

Cisco Spark Board

Cisco Spark Board 55

Cisco Spark Board 70

The Cisco Spark Board: An all-in-one team collaboration device for meeting rooms

The Cisco Spark™ Board, like no other, is a new team collaboration device that combines wireless presentation, digital white boarding, and video conferencing. It is a cloud- and touch-based system that securely connects teams and their content in physical rooms with virtual teams and meeting spaces. The Cisco Spark Board resides in physical meeting rooms but is connected to the Cisco Spark service to facilitate continuous workflow before and during the meeting, and even after everyone has left the physical room. Through the Cisco Spark app, team members both in the physical conference room and attending remotely can meet, message, call, and white board from anywhere through their Cisco Spark app-enabled device of choice.

Cisco Spark Board Benefits

- **All-in-one solution:** Available in 55- and 70-inch versions, Cisco Spark Board is the only tool you need to collaborate in physical meeting rooms
- **Simplicity:** A fully touch-based system that is intelligent, intuitive, and effortless to use
- **Continuous teamwork:** The cloud-based platform lets your work continue before, during, and after the meeting is over on any Cisco Spark app-enabled device
- **Cost-effective, scalable and secure:** Cloud registration makes it affordable and easy to deploy in all of your conference rooms, with end-to-end encryption

Bring your teams and work with you wherever you are

The Cisco Spark Board, together with the Cisco Spark service and app, offers an integrated and comprehensive life-cycle approach to teamwork that is as yet unimagined, and thus unmatched, by any other solution on the market. The Cisco Spark Board itself performs the key activities that teams need to work together in a physical meeting room. The Cisco Spark service connects the board to a virtual space so work can continue even after the meeting has ended.

Key capabilities of the Cisco Spark solution include:

- **Wireless presentation:** Share your presentation, locally in the room or remotely, without any need for wires, dongles, adapters, or typing in PIN codes
- **Digital whiteboard:** Easily white board with the Cisco Spark Pen or your finger and automatically save content to a Cisco Spark virtual space; multiple people can white board – in the room or remotely on any Cisco Spark app-enabled device. You can even annotate on any content that you've shared to the Board
- **Audio/video conferencing system:** Make your high-definition video or high-fidelity audio calls directly on the Cisco Spark Board
- **Continuous workflow:** Connect the Cisco Spark Board to a virtual Cisco Spark space and your whiteboard creations and other shared documents will live there persistently and securely, to be reviewed and edited by any member of the team from another Cisco Spark Board or any Cisco Spark app-enabled device

The Cisco Spark Board is the latest addition to the portfolio of Cisco Spark video and audio conferencing devices that register to the Cisco Collaboration Cloud, including the Cisco TelePresence [MX](#) and [SX](#) Series, the Cisco DX Series, the Cisco IP Phone [7800](#) and [8800](#) Series, and the Cisco Spark [Room](#) Series.
