Simple, Secure Connectivity for the Small Office/Home Office

Connecting your employees to each other and your business to the world is an absolute requirement in today's always-on environment. Every business, even a small business, needs at least basic business-class connectivity—a combination of performance, security, and features that helps keep employees productive and your business assets safe.

The Cisco® RV110W Wireless-N VPN Firewall combines simple, highly secure wired and wireless connectivity for small offices and remote workers with a high-speed, 802.11n wireless access point, a 4-port 10/100 Mbps Fast Ethernet switch, an intuitive, browser-based device manager, and support for the Cisco FindIT Network Discovery Utility, all at a very affordable price. Its combination of business-class features, support for virtual networks to enable highly secure guest access, simple installation, and top-quality user experience takes basic connectivity for a small business with five or fewer employees to a new level.

With the Cisco RV110W Wireless-N VPN Firewall, you get:

High-speed wireless networking: The Cisco RV110W includes a built-in high-speed 802.11n wireless access point, supporting the latest Wi-Fi standards, to deliver a better experience for data, voice, and even video over your wireless network. Support for

Wi-Fi Protected Access (WPA2) helps keep your business safe from wireless attacks.

Highly secure remote access: Support for IP Security (IPsec) VPN connections enables you to securely connect up to five employees working remotely to your business network. A proven stateful packet inspection (SPI) firewall with support for access rules is a first line of defense that helps protect business assets.

Separate virtual networks: Intelligence built into the Cisco RV110W enables you to divide your wireless or wired network into four separate virtual networks to control access to sensitive information. You can also offer highly secure wireless guest access to your customers and partners and allow them to access the Internet without exposing your files.

Ease of use: A simple, intuitive, browser-based device manager makes the Cisco RV110W easy to set up and use. Support for Cisco FindIT offers even more insight into the Cisco Small Business devices in your network.
