

Cisco Secure Choice Enterprise Agreement

The choice is simple

Today's workforce is no longer remote only or in the office only, it may be a shift to a hybrid work environment or whatever your future of work looks like. More users with multiple devices are connecting in and out of the corporate network, from anywhere and anytime. The complexity of managing security increases across a growing attack surface of users, devices, applications, and data. Despite the number of security solutions that exist and enter the market, cyber threats are more prevalent than ever. Security needs to be simplified and easy to use so you can move faster and stay ahead of bad actors. Cisco Secure powers security resilience, enabling businesses to withstand unpredictable threats or change and then emerge stronger. Offering a portfolio of secure connectivity services provides pervasive awareness to eliminate security gaps and optimize efficacy across the extended business ecosystem.

Similarly, the way you buy security must also be simple and flexible. Buying a slew of disparate security products that aren't easily integrated can get expensive to consume. Gone are the days where you need to keep track of renewal dates of multiple security product licenses. Instead, a simplified buying experience means you can activate only the security you need faster, your resources go further, and it eases the burden of managing multiple security licenses from different vendors.

Buying through the Secure Choice Enterprise Agreement allows you the flexibility to access two or more security products. Secure Choice Enterprise Agreement makes staying on top of security software and licenses easy, lets budgets go further, and offers predictable billing over time so you can move faster in responding to security needs.

Cisco Secure products make security simple to choose and simple to use. And now with Secure Choice Enterprise Agreement, they're simple to buy—choose two or more to start and add as your business needs grow. You'll get the convenience of a single agreement and only pay for what you need, with instant savings.

Choose Secure Choice Enterprise Agreement so you can:

- **Buy it your way.** Buy only what you need now, in a single agreement, and easily manage everything in one portal.
- **Activate security fast.** Access products and services whenever you need it. No new procurement or sales hoops to jump through.
- **Instant cost savings.** Get price protection and free growth with deeper discounts as you add products.
- **Flexible payments.** Pay annually, as you go, over three or five years, with 0% financing.
