

Cisco Enterprise Agreement Available Security Software Suites

Introduction

This overview is designed to help you understand the products in the security suites that are available under the Cisco® Enterprise Agreement.

Cisco Enterprise Agreement includes Cisco ONE Software, collaboration, and security suites. Choose one suite or any combination of suites and get a single agreement. For other suites overview documents, visit [cisco.com/go/ea](https://www.cisco.com/go/ea).

Software support

The Cisco Enterprise Agreement for security offers Software Support-Basic, Enhanced and Premium options—for all products in the catalog. Please note that support options for Cisco Umbrella and Cisco Cloudlock are limited to Enhanced and Premium. Refer to the following URL for additional details:

https://www.cisco.com/c/dam/en_us/about/doing_business/docs/cisco-software-support-service.pdf

Solution overview

The Cisco Enterprise Agreement for security enables customers to simply procure and flexibly deploy Cisco's flagship security technologies across their organization.

The solution is composed of multiple software suites:

- Email Security Suite
- Cloud and Web Security Suite
- Policy and Visibility Suite
- Security Essentials Suite

A summary of the available suites is provided in Table 1. The products in each suite are listed in Tables 2 through 5.

Table 1. Cisco Enterprise Agreement Suites for Security

Software Suites	Core components
Email Security Suite	<ul style="list-style-type: none"> ▪ Cisco Email Security Appliance (ESA) Premium Software Bundle (AS, AV, OF, DLP, ENC) License ▪ Cisco ESA Advanced Malware Protection License ▪ Cisco ESA Graymail Safe-Unsubscribe License ▪ Cisco Security Management Appliance (SMA) Centralized Email Management Reporting License ▪ Cisco Cloud Email Security (CES) Premium License ▪ Cisco Cloud Email Security AMP Add-on ▪ Cisco CES Graymail Safe-Unsubscribe License ▪ Cisco AMP Threat Grid Advanced File Analysis Appliance license ▪ Cisco AMP Threat Grid Cloud Subscription License ▪ Cisco AMP Threat Grid Advanced File Analysis License ▪ Cisco AMP Threat Grid Advanced Email Security Appliance File Analysis License ▪ Cisco AMP Threat Grid Advanced Cloud Email Security File Analysis License ▪ Cisco AMP Threat Grid Threat Feeds License ▪ Cisco AMP virtual Private Cloud Service Subscription
Cloud and Web Security Suite	<ul style="list-style-type: none"> ▪ Cisco Web Premium Software Bundle (WREP+WUC+AMAL) Licenses ▪ Cisco Web Security Appliance (WSA) Advanced Malware Protection License ▪ Cisco SMA Centralized Web Management Reporting License ▪ Cisco Web Anti-Virus McAfee License Key ▪ Cisco Web Security Advanced Reporting License ▪ Cisco Umbrella Insights with Gold Support ▪ Cisco Umbrella Platform with Gold Support ▪ Cisco Umbrella Platinum Support ▪ Cisco Cloudlock 1-7 Apps License for Commercial Customers ▪ Cisco Cloudlock 1-7 Apps License for Federal Customers ▪ Cisco Cloudlock Add-ons for Commercial Customers ▪ Cisco Cloudlock Add-ons for Federal Customers ▪ Cisco AMP Threat Grid Advanced File Analysis Appliance license

Software Suites	Core components
	<ul style="list-style-type: none">• Cisco AMP Threat Grid Cloud Subscription License• Cisco AMP Threat Grid Advanced File Analysis License• Cisco AMP Threat Grid Advanced Email Security Appliance File Analysis License• Cisco AMP Threat Grid Advanced Cloud Email Security File Analysis License• Cisco AMP Threat Grid Threat Feeds License• Cisco AMP virtual Private Cloud Service Subscription• Cisco Defense Orchestrator for Umbrella
Policy and Visibility Suite	<ul style="list-style-type: none">• Cisco Stealthwatch Flow Rate License• Cisco Stealthwatch Public Cloud Monitoring• Cisco Stealthwatch Endpoint License• Cisco Identity Services Engine Base License• Cisco Identity Services Engine Plus License• Cisco Identity Services Engine Apex License• Cisco ISE Device Administration License
Security Essentials Suite	<ul style="list-style-type: none">• Cisco NGIPSv IPS, Apps, AMP, and URL Services License for Next-Generation Firewall devices• Cisco NGIPSv IPS, Apps, AMP, and URL Services License for Next-Generation IPS devices• Cisco NGIPSv IPS, Apps, AMP, and URL Services License for Integrated Services Routers• Cisco AnyConnect® Apex License• Cisco Advanced Malware Protection Service for Endpoints License• Cisco AMP Threat Grid Advanced File Analysis Appliance license• Cisco AMP Threat Grid Cloud Subscription License• Cisco AMP Threat Grid Advanced File Analysis License• Cisco AMP Threat Grid Advanced Email Security Appliance File Analysis License• Cisco AMP Threat Grid Advanced Cloud Email Security File Analysis License• Cisco AMP Threat Grid Threat Feeds License• Cisco ESA Advanced Malware Protection License• Cisco WSA Advanced Malware Protection License• Cisco CES Advanced Malware Protection License• Cisco AMP virtual Private Cloud Service Subscription• Cisco Defense Orchestrator for Next-Generation Firewall and Next-Generation IPS

Available Suites for Cisco Enterprise Agreement for Security

Table 2. What's included in the Email Security Suite

Product name	Core functions	Product description	License type
Cisco Email Security Appliance	Protect against advanced email threats	The Email Security Appliance protects against ransomware, business email compromise, spoofing, and phishing. It uses advanced threat intelligence and a multilayered approach to protect inbound messages and sensitive outbound data.	On-premises software
Cisco Cloud Email Security	Protect against advanced email threats	Cloud Email Security protects against ransomware, business email compromise, spoofing, and phishing. It uses advanced threat intelligence and a multilayered approach to protect inbound messages and sensitive outbound data.	SaaS
Cisco AMP Threat Grid	Unified malware analysis and threat intelligence	AMP Threat Grid combines advanced malware analysis with deep threat analytics and content for a global view of threat activity in your environment.	SaaS
Cisco AMP Virtual Private Cloud	Rapid breach detection and remediation	For organizations that have high privacy requirements that restrict using a public cloud, the Cisco Advanced Malware Protection (AMP) Private Cloud is an on-premises, air-gapped option.	SaaS

Table 3. What's Included in the Cloud and Web Security Suite

Product name	Core functions	Product description	License type
Cisco Web Security Appliance	Web traffic security	Cisco Web Security Appliance (WSA), powered by Cisco Talos, protects you by automatically blocking risky sites and testing unknown sites before allowing users to link to them, helping with compliance.	On-premises software
Cisco Umbrella	DNS and IP layer enforcement	Cisco Umbrella uses the Internet's infrastructure to block malicious destinations before a connection is ever established.	SaaS
Cisco Cloudlock	Cloud-native CASB	Cisco Cloudlock secures your cloud users, data, and apps across software as a service, platform as a service, and infrastructure as a service, and orchestrates security across your existing security investments.	SaaS
Cisco AMP Threat Grid	Unified malware analysis and threat intelligence	AMP Threat Grid combines advanced malware analysis with deep threat analytics and content for a global view of threat activity in your environment.	SaaS
Cisco AMP Virtual Private Cloud	Rapid breach detection and remediation	For organizations that have high privacy requirements that restrict using a public cloud, the Cisco Advanced Malware Protection (AMP) Private Cloud is an on-premises, air-gapped option.	SaaS
Cisco Defense Orchestrator for Umbrella	Security policy management	Cisco Defense Orchestrator helps a network operations team easily manage policies across Cisco security products. It's a cloud-based application that cuts through complexity. You can orchestrate and manage policies consistently from one spot to keep your organization protected against the latest threats.	SaaS

Table 4. What's Included in the Policy and Visibility Suite

Product name	Core functions	Product description	License type
Cisco Stealthwatch	Network visibility	The Cisco Stealthwatch system uses the customer's network as a sensor to deliver internal network visibility. It turns network data into security intelligence for real-time threat detection and postincident investigations.	On-premises software
Cisco Identity Services Engine	Highly secure network access	Cisco ISE helps customers gain awareness of everything hitting their networks. It provides access consistently and efficiently relieves the stress of complex access management.	On-premises software

Table 5. What's Included in the Security Essentials Suite

Product name	Core functions	Product description	License type
Cisco FirePOWER Services for NGFW, NGIPS, ISR	IPS, Apps, AMP, and URL Filtering	Highly effective threat prevention and a full contextual awareness of users, infrastructure, applications, and content help you detect multivector threats and automate the defense response.	On-premises software
Cisco AnyConnect	VPN	AnyConnect simplifies highly secure endpoint access and provides the security necessary to help keep your organization safe and protected.	On-premises software
Cisco AMP for Endpoints	Next-generation endpoint security	Prevent breaches. Continuously monitor all file behavior to uncover stealthy attacks. Detect, block, and remediate advanced malware across all endpoints.	On-premises software
Cisco AMP Threat Grid	Unified malware analysis and threat intelligence	AMP Threat Grid combines advanced malware analysis with deep threat analytics and content for a global view of threat activity in your environment.	SaaS

Product name	Core functions	Product description	License type
Cisco AMP Virtual Private Cloud	Rapid breach detection and remediation	For organizations that have high privacy requirements that restrict using a public cloud, the Cisco Advanced Malware Protection (AMP) Private Cloud is an on-premises, air-gapped option.	SaaS
Cisco Defense Orchestrator	Security policy management	Defense Orchestrator helps a network operations team easily manage policies across Cisco security products. It's a cloud-based application that cuts through complexity. You can orchestrate and manage policies consistently from one spot to keep your organization protected against the latest threats.	SaaS
Cisco AMP for ESA, WSA, CES	Advanced malware protection for content security	Breach prevention. Continuous monitoring of malicious behavior. Rapid malware detection. Malware removal.	On-premises software and SaaS
