CONTENTS

OVERVIEW

Cisco UCS X9508 Chassis

The Cisco Compute X-Series Modular System begins with the Cisco UCS X9508 chassis, engineered to be adaptable and future ready. It is a standard, open system designed to deploy and automate faster in concert with your hybrid cloud environment.

With a midplane-free design, I/O connectivity for the Cisco UCS X9508 chassis is accomplished with front-loading, vertically oriented Compute-Only (CO) Nodes intersecting with horizontally oriented I/O connectivity modules in the rear of the chassis. A Unified Ethernet fabric is supplied with the Cisco 9108 Intelligent Fabric Modules. Cisco X-Fabric Technology interconnects enable connectivity between the compute and resource nodes using PCIe Gen4 and will supply other industry-standard protocols as standards emerge. Interconnections can be easily updated with new modules.

The 7 rack-unit (7RU) Cisco UCS X9508 chassis has 8 flexible slots that can house a combination of Cisco Compute-Only (CO) and a pool of current and future I/O resources that may include GPU accelerators, disk storage, and nonvolatile memory.

At the top rear of the chassis are two intelligent fabric modules that connect the chassis to upstream Cisco 6400, 6500 and 6600 series Fabric Interconnects. At the bottom are slots housing XFM modules that can flexibly connect the compute modules with I/O devices and ready for future modules. This Cisco X-Fabric technology uses 'X' to denote a variable that can evolve with new technology developments.

Six 2800 W power supply units (PSUs) provide 54 VDC power to the chassis with N, N+1, N+2, and N+N redundancy. The higher voltage allows efficient power delivery with less copper and reduced power loss. Efficient, 100 mm, dual counter-rotating fans deliver industry-leading airflow and power efficiency.

Optimized thermal algorithms enable different cooling modes to best support your environment. Cooling is modular so that future enhancements can potentially handle open- or closed-loop liquid cooling to support even higher-power processors.

Cisco X210c M6 Compute-Only (CO) Node

Traditional hyperconverged solutions requires scaling compute and storage together. Modern workloads require modern flexibility. When you need to scale compute capacity without adding storage, Cisco Compute-Only (CO) nodes provide that critical capability-empowering you to design clusters that match your exact requirements

Cisco Compute-Only (CO) nodes serve two purposes: expanding hyperconverged node or connecting to external storage like Pure Storage Flash Array

A) Expanding Cisco Compute Hyperconverged node cluster with Compute-Only (CO) node:

Cisco's Compute-Only (CO) node solution enables you to expand the compute resources of Cisco Hyperconverged cluster running Nutanix by adding UCS certified servers without additional storage. These storage-less, Cisco certified Compute-Only (CO) servers integrate seamlessly into your existing or new hyperconverged Nutanix cluster, allowing organizations to efficiently support CPU-intensive applications by scaling processing resources independently of storage infrastructure.

Key benefits:

■ Cost-effective scaling for compute-heavy workloads

■ Flexibility in cluster design

Delivering performance, versatility and density without compromise, the Cisco UCS X210c M6 Compute-Only (CO) Node addresses the broadest set of workloads.

B) Cisco Compute-Only (CO) node connected to Pure Storage Flash Array (Flashstack with Nutanix)

Pure Storage® FlashArray//X™ and FlashArray//XL™ delivers mission-critical performance with the efficiency and resiliency that's missing from legacy arrays. FlashArray //X and FlashArray//XL™ packs more IOPS, ultra consistent latency, and greater scale into a smaller footprint. Non-disruptive upgrades, always-on availability, and built-in data protection ensure workloads are always running while cutting risk. FlashArray//XL is designed to provide the highest performance density with a level of operational and management simplicity.

Nutanix Cloud Platform (NCP) consolidates computing, storage, and networking into a unified pool. It uses AOS for storage, AHV for virtualization, and Prism Central for centralized management across environments.

The Cisco Compute-Only (CO) node with Nutanix Cloud Platform (NCP) and Pure Storage FlashArray solution delivers a disaggregated infrastructure architecture that enables independent scaling of compute and storage resources. This solution combines industry-standard Cisco Compute-Only (CO) node servers running Nutanix AHV and AOS connected to external Pure Storage FlashArray. The FlashStack solution with Nutanix integration provides organizations with the agility to adapt infrastructure resources dynamically while maintaining enterprise-level reliability and performance

Key Benefits:

■ Independent Scalability: Scale compute and storage resources separately based on workload demands

■ Enterprise-Grade Protection: Built-in data protection and disaster recovery capabilities

■ Hybrid Cloud Ready: Seamlessly extend operations across on-premises and cloud environments

■ Investment protection: Enables using Nutanix Cloud Platform with existing storage

The enterprise-class Cisco UCS X210c M6 Compute-Only (CO) Node extends the capabilities of Cisco's Unified Computing System portfolio. The Cisco UCS X210c M6 harnesses the power of the 3rd Gen Intel® Xeon® Scalable Processors.

Non-disruptive upgrades, always-on availability, and built-in data protection ensure workloads are always running while cutting risk. FlashArray//XL is designed to provide the highest performance density with a level of operational and management simplicity.

Nutanix Cloud Platform (NCP) consolidates computing, storage, and networking into a unified pool. It uses AOS for storage, AHV for virtualization, and Prism Central for centralized management across environments.

The Cisco Compute-Only (CO) node with Nutanix Cloud Platform (NCP) and Pure Storage FlashArray solution delivers a disaggregated infrastructure architecture that enables independent scaling of compute and storage resources. This solution combines industry-standard Cisco Compute-Only (CO) node servers running Nutanix AHV and AOS connected to external Pure Storage FlashArray. The FlashStack solution with Nutanix integration provides organizations with the agility to adapt infrastructure resources dynamically while maintaining enterprise-level reliability and performance

Key Benefits:

■ Independent Scalability: Scale compute and storage resources separately based on workload demands

■ Enterprise-Grade Protection: Built-in data protection and disaster recovery capabilities

■ Hybrid Cloud Ready: Seamlessly extend operations across on-premises and cloud environments

■ Investment protection – enables using Nutanix Cloud Platform with existing storage

MLOM REAR MEZZANINE ADAPTER

The Cisco UCS X210c M6 Compute-Only (CO) Node must be ordered with a Cisco VIC mLOM Adapter. The adapter is located at the back and can operate in a single-CPU or dual-CPU configuration. *Table 21* shows the mLOM adapter choices.

Table 21   mLOM Adapters

Product ID (PID)	Description	Connection type
UCSX-V4-Q25GML	UCS VIC 14425 4x25G mLOM for X Compute Node	mLOM
UCSX-ML-V5D200GV2	Cisco UCS VIC 15230 modular LOM w/Secure Boot X Compute Node	mLOM
UCSX-ML-V5Q50G	UCS VIC 15420 4x25G secure boot mLOM for X Compute Node	mLOM

NOTE:

- VIC 14425, 15420, or 15230 are supported with both X9108-IFM-25G and X9108-IFM-100G. VIC 14425 and VIC 15420 will operate at 4x 25G with both X9108-IFM-25G and X9108-IFM-100G. While, VIC 15231 will operate at 4x 25G with X9108-IFM-25G and at 2x 100G with X9108-IFM-100G.

- The mLOM adapter is mandatory for the Ethernet connectivity to the network by means of the IFMs and has x16 PCIe Gen3 connectivity with Cisco UCS VIC 14425, x16 Gen4 connectivity with Cisco UCS VIC 15230, and x16 Gen4 connectivity with Cisco UCS VIC 15420 towards the CPU1.

- There is no backplane in the Cisco UCS X9508 chassis; thus the Compute-Only (CO) Nodes directly connect to the IFMs using Orthogonal Direct connectors.

REAR MEZZANINE ADAPTERS (VIC)

The Cisco UCS X210c M6 Compute-Only (CO) Node has one rear mezzanine adapter connector which can have a UCS VIC 14825/15422 Mezz card that can be used as a second VIC card on the Compute-Only (CO) Node for network connectivity or as a connector to the X440p PCIe node via X-Fabric modules. The same mezzanine slot on the Compute-Only (CO) Node can also accommodate a pass-through mezzanine adapter for X-Fabric which enables Compute-Only (CO) Node connectivity to the X440p PCIE node. TRUSTED PLATFORM MODULE

Trusted Platform Module (TPM) is a computer chip or microcontroller that can securely store artifacts used to authenticate the platform or server. These artifacts can include passwords, certificates, or encryption keys. A TPM can also be used to store platform measurements that help ensure that the platform remains trustworthy. Authentication (ensuring that the platform can prove that it is what it claims to be) and attestation (a process helping to prove that a platform is trustworthy and has not been breached) are necessary steps to ensure safer computing in all environments.

Table 26   TPM Option

Product ID (PID)	Description
UCSX-TPM-002C	TPM 2.0, TCG, FIPS140-2, CC EAL4+ Certified, for M6 servers
UCSX-TPM-OPT-OUT	OPT OUT, TPM 2.0, TCG, FIPS140-2, CC EAL4+ Certified[1]

Notes . . .

1. Please note that Microsoft certification requires a TPM 2.0 for bare-metal or guest VM deployments. Opt-out of the TPM 2.0 voids the Microsoft certification

NOTE:

■ The TPM module used in this system conforms to TPM v2.0 as defined by the Trusted Computing Group (TCG).

■ TPM installation is supported after-factory. However, a TPM installs with a one-way screw and cannot be replaced, upgraded, or moved to another server. If a server with a TPM is returned, the replacement server must be ordered with a new TPM. If there is no existing TPM in the server, you can install TPM 2.0. Refer to the following document for Installation location and instructions:

(4) Any future expansion opportunity does not require mandatory Nutanix Professional Services attach.

(5) Cisco and Nutanix products are each subject to their own terms and conditions, including support timelines and milestones. This includes the Nutanix Cloud Platform software and qualified Cisco UCS hardware platforms sold together as part of the Cisco Compute Hyperconverged with Nutanix solution. Carefully review Nutanix's EoL portal for support timelines by hardware platform. Cisco's UCS hardware support milestones may not align with Nutanix's support milestones. Therefore, it is important to plan your hardware and software refresh cycles based on the earlier of the two dates (hardware support from Cisco and software support from Nutanix). It is your responsibility to check the Nutanix software term length desired against the support time frames for the quoted UCS hardware platform.

Nutanix licenses are transferable to newer generation Cisco UCS platforms subject to Nutanix's end user license agreement. Refer to Nutanix's Support FAQs for details and definitions of Nutanix's End of Life and End of Support Life milestones. Refer to Cisco's EoL policy for details and definitions of Cisco's End of Life and Last Date of Support milestones.

(1) Nutanix Cloud Infrastructure (NCI):

Nutanix Cloud Infrastructure (NCI) converges the entire datacenter stack, including compute, storage, storage networking, and virtualization and is at the core of creating a hyperconverged infrastructure environment. Complex and expensive legacy infrastructure is replaced by NCI, running on industry-standard servers loaded with the latest hardware technologies. This allows enterprises to deploy what you need for the short term, and scale on-demand as infrastructure needs increase over time. Each server, often referred to as a node in the context of HCI, is an x86 platform with direct-attached storage drives. NCI software runs on each node, distributing all operating functions across the cluster for superior performance and resilience, and enabling seamless scalability.

- For more information about Nutanix Cloud Platform software options, please visit https://www.nutanix.com/products/cloud-platform/software-options
- Please note that the Federal Support program is reserved for US Federal accounts. US Federal accounts must select Federal Support Tier for the order to be fulfilled. If a non-Federal account selects a Federal Support program, Nutanix may not fulfill the order. Additionally, Nutanix's Mixed Support Level Guidelines (https://www.nutanix.com/support-services/product-support/support-policies-and-faqs?show=accordion-4) requires all software assets within a cluster to have the same support level, else software support will default to the lower option.
- Sellers in the Federal space need to ensure they have the Federal Support SKU's on the quote and order. All orders without the Federal Support SKU's will be rejected by Nutanix.Refer this Knowledge base article for more info: https://computekb.cisco.com/article/nutanix-support-for-federal-customers.html

(4) Nutanix Cloud Infrastructure Edge (NCI-E):

Nutanix Cloud Infrastructure – Edge (NCI-E) provides a distributed infrastructure platform for small edge deployments. NCI-Edge provides the same capabilities as NCI, combining compute, storage, and networking resources from a cluster of servers into a single logical pool with integrated resiliency, security, performance, and simplified administration. With NCI-Edge, organizations can efficiently extend the Nutanix platform to remote office/branch office (ROBO) and other edge use cases.

- 1 TiB of NUS Pro per NCI-Edge cluster is included at no cost with NCI-Edge.

- NCI-Edge licenses must run on a dedicated licensed cluster with no core-based licensing. Mixing of NCI-Edge licenses with other types of NCI licensing within a cluster is not supported.

- NCI-Edge can be used with any cluster deployment type as long as the conditions mentioned are followed.

- Maximum nodes for the Edge cluster is 5.

(5) End User Computing (EUC):

Per user model offers hybrid cloud infrastructure capabilities appropriate for on-prem virtual desktop infrastructure (VDI) and Desktop as a Service (DaaS) use cases with pricing based on a Maximum Concurrent User basis (maximum number of provisioned end-user VMs). EUC per user is an alternative to the core-based NCI licensing option and is designed to provide simple, transparent licensing for all VDI users, regardless of the underlying hardware, hypervisor, or cloud.

- **Agnostic**: Works with any EUC management platform including Citrix Virtual Apps & Desktops and VMware Horizon
- **Term license**: Term license must run on a dedicated software licensed VDI cluster with no core-based licensing. Mixing of non-VDI workloads is not supported
- **Unified Storage**: Built-in and also available as a per TiB base add-on
- No additional license cost for DR site
- Portable across on-premises and public cloud, public cloud use requires Ultimate edition
- Available in Starter, Pro, and Ultimate editions
- Cloud Native and Database Service Add-ons not available with NCI EUC. Advanced Replication and Security Add-on features require NCI Ultimate edition

- Please note that the Federal Support program is reserved for US Federal accounts. US Federal accounts must select Federal Support Tier for the order to be fulfilled. If a non-Federal account selects a Federal Support program, Nutanix may not fulfill the order. Additionally, Nutanix's Mixed Support Level Guidelines (https://www.nutanix.com/support-services/product-support/support-policies-and-faqs?show=accordion-4) requires all software assets within a cluster to have the same support level, else software support will default to the lower option.

- Sellers in the Federal space need to ensure they have the Federal Support SKU's on the quote and order. All orders without the Federal Support SKU's will be rejected by Nutanix. Refer this Knowledge base article for more info: https://computekb.cisco.com/article/nutanix-support-for-federal-customers.html

- The total number of cores for NCI-C and NCM should be same as NCP-C

- The support tiers for NCI-C and NCM should be same as NCP-C

WARNING:

- The NCP-C, NCI-C, and NCM license requires a minimum initial purchase of 2,000 cores.

- After this threshold is met, the customer is no longer subject to a minimum core requirement for subsequent orders, but quantity of NCP-C, NCI-C, and NCM license must match with total number for processor cores in hardware platforms.

(10) Nutanix Unified Storage™ (NUS):

Nutanix Unified Storage™ (NUS) is a software-defined data services platform that consolidates the management and protection of siloed block, file, and object storage into a single, unified platform. NUS harnesses the power of rich data services such as analytics, ransomware protection, lifecycle management, and data protection. These features enable organizations to seamlessly adapt to the ever-changing requirements of modern applications, allowing them to shift their management focus from data storage to data management. Leveraging the Nutanix Cloud Platform™ (NCP) software, NUS is specifically built to meet the needs of modern applications deployed across core, cloud, and edge infrastructure. With its capacity for seamless scaling, high performance, and integrated data security, NUS provides a comprehensive solution for organizations.

Includes:

- **Nutanix Files Storage**: simple and secure software-defined scale-out file storage solution to store, manage, and scale files data (NFS and SMB)
- **Nutanix Objects Storage**: distributed scale-out S3-compatible object storage for both archive and high-performance analytics
- **Nutanix Volumes Storage**: high-performance low-latency block storage
- **Nutanix Data Lens**: available as an add-on for data analytics, anomaly behavior detection and ransomware protection

(12) Nutanix Kubernetes Platform (NKP):

Nutanix Kubernetes Platform (NKP) combines the Nutanix Kubernetes Engine (NKE) features with their acquisition of the D2iQ product family to bring a consolidated runtime, orchestration, and management environment to our cloud native customers. The SKUs have two ordering options:

1. NKP Full Stack (Starter, Pro & Ultimate) - This includes the Complete Nutanix stack, bundling NCI, NDK and NKP. This is core based licensing (for all cores in cluster) and feature/capability inclusions depend on the whether it's starter, Pro or Ultimate. This is suitable for customers who will have Nutanix clusters exclusively for container workloads.

2. NKP (Pro & Ultimate) - NKP Starter is Bundled with NCI Pro and Ultimate . This adds NKP to existing NCI deployments (for AHV, ESXi, AWS EC2 & Azure). The Kubernetes and associated NKP functionality is provided by running master and worker node VMs on NCI. This is licensed on vCPU for the workload VMs that will be deployed. This is suitable for customers who already have Nutanix NCI clusters.

(13) Nutanix Enterprise AI (NAI):

The Nutanix Enterprise AI (NAI) solution offers endpoint APIs for the leading LLM providers, including NVIDIA NIM and Hugging Face, making it easy for organizations to deploy a wide range of GenAI models securely, on-premises or in the public cloud. NAI includes a simple UI, role-based access controls (RBAC), and the capability for untethered operations (dark site or air-gapped deployments) to simplify the operation, monitoring, and adaptation of AI models (LLMs) with enterprise resiliency, Day 2 operations, and compliance.

Nutanix AI Platform has 2 ordering requirements & both need to be ordered:

- CPU (measured in vCPU/Core): This quantity should correspond to the number of physical cores for bare-metal deployments or the vCPUs for virtual deployments.

- GB (memory on GPU): Note that this refers to the total GPU memory, not the physical memory of the nodes in the cluster, and it depends on the GPU selected.

NOTE:

- For more information about Nutanix Enterprise AI (NAI), please visit https://www.nutanix.com/library/datasheets/nutanix-enterprise-ai

- For more information about Nutanix Cloud Platform software options, please visit https://www.nutanix.com/products/cloud-platform/software-options

- Please note that the Federal Support program is reserved for US Federal accounts. US Federal accounts must select Federal Support Tier for the order to be fulfilled. If a non-Federal account selects a Federal Support program, Nutanix may not fulfill the order. Additionally, Nutanix's Mixed Support Level Guidelines(https://www.nutanix.com/support-services/product-support/support-policies-and-faqs?show=accordion-4) requires all software assets within a cluster to have the same support level, else software support will default to the lower option.

- Sellers in the Federal space need to ensure they have the Federal Support SKU's on the quote and order. All orders without the Federal Support SKU's will be rejected by Nutanix.Refer this Knowledge base article for more info: https://computekb.cisco.com/article/nutanix-support-for-federal-customers.html

- Authorized Partners of Nutanix can offer Level 1 & Level 2 support for Nutanix Software. For the complete list visit https://computekb.cisco.com/article/rules-for-ordering-nutanix-partner-support-skus.html
