Cisco Catalyst 9200 Series Switches

Common terminology

- Network Stack: NW
- Cisco Digital Network Architecture: Cisco DNA
- Cisco DNA Essentials: -E
- Cisco DNA Advantage: -A
- Cisco DNA Advantage: -P
- Smart Account: SA

Smart license: SL

Purpose of this document

This document provides a detailed overview of the ordering process for Catalyst 9200 Series switches on Cisco Commerce Workspace.

Hardware and software order overview

Cisco Catalyst 9200 Series switches are ordered through Cisco Commerce Workspace with a 3, 5 or 7 year term-based Cisco DNA Premier, Advantage and Essentials subscriptions. This includes term-based embedded support. All options include switch hardware coupled with Cisco IOS® XE and the related perpetual Network Advantage or Essentials network stack software. In addition to the hardware and network stack software, the offer requires the addition of the term-based Cisco DNA subscription software. Figure 1 gives an overview of available Cisco DNA Premier, Advantage and Essentials subscription options, and what is included in each software package.

Things to know

Before placing an order, please review the following:

- Cisco® Catalyst® 9200 Series switches offer structure has three main components: the switch hardware, a Network stack perpetual license, and a Cisco Digital Network Architecture (Cisco DNA™) term license.
- Cisco DNA term licenses and Network Stack perpetual licenses are smart product IDs (SKUs). Both licenses are required with a hardware purchase.
- Smart Accounts mandated during purchase (for more information, please see Smart Accounts section).
- Available services included:
  - Solution support
  - Enhanced Limited Lifetime Warranty (E-LLW)
  - Smart Net Total Care™ support
  - Embedded support for Cisco DNA term license

Figure 1. Catalyst 9200 Series switch offer overview
How to Order a Cisco Catalyst 9200 Series switch

Both Network Stack licenses and Cisco DNA licenses are mandatory at the time of purchase and come in two licensing tier options: Essentials (-E) and Advantage (-A). Network Stack Essentials or Advantage is included with the hardware, while a Cisco DNA term license needs to be selected at the time of order.

To order in the Cisco Commerce Workspace, follow these steps:
1. Select the appropriate Catalyst 9200 Series switch SKU with "-E" or "-A" device for the desired license type.
2. Choose the preferred consumption model - Cisco DNA Premier, Advantage or Essentials.
3. Choose the Cisco DNA term license (3, 5 or 7 years).
4. Add other components (for example secondary power supply, power cables, etc.).

Step-by-Step Ordering in Cisco Commerce Workspace

Enter the hardware SKU in Cisco Commerce Workspace.

The Network Stack license is perpetual and included with the hardware by default (it will not be visible in the selection menu) per the respective hardware SKU suffix (example: C9200L-48P-E/C9200L-48P-A).
A Cisco DNA Premier license option is available for selection and is the default. Customers are encouraged to purchase the Cisco DNA Premier option to enable advanced Cisco DNA solutions:

**Note:** Follow steps below to change from 5 year default term to a 3 or 7 year term for Cisco DNA Premier License

Check Summary to validate all terms are aligned to intended term.

**For the Cisco DNA Premier license option,** Catalyst 9200 Series 48 port switch models come defaulted with additional 25 end points in addition to typical 25 endpoints or flow. See the next to snapshots to select the desired number of endpoints.

For Cisco DNA Advantage and Essentials options, the term-based Cisco DNA license is preselected by default to the 5 year term, but can be changed to 3 or 7 year term. The Cisco DNA term license is mandatory (customers must select one of the term options to complete the configuration) and aligns with the hardware SKU suffix (-E or -A):
A power cable must be selected to complete the configuration:

The primary power supply is added by default, based on the hardware model. A secondary power supply is can be selected as well, based on hardware model.
A stacking module is available for selection. Each stack kit contains two stack adaptors and one stacking cable:

Smart Accounts
As with all Catalyst 9000 family switches, Smart Accounts are mandatory when ordering a Catalyst 9200 Series switch.

A Smart Account is a central data repository that provides visibility and access control to all the Cisco software licenses and entitlements across an organization. Smart Accounts allow customers to store, manage, and move assets across locations and devices and begin to use them immediately. Smart Accounts are required for enabling Cisco Smart Software Licensing.

After a Smart Account has been set up, customers have the flexibility to create subaccounts (virtual accounts) to help manage licenses for departments, areas, or locations within their organization. Licenses can be pooled within virtual accounts as needed. Smart Accounts support role-based user access controls, which allow the delegation of authority to account administrators at the Smart Account level or at the virtual account level. In addition, customers can assign partner visibility and management rights to their virtual or enterprise-level accounts.
Additional information

- [Operations Exchange](https://www.cisco.com/c/en/us/buy/smart-accounts.html) site featuring Smart Account overviews and training sessions; navigate to the Smart Account Resources panel on the page

Smart Licensing

Smart Licensing is a cloud-based licensing managed platform built to simplify the purchase, deployment, and management of Cisco software assets. Entitlements are immediately deposited into a customer’s virtual account for usage. This eliminates the need to install license files on every device. Products that are Smart License enabled communicate to Cisco to report consumption. The primary location to manage product registration and monitor Smart License consumption is the Cisco Smart Software Manager. License ownership and consumption are readily available to help make better purchase decisions based on consumption or other business needs.

Cisco Smart Software Manager

Cisco Smart Software Manager enables the management of software licenses. The interface allows you to activate your product, manage entitlements, and renew and upgrade software. An active Smart Account is required to complete the Smart License registration process.

Smart Account and Smart License availability

Important information about smart account and smart license availability

- Catalyst 9200 Series switch SKUs are smart SKUs. License entitlements will be deposited in the Cisco Smart Software Manager and the Smart Accounts
- In addition to viewing entitlements, customers will also be able to track consumption

Smart Accounts are mandatory at the time of the order of a Catalyst 9200 Series switch. If a customer does not have a Smart Account set up prior to the purchase, a new Smart Account must be created at the time of purchase.
Deploying Smart Licenses for Cisco Catalyst 9200 Series switches

The Cisco Catalyst 9000 switch family comes in different licensing packages in comparison to previous-generation Cisco Catalyst platforms. Smart Licenses are transferable between the same types of devices (for example, from one Cisco Catalyst 9200 Series switch to another). (See Figure 2.)

In the deployment model shown in Figure 2, the Smart Account Cisco back end and Cisco Catalyst 9200 Series switches do not have a communication channel to report usage and consumption. They operate as separate entities. The switches must be configured in RTU mode with correct license level to enable the purchased feature set.

License usage and consumption reporting is performed on Cisco Smart Software Manager.

**Network admin:**
Person see if device is in or out of Compliance. Might have access to Smart Account.

**Financial person**
receives report for out-of-compliance virtual accounts.
Services and warranty

The Solution Support service option is strongly recommended; it provides coverage for Cisco DNA Premier, Advantage and Essentials software licenses. Additional product-level hardware support options are available: Smart Net Total Care support, partner service support, embedded support, and Enhanced Limited Lifetime hardware Warranty (E-LLW). Please note that if Solution Support is not selected, Cisco DNA Premier, Advantage and Essentials software licenses can still be covered by selecting the embedded support option.

It is strongly recommended that the term of the hardware support contract match the software subscription license term to avoid any service support gaps for the duration of the term.

Figures 4 through 9 describe the various service options for Cisco Catalyst 9200 Series Switches.

How to order Cisco Catalyst 9200 Series switches services with Cisco DNA Advantage and Essentials licenses

Solution Support is the default service. Customers can attach desired services by following the steps outlined below – this scenario showcases if a customer wants to attach a different service than Solution Support:

1. Customer will configure the product. Then click “Done”.

2. Customer will select “Edit Service/Subscription” to view and edit service options.
3. Customer will select “Edit Services” to change services if needed.
4. The customer can then choose from a variety of different service options. Click “Done” when finished.
5. Any changes will be reflected on the following screen. Customer will click “Done” when finished.

Distribution Ordering Addendum

This section details the steps necessary to order Cisco Catalyst 9200 Series switches through distribution partners.

Figure 9. Distribution Ordering Options for Cisco Catalyst 9200

Distribution ordering options-9300

- **Dropship entire order**
  - Distributor places HW and SW order on behalf of Partners. 9300 is shipped directly from Cisco with Cisco DNA licenses.

- **Stocking distributor ordering for inventory**
  - Distributor places order for inventory. Cisco DNA subscription is not mandated.

- **2T quote–HW fulfilled from inventory**
  - Partners submits PO to Distributor who fulfills the 9300 from inventory and places the SW Cisco DNA subscription order at Point of Sale.

Cisco Catalyst 9200 Series switches for stocking. By selecting “Stocking” as “Intended Use”, the system will show only hardware and does not include the Cisco DNA Premier, Advantage or Essentials subscription (the subscription must be ordered at point of sale).
Figure 10 above shows the scenario where the distributor will dropship the entire order from Cisco to the end customer. The intended-use drop-down menu is set to Resale, which allows the default options for hardware support and software to become available. The system defaults will be Cisco DNA and Solution Support. Hardware support can be changed to premium Solution Support or SNTC, or it can be removed completely.
Figure 11 above shows the scenario where the distributor places a stocking order. While placing a distribution stocking order for a Catalyst 9200 Series switch, the distributor will opt out of attaching mandatory subscription software. Orders for Stocking will include Hardware + OS (Network Stack). The Opt out feature will exclude the Cisco DNA Subscription software only for distribution stocking orders.
Figure 12 shows the distributor using either the Cisco DNA Premier, Cisco DNA Advantage or Essentials subscription options when fulfilling from inventory.

Cisco will also use this information to associate the HW SN to the mandatory attach subscription. In situations where the customer has not received their license entitlement through their Smart Account, Cisco will deposit the Mandatory Attach Smart Licensed Subscription into the End Customers Smart Account when the HW SN is registered with Cisco. This will ensure that the customer is accurately entitled to their purchased subscription and avoid any disruption in functionality of the switch.
Figure 13 shows the partner quote request to the distributor. The distributor can choose to fulfill the entire order by drop-shipping or fulfill the hardware from stock and create a dropship order for Cisco DNA Premier, Advantage or Essentials licensed software.

Figure 13. Fulfilled from Inventory
Figure 14 shows the SKUs that the distributor has to use when ordering software as a dropship in Cisco DNA Premier, Advantage and Essentials scenarios.

#### SKU details for disti ordering software as dropship

</tbody>
</table>

Disti fulfills the hardware from stock for the quote from partner and creates a dropship for the Cisco DNA Term software. When placing the order for Cisco DNA Term SW, the Disti will use C9200-DNA-E-24 =

Disti fulfills the hardware from stock for the quote from partner and creates dropship for the Cisco DNA Term software. When placing the order for Cisco DNA Term software, the Disti will use CAT-P-Add SKUs.
Cisco Catalyst 9200 Series switches for stocking

**Distributor Stocking Flow:**

**Stocking Order scenario:** HW with Perpetual Smart License shipped from Stock

- **Distributor places HW Stocking Order**
- **CCW Stocking Order**
  - Perpetual License (network essential/advantage) is configured with HW
- **Reseller PO to Distributor**
- **HW Shipped to Distributor Warehouse**
- **HW SN + Perpetual License**
- **Customer HW Registration**
- **Customer uses Cisco DNA Software for each Hardware unit sold**

By selecting “Stocking” as “Intended Use”, the system will show only hardware and does **not** include the Cisco DNA Premier, Advantage or Essentials subscription (the subscription must be ordered at point of sale).

When fulfilling a Catalyst 9200 Series switch from inventory the distributor is required to attach Cisco DNA subscription Software for each Hardware unit sold. In this scenario, the distributor will place a dropship Cisco DNA software subscription order with Cisco using CCW leveraging the equivalent spare SKUs shown below.

When ordering a Catalyst 9200 Series switch from Cisco, CCW will enforce the mandatory attach of the Cisco DNA Subscription Software to every Catalyst 9200 Series switch estimate, quote and order except stocking orders.
When submitting a drop ship subscription order associated to hardware shipped from stock, the distributor must submit the following information directly in CCW UI (or via B2B):

1. Distributor Hardware Sales Order Number (as submitted in hardware POS line)
2. Distributor Hardware Sales Order Line Number (as submitted in hardware POS line)
3. Cisco Hardware Part Number

<OR> Hardware Serial Number(s)

### 9200: Mandatory Attach Exceptions and Approvals
