

Trade up to 802.11n Performance

Technology Migration Program for Wireless Controllers

Earn up to 25% credit with the Cisco® Technology Migration Program (TMP) when you trade in your old controller for the new Cisco 5500 Series Wireless Controller.

The Cisco TMP allows you to address your current wireless LAN (WLAN) needs with the assurance that you can take full advantage of your existing investments by using them toward future Cisco purchases.

Purposely designed for 802.11n performance and enhanced scalability, the 5500 Series provides a flexible platform for business-critical wireless services for medium-sized to large enterprises and campus environments. The 5500 Series manages all of the Cisco access points within campus environments and branch locations, eliminating complexity and providing enhanced visibility and control into your wireless LAN. It simplifies deployment and operation of wireless networks, helping to ensure smooth performance, enhance security, and maximize network availability.

If you own the following Cisco products you can upgrade to the next generation of wireless controllers with up to a 25% discount incentive:

- Cisco 4400 Series Wireless LAN Controller
- Cisco Wireless Services Module (WiSM)
- Cisco Catalyst 3750G Integrated Wireless LAN Controller

In order to take advantage of the Technical Migration Program, please contact your local Cisco reseller or distributor.

For more details about these products, please visit <http://www.cisco.com/go/wireless>

Effective Dates: October 4, 2010, through December 31, 2011.

Trade Up to Cisco CleanAir Promotion

Earn credit with the Cisco® Technology Migration Program (TMP) when you trade in your old access points for the new Cisco Aironet® 3500 Series with CleanAir technology, winner of Best of Interop 2010 for Wireless and Mobility.

When purchasing the new Cisco Aironet 3500 Series Access Points with TMP, you can:

- Receive up to a \$90 TMP credit on older Cisco access points
- Receive up to a \$224 TMP credit on end-of-sale Cisco access points
- Receive up to a \$100 TMP credit for competitive access points
- Receive up to a \$130 TMP credit for Cisco 802.11n access points

The Cisco TMP allows you to address your current wireless LAN (WLAN) needs with the assurance that you can take full advantage of your existing investments by using them toward future Cisco purchases. The new Cisco Aironet 3500 Series Access Points with CleanAir technology represent an industry first: Cisco CleanAir can innovatively detect radio interference that other systems cannot detect, identify the source, locate it on a map, and then take remedial action. Building on the 802.11n standard, Cisco CleanAir technology delivers the reliability required for wireless networks to support mission-critical applications by automatically mitigating the performance effect caused by radio frequency interference. For more details about this exciting new technology, please visit <http://www.cisco.com/go/cleanair>.

In order to take advantage of the Technical Migration Program, please contact your local Cisco reseller or distributor.

Effective Dates: April 27, 2010, through April 27, 2011.
