

MANY THREATS. ONE DEFENSE

THE POWER OF SUPERIOR THREAT DEFENSE IN ONE SINGLE DEVICE.

Every Organization of Every Size Requires Advanced Threat Defense

Threats never stop. More than 60% of data is stolen in hours and 54% of breaches remain undiscovered for months*.

Security adversaries are more capable, funded, and motivated than ever before. **Is your organization safe from threats?**

DETECT AND DEFEND FROM ALL DIRECTIONS

CISCO® ASA WITH FIREPOWER™ SERVICES

Tailor-made for organizations of all sizes, they offer industry-leading, threat-centric capabilities at entry-level prices. These new solutions include:

- Advanced next-generation firewall (NGFW) threat defense - application control, URL filtering, AMP, and NGIPS
- A small desktop or rackmount form factor
- On-box or centralized management
- Low total cost of ownership

CISCO® AMP FOR ENDPOINTS

Continuously monitors, analyzes, and records all file and executable activity, regardless of disposition, even after initial inspection. Deployed through lightweight endpoint connector, with no performance impact on users - analysis is done in the cloud, not on the endpoint.
