Featured News

Cisco Integrated ACI with FirePOWER to Deliver Automated Real-Time Threat Protection for Data Centers

Cisco recently announced the full integration of **Application Centric Infrastructure** embedded security and the **FirePOWER next-generation intrusion prevention system** (NGIPS). Now you can get automated protection to combat emerging data center security threats.

With our industry-leading NGIPS and ACI, you can build a highly secure architecture. You get fine-grained control (including application-level security), visibility, and centralized automation. In addition, you benefit from a lower total cost of ownership, including reduced infrastructure and management costs as well as costs associated with security breaches.

The **ACI is validated by independent auditors** for deployment in PCI-compliant networks, which can help reduce the scope of a PCI audit and lower the audit costs and time.

The integrated ACI security solution will be available in June 2015.

Announcing the Cisco Web Security Reporting Application

As our first hybrid reporting solution for web security, the new Cisco Web Security Reporting Application provides unified reporting for Cisco on- and off-premises web security solutions, the Cisco Web Security Appliance and Cisco Cloud Web Security. It has also been redesigned to provide greater insight into very large volumes of data for rich analysis. This more robust version of the Advanced Reporting for WSA Application comes with revised pricing and additional support.

Cisco Security Week

Today's attacks are increasingly profit-driven, sophisticated efforts controlled by well-funded crime organizations and nation-states. Traditional defenses that rely exclusively on point-in-time technologies are no longer adequate. It's time for a threat-centric security approach that addresses the full attack continuum—before, during, and after an attack. Join us during Cisco Security Weeks and learn more.

Key Benefits

- **Discover** the latest innovations in security and gain a better understanding of today's threat landscape.
- **Understand** Cisco's "before, during, and after" security approach and how that strengthens your business outcomes.
- **Hear** directly from Cisco's Talos and Research Intelligence Group.
- **Connect** with industry visionaries, industry peers, and Cisco leadership.
- **Engage** in strategic discussions with peers and subject matter experts.

Join us at one of these locations:

- [June 3–4 in Toronto, Canada](#)
- [September 16–17 in Los Angeles, California](#)
- [September 30 and October 1 in Chicago, Illinois](#)
