Use Case

This PeerStory is a collection of quotes from a real user sharing their experience using Cisco Firepower NGFW Firewall on PeerSpot.

Valuable Features

The most valuable feature would be ASDM. The ability to go in, **visualize and see the world base in a clear and consistent manner** is very powerful.

Results

Cisco Firepower NGFW Firewall made our firewall response much faster when trying to respond to any services or networks that stand out.

“It makes us very responsive when any of the visualized logs are blocked in real-time.”

“We use it for our data center. We have clusters of the solution to protect the equipment in our data center. We also use it for site-to-site VPN hubs.”

ROI

We have very much seen an ROI in terms of the **saving on man time and the costs of standing up new equipment**. Compared to what we had before, Cisco Firepower NGFW Firewall is faster.
