Learn more about Security Resilience

Ready to learn more?
Explore how Cisco Secure can help you increase visibility, anticipate what’s next, and further hone your security resilience.

Secure connectivity that spans workspaces

Multi-dimensional environments need multi-dimensional security

When it comes to cybersecurity, uncertainty is a given

Businesses are repositioning, and the attack surface has expanded

82% of survey respondents have external hybrid-cloud

92% of the companies we interviewed reported increased visibility.

75% of our respondents said they can only see activity in their environment.

Users, applications, and networks now exist across:

More than 60% of survey respondents have adopted hybrid cloud.

100% have been subject to an increase in cyber threats.

95% of respondents expect at least one security incident in the next year.

Multi-cloud Hybrid Enterprise

It’s better together with Cisco

Seeking security resilience?
