

Cisco Enterprise Agreement

Benefits

- **Condenses** complex software SKUs into customized simple solution subscriptions
- **Simplifies** licensing management with one agreement for your entire worldwide organization
- **Scales** to meet changing business needs with licenses that allow organic growth and provide updates and upgrades
- **Includes a** “True-Forward” option, which allows for growth above the allocated 20% with no retroactive charge
- **Controls** costs with volume pricing, budget predictability, and investment protection for existing licenses and services

Simplify Processes with a Single Licensing Agreement

Technology needs are constantly shifting. Organizations have to adopt quickly to stay competitive. They also cannot afford to be bogged down by complicated procedures when their skills can be much more productive when applied to other areas. Simplifying and standardizing the software buying process is now essential.

A New Cisco Buying Program

Cisco EA is a 3 to 5 year agreement that provides customers with enterprisewide coverage of predefined software suites with simplicity, flexibility, and value.

- **Simplicity:** Choose from single agreement, term, and workspace licenses
- **Flexibility:** Take advantage of various payment arrangements

- **Value:** Enjoy a 20 percent growth allowance and an industry-first true forward (no retroactive billing)

Cisco EA currently includes purchasable suites for Cisco ONE Software, collaboration, and security.

Is Cisco EA Right for You?

Reference this checklist to help determine if Cisco EA fits your needs:

- ✓ Cross-architecture standardization
- ✓ 100 percent organization coverage
- ✓ Centralized license management
- ✓ Predictable budget and pricing
- ✓ A strategic, multiyear vendor relationship
- ✓ The best value for your money

Software Suites

Reference this page for Cisco EA software suite details organized by architecture:

- Cisco ONE Software (network, storage, computing)
- Collaboration
- Security

Why Buy an EA from Cisco

- Architecture-specific access
- 3 to 5 year fixed price (best unit price)
- Defined suites of software and services
- Blanket enterprisewide service coverage and co-terminated service coverage
- Ability to scale as needed with 20 percent growth allowance included
- Cisco® exclusive True-Forward rather than industry-standard true up

Cisco EA includes multiple software suites for multiple architectures (see Table 1) and is available in more than 40 countries.

Table 1. Cisco EA Architectures and Software Suites

Cisco ONE Software Suites	Core Cisco Components
Foundation for Wireless (Essentials)	<ul style="list-style-type: none"> ▪ Wireless LAN Controller access points ▪ Connected Mobile Experiences Base ▪ Identity Services Engine (ISE) Base ▪ Cisco Stealthwatch (coming soon) ▪ PI Lifecycle/Assurance

Service Notes:

Cisco Software Support Service (SWSS) provides complete coverage for your software applications to help protect your investment and maintain business continuity for your Cisco software products. We want every customer who buys Cisco software to get great software support services.

SWSS includes 24x365 TAC support, major, minor, and maintenance software release updates, license portability, ongoing innovation, and access to online resources (with Cisco ONE Software purchases), and online resources.

SWSS support will be entitled at the product family level for each suite the customer is entitled to within the Cisco EA.

Next Steps

To learn more about Cisco EA, please contact your regional territory manager.

Search for eligible partners by Cisco Enterprise Agreement suites with the [Partner Locator Tool](#). Click on Advanced Search Criteria > Additional Partner Programs > Check the box of the EA suite(s) you require.
