Introduction

Traditional networks cannot meet the demands of a digital network. Traditional networks were hardware centric, manual with fragmented security, and focused on network data. The new network that drives digital business demands a software-driven approach, automation, built-in security, business insights with proactive monitoring, and troubleshooting. With this vision, Cisco launched the new era of networking powered by the Cisco® Digital Network Architecture (Cisco DNA).

The latest innovations in Cisco DNA include new software capabilities that deliver greater intelligence and security through Cisco DNA subscription licensing for access switching and wireless software and an architectural approach that delivers end-to-end visibility, automation, and insights for switching. Introducing new subscription offers for access switching and wireless built on an entirely new era of intent-based networking.

Cisco DNA for access switching subscription
Scale your network for business expansion; segment your network for security, compliance, and complex processes; and centralize network access policy management for secure access.

Cisco DNA for access wireless subscription
Get exceptional wireless performance for high-density environments; personalize services through location-based solutions; and secure your network by protecting devices, data, and your business with strong, network-based security. Built with an agile OS, the new wireless controller are the most secure controllers that are always-on and can be deployed anywhere.

Benefits of software subscription

- Ongoing access to newest features
- Up-to-date security protection
- Software refresh independent of hardware
- Ability to renew and scale what you want
- License portability for flexibility
- Better together pricing
- Linear, predictable budget spend
- Software Support Service (SWSS) included

Cisco DNA for switching subscription

- The new Cisco DNA subscription for switching is available on current generation switches such as Cisco® Catalyst® 3000, 4000, and 6000 Series as well as on Cisco Catalyst 9000 Series switches.

Figure 1. Cisco DNA for Switching: Subscription Offer Structure

**Cisco DNA Essentials** delivers base automation, monitoring, and management.

With this solution, customers can enable basic automation and monitoring. Cisco DNA Essentials is not available on Cisco Catalyst 9600 Switches.

**Cisco DNA Advantage** delivers policy-based automation with SD Access, monitoring, and Cisco DNA Assurance.

Customers need to buy ISE Base, ISE Plus, and Stealthwatch® to enable all Cisco DNA use cases.

**Cisco DNA Premier** delivers policy-based automation with SD Access, Cisco DNA assurance, and enhanced security.

Customers can enable all Cisco DNA use cases with Cisco DNA Premier. Offered as a single SKU.

Cisco DNA for wireless subscription

- The new Cisco DNA subscription for wireless is available on Catalyst 9100 and Wave 2 Aironet® access points and controllers: Catalyst 9800 Series (C9800-40/80/CL) and WLC 3504, 5502, 8540.

Figure 2. Cisco DNA for Wireless: Subscription Offer Structure

**Cisco DNA Essentials** delivers base automation.

**Cisco DNA Advantage** delivers Automation, Assurance, Cisco AI Network Analytics and location analytics.

**Cisco DNA Premier** gives you Automation, Assurance, SD-Access, Cisco AI Network Analytics, security, and location analytics. Additionally, you can purchase Stealthwatch and a Cisco DNA Spaces Act license as add-on options.
Cisco Smart License and Smart Accounts

Enterprise switching and wireless software now leverages Smart Licensing. In order to retrieve your license, you will need to first set up a Smart Account on Cisco Software Central (software.cisco.com). Once set up, you’ll generate a token to activate the license.

With Smart Accounts you get:

• Real-time visibility into all of your Cisco software licenses, entitlements and users across your organization.
• Centralized management to view all license entitlements and move licenses freely through the network as needed.
• The ability to organize your licenses by department, product, geography or other designation with virtual accounts.

To learn more go to https://www.cisco.com/go/smartaccounts.

Why Cisco?

Digital business relies upon a new digital network in enterprise networking and in the data center. This new network requires a software-based and policy-driven approach, automation, built-in security, and proactive monitoring and troubleshooting informed by insights from your business. Cisco is delivering this new network via Cisco Digital Network Architecture (Cisco DNA) for enterprise networking.

Through these innovations, we make it easier for IT to respond to the ever-evolving demands of your business. Cisco is the premier company with the breadth, depth, and intellectual property to fully enable all of your organization’s telecommunications needs now and into the future.

Cisco Solution Support (Optional)

Basic software support (SWSS) is included in all subscriptions. To get centralized solution support, including hardware for Cisco and our solution partner products in your Cisco DNA ecosystem, we recommend Solution Support. For more information, visit, www.cisco.com/go/solutionsupport.
