

Cisco 1000 Series Integrated Services Routers

Digital ready, branch routers with advanced capabilities

The Cisco 1000 Series ISR platform with a small form factor is best suited for small and midsize businesses, enterprise branches, and as customer premises equipment in managed services environments. The routers come with 8 or 4 LAN ports in various model options. They have high performance with Gigabit Ethernet packet forwarding capabilities. The multicore architecture has separate cores for data plane and control plane. The 1000 Series ISRs support Power over Ethernet (PoE) and PoE+ to power branch devices such as IP phones and cameras. They are easy to deploy with zero-touch provisioning using Plug-and-Play capability. There are multiple combinations to choose from, including LAN, WLAN, WAN, DSL, LTE, and pluggable, depending on your branch needs. The 1000 Series can be used in ATMs, retail stores, and kiosks, as well as for various other purposes.

Benefits

- **Increase manageability** with the first fanless, small form-factor router to include Cisco IOS® XE, and use one operating system across all routing platforms
- **Deliver high performance** with multiple services using multicore architecture
- **Save on operational costs** with Cisco SD-WAN and pay-as-you-grow licensing
- **Deliver the latest wireless technologies** such as LTE Advanced for wireless WAN connectivity and 802.11ac Wave 2 for wireless LAN with full Mobility Express functionality
- **Increase security** with Trustworthy Systems, secure boot, hardware anchoring, Secure Unique Device Identifier (SUDI), run-time defenses, integrity verification and Encrypted Traffic Analytics
- **Block malicious phishing and malware attacks** at the branch with Cisco Umbrella™ security

Next steps

Offer advanced connectivity

The 1000 Series ISRs address the demands of increased mobility with LTE Advanced and 802.11ac (Wave 2) Wi-Fi. It has a comprehensive set of WAN connectivity options such as Ethernet, Fiber, LTE, and the latest DSL technologies, like G.fast.

Reduce total cost of ownership

The routers provide a great ROI, allowing you to save on operating expenses by reducing WAN link costs with Software-Defined WAN capability and transport independence using Cisco SD-WAN. You can also reduce capital expenses using pay-as-you-grow licensing for IPsec performance.

Secure the branch

The 1000 Series ISRs answer the latest security threats to networking devices with advanced features such as zone-based firewall, Trustworthy Systems, Cisco Umbrella security and Encrypted Traffic Analytics.
