Certificate Authority Configuration Changes	The Certificate Authority (CA) configuration changes are applicable in any one of the following scenarios:
	• Upgrade from a lower AsyncOS version to AsyncOS 14.0 version and later.
	<ul> <li>Install AsyncOS 14.0 for Cisco Secure Email Gateway for the first time.</li> </ul>
	The following changes are made to the Certificate Authorities list:
	<ul> <li>You can view the count and details of custom and system CA certificates in your email gateway.</li> <li>Use the Managed Trusted Root Certificates option in Network &gt; Certificates &gt; page to view the custom or system CA certificate details.</li> </ul>
	• You can upload, delete, or append the custom CA certificate in your email gateway.
	<ul> <li>You will not be able to upload duplicate custom CA certificates to your email gateway.</li> </ul>
	• [Applicable for new AsyncOS install only]: You can update the existing system CA certificate bundle to the latest available version. Use the Update Now option in Network > Certificates page in the web interface or the updatenow CLI command to update the existing system CA certificate bundle.
	• [Applicable for AsyncOS upgrade only]:
	<ul> <li>During upgrade, you can choose to append the valid CA certificates from the system CA bundle (of the current AsyncOS build) to the custom CA bundle of the upgraded AsyncOS build.</li> </ul>
	Note The backup of the current system CA bundle is stored in the following location - /data/pub/systemca.old/trustedca.old.pem
	<ul> <li>After upgrade, the system CA certificate bundle of the current AsyncOS build is updated to the latest version automatically.</li> </ul>
