

Cisco Tetration Enabling Huntington National Bank to Execute Major IT Initiative Faster and More Efficiently

80-90% LESS

staff time to carry out application mapping

"We needed up to a month to map a complex application, and Cisco Tetration allows us to do this in days or less. This will help us complete a significant IT initiative with major cost implications in far less time."

—Patrick Drew, Assistant Vice President, Network Infrastructure Manager,
The Huntington National Bank

60-65% FASTER

expected execution of significant IT initiative

"The big ROI for us of using Cisco Tetration is not having to do application mapping again; the dynamic mapping means that we don't have to go through the exercise again for future initiatives."

—Patrick Drew, Assistant Vice President, Network Infrastructure Manager,
The Huntington National Bank

98% LESS

time spent by application owners for application mapping
