The screenshot shows the 'Certificates' tab selected in the Cisco ISE interface. On the left, a sidebar lists various certificate-related options under 'Certificate Management'. The 'Trusted Certificates' section is currently active. The main panel displays details for a certificate named 'IdenTrust Commercial Root CA 1'. The fields shown include:

- \* Friendly Name: IdenTrust Commercial Root CA 1
- Status: Enabled
- Description: IdenTrust Commercial Root CA 1
- Subject: CN=IdenTrust Commercial Root CA 1,O=IdenTrust,C=US
- Issuer: CN=IdenTrust Commercial Root CA 1,O=IdenTrust,C=US
- Valid From: Thu, 16 Jan 2014 18:12:23 UTC
- Valid To (Expiration): Mon, 16 Jan 2034 18:12:23 UTC
- Serial Number: 0A 01 42 80 00 00 01 45 23 C8 44 B5 00 00 00 02
- Signature Algorithm: SHA256withRSA
- Key Length: 4096

Below this, the 'Usage' section lists several checkboxes for 'Trusted For':

- Trust for authentication within ISE
- Trust for client authentication and Syslog
- Trust for certificate based admin authentication
- Trust for authentication of Cisco Services
- Trust for Native IPSec certificate based authentication

### Deployment Nodes

A Cisco ISE node can assume the Administration, Policy Service, or Monitoring personas. Data is automatically replicated from PAN to all the secondary nodes. If needed, you can manually sync a node with the PAN by using the Sync option. During Sync, Cisco ISE performs Full Sync if full database replication is required or Selective Sync if only bulk replication of selective dataset is needed. You must update the SXP device configuration with the connected PSN details in case of upgrade, node failure, or node configuration updates.

[Configuration](#)[About this integration](#)

### Registration

The integration of pxGrid Cloud will take place through your Cisco DNA Portal account where this ISE is registered. [Manage your ISE registration](#)

**Cisco DNA Portal account**

cisco

**Status**

Registered

**Device name**

ISE341-PSN1

**Registered region**

us-west-2

**Description**

Primary pxGrid node

### App configuration

**Application status** Inactive**Instance** ⓘ Existing instances New instance**Data scope**

Select at least 1 data scope for this application to consume.

- Adaptive Network Control (ANC) Configuration  
Provides ANC configuration details such as policy name, action type, status, and MAC address.
- Echo Service  
Provides a way for the app to check the health of the integration.
- Profiler Configuration  
Provides ISE profiling policy device details such as ID and name.
- Session Directory  
Provides details on session and user group objects which include authenticated user context, wired and wireless connection type information, posture status, endpoint profile device, Security Group Tag (SGT), and username.
- TrustSec  
Covers TrustSec, TrustSec Configuration, and TrustSec SXP topics which include SGACL, SGT, and SGT binding information.

- ⚠** • If you are associating multiple ISE clusters, please ensure that your SGT IDs and names are homogenized.  
• When you select a data scope, it will also enable the same under system level pxGrid Cloud Policy settings.

Interactive Help

**pxGrid Cloud Policy**

You can create a general pxGrid Cloud policy for what is allowed or denied between your ISE deployment and the pxGrid Cloud service. The per partner authorization policy can be setup in the cloud portal.

**pxGrid Services**

You can use Cisco pxGrid to share the context-sensitive information from Cisco ISE session directory with other network systems such as ISE Eco system partner systems and other Cisco platforms. The pxGrid framework can also be used to exchange policy and configuration data between nodes like sharing tags and policy objects between Cisco ISE and third party vendors, and for other information exchanges.

رادج ةرادا زكرم > لماكتلا تايملع > ئرالا قوف رقنا ، نامألا ئباجس يف مكحتلا ئمئاق نم 2. نيوكت > ماظن ددح ، نميألا عزجل اتاري خىل عو ددحو ئامحل ا.

The screenshot shows the Cisco Multicloud Defense Controller interface. On the left sidebar, under the 'Administration' section, the 'Firewall Management Center' and 'Administration' buttons are highlighted with red boxes. The main dashboard displays various metrics and sections such as 'Overall Inventory', 'Accounts and Assets', 'Configuration States', and 'Change Log Management'. The 'Overall Inventory' section shows 4 Total Devices with 2 Issues, 2 Pending Action, 0 Other, and 0 Online. The 'Accounts and Assets' section shows 0 Service VPC/VNets without gateways, 0 Apps not protected, and 0 VPCs/VNets not protected. The 'Configuration States' section shows 2 Not Synced, 0 Conflict Detected, and 0 Synced. The 'Change Log Management' section shows changes by all users and my changes, with a completed dropdown set to 'Completed'.

عون رتخد > ئي وهلا رداضم > ئرالا لماكتلا تايملع > لماكتلا ددح ، نيوكتلار ئحفص يف 3. قي بطبت لي ثم عاشنا قوف رقنا Identity Services Engine (PxGrid Cloud). Cisco ISE نم خسن مت يذلا OTP دادرتس او لي ثم ئفاضا ا.

The screenshot shows the Cloud-delivered Firewall Management Center interface. On the left sidebar, the 'Integration' button is highlighted with a red box. The main page shows the 'Configure Identity Sources' section, which allows selecting a service type (None, Identity Services Engine, Identity Services Engine (pxGrid Cloud), or Passive Identity Agent). The 'Identity Services Engine (pxGrid Cloud)' option is selected. A modal window titled 'Create pxGrid Application Instance' is open, prompting for a 'Name' (SaaS instance-cdFMC), 'Description' (cdFMC), and 'OTP (One-Time Password)'. The 'OTP' field is highlighted with a red box, and a note below it says 'The OTP enables you to set up your pxGrid Cloud application instance'. There are 'Cancel' and 'Create' buttons at the bottom right of the modal.
