

# Global Firm to Achieve 365% ROI from Cisco ONE Software

The Total Economic Impact™ of Cisco ONE Software

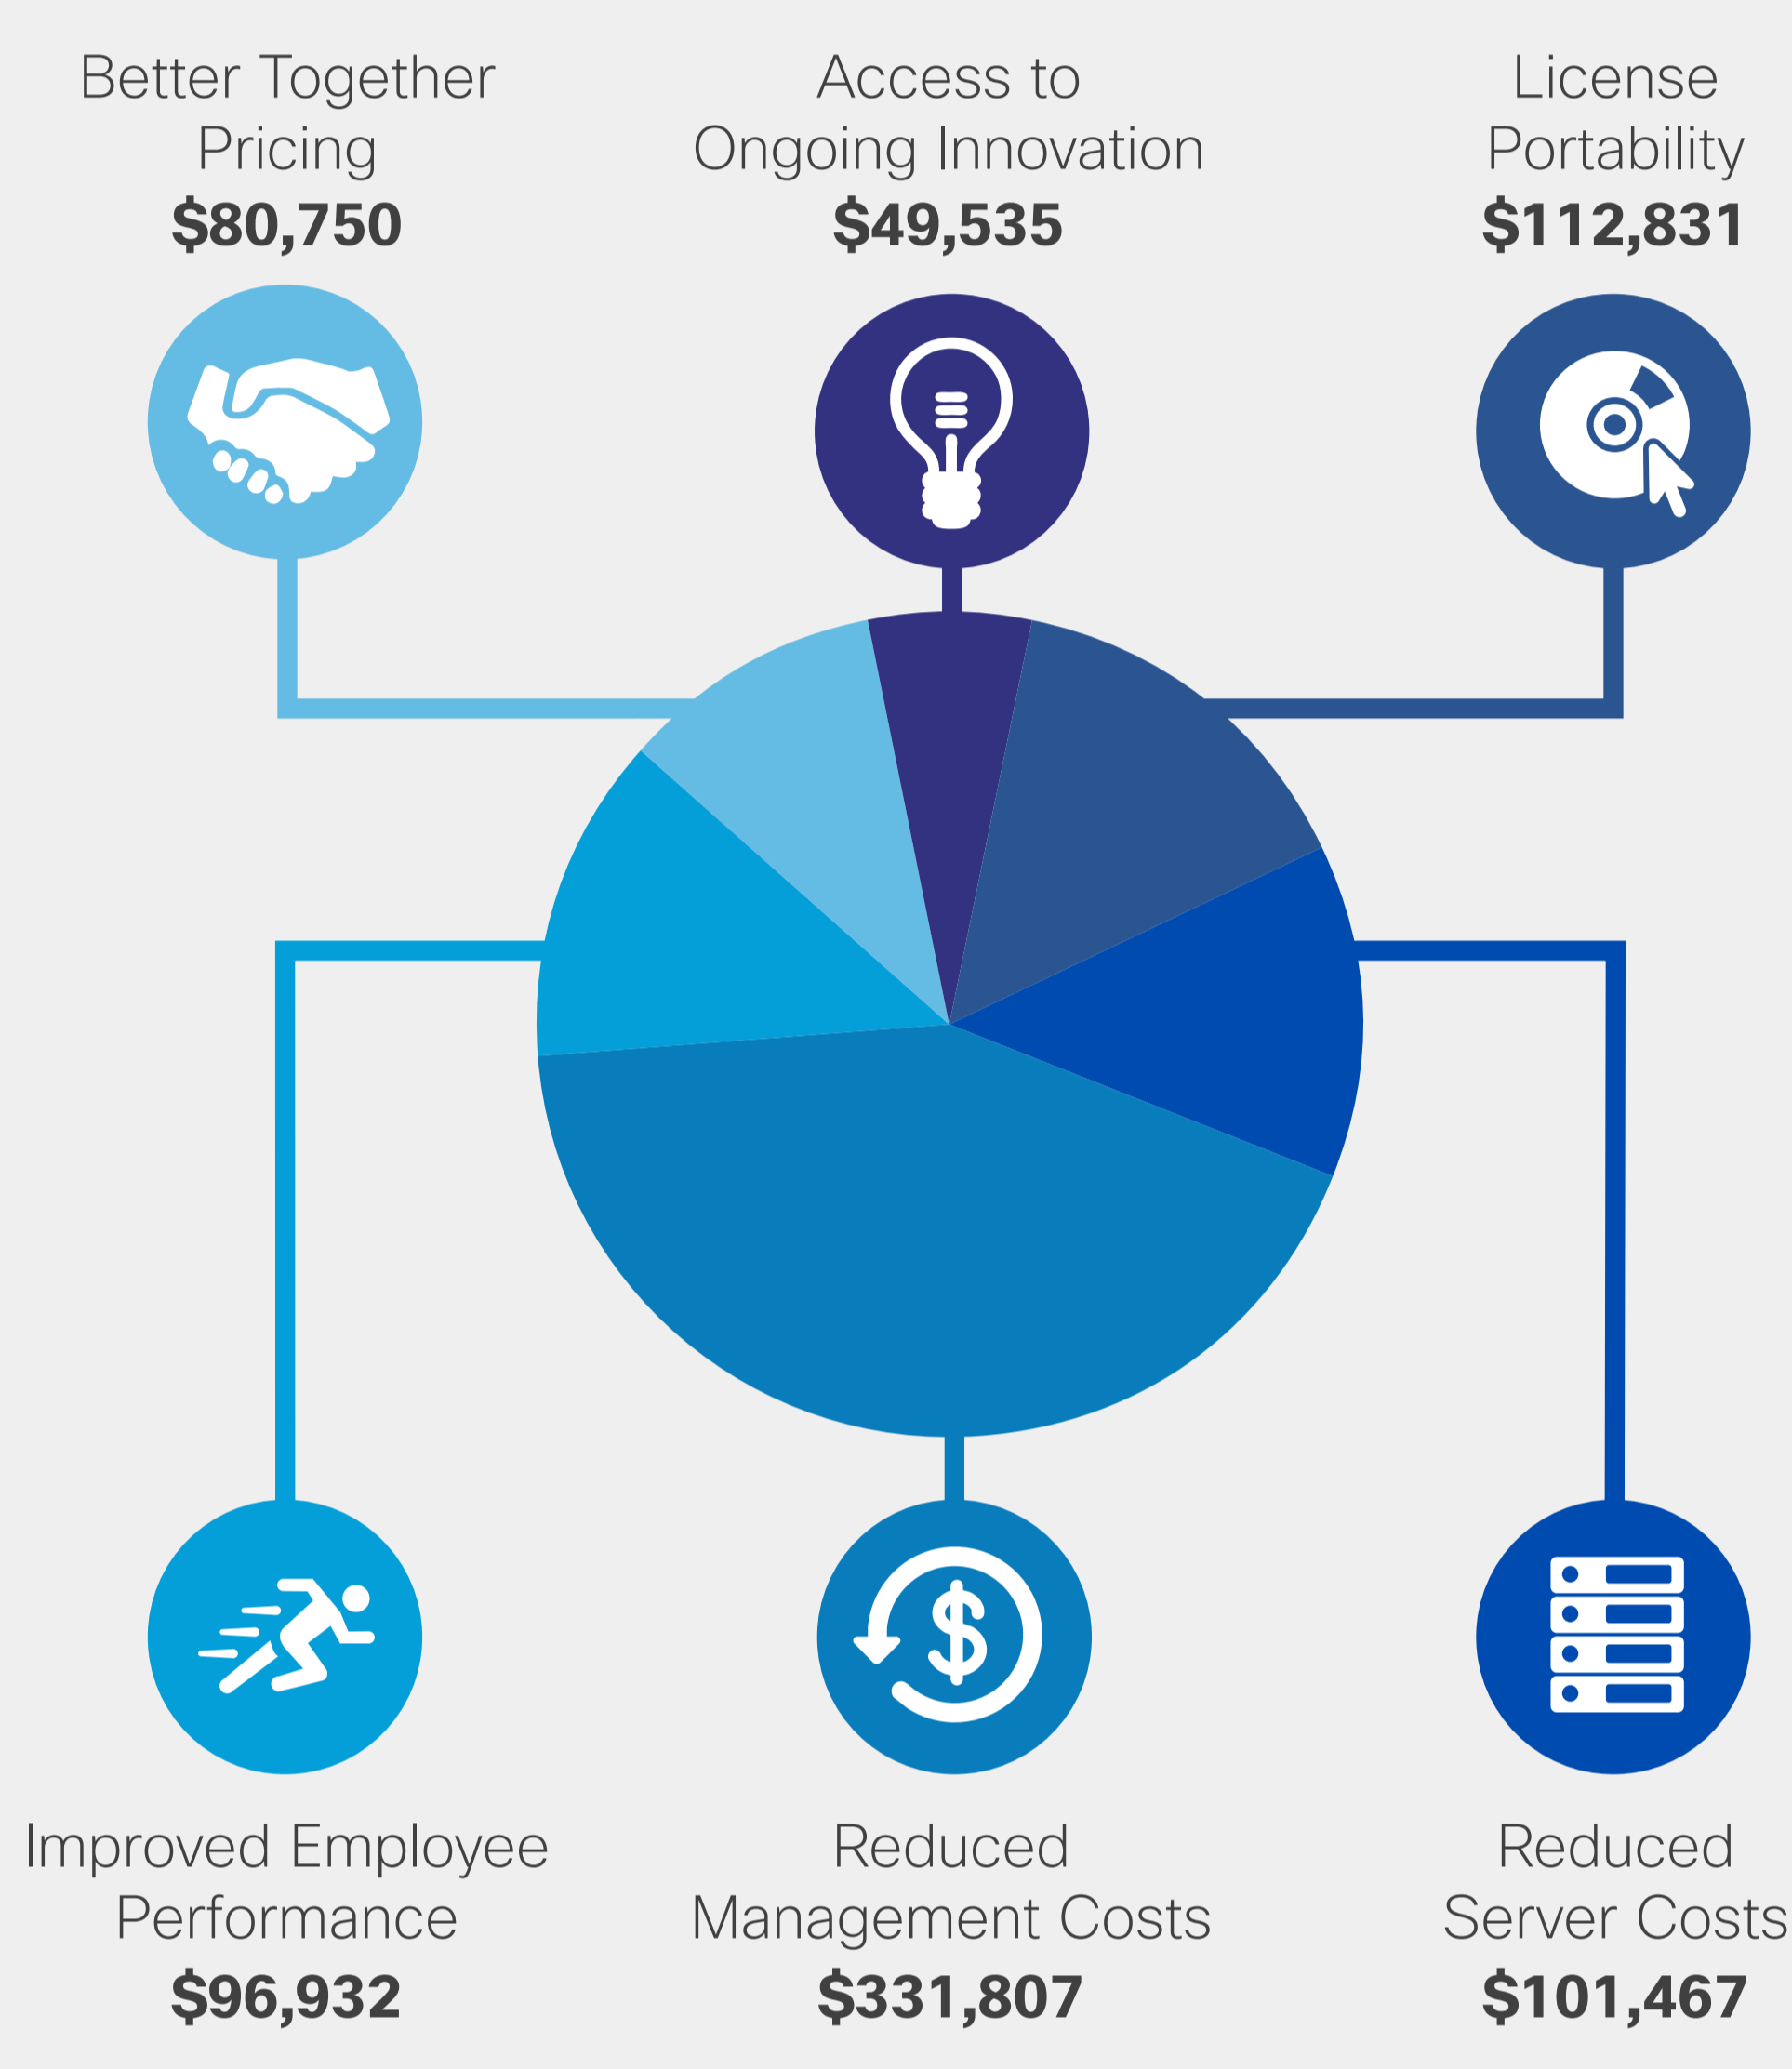

A global consulting firm purchased **55 Cisco 4300 Series Integrated Services Routers** with **Cisco ONE Foundation for WAN** and **Cisco ONE WAN Collaboration** software to upgrade its offices worldwide.

Forrester interviewed the organization, analyzed cost and benefits, and estimated that the investment would deliver the following risk-adjusted, 10 year ROI and NPV:

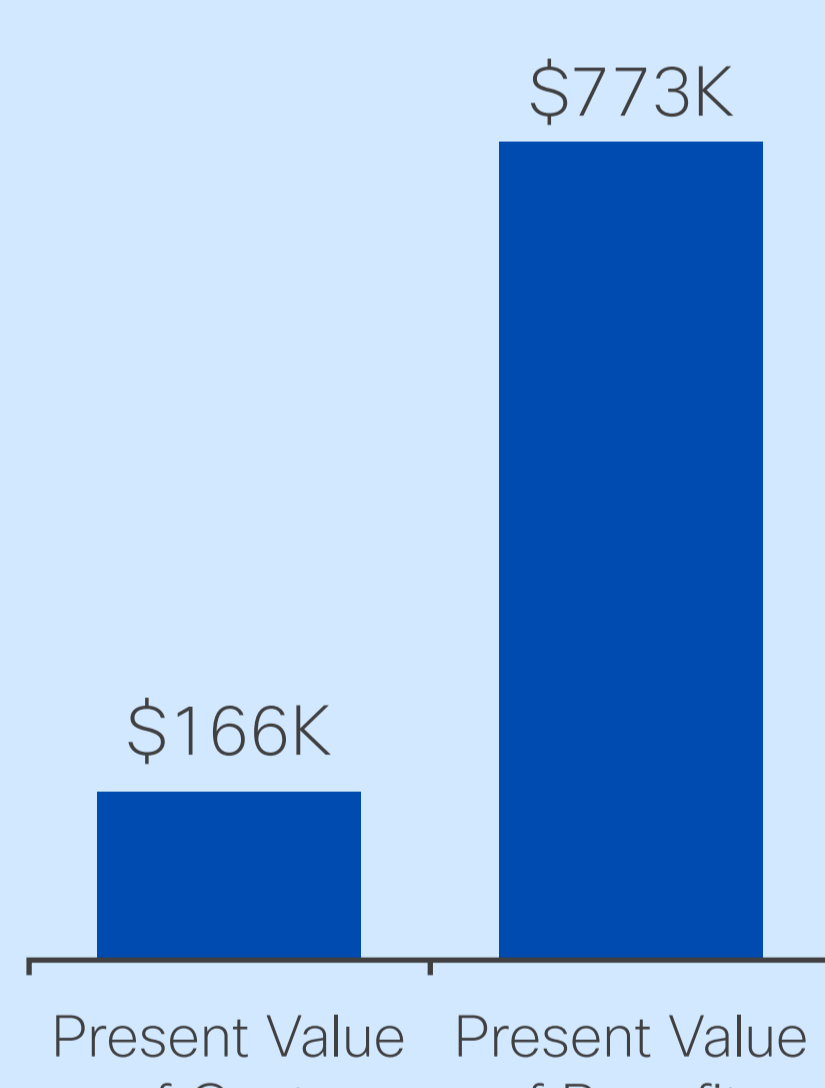

## How did the consulting firm achieve this payoff?

The Cisco solution enabled these impressive risk-adjusted benefits:

In addition, **Cisco ONE Software** helped the firm reduce network server space by 40,000 square feet, and free up the space for meetings and collaboration.

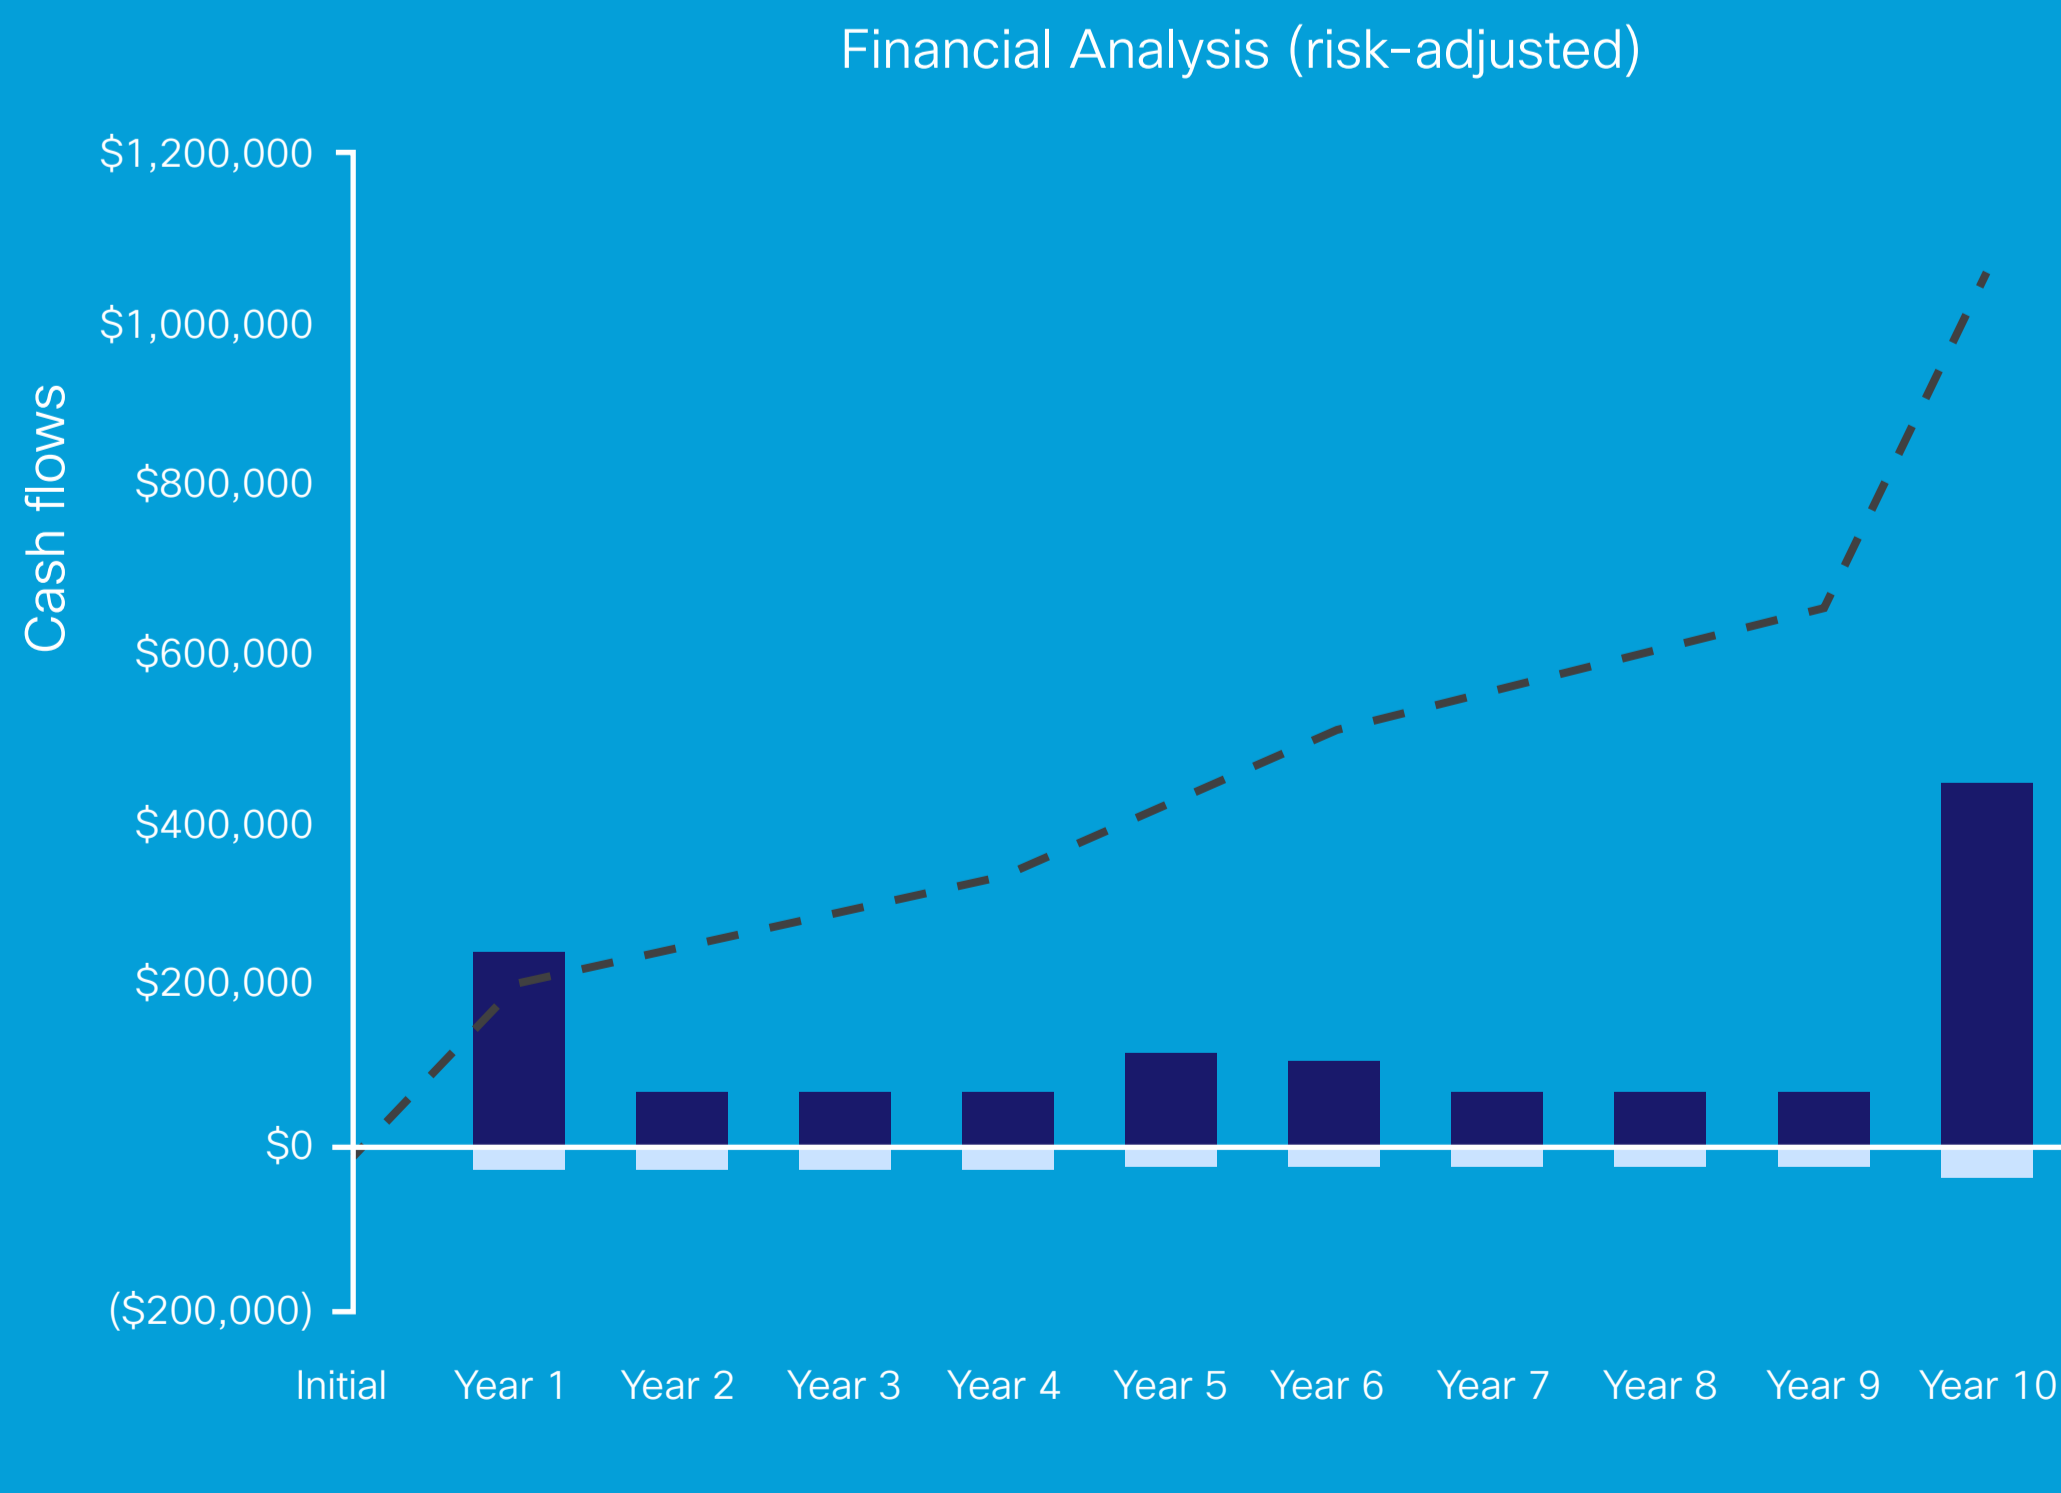

The benefits are more than **4X** the cost

Leading to a risk-adjusted, 10 year

**NPV of \$606,990**

Here's a breakdown of the benefits and costs over the years.

Disclosures

- This document is an abridged version of the full case study
- The study was commissioned by Cisco and conducted by Forrester Consulting
- Costs and benefits are risk adjusted.
- The financial costs and benefits are based on a nine-year router hardware refresh cycle, as reported by the interviewee. Organizations with a shorter average router hardware refresh cycle (such as five to six years), will likely have a higher ROI.
- The potential return on investment that other organizations will receive may vary.
- Please read the case study for full details
