

# Get off the security treadmill with Cisco SecureX

## Your teams are adding new security technology to keep pace with business needs

You're being forced to pick point solutions from an industry that's rife with incompatibility. This has put you on an endless treadmill of stitching up products that don't easily fit together.

### This can create a lot of complexity for you:

- ▶ Siloed threat intelligence and visibility
- ▶ Constantly pivoting between interfaces
- ▶ Spending too much time on integration
- ▶ Disconnected, incomplete workflows

It's like you're building a brick wall without any mortar.

## Cover every threat vector and access point with SecureX, the broadest, most integrated security platform.

SecureX connects the breadth of Cisco's integrated security portfolio and your entire security infrastructure for a consistent experience that unifies visibility, enables automation, and strengthens your security across network, endpoint, cloud, and applications. The result is simplified security, built into the solutions you already have.

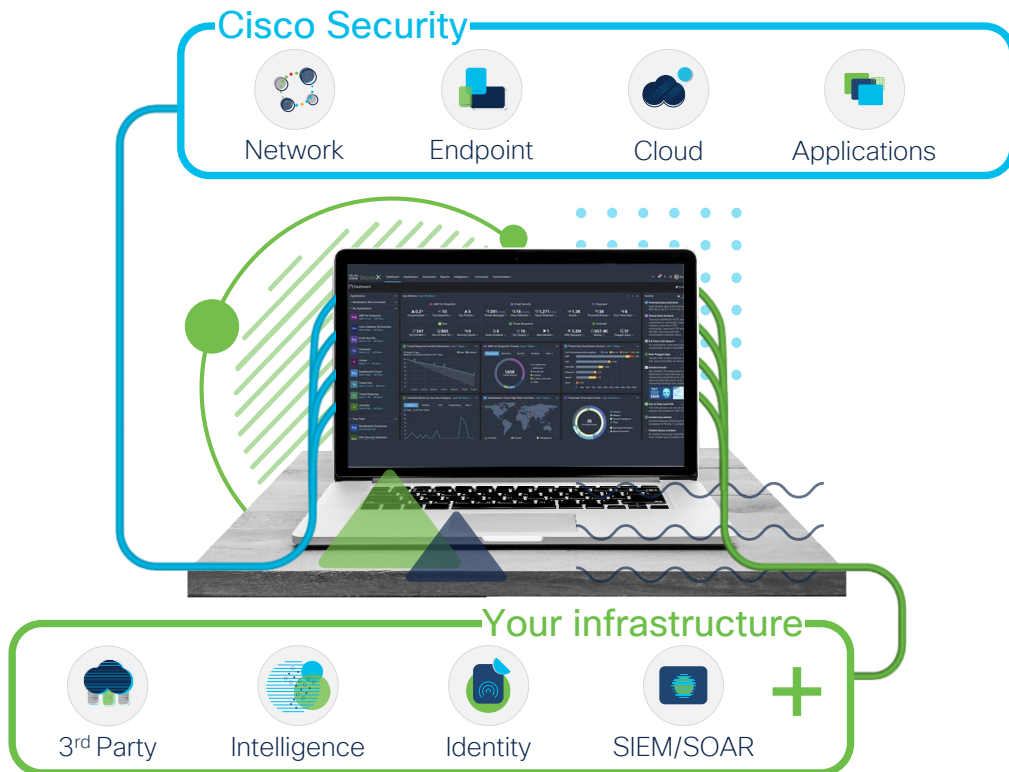

We have invested billions to bring together world-class solutions for a comprehensive security approach. SecureX is the realization of that effort.

SecureX is the mortar that multiplies the power of your security solutions.

# Simplify your security with what you already have
