

Webex delivers seamless collaboration in every space

Creating experiences where ideas grow, expand, multiply, and thrive.

Simple, secure, and intelligent collaboration in any space, from the desktop to the boardroom

- The desk
- The huddle space
- The hot desk
- The ideation room
- The boardroom

A day in the life

See how Webex creates an intelligent, integrated workplace experience through the eyes of one innovative technology company

9:00 AM

Jess starts the day by prioritizing her work and conducting a stand-up meeting with her team.

Webex Desk

The desk

- **Instant join:**
Informs her of upcoming meetings which she can join at the push of a button.
- **Quality video and premium sound:**
Makes it easy to hear and interact with her team. She doesn't miss a beat.
- **Noise detection and suppression:**
Ensures that distracting background noises aren't picked up.
- **Digital whiteboarding:**
Allows her to collect real-time feedback on progress from the team.

11:00 AM

After receiving a Microsoft Teams meeting invite, the design team heads to a huddle space in preparation for the client briefing.

Webex Room Bar

The huddle space

- **Third-party meetings:**
Makes it simple for the team to join the client's third-party meeting with a push of a button while leveraging the Room Bar's powerful camera, speakers, and microphones.
- **Intelligent views:**
Ensures that the speaker is always in frame and provides an equitable view of everyone in the room.
- **Immersive meetings:**
Creates a true-to-life experience with spatial stereo audio and full HD video—displayed on single or dual-screens.
- **Powerful presentations:**
Allows them to share crisp content, such as files, prototypes, and presentations, wirelessly using Webex, Apple AirPlay, or Miracast.

1:00 PM

Jess finds an open desk after meeting with the client to review action items.

Webex Desk Hub

The hot desk

- **Personalized space:**
Transforms any shared space into a personalized space so Jess can view her calendar and join her meetings at the push of a button just by docking her phone.
- **Desktop collaboration hub:**
Allows her to connect to the monitor and the Cisco Desk Camera in seconds.
- **Device pairing and charging:**
Provides her with phone and headset pairing and charging while she works.
- **Webex Assistant:**
Provides a zero-touch experience so she can join calls and control the entire meeting experience with just her voice.

3:00 PM

The UX team meets to share ideas on how they can improve the application design.

Webex Board Pro

The ideation room

- **Powerful integrations:**
Gives them the ability to instantly join Webex and third-party meetings, while providing effortless access to productivity tools with web apps.
- **Co-creation:**
Lets them annotate on the design file, leverage digital stickies, and create mockups for future enhancements.
- **Multi-way whiteboarding:**
Supports simultaneous collaboration in the meeting space and beyond with active pens and the ability for everyone to participate on any device.

5:00 PM

Jess and her team meet with the senior VP to provide an update on the next software release.

Webex Room Panorama

The boardroom

- **Immersive experience:**
Provides the highest-quality experience so it feels like participants are sitting in the same room.
- **Directional sound:**
Emulates the in-person experience.
- **Dedicated content screen:**
Allows her to share the release plan while still displaying multiple remote colleagues or a panoramic view of a remote executive meeting room.

The entire Webex devices portfolio works seamlessly with the Webex App, Webex Calling, and the productivity tools you use every day

And for a holistic view of all your Webex services, including devices in the office and at home, Webex Control Hub provides rich insight into your workspaces, ensuring the best collaboration.

Based on RoomOS, the cloud-connected operating system, Webex devices deliver the same seamless experience in every space and on every device. It's team collaboration without interruption, just inspiration.
