

### Overview

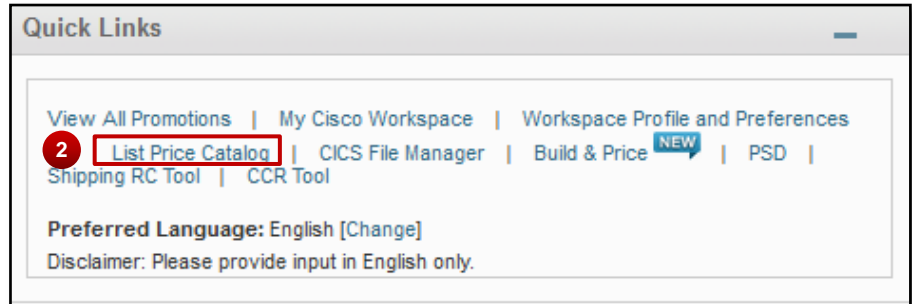

As of February 2, 2014, the Services Price List Catalog files available in CCW are available in a new format, and on a new frequency.

**Note:** Files in the old format will still be available for a minimum of three months after the introduction of the new format.

### Accessing the Price List Catalog

1 Log in to [Cisco Commerce Workspace](#).

2 In the **Quick Links** modal, click the [List Price Catalog](#) link.

3 Select **Service to Product** for the new file format.

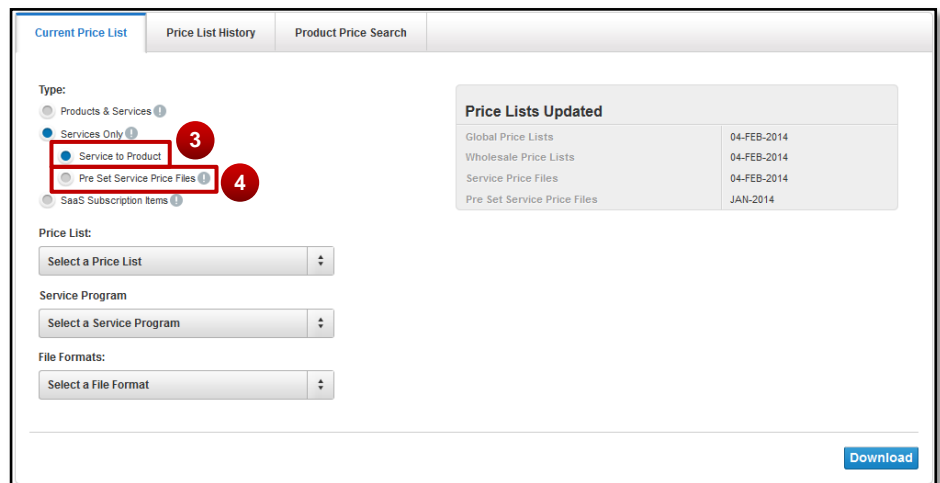

*Note that this file is updated every 24 hours, and will contain the latest prices available.*

4 Select **Pre Set Service Price Files** for the old file format.

*Note that this file is updated every ~30 days, and may contain outdated prices.*

5 Select the appropriate **Price List, Service Program, and/or File Format**.

*Note that if you are accessing the **Service to Product** price list format, you will only see price lists which are available to you in CCW.*

## New Services Price List Catalog File Format

**1** In each output file, you will see the selected Price List with all service items including the following fields:

- Family Mapping
- Description
- Service SKU
- Product List Price
- Service List Price

**2** Note that the new file format aligns to the existing Products Price List file format, but differs from the previous Services Price List file format. Users may need to update any existing macros or import utilities.

## Downloading and Viewing Compressed Files

**1** The existing Products & Services Price List files are available in standard and compressed file formats.

**2** The compressed file formats have a technical dependency on the WinRAR utility, and the new Services Price List files are based on the existing Products & Services Price List files.

**3** If you select the Compressed file format option, the WinRAR utility should be installed on your system prior to viewing the files.
