

CISCO SECURE ENDPOINT OFFER TERMS (SECURE MSP CENTER)

MSP's use of Cisco Secure Endpoint purchased on and covered by the Cisco Cloud Services Terms of Use (Secure MSP Center) ("Cloud Terms"), which includes the use of Secure Endpoint Essentials and/or Secure Endpoint Advantage ("Secure Endpoint" or "Cloud Service"), also includes these Offer Terms. Capitalized terms used but not defined in these Offer Terms are defined in the Cloud Terms.

1. Cloud Service Description

Secure Endpoint is a cloud-based advanced malware analysis and protection solution that allows MSP and MSP End Users to detect malware and cyber threats. Cryptographic hashes of Files are collected and transmitted for File reputation analysis and a disposition is made as to whether the File is good, bad or unknown. After the File analysis is completed, Secure Endpoint will act on the disposition (e.g., by deleting the File and putting it into quarantine if it is determined to be malicious). Please consult Secure Endpoint's documentation for further information on its technical specifications, configuration requirements, features and functionalities.

2. Supplemental Terms

- 2.1. Scope of Use and Limitations. Secure Endpoint is licensed based on quantity of Endpoints and invoiced based on that same usage meter. You will promptly implement any updates, modifications or changes to the Cloud Service requested by Cisco. You will also use Secure Endpoint as a Cisco-branded Cloud Service to provide Software Services to MSP End Users and will not alter or modify the Cloud Service except at Cisco's request or with Cisco's express written authorization.
- 2.2. Cisco SecureX. Secure Endpoint includes access to Cisco SecureX. SecureX is a cloud-based aggregator of threat intelligence collected or generated by Cisco security products as well as available third-party products selected by a customer. The SecureX dashboard makes it possible to visualize key security metrics and trends using data provided by platform products in a single location.
- 2.3. Orbital. Your Secure Endpoint subscription may include access to Cisco Orbital, an advanced search capability that provides more than one hundred pre-canned and customizable queries, which allows You to quickly run complex queries on any or all Endpoints.
- 2.4. Data Protection. For information on the personal data processed by the Cloud Service, please see the Secure Endpoint and SecureX privacy data sheets on [Cisco's Security and Trust Center](#).
- 2.5. Security. When providing the Software Services to MSP End Users, MSP will implement and maintain appropriate industry standard technical and organizational measures to protect MSP End User data against accidental or unlawful use or destruction, accidental loss, alteration, and unauthorized disclosure of, or access to, any MSP End User data.
