CISCO SMART CAMERAS

Modernize your Physical Security Cameras with Next-Generation Cisco Smart Cameras

Quicker deployment, sharper security footage, faster edge analytics, and more video retention all powered on Meraki dashboard via Cisco Cloud Control.

What has changed?

Functionality	2nd Generation	Next-Gen Smart Cameras
Image Quality	1080p and 4.2 MP *(fisheyes)*	**4K** and 8 MP *(fisheyes)*
Edge Analytics	On-board analytics (object detection, motion search and heatmaps)	Faster onboard analytics + **AI-powered** Presence Analytics, Attribute Search, and Cross-Camera Tracking
Retention	128GB to 512GB onboard storage	256GB to **4TB** plus Smart Codec and **Smart Retention**
Device Security	Full-disk AES-256 encryption; WPA/WPA2 wireless security	Secure boot and signed firmware backed by hardware security chip; **WPA3** support
Integrated IR	IR availability and distance vary	**Integrated IR** across most models
Compliance	Wired/wireless deployment; NDAA compliant	Wired/wireless deployment; NDAA and **TAA compliant**

Is your current security footage resolution still at 1080p?

Are you constantly running out of storage on your camera?

How long does it take you to locate critical incident footage?

Next-Gen Smart Cameras Unlock....

Crisper video footage

Greater storage

Strategic incident management

Strategic Incident Management with Next-Gen Cisco Smart Cameras

Attribute Search
Filter searches by top and bottom color such as person wearing a "green top" and "blue bottoms

Cross-Camera Tracking
Locate a person of interest across a camera deployment without using facial recognition prioritizing privacy

Presence Analytics
Leverage video footage for more data-driven analytics through people counting and area occupancy

License Plate Recognition
Automatically identify, read, and catalog license plates from the video stream for smoother parking lot visibility

Optimal Scalability
Deploy multiple cameras at once with our multi-imager portfolio allowing prompt visibility into new spaces

Less Blind Spots
Capture more of the field of the view with less blind spots with multi-imager camera deployments
