

Technology changes. Fast.

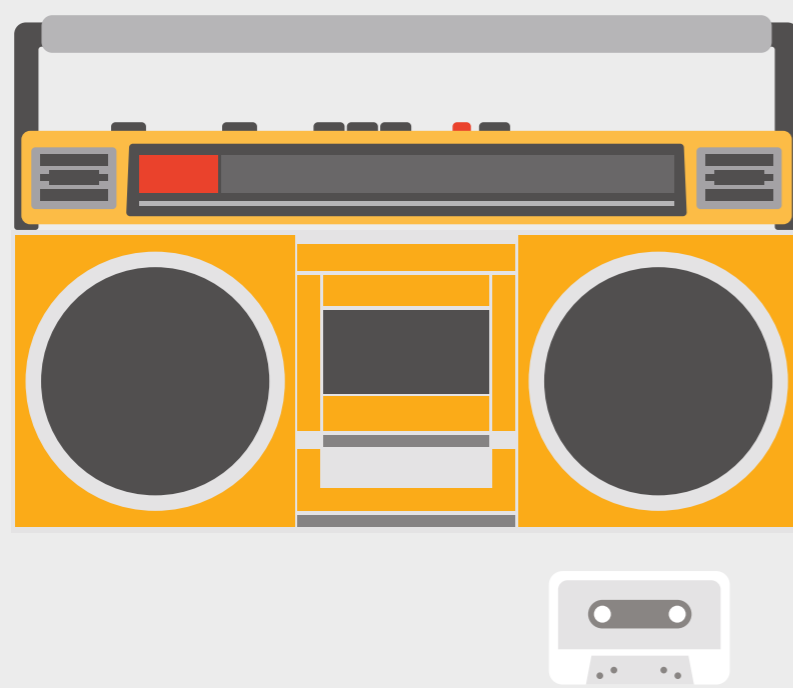

← Flip phones that only made calls

Smartphones that can call, record high-def videos, and order takeout →

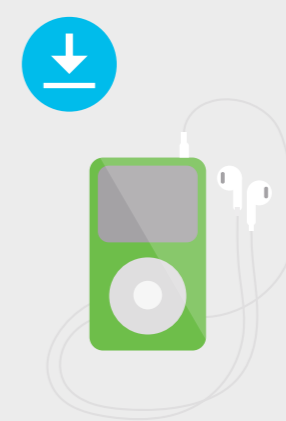

← Data stored on floppy disks

Tablets the size of floppy disks →

← Cassette tapes and an arm workout

Music on demand that fits in your pocket →

So why is your office phone system behind the times?

Here's what's new with office phone systems:

- Easier to use and manage
- One-day installation
- Cloud managed
- Pay for service as you go
- Dramatically improved quality and reliability
- Reduced costs thanks to Internet-based calling

Cisco has been the leader in corporate telephony for more than a decade. When you partner with Cisco, you get the latest technology from an industry-leading communications company. See how Cisco can help your small business today.
