Reduce complexity with a built-in platform experience

In security, attackers aren’t customers only concern. You’re racing against time to keep up with business needs. Your teams are overwhelmed with a slew of disconnected vendors and products. It’s getting harder to focus on the initiatives to support growing the business. Why is that?

- **Architecture has complexity** due to lack of orchestration between technologies across multiple vendors
- **Context is hidden** in multiple consoles with inconsistent alerts needed to make faster and smarter decisions
- **Process has friction** due to outdated playbooks and broken scripts that require manual upkeep
- **Resources are limited** due talent and budget shortage

To confidently tackle these challenges, you need a platform approach to security. And that’s why every Cisco Secure customer is entitled to a simpler experience with SecureX.

**Simplify your security**

SecureX is a cloud-native, built-in platform experience within our portfolio and connected to your infrastructure. It is integrated and open for simplicity, unified in one location for visibility, and maximizes operational efficiency to secure your network, endpoints, cloud, and applications.

*Third party including IT Service Management*

**SIEM - Security information and event management / SOAR - Security orchestration, automation and response**
Simplicity, visibility, and efficiency translate into unlocking value to:

- Reduce the *dwell time* of threats involved with countering attacks and staying compliant
- Enable *faster decisions* with less overhead and better precision with less error
- Deliver *time savings* and better collaboration by automating security across SecOps, ITOps, and NetOps teams
- Realize more desired outcomes with *measured, meaningful metrics*
- *Speed time-to-value* and *reduce costs* as you invest in more Cisco Secure products

Included with every Cisco Secure product

In 15 minutes, achieve real benefits using what you already have

In half the time, visualize threats within your environment

Save 100 hours by automating your workflows

85% reduction in time to respond and remediate

Source information: 1. TechValidate 2. Based on internal simulation
Simplify to maximize benefits

“A platform approach like SecureX is the future of security at Mohawk Industries. It will make things easier, faster, and we will see much more going on in our environment than ever before.”

Michael DeGroote, Infrastructure Consultant
