Simplify Network Growth Without Sacrificing Features.

Cisco Small Business Smart Switches Deliver Powerful Performance with Less Hassle.

Cisco® Small Business Smart Switches deliver robust features and capabilities that help boost your productivity and increase your efficiency. Smart switches are managed through a simple web interface that makes setup and management easy. Designed for small businesses that need more than what an unmanaged switch can provide, but not ready for the complexity and cost of a managed switch, smart switches provide the ideal solution.

With Cisco Small Business Smart Switches, you can enjoy the features of managed switches such as basic quality of service (QoS), security, and availability. Choose from 5- to 48-port Fast Ethernet, Gigabit Ethernet and Power over Ethernet (PoE) models. When your small business needs basic network switch functionality with minimal hassle, Cisco Small Business Smart Switches deliver at a fraction of the cost.

Features & Benefits of the Smart Switches:

- **Manageability:** Remove the complexity from the setup process with a intuitive browser-based configuration that helps you get your switch easily installed.
- **Performance:** Get your high-bandwidth data where it needs to go, quickly and without errors.
- **Security:** Keep unauthorized users away, and the data on your network safe from unauthorized access, with enhanced security, encryption, and authentication features.
- **Expandability:** Enable easy expansion of your network deployments with features such as QoS and PoE that can support advanced technologies.

Cisco Small Business Smart Switches deliver some of the networking features of a managed switch, yet are easy to use and cost less. When you need to expand your network to handle more advanced data types such as real-time video or voice communications, or PoE functionality, your Cisco Smart Switch will be ready for the job.
