

Synchrony Financial Bank

Introduction

This case study of Synchrony Financial Bank is based on an April 2017 survey of Cisco Identity Services Engine customers by TechValidate, a 3rd-party research service.

“Cisco ISE allows us to gain awareness of everything hitting our network. It provides access consistently and efficiently and helps us relieve the stress of complex access management.”

“Our network did not have proper network access control in the past. Users could bring any device and connect to the network. It fully ensures who owns the device and who is the user. We also are able to allow guest and employees on personal devices knowing which devices they are using.”
