A DAY IN THE LIFE

See how Webex creates an integrated workplace experience through the eyes of an innovative technology company

Webex Desk Pro
Jess starts the day by prioritizing her work and conducting a stand-up meeting with her team

Webex Assistant:
Reminds her of the meeting and asks if she'd like to start the call.

Quality video and premium sound:
Makes it easy to hear and interact with her team. She doesn't miss a beat.

Noise detection and suppression:
Ensures that distracting background noises aren't picked up.

Digital whiteboarding:
Allows her to collect real-time feedback on progress from the team.

Webex Room Kit Mini
After receiving a Microsoft Teams meeting invite, the design team heads to a huddle space in preparation for the client briefing

Software agnostic:
The team uses the Cisco Touch 10 to join the clients’ Microsoft Teams meeting while leveraging the powerful camera, speakers, and audio of the Webex Devices.

Intelligent views:
Ensures that the speaker is always in frame no matter where they are in the room.

Webex Room 70 Dual
The team of local and remote colleagues come together to discuss why one deliverable is falling behind

Proximity pairing:
Recognizes team members when they walk into the room and pairs with their device.

Facial recognition:
Links the team easily into the meeting with their video feed on the same screen.

Content sharing:
Allows the team to wirelessly share the tracking spreadsheet.

Meeting transcription:
Provides her with a recording and transcript of the meeting so she can review action items.

Webex Board
The UX team meets to brainstorm how they can improve the application design on a Webex Board

Powerful integrations:
Provides access to the Google Drive app so the team can bring up the design files for the next release.

Cocreation:
Lets them annotate on the design file and create mockups for future enhancements.

Access from anywhere:
Everything is stored in the cloud, so they can pick up where they left off at their next meeting.

Webex Room Panorama
Jess and her team meet with the senior VP to provide an update on the next software release

Immersion experience:
Provides the highest quality experience to the team if they are streaming and viewing the same screen.

Directional sound:
Facilitates a more personal experience.

Dedicated content screen:
Allows her to share the release plan while still maintaining the immersion experience.

The entire Webex Rooms portfolio works seamlessly with Webex Meetings, Webex Teams, Webex Calling, Cisco headsets, and the productivity tools you use every day

And for a broader view of all your Cisco Webex services, including Rooms devices in the office and at home, Webex Control Hub provides rich insight into your workspaces, ensuring the best collaboration.
