Cisco Headsets
Extending the secure and reliable collaboration experience.
Our work styles are evolving. We work in open environments that allow us to interact freely, but we rely heavily on computers and smartphones. People work on the go, from an office, or at home and the devices we utilize are the critical component in staying seamlessly connected.

Whether we’re working at our desks, roaming around, or interacting with a team, each of us must remain intently focused on work. Accomplishing that can be a challenge with the noise of open workspaces and the variety of devices and applications used to collaborate.

That’s where Cisco® Headsets come into play with a range of professional wired and wireless headsets that seamlessly extend the collaboration platform and fit any workstyle. They’re optimized for use with Cisco devices, IP phones, and soft clients. Plus, they make management and service easier than ever.

Elevate your listening and communicating to a new level

With the 500 of 700 Series headsets, you’ll enjoy premium audio quality, powerful noise isolation, intuitive controls, exceptional comfort, and easy maintenance to keep you connected and immersed in a truly satisfying listening experience.

Cisco Headsets: Any environment. Any workstyle.

- A complete portfolio of wired and wireless headsets that extend the collaboration experience to keep you connected.
- Reliable audio performance allows you to hear and be heard, no matter how, when, or where you need to talk.
- Deep integrations between Cisco hardware and software enables simple and intuitive user experiences.
- A single platform for all your Cisco endpoints apps, and headsets for intelligent management.
Presenting the headsets that make your job feel less like work.

So, what can you expect when use a Cisco Headset? The short answer is superior audio, easy operation, and lasting comfort. Let’s take a closer look at the many features and benefits you’ll enjoy.

**Pick the perfect model**

The Cisco Headset portfolio includes a range of single-ear and dual-ear models, wired and wireless options, plus a variety of connection options so you can experience great sound no matter what your job requires.

**Enjoy lasting comfort**

The lightweight and ergonomic design of Cisco Headsets put comfort front and center. They reduce head fatigue, so you can wear them all day long. You may even forget you’re wearing them. The headsets are built with quality materials including soft, multiaxial ear cups.

**Hear crisp, clean audio**

Our advanced ear cup design produces a full, rich sound that enhances your experience. The clear audio makes collaboration easier and music more enjoyable.

**Experience a new level of voice quality**

The microphones on Cisco Headsets deliver a premium audio experience. The 500 Series have a unique, unidirectional microphone design that captures wide bandwidth audio—with little signal noise and even less distortion—so it zeros-in on your voice and reduces background noise. The 700 Series feature clear voice technology which is a voice honing, boom less microphone design coupled with adaptive noise cancellation, background noise suppression, and side tone enabling crystal clear audio. You can count on reliable audio with Cisco Headsets.

**Fine tune your microphone**

The 500 Series features a microphone test that removes the guesswork associated with tuning gain levels. You simply record yourself speaking in your current work environment and then play the recording back to make sure your settings are optimal*. The 700 Series microphone automatically adjusts based on user’s environment for optimal performance.

**Shape your sound**

Cisco Headsets allow you to modify your audio to ensure an optimum listening experience rather you are on a call, listening to music, or watching a video*.
Enterprise grade security
The 700 Series have industry first enterprise-grade security through hardware and software providing unparalleled Bluetooth (5.0) security to help communications stay secure.

Eliminate the hassle
Manage and troubleshoot all Cisco headsets from within your existing Cisco infrastructure. Headset management tools provide comprehensive inventory management, remote configuration and policy management, along with proactive diagnostics and quick troubleshooting.

*500 Series feature requires a USB interface for headsets and a supported Cisco IP phone.

Cisco Headsets: Any environment. Any workstyle
When it comes to office headsets, Cisco is a smart choice. We’ve long been a leader in office communications, and we continue to create the most intelligent and intuitive collaboration experiences possible. Besides, there’s so much to love about the Cisco Headsets. Crisp, clear audio is only the beginning. With our range of models, you’ll find a headset that’s perfect for your situation. You’ll stay comfortable all day long and remain productive in any environment. You can work wherever you want, in one spot or on the move. You’ll benefit from the peace of mind that comes with using reliable Cisco products. The best part, though, is that all adds up to a listening and conversing experience that makes your work far more enjoyable.

So get all the details, then hear our headsets for yourself.
