

NUTANIX

# Nutanix Software, Simplified Through Cisco EA

One agreement.  
Predictable pricing.  
Flexible growth.

## Now it's easier than ever to modernize with Nutanix on Cisco infrastructure

Cisco EA now includes Nutanix software—enabling you to procure, deploy, and scale under one agreement.

### Experience the Cisco EA advantage

#### Unique in the market

Only available through Cisco, offering Nutanix software within an enterprise-grade agreement like Cisco EA

#### Superior to custom agreements

More predictable, scalable, and customer-friendly than customized manual contracts

#### Stronger together

Combines Cisco EA maturity with Nutanix software innovation and joint support

## Unlock simplicity, pricing predictability, and long-term flexibility with Cisco

Cisco EA is the smart, proven way to purchase and grow Nutanix. It delivers:

### Operational Simplicity

Enjoy predictable, streamlined purchasing. Cisco EA delivers consistent:

- Terms
- Pricing structure
- Benefits

No more repeated negotiations or custom agreements.

Clear, documented EA rules, predictable Nutanix consumption, faster business outcomes.

### Financial Predictability

Get built-in price protection. Cisco EA locks in:

- Pricing
- Discounts
- Commercial terms

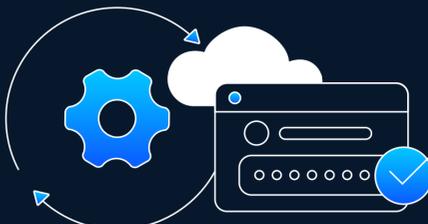

Bring predictability to license overconsumption with True Forward—no retroactive billing.

Plan with confidence, gain budget certainty, and avoid unexpected cost increases.

### Growth Flexibility and Easy Expansion

Start at the right size, and expand as needed, over time. Through it all, Cisco remains your trusted partner for:

- Procurement
- Support
- Lifecycle management

Reallocate license value across your Nutanix suite

Grow your Nutanix environment predictably, scaling with real demand, without commercial friction.

## Ideal for today's advanced use cases

Cisco's hyperconverged infrastructure solutions with Nutanix, including the recently released converged infrastructure architecture for FlashStack with Nutanix, deliver simplicity, performance, and resilience.

Modernize your infrastructure to support demanding use cases like:

- Virtualization and infrastructure modernization
- Hybrid operations across on-prem and public cloud
- Data center consolidation and infrastructure refresh

## Move forward on your infrastructure modernization journey
