-rules.
* * `semicolon`: contains true if the last child has
an (optional) semicolon.
* * PostCSS cleans selectors from comments and extra spaces,
* but it stores origin content in raws properties.
* As such, if you don't change a declaration's value,
* PostCSS will use the raw value with comments.
* * @example
* const root = postcss.parse('a {\n color:black\n}');

```

```

root.first.first.raws //=> { before: ", between: ', after: '\\n' }
}

Represents a plugin's warning. It can be created using { @link Node#warn }.
if ( decl.important ) {
  decl.warn(result, 'Avoid !important', { word: 'important' });
}

class Warning {
  @param {string} text - warning message
  @param {Object} [opts] - warning options
  @param {Node} opts.node - CSS node that caused the warning
  @param {string} opts.word - word in CSS source that caused the warning

import Warning from './warning';
@typedef {object} Message
@property {string} type - message type
@property {string} plugin - source PostCSS plugin name
Provides the result of the PostCSS transformations.
A Result instance is returned by { @link LazyResult#then }
or { @link Root#toResult } methods.
@example
postcss([cssnext]).process(css).then(function (result) {
  console.log(result.css);
});
@example
var result2 = postcss.parse(css).toResult();

class Result {
  @param {Processor} processor - processor used for this transformation.
  @param {Root} root - Root node after all transformations.
  @param {processOptions} opts - options from the { @link Processor#process }
    or { @link Root#toResult }
  constructor(processor, root, opts) {
    @member {Processor} - The Processor instance used
    for this transformation.
    @example
    for ( let plugin of result.processor.plugins ) {
      if ( plugin.postcssPlugin === 'postcss-bad' ) {
        throw 'postcss-good is incompatible with postcss-bad';
      }
    };
    this.processor = processor;
    @member {Message[]} - Contains messages from plugins
    (e.g., warnings or custom messages).
    Each message should have type and plugin properties.
    @example
    postcss.plugin('postcss-min-browser', () => {
      return (root, result) => {
        var browsers = detectMinBrowsersByCanIUse(root);
        result.messages.push({
          type: 'min-browser',
          plugin: 'postcss-min-browser',
          browsers: browsers
        });
      };
    });
    this.messages = [];
    @member {Root} - Root node after all transformations.
    @example
    * root.toResult().root == root;
    * this.root = root;
    @member {processOptions} - Options from the { @link Processor#process }
    or { @link Root#toResult } call
    that produced this Result instance.
    @example
    * root.toResult(opts).opts == opts;
    * this.opts = opts;
    @member {string} - A CSS string representing of { @link Result#root }.

```

```

@example\n * postcss.parse('a{}').toResult().css //=> \"a{}\" \n * \n this.css = undefined; \n /** \n *
@member {SourceMapGenerator} - An instance of `SourceMapGenerator` \n * \n class from the

Create one `Processor` instance,\n * initialize its plugins, and then use that\n instance on numerous CSS files.\n *\n * @example\n * const processor = postcss([autoprefixer, precss]);\n * processor.process(css1).then(result => console.log(result.css));\n * processor.process(css2).then(result =>\n console.log(result.css));\n *\n\n class Processor {\n  /**\n * @param {Array.<Plugin|pluginFunction>} Processor\n plugins - PostCSS\n * plugins. See { @link Processor#use } for plugin format.\n *\n * constructor(plugins = [])\n *\n * @member {string} - Current PostCSS version.\n *\n * @example\n * if (\n result.processor.version.split('.')[0] !== '5' ) {\n * throw new Error("This plugin works only with PostCSS 5");\n *\n * }\n *\n * this.version = '5.2.0';\n *\n * @member {pluginFunction[]} - Plugins added to this processor.\n *\n * @example\n * const processor = postcss([autoprefixer, precss]);\n * processor.plugins.length // => 2\n *\n * this.plugins = this.normalize(plugins);\n }\n\n /**\n * Adds a plugin to be used as a CSS processor.\n *\n * PostCSS plugin can be in 4 formats:\n * * A plugin created by { @link postcss.plugin } method.\n * * A\n function. PostCSS will pass the function a { @link Root }\n * as the first argument and current { @link Result }\n instance\n * as the second.\n * * An object with a `postcss` method. PostCSS will use that method\n * as

```

described in #2. Another `{@link Processor}` instance. PostCSS will copy plugins from that instance into this one. Plugins can also be added by passing them as arguments when creating a `postcss` instance (see `[postcss(plugins)]`). Asynchronous plugins should return a `Promise` instance.

`@param {Plugin|pluginFunction|Processor} plugin` - PostCSS plugin or `{@link Processor}` with plugins

`@example` `const processor = postcss().use(autoprefixer).use(precss);`

`@return {Processes}` current processor to make methods chain

```

use(plugin) {
  this.plugins = this.plugins.concat(this.normalize([plugin]));
  return this;
}

```

Parses source CSS and returns a `{@link LazyResult}` Promise proxy. Because some plugins can be asynchronous it doesn't make any transformations. Transformations will be applied in the `{@link LazyResult}` methods.

`@param {string|toString|Result} css` - String with input CSS or any object with a `toString()` method, like a `Buffer`.

Optionally, send a `{@link Result}` instance and the processor will take the `{@link Root}` from it.

`@param {processOptions} [opts]` - options

`@return {LazyResult}` Promise proxy

`@example` `processor.process(css, { from: 'a.css', to: 'a.out.css' }).then(result => { console.log(result.css); });`

```

process(css, opts = {}) {
  return new LazyResult(this, css, opts);
}

```

`normalize(plugins)`

```

let normalized = [];
plugins.forEach(i => {
  if (i.postcss) i = i.postcss;
  if (typeof i === 'object' && Array.isArray(i.plugins)) {
    normalized = normalized.concat(i.plugins);
  } else if (typeof i === 'function') {
    normalized.push(i);
  } else {
    throw new Error(`${i} is not a PostCSS plugin`);
  }
});
return normalized;

```

`export default Processor;`

`/* @flow */ import './rule'; // break cyclical dependency deadlock - #87`

`import Container from './container';`

`import LazyResult from './lazy-result';`

`import Processor from './processor';`

`import warnOnce from './warn-once';`

Represents a CSS file and contains all its parsed nodes.

`@extends Container`

`@example` `const root = postcss.parse('a {color:black} b {z-index:2}');`

`root.type // => 'root'`

`root.nodes.length // => 2`

```

class Root extends Container {
  constructor(defaults) {
    super(defaults);
    this.type = 'root';
    if (!this.nodes) this.nodes = [];
  }
  removeChild(child) {
    child = this.index(child);
    if (child === 0 && this.nodes.length > 1) {
      this.nodes[1].raws.before = this.nodes[child].raws.before;
    }
    return super.removeChild(child);
  }
  normalize(child, sample, type) {
    const nodes = super.normalize(child);
    if (sample) {
      if (type === 'prepend') {
        if (this.nodes.length > 1) {
          sample.raws.before = this.nodes[1].raws.before;
        } else {
          delete sample.raws.before;
        }
      } else if (this.first !== sample) {
        nodes.forEach(node => {
          node.raws.before = sample.raws.before;
        });
      }
    }
    return nodes;
  }
}

```

Returns a `{@link Result}` instance representing the root's CSS.

`@param {processOptions} [opts]` - options with only `to` and `map` keys

`@return {Result}` result with current root's CSS

`@example` `const root1 = postcss.parse(css1, { from: 'a.css' });`

`const root2 = postcss.parse(css2, { from: 'b.css' });`

`root1.append(root2);`

`const result = root1.toResult({ to: 'all.css', map: true });`

```

toResult(opts = {}) {
  const lazy = new LazyResult(new Processor(), this, opts);
  return lazy.stringify();
}

```

`remove(child)`

`warnOnce('Root#remove is deprecated. Use Root#removeChild');`

`this.removeChild(child);`

`prevMap()`

`warnOnce('Root#prevMap is deprecated. Use Root#source.input.map');`

`return this.source.input.map;`

`@memberof Root#`

`@member {object} raws` - Information to generate byte-to-byte equal node string as it was in the origin input.

Every parser saves its own properties, but the default CSS parser uses:

- `after`: the space symbols after the last child to the end of file
- `semicolon`: is the last child has an (optional) semicolon

`@example` `postcss.parse('a {}').raws // => { after: '\n' }`

`postcss.parse('a { }').raws // => { after: ' ' }`

```

export default Root;
/* @flow */ import './root'; // break cyclical dependency deadlock - #87
import CssSyntaxError from './css-syntax-error';
import PreviousMap from './previous-map';
let sequence = 0;

```

`@typedef {object} filePosition`

`@property {string} file` - path to file

`@property {number} line` - source line in file

`@property {number} column` - source column in file

Represents the source CSS.

`@example` `const root = postcss.parse(css, { from: file });`

`const input = root.source.input;`

```

class Input {
  /* @param

```

```

{string} css - input CSS source\n * @param {object} [opts] - {@link Processor#process} options\n */\n
